TAPES *and* RULES

This Fine Billmont Display Board FREE!

Here is a striking display board, standing higher than a man, in strong attractive colors that will compel attention for your stock of Billmont Wrenches. It costs us real money to prepare these boards, but our aim is to help you SELL Billmont Wrenches.

One of these fine display boards will be furnished free to selected dealers who sign a Billmont Master Dealers' Contract.

A Live Merchandising Plan for Billmont Master Dealers

We will circularize your mailing list at no expense to you; inquiries will be referred to Master Dealers; newspaper cuts will be furnished free for your local advertising; special Master Dealers' prices enable you to sell mechanics and quantity purchasers; catalogs and advertising material furnished with your name imprinted.

The Billmont Wrench is a worth-while proposition. It fills a real need of mechanics, garages, car owners, farmers, industrial plants; in fact of every one working with nuts and bolts.

Billmont Wrenches are an economy, as well as a wonderful convenience. A set of eight wrenches, with only twenty-four sockets, equal 192 wrenches. It is surely an economy for any man to be able to buy such a **complete** outfit that yet contains so few tools. And you can sell them singly or in sets.

Remember "Billmont Sockets" are absolutely guaranteed against breakages when used with "Billmont Wrenches."

Write us for details of Master Dealer Proposition. It's a profit-maker!

THE DAYTON IS MADE IN CANADA

What's in a name?

THIRTY-FIVE years of scientific and painstaking effort are built into the "DAYTON" Hardware Scale.

When you think of Computing Scales, if you appreciate precision and quality service, you must think of "DAYTON."

DAYTON Computing Scales

were pioneers in the Canadian market. The "DAYTON" Company was the first to establish a computing scale factory in Canada.

Daytons to-day are built for every line of business, from the smallest country or corner store to the plant of the manufacturer weighing annually goods worth millions of dollars.

There is a Dayton to meet YOUR needs. Let us demonstrate how we can help you to improve your service and increase your profits.

Strikingly Effective Window Trims Now Ready for Distribution to all SMP Dealers

Here you are! Four of the most striking window trims ever produced. Trims that will catch the eye of every man, woman or child that passes the window. They have just been delivered to us and we must admit we are very proud of them.

Take Your Choice

There are four different trims; two in Diamond Ware and two in Pearl. You can have the one above in either Pearl Ware or Diamond Ware. Next week we will print a photograph of another trim in our Hardware and Metal ad. This trim can also be had in either Diamond Ware or Pearl Ware. Watch for it.

See Our Traveler

Our travelers have photographs of these different trims. See the man who covers your territory; make your choice and order. If you'd rather not wait, write direct to us.

Any one of these four trims will transform an enameled ware window into one of the most attractive displays possible. A window dressed with one of these trims will form a powerful link between our great campaign of advertising and your store.

Write us at once or order through our traveler

'RICE LEWIS' NEWS

Wedding Gift Time— will soon be here

While June is the wedding month, do not overlook the fact that May is the month of showers for the bride-to-be. You will have many opportunities to do business with this class of trade this year and now is the time to look over your requirements and make sure that you have a complete selection of suitable gifts.

Here are a few suggestions

Community Plate

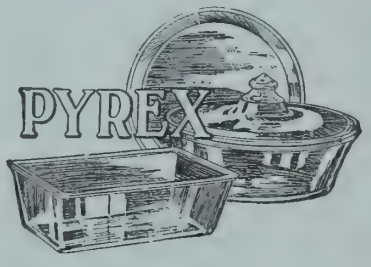
We carry a full line of flatware in the following patterns: **"Adam," "Patrician," and "Sheraton,"** also the new **"Grosvenor"** pattern. These splendid patterns have a very distinct appeal and are proven sales makers. Display them prominently. They will attract trade.

Rogers 1847

Our stock of Rogers 1847 flatware consists of such well known patterns as "Old Colony," "Cromwell," "Tipped," and also the new pattern, "Ambassador." They are well known standard lines and make pleasing gifts.

Pyrex Ovenware

We carry a full line of Pyrex in plain and cut, separate pieces and sets. The Pyrex Ovenware Set is very appropriate for occasions of this kind.



Electrical Appliances

also have their appeal to the June bride trade. We have a very fine assortment from which to choose, including grills, toasters, percolators, boudoir sets, irons, vacuum cleaners and many others equally as popular.

Now is the time to start wedding gift buying interest by having the stock and displaying suitable lines.

Let us sort up your stock.

Chart of Recommendations

(Abbreviated Edition)

THE correct grades of Gargoyle Mobiloil for engine lubrication of both passenger and commercial cars are specified in the Chart below.

How to Read the Chart:

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
BB means Gargoyle Mobiloil "BB"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

Where different grades are recommended for summer and winter use, the winter recommendation should be followed during the entire period when freezing temperatures may be experienced.

This Chart of Recommendations is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and represents our professional advice on correct automobile lubrication.

Slow Movers Speeded Up With Quick Sellers—

Automobilists are constant buyers of hardware. They often need pliers, a new screw-driver, wire, chisels and other materials which are "aging" on your shelves.

Most of these automobile owners know the sign of the red Gargoyle. If they are coming to you for correct lubrication you will have many opportunities to supply their needs for tools and other merchandise.

Is your stock of Gargoyle Mobiloil helping you to move slow hardware off your shelves? It certainly will if you let people know that you sell Gargoyle Mobiloil.

Hang the Gargoyle flange sign over your store. We will gladly send it to you on request. Keep cans of Gargoyle Mobiloil constantly in your window. This will bring you many dollars of profit from oil sales—and from sales of hardware that automobile owners constantly need.

One dealer told us this: "I push Gargoyle Mobiloil all I can. People always come back for more. It has made many a new customer for me."

The red Gargoyle has brought quick profits to dealers the country over. Is the Gargoyle a business getter for you?

GARGOYLE

Mobiloil

DOMINION DECORATIVE WALL BURLAPS

This is the time of year when the modern Paint Department sells large quantities of Decorative Wall Burlaps. This spring there is bound to be even greater demand for these Burlap Wall coverings. Just as people need paint, wall paper, varnish, etc., just to the same extent—sometimes more so—do they need Decorative Wall Burlaps.

DOMINION Decorative Wall Burlaps make homes comfortable, make walls attractive; they are convenient to handle, easy to apply. They are of moderate cost and it is wise to meet every need. Buy half a dozen rolls—it won't take much capital—and display them with your regular paint specialties. Get in touch with your local painter and tell him how it will pay him to push this line himself, for each customer will want him to decorate with Burlap when special room color schemes are decided upon.

Rolls 30 and 60 yds. long.

Widths 30, 36, 45, 54, 60, 72, 90 in.
Shades, Oil-coated Drab, Green, White.

Add this line to your Paint Department Now! Write us for price list and other particulars including our attractive little counter card.

Spark-C

Ignition Tester

Does your car make a hill of a level road? It does if the ignition system is faulty.

This is the question we are asking every car owner. Motorists everywhere are answering by buying "Spark-C" Ignition Testers.

The sales possibilities in "Spark-C" are almost unlimited. Every user of an internal combustion engine has real need for "Spark-C" Ignition Tester. For "Spark-C" is the only sure way to test ignition.

Consider the number of cars, motor boats, tractors and stationary gas engines right around you. Then you know what you can do with "Spark-C." Few articles compare with "Spark-C" Ignition Testers for quick turnover and high percentage of profits.

Let your jobber supply you to-day.

This is the 4-burner stove with cabinet. New Perfection Oil Cook Stoves come in 2, 3, 4 and 5-burner sizes, with or without cabinet. There is also a New Perfection Range with built-on oven.

Electrical Appliances
Sani-Can
Perfection Oil Heaters
New Perfection Water Heaters
New Perfection Ovens
New Perfection Cabinets
New Perfection Cook Stoves

All Year 'Round, Of Course!

TRUE, the best season for selling oil cook stoves is approaching, but you are not getting all the New Perfection business possible if you limit your efforts to this one season of the year. Always keep your New Perfection Oil Cook Stoves well to the front; they sell well **all year 'round.**

Yes, the New Perfection Oil Cook Stove is decidedly an all-season cook stove. Wherever there is food to be cooked—meat, vegetables, bread, cakes or pies—the New Perfection will do it with the greatest satisfaction and economy. Over 4,000,000 satisfied users endorse this statement and point the way to the immense business in which you should share.

New Perfection Oil Cook Stoves offer ample oil cooking facilities to even the largest family. See that every New Perfection in your district has a New Perfection Cabinet and Oven. Carry a complete line of repair parts and wicks, for New Perfection service is essential to New Perfection satisfaction—the fuller your service the bigger your business.

New Perfection Water Heaters, Perfection Oil Heaters and Sani-Cans are equally attractive lines. If you are not carrying the complete Perfection line, you will be interested in our dealer proposition. The Perfection line is a real profit maker.

The Story of Rope—

The most interesting industrial film ever made, that's what many have said about the "Story of Rope."

Native scenes in the Philippine Jungles, the growing plants, their transformation into fiber, the making of rope and of binder twine.

You are carried from the tropics through the interior of great factories and to the Canadian wheat fields by this intensely interesting film, now available in regular standard or theater prints for circulation in Canada.

Jobbers and dealers may secure the use of this film free for their local picture theater, salesmen's conventions, customers' get-togethers. Footage 3000 feet; program 1 hour.

Ask the Independent Cordage Company, Toronto, Ontario, for folder showing how this film is being used elsewhere.

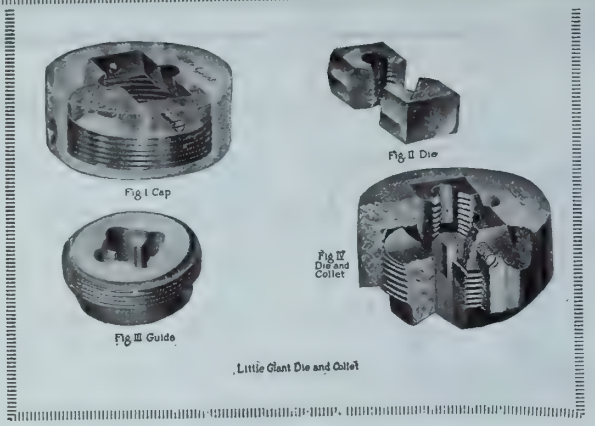
Little Giant



Little Giant Die and Collet

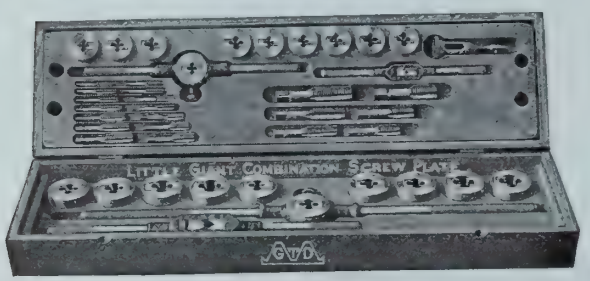
Screw Plates

Regiments of Repairmen "Fix it" with GTD tools

By fifty years of real service to the metal-working industries GTD has won a place of honor at the side of the *Man who makes things*, and the *Man who Fixes things*.

And we are proud especially of our service to the repair man, the *Man who Fixes things*, typified by the GTD "Little Giant" Combination Screw Plate shown herewith. Probably no thread cutting outfit has ever had wider distribution in every corner of the world than the "Little Giant."

We want to tell you more about GTD tools. Write for descriptive literature.



This is the "threading tool chest" that every repairman ought to have. Dies are adjustable to loose or tight fit, and are reversible in the collet.

A Proven Salesman Will Work Free For You!

This case is an excellent salesman. Just put it in a conspicuous place and it will pay over money for you. It sells Blue Nose Oak Sole Leather Strips, in special lengths, to cut without waste for economical people who like to mend their own shoes.

It not only makes sales because of the attractive display, but because the prices for sole leather are very low for the quality. Blue Nose Oak Sole Leather Strips are cut from the choicest part of the best packer steer hides, slow cured in the good, old-fashioned way. This money-making cabinet is free — you pay only for the Blue Nose Oak Sole Leather Strips it contains.

Order it now—from your jobber. If your jobber does not already handle this line mail your order direct to us, specifying your jobber's name.

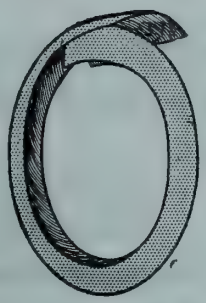
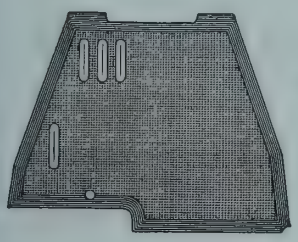
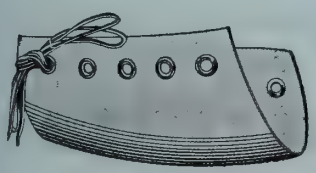
Accessories That Sell



Reliners



Windproof Mats (for Fords)



Lace-on Boots

Sealtite Patches

The "GUTTA PERCHA" Kind

Gutta Percha Reliners
are favorites in the kits of "wise" motorists. They head off the blow-outs. When an old casing is about to go, these handy Gutta Percha Reliners save the day. Caution your customers not to use them in a **new** casing; they're not meant for that.

Windproof Mats (for Fords)
All that heat from the engine, and dust from below, is stopped by these patented Mats. They enjoy good, year-round sales because they definitely fill an existing need for your motoring customers.

Lace-on Boots
Show them these! They prevent that sickening feeling the motorist has, when, miles from home, he finds a soft spot in a casing. They're handy to slip on, and perfectly effective.

Sealtite Patches
repair punctures while you wait only a very, very short time. It adds comfort to a motor trip to know that Sealtite Patches are in the car ready for use in tube repairs. They sell just like they mend punctures—quickly!

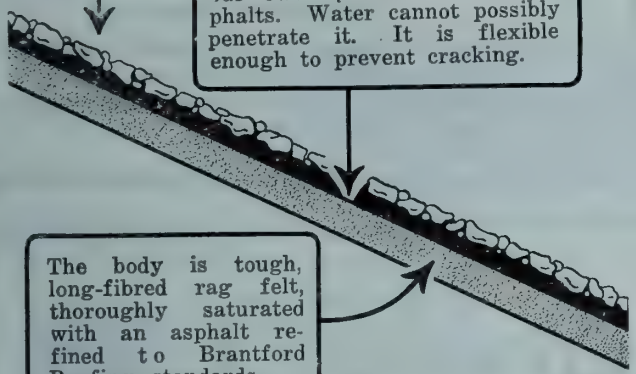
How Brantford Asphalt Slates

Are Waterproofed and Armor-plated

Crushed slate in its natural colors (dark red or green) is deeply embedded into and encrusted on the weather surface. This makes it wearproof.

A heavy waterproof coating of our own special blend of asphalts. Water cannot possibly penetrate it. It is flexible enough to prevent cracking.



The body is tough, long-fibred rag felt, thoroughly saturated with an asphalt refined to Brantford Roofing standards.

They will not crack They will not curl

Brantford Asphalt Slates are distributed under Brantford Roofing trade marks, through Brantford Roofing dealers. Stock carried, information furnished, service rendered by our dealer in your district.

Write for our Booklet, "Permanent Roofing Satisfaction." Mailed free to responsible parties.

The Flag Brand Established 1836
Christopher Johnson & Co.
Are Manufacturers of

HIGH GRADE Table Cutlery, Pocket and Pen Knives, Scissors and Razors. Spoons and Forks and All Classes of Electro Plated Ware.

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.

Galvanized Pails and Wash Tubs

We want to draw your attention to the quality of these Davidson Pails and Wash-tubs. The special hot process in which they are galvanized ensures the superiority and durability which are the outstanding characteristics of these lines. All seams are thoroughly well filled to avoid moisture collection.

Wash-tubs are fitted with wringer attachment and strong handles and can be had in four different sizes.

The pails are of a strong, serviceable weight and can be absolutely relied upon for all ordinary purposes.
The Davidson trade mark denotes quality.

"JARDINE"

Horseshoeing Foot Vise and Boltheader

Made in Canada

The Foot Vise has tempered, crucible steel anvil, bevelled at one end, square at the other, for square and bevelled calks. The back jaw is self-adjusting to the back of shoe. Jaw 6" wide.

For Bolt Heading

Pressure on the treadle operates a short, stiff arm (not shown in illustration) opposite the pivot of the swinging side of machine. This closes the dies of Bolt Header as firmly as a vise. When pressure is removed from treadle the bolt is free to be taken out to square the head while hot.

We make a full line of Blacksmith's Tools. Why not send for catalogue No. 18.

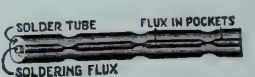
HAMILTON

KESTER ACID CORE WIRE SOLDER

FLUX IN POCKETS

— a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of genuine tin-and-lead solder. In great demand by all solder users because it saves two-thirds of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.



Sectional view. Note flux in pockets.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

Chicago Solder Co.
4225 Wrightwood Ave., Chicago, U.S.A.

"EVERLASTING"

Veneer Toilet Seat—Strong, Clean, Hygienic

7- and 9-ply, air-seasoned wood veneer, held together by our special wood cement. This cement is proof against heat, cold or dampness. The veneering is distributed according to the strain and wear required of the different parts. The Everlasting Seat will never crack, warp or split.

We also manufacture five staple lines of Veneer Chair Seats, round-cornered, and durably finished in coach varnish.

Ask for our English-French-Spanish-English Catalogue.

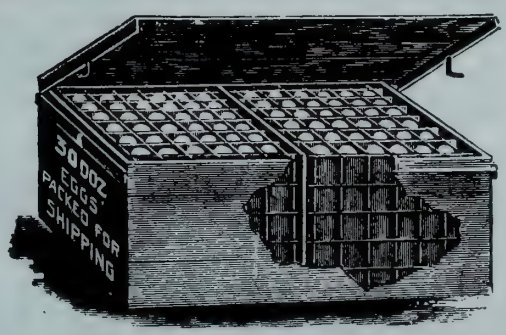
You Should Increase Your Egg Filler Business



Always recommend fresh fillers be used for every shipment—it's the only way your customers can be sure the eggs will reach the market in proper condition.

Used fillers absorb the odor given off by new-laid eggs—and egg shells are porous, susceptible to surrounding odors. Eggs shipped in used fillers become tainted—can't help but be.

You owe it to your customers—and the public—to see that they use fresh fillers in every shipment.

One of the 4000 hardware institutions in Canada where Hardware & Metal is read every week

Significant Features

THE goods which are featured most in Canadian hardware window displays are goods which are advertised regularly in Hardware and Metal. We have proof of this.

The goods which are featured most in the advertisements of retailers in their local newspapers are goods which are advertised regularly in Hardware and Metal. We have proof of this.

Go into a list of hardware stores in any province in Canada and ask the proprietor, or any of the senior salesmen, to name six or more of the best known firms whose goods are sold through the Canadian hardware trade. They will invariably name firms whose advertisements have been appearing regularly for years in Hardware and Metal. We have tried this experiment successfully in all parts of Canada.

Pick out a list of 100 hardware firms in any part of Canada. Ask them which paper they read for business information. We are always willing to let the hardware trade of Canada act as judges in a test of this kind. This test has been successfully tried out many times.

There is only one hardware paper in Canada that gives weekly market services from Montreal, Toronto, London, Winnipeg, Pittsburgh. There is only one hardware paper in Canada that has had its circulation audited by the Audit Bureau of Circulations. That paper is Hardware and Metal.

Hardware and Metal

"Canada's National Hardware Weekly"

143-153 University Avenue - **Toronto, Canada**

Montreal Branch, Southam Bldg. **Winnipeg Branch, Confederation Life Bldg.**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

CURTIS AIR COMPRESSOR and TANK OUTFITS

Note these Special Features of this Garage Equipment:

1—**Controlled-splash, self-oiling system. No excess oil in cylinder, no external leakage or waste of oil, no oil gets into the tires. Enclosed crankcase keeps out dust.**
2—Uses about one-tenth of the oil used by any competing machine. saving in oil alone soon pays price of machine.
3—High and low level oil-filling gauge, so you can tell at a glance the amount of oil in the crank case.
4—Fan flywheel cools cylinder; increases capacity.
5—Inspectable valves, light weight, large area.
6—Valves cannot drop into cylinder and wreck machine.
7—Hand unloader permits starting compressor against full tank pressure without burning out motor, blowing fuses or burning or jumping of belt.
8—Drop forged crankshaft. Adjustable, renewable, non-cutting die-cast bearings.
9—Head removable without breaking or bending any pipe connection or pipe fittings; only one gasket.

Welded Steel Pressure Tanks

For Air, Gas and Liquid

We make these tanks of best quality copper, steel welded throughout and thoroughly tested under Air Pressure to 300 lbs. before leaving our factory.

Write for price list and further particulars. Send names of prospective customers to whom we may mail literature.

We also make baths, steel factory equipment, gasoline tanks, truck tanks, etc.

This Fine Billmont Display Board FREE!

Here is a striking display board, standing higher than a man, in strong attractive colors that will compel attention for your stock of Billmont Wrenches. It costs us real money to prepare these boards, but our aim is to help you SELL Billmont Wrenches.

One of these fine display boards will be furnished free to selected dealers who sign a Billmont Master Dealers' Contract.

A Live Merchandising Plan for Billmont Master Dealers

We will circularize your mailing list at no expense to you; inquiries will be referred to Master Dealers; newspaper cuts will be furnished free for your local advertising; special Master Dealers' prices enable you to sell mechanics and quantity purchasers; catalogs and advertising material furnished with your name imprinted.

The Billmont Wrench is a worth-while proposition. It fills a real need of mechanics, garages, car owners, farmers, industrial plants; in fact of every one working with nuts and bolts.

Billmont Wrenches are an economy, as well as a wonderful convenience. A set of eight wrenches, with only twenty-four sockets, equal 192 wrenches. It is surely an economy for any man to be able to buy such a **complete** outfit that yet contains so few tools. And you can sell them singly or in sets.

Remember "Billmont Sockets" are absolutely guaranteed against breakages when used with "Billmont Wrenches."

Write us for details of Master Dealer Proposition. It's a profit-maker!

Vol. XXXIV. TORONTO, APRIL 29, 1922. No. 17

"Survival of the Fittest in Sale of Electrical Goods"

—Says Official of Electrical Supply Manufacturers' Association

THE MUCH mooted question of eliminating hardware stores from the sale of electrical supplies has again undergone its periodic discussion at the hands of one branch of the Electrical Supply Manufacturers Association and the hardware trade has magnanimously been accorded a new lease of life. At least this is how certain electrical dealers would have one believe. The truth of the matter is that the question has now apparently sunk to such small proportions in importance that it was accorded less than usual mention at the gathering of the heating branch of the Electric Supply Manufacturers Association in Ottawa a few days ago.

Eleminating hardware store competition has always been the distant and hazy but much desired goal of electrical contractor dealers and much unnecessary stress has been laid by them upon the value of service and other such elements, in their petitions to manufacturers and supply houses to grant them an exclusive channel for the distribution of electrical supplies. To the hardwareman such a situation has always seemed mythical because the hardware store always has, is now and will continue to be a most important channel of distribution for electrical requirements. If the question of service and other elements raised by electrical contractor dealers were so important, the customer would be the first to realize it and direct his buying accordingly. It is difficult to imagine why these electrical dealers would have to appeal to manufacturers and supply houses to protect them when they have such "important" arguments for desiring exclusion in the sale of electrical goods.

The question has been discussed at electrical dealers conventions for years and will probably continue to be discussed and haggled over (while hardware merchants are doing the selling). It is doubtful if any definite decision will be arrived at, because the electrical contractor dealers have yet a long way to go before they can show the manufacturers and supply firms any good and substantial reason why the latter should not seek an outlet for their product through the hardware trade. This latter sentiment has been openly expressed to Hardware and Metal by one of the officials of the Electrical Supply Manufacturers Association. This same official pointed out that the relation of the hardware trade in selling electrical equipment was a subject on which there was now much division of opinion among manufacturers and supply firms. They now realized that it was a question of the survival of the fittest as between electrical dealer contractors and hardware merchants. He admitted that the severe competition of hardware merchants was one of the chief reasons why electrical dealers were wanting the elimination of hardware merchants in the sale of this line, and he expressed the opinion that the better merchandising ability of hardware merchants was at the root of their success in selling electrical goods.

"The hardware merchants are top notchers in merchandising," said this official, "and no action will be taken along the line desired by electrical contractor dealers until they can show the manufacturers that they are in the same class in merchandising ability, by fixing up their showrooms, display windows, etc. It will now be a question of the survival of the fittest."

It is a question if many electrical goods manufacturers have given much support to the sentiments expressed, but so numerous have become the petty gibes at the hardware trade, mostly from irresponsible parties, that a definite statement of the position of the hardware trade in relation to electrical goods manufacturers and supply firms is much desired by Hardware and Metal in the interests of the retail hardware trade. To this end communication with these interests is under way through the medium of the Ontario Retail Hardware Association.

This is not the first time that certain interests, jealous of the merchandising ability of the hardware trade, have tried to boycott the trade on the sale of competitive lines, but hardware merchants never have taken such action seriously as long as the merchandising ability of this trade is so highly valued by producers, and as far as electrical goods are concerned it is nothing short of laughable to imagine the hardware trade eliminated from the sale of such appliances due to the jealous rantings of a few narrow-minded electrical contractor dealers. Such exposures as the present only tend to further strengthen the position of the retail hardware trade in Canada, and the fact that electrical goods manufacturers are paying less heed to such exhortations and are giving more attention to the hardware trade as a legitimate and worthy outlet for their product, is a tribute to their shrewdness and their breadth of vision. The policy of "survival of the fittest" is quite acceptable to the retail hardware trade of Canada.

Hardware Merchant Opens Radio Dep't

Big Rush for Copper Wire, Galvanized Wire, Storage Batteries, etc., Initiated Big Trade in Radio Telephone Requirements—Aikenhead Hardware Co., Toronto, have a "Radio" Enthusiast for Department—Installing Model Set in the Store

"IT SEEMS that we just drifted into the radio business through wireless telephone enthusiasts naturally coming into the store for many of their requirements," said J. T. Aikenhead Hardware Ltd., Toronto, in discussing the recent innovation of their radio department with Hardware and Metal.

"We were becoming the local headquarters for supplies needed by amateurs and radio "fans," who were experimenting in the art by building their own receiving sets, without hardly being aware of it. Except, of course," he added, "that the additional rush of business for such materials as copper wire, galvanized wire, storage batteries, porcelain sockets, screws, pulleys, tape, bolts, mica, fibre, and so forth, gradually forced the matter to our attention."

The extensive number of inquiries for both sets and parts, was one of the primary reasons for the decision to install a radio department, especially considering the fact that the nucleus of a stock required therein was already being handled in ever-increasing quantities. In one respect, however, it was pointed out by Mr. Aikenhead, they were particularly well adapted for the merchandising of radio-phone equipment, in that a specially-qualified man was in charge of the department. He was not only a radio enthusiast, but had studied wireless as a hobby for some time, and possessed a deal of technical knowledge. Thus he could speak with some authority on the requirements of the new recruit or novice in the radio field.

On Advising Customers

"Unless the retail hardware merchant, or one of his assistants, is more or less grounded in the study of radio-telephony and can not only answer intelligently the various questions of customers but can also advise them to a certain extent, then it is perhaps as well not to make a specialized department in the store for radio requirements," said Mr. Aikenhead. However, it was also pointed out that the scope of industry was apparently so universal that it would undoubtedly soon become one of the stabilized departments in the hardware business and would therefore speedily be treated accordingly. In this manner, the man handling radio parts and sets should be able to experiment with his own outfit, and be a keen student of it either at home or at the store, if facilities are provided for that purpose. It would then develop into a natural phase of the average retail hardware store, such as having a well-known athlete in charge of the sport department, or a man versed in mechanical requirements in the tool departments, a salesman who has studied many factors of the paint trade in the varnish brush and paint section, and so on.

Instal Set in the Store

One of the salient features of the Aikenhead radio department, however, was the receiving outfit being installed right in the store. When interviewed by Hardware and Metal, Mr. Aikenhead pointed out that they had experienced such an active demand for sets, that their supply was exhausted to the point where the receiving set intended for store demonstration purposes had also been parted with in a futile effort to keep pace with the demand. The aerial, or antenna, had been erected on the roof of the building and the connections were all ready. It was the intention to connect up the next available set and have prospective customers and radio converts "listen in" at the demonstrating booth. The completion of this was expected within a few days. Not only is this method a great attraction from the public standpoint, but it is also considered as a big business puller and combined advertiser for the new radio department.

A large number of customers wanting sets and parts, but particularly the various parts, were on hand almost throughout the day, with an extra rush at noon and other leisure hours. In the opinion of Mr. Aikenhead, the future of radiophone development, both commercially and otherwise, was undoubtedly assured. Where retail hardwaremen were able to duplicate or follow the plan adopted by their company, the institution of a radio department should prove to be a profitable venture.

Not to be Handled Wholesale

Although the Aikenhead Co., have both wholesale and retail departments, it was pointed out that no effort had been made at jobbing special radio equipment. One factor acting as a deterrent in this respect was the complicated nature of materials and parts, while another important element was the apparent difficulty in obtaining the

"A Soft Answer Turneth Away Wrath"

AT LEAST one of the many salesmen who entered his store last week to sell him various lines of hardware, stands out in the recollection of a West Toronto hardware merchant. This was not because of the size of the order given either, for no business was transacted.

After passing the time of day the salesman who represented a manufacturer of washing machines proceeded to deliver with machine like precision and rapidity the various selling arguments concerning his particular machine. The hardware merchant paid little attention to him because he was not interested in washing machines.

The salesman persisted in delivering his oration of a correspondence school flavor, and heeded not the lack of interest displayed by his would-be customer.

At last the hardware merchant could stand it no longer.

"Cut it out man. I don't want to hear all that rifle fire talk about washing machines. I don't handle washing machines and I don't want to buy any of them now," he said.

"D——n it! I believe you're wise," retorted the salesman, who, after briefly discussing the weather, made a hasty exit, leaving the hardware merchant to ponder one of the most surprising answers he had ever received.

Suggestive window display of radio telephone equipment such as can be used by hardware merchants. This window includes a number of the more important and most needed parts which should form the basis of the stock, as outlined in the article herewith. A window such as this will attract many radio enthusiasts to the store for various pieces of equipment and accessories.

various articles from the manufacturers. Producers state that radio equipment is in such demand that the factories are already several weeks behind in supplying orders and while increased output is looked for in the near future, no promises are made nor orders taken for prompt delivery. Under these circumstances, it is difficult to organize along wholesale lines. Some doubt has also been expressed as to the permanency of the present style or method of transmitting and receiving by radio-phone, as with so much research continually being carried on in this science, any new invention or improvement might be liable to render present equipment almost obsolete at short notice. On the other hand, an official of the Marconi Co., pointed out to Hardware and Metal, that radio-telephony was not absolutely new, developments having been carried on by this concern during the past ten or twelve years. Therefore, the present stage was considered more or less permanent, as the equipment had not been concocted or assembled overnight, but was the combined result of several years diligent experimenting.

Quite a number of pertinent factors were outlined by G. F. Eaton, Toronto Manager, Marconi Wireless Telegraph Co., of Canada, when discussing the developments of radio-telephony with Hardware and Metal. That an extensive turnover in parts has become one of the principal features of the business is now generally apparent, a large percentage of inquiries being for accessories which go with the various units, or are embodied in receiving outfits. The necessity for at least one member of the firm retailing radio equipment to possess some degree of technical knowledge is evident when beginners or novices enter the store, interested in radio but without a very clear idea of what they actually require. On the other hand, it is claimed that only an elementary knowledge of radio-telephony is required in order to successfully merchandise such articles as vacuum tubes, coils, dry cells, transformers, storage bateries, connections, wavemeters, condensers, amplifiers, and other articles, which are complete in themselves but collectively necessary.

Repeat Business

There is also a fair amount of repeat business to be considered, judging from the experience of distributors of radio products. Vacuum tubes, which are used in detecting radio waves, require renewing according to the amount of use, and the same course is evident with storage batteries and certain other things. In addition, it was pointed out that hardware dealers catering to radio enthusiasts who need parts, as well as marketing complete outfits, would include in stock such articles as spark coils, buzzers, keys, grounding switches transformers, of different voltage, circuit reactors rheostats, voltage condensers, crystal detectors, telephone receivers, inductance coils, ammeters, plugs, voltmeters, and numerous other requirements.

That a license for every receiving set in operation was required by the Department of Naval Service, Ottawa, was another point introduced by Mr. Eaton. To obtain such a license was up to the individual purchaser, although the general impression prevails that where some amateurs have made and installed their own receiving sets, no license has yet been issued. Thus a merchant installing an outfit for demonstrating purposes would be required by law to obtain one license for which a charge of $1.00 is made, but is not held responsible for licenses covering outfits merchandised. Additional licenses are needed for the operation of transmitters, but as previously referred to, these are not in general demand being only installed for specific purposes at present, as well as being much more expensive than the receiving outfits.

It was further explained by Mr. Eaton, that the Marconi Co., are more or less confining their present receiving output to the production of a standard set. This is described as of moderate proportions, being built in sections, so that radio enthusiasts can purchase one or more parts, as required. Whatever style or type of equipment will likely experience the greatest demand is primarily dependent upon the satisfaction the public receive from their radio in-

vestments. Certain manufacturers believe that outfits with a sufficient radius to receives waves several hundred miles distant will meet the keenest approval, while other sets with limited receiving capacity, being adaptable for local purpurposes, only, are being produced in certain quarters and finding temporary favor among the extensive following of radio-telephony. It was stated that the receiving capacity of different sets was generally in active comparison to the costs thereof.

Merchants Instal Sets

As to whether merchants should be expected to install aerials or other portions of receiving sets for their clientele, Mr. Eaton stated that this was not the general practice and was only being done by the Marconi Co., in exceptional instances. Other hardware stores handling radio equipment sell the goods as required over the counter, or deliver sets to customers, but do not consider installations any more than they would be expected to paint a house or barn after supplying the color. Another point in favor of having an experienced technical man in charge of the radio department has been suggested in this connection, a nominal charge being made for installation services. In the majority of cases, however, radio fans are eager to experiment with their individual outfits, and the movement of parts and accessories provides the chief feature from the hardware point of view.

The installation of a demonstrating set, with the aerial in a prominent position, such as on the roof, was one of the suggested methods of extending the retail hardware field for radio business. Producers of radio equipment state that the present channels of distribution are through recognized dealers, with the only limitation being the difficulty in securing adequate supplies of both parts or sets.

In towns situated within a reasonable distance of any broadcasting station, the demonstrating set has been the forerunner in the formation of a local radio club, with the hardware store as one of the prime factors therein. A notice inviting those interested to come into the store and "listen in" is usually considered sufficient advertising, while the sale of charts depicting methods of wiring and installing sets, and booklets describing radio developments in general, are other phases engaging the attention of the radio department. The salesman in charge of this section of the store, should be an active member of local radio organizations, where possible, while opening the store to allow evening gatherings the opportunity of entertainment by radio, has gripped the interest of the public. To attain this object, the receiving set is equipped with a double amplifier and "loud talker" that makes the messages, concerts, news items, weather forecasts, and other matter sent out by the broadcasting stations, audible to those persons gathered round the apparatus.

Says Radio Profits Average 33⅓%

F. R. Jackson, Hardware Merchant, Toronto, Deals With Various Parts Which Should Form Basis of Stock of Radio Telephone Equipment—Investment of $100 Will Set it Under Way—Points Which Some Prospects Raise

AS RESULT of numerous enquiries received for various hardware lines needed in connection with the installation of a radio telephone set, F. R. Jackson, hardware merchant, Queen St., E., Toronto conceived the idea of placing in stock a number of radio telephone parts which are mostly needed by amateurs in putting together their own outfits and his judgment was rewarded with a number of sales on the first day. Mr. Jackson has made a cursory study of radio outfits to enable him to give certain elementary advice and to assist him in the selection of stock, and in addition he has recourse to the knowledge of one who is prominent among the amateur operators of radio telephones in the city. Discussing the subject with Hardware and Metal, Mr. Jackson pointed out that the complete sets are well protected by patent and can only be made by certain firms. He is of the opinion that the best source of business for the hardware merchant is to handle the parts which the amateurs require in rigging up their own sets.

What Merchant Needs

Discussing the requirements of a hardware merchant in radio equipment in order to start up business in this line, Mr. Jackson pointed out that copper wire for aerials is one of the first requirements, with galvanized wire frequently needed for supports, etc. Switch arms and switch points are needed, spider web inductants, batteries. In batteries Mr. Jackson points out that the plain 22½ volt, plain 45 volt and variable 22½ volt are the most popular styles for comparatively small sets. The plain batteries have the usual two terminals, but the variable have a number of terminals so as to enable them to be connected up in series. Ear phones are also greatly in demand at present and like many other lines the supply is short. Keys are not much required, for sending sets are much more expensive and not so much required.

F. R. JACKSON

Hardware merchant of Queen Street, East, Toronto, who will be numbered among the pioneers in the sale of radio telephone equipment through the hardware trade. Mr. Jackson has studied the rudiments of this science and his advice as to investment, parts to buy, methods of selling, etc., as given in this issue, is well worth studying.

The investment of $100 will put in a small stock of assorted parts with which to feel out the local requirements. Included in this would be 1000 ft. of each kind of wire for aerials, storage batteries, amplifiers, microphones, receivers costing from $6 to $21. A Magnavox is sometimes used for enlarging the volume of sound for the benefit of a number of persons, but there is little call yet for these. They cost approximately $62. Other lines include binding posts or terminals. Round headed brass machine screws 6/32 and 8/32 size and hexagon nuts are both needed in connection with the insulated knobs. Switch arms are required, rheostats. Galena is a crystal which is wrapped in tinfoil and retails at about 35 cents. This lump of crystal is set in lead and is used in the machine as a detector. Condensers in both variable and grid styles are needed. Coil plugs and fibre coil bands, and coil mounts.

Aerials of 14 Gauge Copper

The aerials consist of 14 gauge copper, bare hard drawn wire. This can be procured in both cable and solid, the former is said to be the better because it has more gathering surface and is the stronger to withstand ice, wind, etc. At the ends of these aerials are insulators, both the long and round styles are used. The switch arms are used for the

purpose of switching in the house current when the machine is to be used or for switching it over to a ground wire to act as a lightning conductor in case of it being struck during an electrical storm.

Tuning coils, both lateral and honeycomb styles are used in 25, 35, 50, 75 and 100 metre wave lengths for local purposes, and in 125-200 metre wave lengths for long distance purposes.

The foregoing will give some idea of the parts which Mr. Jackson considers are necessary for the hardware merchant to make a start in the sale of radio equipment. He is showing his stock regularly in his window displays at present, and is planning on the establishment of a complete working set in the store window. His experience with a number of youthful enthusiasts to date has brought out many interesting points. For instance one or two youths who are very enthusiastic at first expressed the fear that the broadcasting of concerts by certain electrical firms might cease when they had about exhausted their sales of equipment. Mr. Jackson is of the opinion however that this industry is but in its infancy and that it will be a prominent science in future. Even if the electrical firms did for some reason discontinue broadcasting concerts, he is of the opinion that the radio telephone is a big factor from an advertising standpoint and that advertising firms would be quick to supply entertainment in connection with broadcasting advertising matter. Others would also undoubtedly find some way of controling the matter so as to make it worth while for radio telephone operators to have their sets.

Mr. Jackson has combined with his radio parts a large number of hardware lines which sell with them. For instance there are tools for installing sets, electric lights, wire, tape, screws, tacks, paint, stains, varnishes, brushes, etc.

As changes will undoubtedly be made as radio telephone equipment is perfected, Mr. Jackson is of the opinion that hardware merchants should not stock too heavily at present. He is convinced that the hardware trade is the legitimate channel of distribution for radio equipment and advises the trade to keep in close touch with developments in this new trade industry. He finds the average profit on these goods is about 33 1/3 per cent. and considers this a favorable enough basis to justify the stocking of a well-assorted group of radio telephone parts.

HELPING TO ORGANIZE A RADIO CLUB IN YOUR TOWN

The popular demand for radiophone outfits has been such during recent weeks that wireless telephone enthusiasts in many towns throughout the country are looking for uniform centres where activities in this direction can be participated in to mutual benefit and entertainment. Radio clubs have sprung into being like mushrooms overnight, resulting in big business for hardware merchants who have realized its possibilities and instituted radio deparments in their stores. An article dealing with the channels of co-operation between the retail hardware store and local radiophone clubs appear elsewhere in this issue of Hardware and Metal.

FRESH SHIPMENTS OF IMPORTED SHEETS DUE

Montreal.—With the opening of direct navigation to this port comes the announcement from importers that the first shipments of English galvanized sheets will shortly arrive, the initial cargo of these being now on the way over. From present indications it is stated that imports from overseas this season are expected to be heavier than in the past few years. One local importer announced that shipments already covered compare favorably with the volume recorded during pre-war years, being well in excess of last season.

T. N. Clayton, general manager of the North Star Oil and Refining Company, Winnipeg, accompanied by F. W. Deer, sales manager, is on a business trip to Toronto.

Combine Displays of Sport Goods and Auto Accessories

Spring sporting goods and automobile accessories are both receiving much publicity throughout hardware stores at this time. The boys are busy on the corner lots playing ball, and one Toronto hardware merchant reported a dozen baseball gloves sold in two days as result of a special window of sporting goods used last week. The tennis season will also be shortly under way and fishing supplies will be required now that favorite haunts of anglers are beckoning. In auto accessories enamels are required for brightening up the car, tools for overhauling, new spark plugs, carbon remover, etc., and the motorist can be sold a number of the devices offered for adding comfort to the spring and summer motoring. In the above a combination display of spring sporting goods and auto accessories is shown by the M. Philbin Hardware Co., Montreal.

Patterns For Panelled Diagonal Pipe

Written for Hardware and Metal by O. W. KOTHE, Principal St. Louis Technical Institute, St. Louis, Missouri

LEADER pipes as well as vent pipes, placed on the outside of the bui d-ing, are often ornamented by mak-ing a set in member, and over this, pan-el bars are planted.

This helps ornament the pipe, and takes away the plain monotonous effect.

However, to lay out the pattern and make a suitable working drawing, first draw the side elevation with a wall line as M-N-O-P.

Next develop the plan or section through top I, and place the plan on an angle as E-F.

After which, detail the lower section and draw the diagonal lines as shown.

The dotted lines a-b, e-d, also f-g and i-j are panel bars, built in over the miters, so a straight effect is produced in the front.

Observe the elevation miters are bi-sected to the angles of the wall lines, and give the lines N-c and O-h.

Now as both the elevation and the plan are foreshortened a diagonal elevation must be deve oped.

To do this, we place a strip in the po-sition X and from each point in eleva-tion, miters project the altitudinal heights to the strip X as shown.

We now place this strip in the posi-tion X so it is at right angles to E-F of plan.

From each point in this strip X we square out lines until they are parel el with E-F.

Then from this point in plan, taking in each of the corners in the top and bot-tom sections, we project lines so they are at right angles to E-F of plan.

Where these intersections take place, we draw the shapes of the top and bot-tom sections in the diagonal elevation.

After which, we join the side lines and that gives us our true position of the double offset.

The next step is to develop a true sec-tion through the diagonal elevation, giving the exact outlines how the metal must be formed, both in shape and in girth, as shown at W.

To do this, we draw a set line square to E-F as T-U.

We pick all the width of plan lines along this line T-U of plan and transfer them on the extended diagonal elevation line, as T-U.

Now from each point in the diagonal elevation extend the lines parallel and from each point in the line U-T square out lines to intersect those from elevation and this will enable you to draw the shape W through the intersec-tions thus established.

To set out the patterns for the vari-ous parts, the straight angles I and III are set off the same as any straight an-gles where the girth is taken from the section thruogh top I and the distances are picked from line A-B or else from C-D of elevation.

But for the middle pattern, we must pick the girth from the true section W, and set it off on the line R-S.

Through each of these points draw stretchout lines and then draw any set line in diagonal elevation as R-S.

Use this set line as a base line and pick the length of each line from diagon-al elevation and set off on similar num-bered line in pattern.

At the intersection thus established draw the miter line as shown and this gives the pattern for the middle angle.

Now to lay off the panels which fit over the miters we pick the girth from side elevation as a b-c d-e and set to the left of plan as a-e.

In the same way pick the girth f.g.h.i. j. from the side elevation for the lower panel and set as f-j to the right of plan.

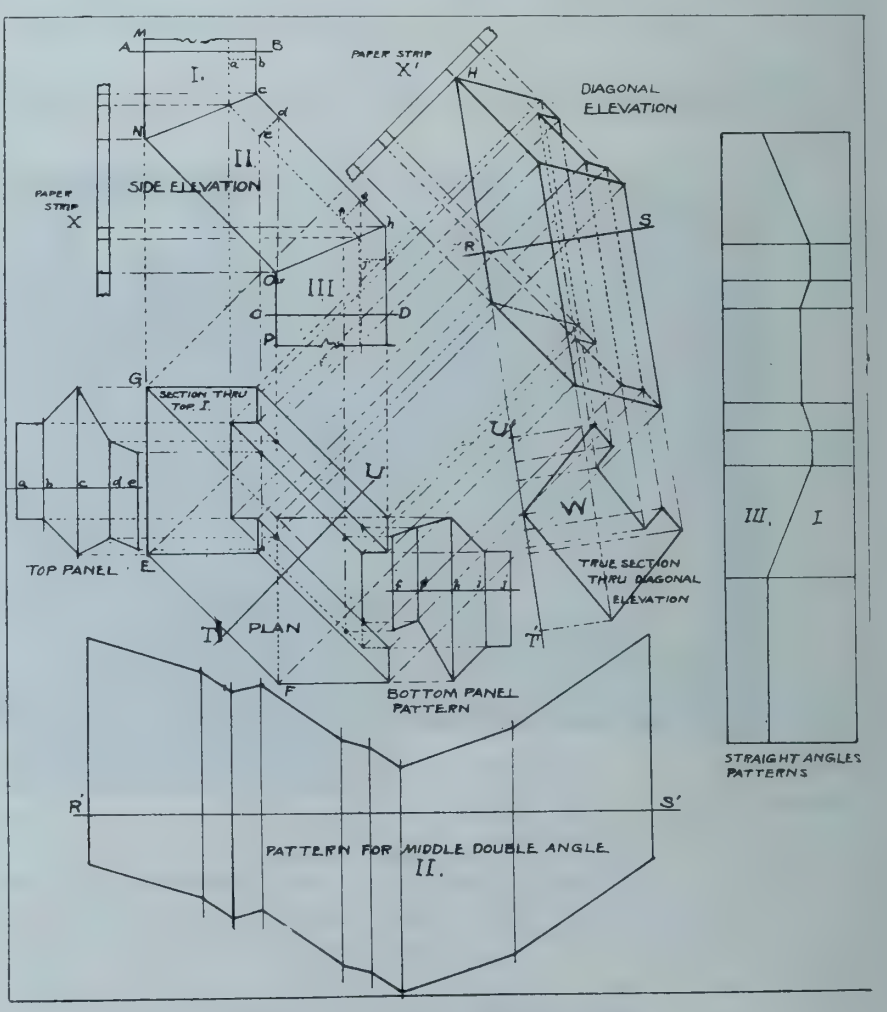
From each of these points in elevation drop lines into plan to intersect those lines of similar number shown by the heavy dots in plan.

From these points square over lines into stretchout and this enables drawing the miters for the patterns as shown. Laps must be allowed extra on all edges for seaming.

TO USE NICKEL FOR TIN IN COATING TINPLATE

Experiments of a far-reaching nature are being conducted in the tinplate works at Swansea, England, with the object of substituting nickel for tin in the coating of tinplates.

A company has been formed to deal with the invention, which is known as the Steel-Nickel Syndicate. A prominent member of the syndicate is Henry Mond, son of Sir Alfred Mond. Production of rustless plate is aimed at.



Patterns for Paneled Diagonal Pipe.

Gives Warning Re Imported Fireworks

Proximity of May 24 Makes Necessary Considerable Care on Part of Merchants Handling Fireworks—"Made-in-China" Firecrackers Differ from Chinese Crackers

By Ottawa representative of Hardware and Metal

OTTAWA.—Dealing with the composition of imported fireworks, a bulletin has just been issued by the Explosives division of the Department of Mines drawing attention to the fact that fire crackers are being distributed in this country under the "made in China" designation, but which differ very materially from the Chinese crackers as commonly known. As these are said to be of an unusually dangerous and undesirable character, the trade is asked to assist in the work of checking such importations. The bulletin reads as follows:

With the assistance of Customs Brokers in Canada, the authorities in Hong Kong and others, information was obtained concerning the composition and manufacture of certain Chinese fireworks, as a result of which it was possible to so regulate the importation of fireworks from China as to exclude certain types considered dangerous, and at the same time to avoid delay.

The composition universally used in these fireworks was gunpowder of a similar explosive made up of the same ingredients namely saltpetre, charcoal and sulphur.

Differ from Chinese Crackers

In view of this, Chinese crackers not exceeding 4 in. in length or 9/16 in. in diameter were readily accepted. Larger natures have also been admitted occasionally after special examination, but so long as occasional checks show that the origina practice of the Chinese makers in regard to the nature and composition of the powder is being followed, this general rule offers a good guide, and enables the importations of crackers to be expeditiously dealt with.

It has now come to notice that certain crackers marked "made in China" have been put forward for importation either direct or through agencies in the United States, and these differ very materially from the Chinese crackers as commonly known.

Certain of them are somewhat similar in composition to the "Salutes" the importation of which has already been stopped Others differ in the manner of their make up and, so far, none which have been examined and which emanate from China, yet differ from the ordinary gunpowder Chinese crackers, has been found acceptable.

It will assist the work of checking these importations, and expedite the importation of acceptable crackers, if importers when ordering them will specify that they are to be of the usual Chinese type with gunpowder composition, and will describe them on their applications for permission to import as "Chinese Firecrackers (gunpowder composition) size...."

Government Wants Co-operation of Merchants In Dealing With Retail Problems

Hon. J. A. Robb, Minister of Trade and Commerce, Addresses Retailers in Ottawa—B. G. Crabtree, Retail Grocer in Dominion Capital, is Re-elected Secretary

OTTAWA, April 27, (Special).—The re-election of B. G. Crabtree, retail merchant, to the office of secretary, and the championing of the cause of the retail merchant by Hon. J. A. Robb, Minister of Trade and Commerce, were features of the annual banquet and business meeting of the Ottawa branch, Retail Merchants' Association of Canada which was held in a local hotel recently. At the conclusion of the festivities, Henry Watters, treasurer of the Dominion Board, R. M. A., proposed a vote of thanks to the dealers "for their splendid contribution to the success of the entertainment." He explained that certain members had been responsible for the music and certain other forms of pleasure. Retail merchants, two hundred strong, representing every class of retail merchandising in the city, attended the function, which was presided over by the president, E. A. Stephens.

The Minister of Trade and Commerce, after expressing his deep appreciation at the evident desire on the part of the Dominion Association to co-operate with the department of trade and commerce for the mutual welfare of the merchants and the Dominion, reminded his hearers that he had at one time served his apprenticeship to the trade, starting as errand boy and winding up as proprietor. He took issue with those who had on previous occasions, suggested the advisability of the elimination or curtailment of the retail merchants, or middlemen, as they had been designated, and said that they had not been responsible for the high cost of living, as had often been said. He submitted that the retailers of Canada had built up from the Atlantic to the Pacific a medium of exchange from the producer to the consumer which was of utmost necessity in order to provide for fair dealing in merchandising. It was the retailer who measured up the requirements of a community and established fair values between seller and buyer.

The minister said that the government was desirous of the co-operation of the retail merchants in dealing with their problems, and was of the belief that the development of trade in Canada could be better increased by the government's non interference, and leaving it in the hands of business men who were capable of dealing with its many problems.

W. C. Miller, Ontario Provincial secretary of the Association, reviewed what the Ontario executive had accomplished and its future intentions with regard to legislation in its application to the retail trade. Other speakers were: Henry Watters, treasurer of the Dominion Board; E. M. Trowern, secretary of the Dominion Board, and C. A. J. Miller, manager for the North Western Mutual Retail Merchants' Insurance Underwriters.

The officers for the ensuing year are: President, E. A. Stephens; first vice-president, R. McGiffan; second vice-president, J. A. Larocque; treasurer, Frank Orme; secretary, B. G. Crabtree.

NEW FIRM WANTS CATALOGS

W. J. Henderson, who formerly managed the Maglader store at Englehart, Ont., is opening a hardware store on his own account there and desires catalogues of general hardware, stoves, oil stoves, valves and fittings, heating and plumbing goods, sheet metal, auto accessories and sporting goods.

Protects the Farmer Again

FOLLOWING out its usual plan of shelving all legislation which will enforce compliance from farmers, the Drury Government in Ontario has overwhelmingly defeated a bill to make it compulsory for all vehicles to carry front and rear lights between dark and dawn on highways. The carrying of such lights is compulsory in England and other European countries and the practice is found to have been highly satisfactory in curtailing accidents. The Ontario Motor League has supported the Bill after establishing the fact that many accidents were caused on country roads after dark due to wagons and other such vehicles having no lights. The farmer raises the question of danger in barns from having such lamps around, but he already uses lanterns. The defence on this basis is very weak and it is quite evident that the farmer would rather risk his life than be put to the trouble and expense of providing lights for his vehicles, as long as the onus for accident due to this cause is on the other party.

Hardware Producers More Confident

IMPROVEMENT in the iron and steel industry, as dealt with in recent issues of Hardware and Metal, continues to be evident. Higher prices on pig iron as formerly outlined as taking effect in United States markets have now spread to Canada and are likely to be reflected in higher prices on other products in the near future. The iron and steel market is now influenced by sellers rather than buyers, the former showing little disposition to fill orders until prices are advanced to the point where a profit is shown. Practically all producers report improvement in earnings, and a number of new high levels for the year have been established on certain steel stocks within the past few days. Railroad buying has been temporarily restricted, possibly due to uncertainty regarding the future trend of freight rates in view of semi-official statements which predict drastic reductions in rates.

In Canada during the past week progress has been made in the accumulation of new business in semi-finished steel products, and delivery dates are being extended in many cases until on most new business now being placed delivery cannot be made under six to eight weeks. A wide variety of steel products figure in present bookings, but it is evident that the trend is toward greater activity among industries fabricating products from pig iron and steel. There is a greater disposition on the part of buyers to anticipate requirements for some months ahead but a cautious tendency is evident on the part of producers in setting delivery dates due to the serious possibilities which might be involved if the present coal strike is protracted.

Hardware Merchants in the Vanguard

PROGRESS in the development of radio-telephony has been rapid now that it has been perfected to the stage wherein it is of interest and value to the public at large. Last week's issue of Hardware and Metal told what was being done in other countries in connection with the merchandising of radio equipment, and this week considerable editorial space is devoted to details of what two Toronto hardware firms are doing in connection with the sale of these supplies. It is possible that in years to come, when this science now in its embryonic stage has been developed to perfection, these hardware merchants and others who have already entered upon the sale of this line in other parts of Canada, will be regarded as pioneers in the establishment of one of the most important means of communication for both social and commercial purposes which has yet been known.

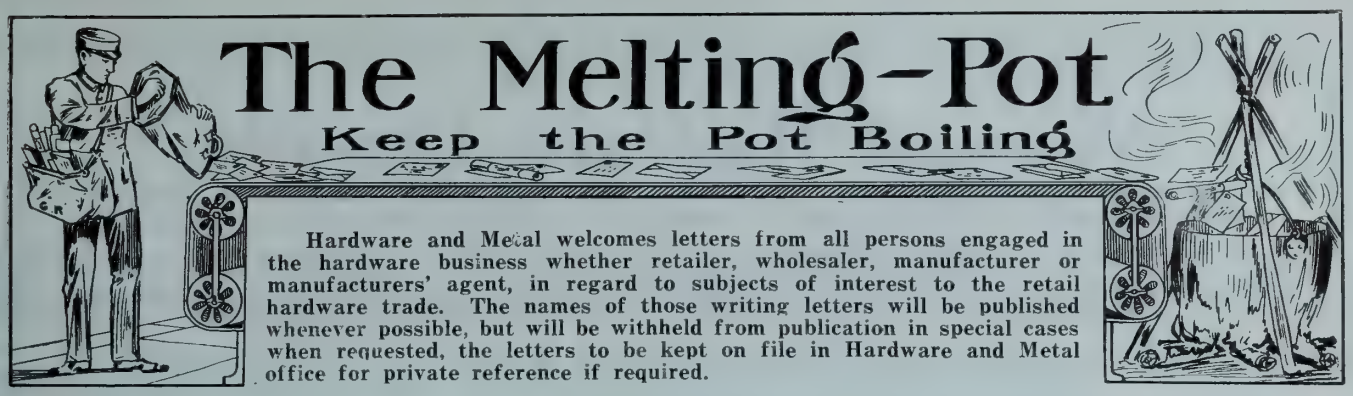
Radio equipment offers a profitable line to hardware merchants, and there is no doubt but that it fits in with the regular run of hardware lines much better than with almost any other trade. In fact in a number of cases hardware merchants have only realized the possibilities of selling radio telephone parts after they have had a big run on wire, batteries, tools, screws and other lines of hardware required in connection with installing sets.

While radio-telephony is in its infancy hardware merchants will naturally have to be cautious as to what lines they stock and the extent of their investment. A good plan is to make extensive enquiries among prospects as to parts desired for sets of varying range, and to have someone thoroughly acquainted with wireless near at hand to whom reference can be made for advice in assisting amateurs to instal sets or to point out difficulties encountered.

Some of the arguments raised by prospects whom hardware merchants have tried to sell are indicative of the trend of general thought on the subject. One of the arguments most frequently heard is that the electrical supply firms who are broadcasting concerts to encourage the use of radio telephones will cease to do so when possibilities for trade are exhausted. Progress in such a science as this both in extending its influence and in the perfection of equipment is so rapid that there is little need for fear of the early exhaustion of possibilities. Even if such a situation did result, the wonderful advertising opportunities of such equipment are such that some form of entertainment would always be available.

* * * *

THE LOSS caused by fires in Canada in 1921 was greater than in any previous year, despite the fact that steady progress has been made in the perfection of fire fighting machinery. The loss in Canada alone reached the amount of $45,015,930. This is at the rate of $5.22 per head. Ontario shows much the highest proportion in the whole of Canada. The four chief classes represent manufacturing, mercantile stores, dwellings and farm barns. These figures carry a real significance to retail hardware merchants for they indicate a real argument for periodic cleaning-up of premises, painting of buildings and implements and the use of safety devices and fire proof materials which are now offered. The hardware merchant handles many lines which are more or less directly interested in the question of fire hazard and his influence can greatly help to curtail this waste. Then too, the average hardware merchant knows that $5.22 per head is not expended by his customers on paint and varnish each year, and it has been figured out that loss by depreciation on inadequately protected surfaces amounts to approximately 2 per cent. per annum, or a much larger figure than fire losses.



Hardware and Metal welcomes letters from all persons engaged in the hardware business whether retailer, wholesaler, manufacturer or manufacturers' agent, in regard to subjects of interest to the retail hardware trade. The names of those writing letters will be published whenever possible, but will be withheld from publication in special cases when requested, the letters to be kept on file in Hardware and Metal office for private reference if required.

HARDWARE CRAFT BELOW CHINAMAN COOK LEVEL

Editor's Note:—The following letter in regard to a comunication which appeared in a recent issue of Hardware and Metal, has been received from a clerk in a Western Canada hardware store. His name is withheld by request, but the original letter is on file in Hardware and Metal office.

Somewhere in Canada, April 11, 1922.
Editor Hardware and Metal,
Toronto.

On page 44 of your issue dated April 8, I notice a letter. As the name of the writer implies, he certainly would live up to his traditions, keep us clerks down all right if he had his way; he would also lower the profession of Hardware Craft below the level of Chinaman cook. How can he expect a married man or even a bachelor to live decently in a city like Toronto on $15 per week? He must expect him to eat at a 15 cent joint, come to his store dresed in a $14 suit, wear a 39 cent shirt and buy his socks and underwear at Woolworths; work during the busy summer months, and get fired in the fall about the time the soup kitchens open up; the only thing I agree with the gentleman, is that we should start the ball rolling all right and snow ball him for "fair."

Now Mr. Editor, I am not an O. B. U. or even an I. W. W., but I do think that efficient hardware salesmanship is a man's job, and should be made attractive to the best of them not by being half fed like the letter suggests, but by offering a salary that will enable him to live decently without tampering with the cash register.

Yours truly,
Nail Set.

SALE OF GERMAN GOODS

Editor Hardware and Metal,
Toronto.

I understand some criticism has been directed against hardware merchants for encouraging the sale of German made goods. I think this is hardly justified, and hope it is not to any extent, outside department and chain stores, and even these I think the stocks of German goods are quite limited.

Are the manufacturers, and the men in their factories doing all they can to merit the whole support of the merchants and their customers? A responsibility rests upon the producers for quality and quantity production necessary to meet the competition of efficient factories, and the demands of the buying public.

I have frequently had occasion to pay men to go over machines and other factory products and fit them in better shape before offering them for sale. The hardware man should not have to do this, after paying a good price for the goods.

In my own experience I have refused since the outbreak of war to buy anything of German production, with the exception of dairy thermometers, or small articles, not made in this country, and I hope to continue this policy unless forced by demands from the buying public to change this attitude.

I have had occasion to meet and discuss business with a goodly number of hardware merchants during the past two months, and have yet to learn of German goods being handled by these men to any extent, and I hope they will not encourage that trade.

I would strongly advocate a slogan "Canadians for Canada," as a supplement to the "Made in Canada" slogan, which I was pleased to put forward, with others, during the past five or six years at Hardware, and Retail Merchants' conventions, and on other suitable occasions. I believe this slogan has been the means of creating a patriotic sentiment which has inspired many to buy more Canadian products, thereby keeping our industries going, and our workmen better employed than has been the case in other countries.

Let us hope that our people will have more confidence in their fellow Canadians, more confidence in themselves, working faithfully and honestly to keep this Canada of ours and themselves prosperous.

(Signed) R. Hawkins,
Smiths Falls, Ont.

WANTS RETAILERS TO WRITE RE TRAVELING SALESMEN

Editor's Note:—The following letter from a manufacturers agent concerning letter which appeared in April 8 issues of Hardware and Metal over the signature "Sunshine," is to some extent a misinterpretation due to the fact that the letter referred to was from a manufacturer and not a retailer. However, this does not materially affect the sentiments involved and Hardware and Metal would be glad to have from retailers, some letters concerning the traveling salesmen who call upon them.

Editor, Hardware and Metal,
Toronto.

Letter signed "Sunshine" in April 8 issue is of great interest to me, though I am not the guilty party—having more sense—I would like to impress upon our good friend the retailer that this party referred to, is a "traveler," just as the name implies and nothing more. I note he doesn't state a "Commercial Traveler." Maybe this particular party is one of those so-called "overnight salesmen," that one often meets on the road.

Our good friend Sunshine is perfectly all right in voicing his opinion of such, and I heartily agree with him and his point of advice to manufacturers, to give their salesmen at least one lesson on salesmanship.

I believe it would be a very excellent idea if the various retailers in the country would voice their opinions from time to time on incidents that occur pertaining to the various commercial men, who call upon them selling them their wares.

In the selling game it is not all a rosy piece of business, but a very difficult one indeed and especially those of us who are endeavoring at all times to render a first class service, and selling only goods which are worth the attention of the retailer.

A commercial man to-day is not finished with his work when the whistle blows, but is at it from Sunday, until the following Saturday night, in all weather. The retailer is located in his own town where his home is, also his working conditions are entirely different from those of the traveling salesman.

I trust this letter will be a preliminary answer, as it were, to the letter written by our friend Sunshine and that it will mean the commencement of a series of letters and general discussion on the art of salesmanship. Assuring you that this letter is written in good part.

(Signed) I. Dyment,
Toronto.

WILL ENTER NEXT CONTEST

Editor, Hardware and Metal,
Toronto.

I received your recent letter in which you congratulated me on my success in your Window Contest of Christmas 1921, and that the second prize which I received would be sent under separate cover. The check came to hand on March 10 and for which I thank you very much.

If I have the position I hold now next Christmas I am sure I will be delighted to enter into your contest again and try to make it a success.

(Signed) E. RAHN,
Bond Hardware Co., Guelph.

RECOGNIZE NO FLAG IN COMMERCE

Editor Hardware and Metal,
Toronto.

Up until the war we carried considerable German merchandise and always had splendid success with the sale of same because of their quality and lower price. During the war this same class of goods was quietly sought for and would have in many cases been openly demanded except that it might have displayed an evidence of unpatriotism on the part of the purchaser.

We, of course, hold no brief for the German manufacturer and aside from the bigger issue of governmental banning of their goods entirely, we would not care if we handled any of it. We are the buyers only for the consumer and that cosmopolitan body recognizes no flag in trade or commerce.

The merchant that insists on holding radical views in the face of public demand for quality goods at a price would simply commit business suicide and this brings us directly to the pointed question of the labor man's view.

We find that the great majority of labor is not consistent and will insist on buying any goods, any where, providing he gets it at his price, which price is not in keeping with the price he demands for his own labors.

It is recognized and I think quite true, that the women are the buyers now of 75 per cent. of all home necessities but we fail to notice any considerable conversion on their part to the views of the husband, who prefer to expend their energy proclaiming their selfish views from the housetop when it would be better to start on the inside of the house. No, the labor man is decidedly not consistent.

Winnipeg Hardware Merchant.

Coast Hardware Business Exceeds Last Year

Paint and Varnish Receiving Active Sale Due to Stimulated Building—Some British Hollow Ware Appearing—Much Activity in German Toy Industry

VANCOUVER, B. C.—In hardware circles on the coast much attention is being devoted just now to the requirements of the paint and varnish trade. It is stated on very good authority that sales are in excess of last year due to several reasons, the most important of which is the fact that building is much more extensive in Vancouver and district than at this time last year. Another good reason is that a large number of people who have let their homes go for a couple of years in the hope of lower prices, are now attending to much needed brightening of their premises. It is probably a well-known fact in the east that ninety per cent. of the residences here are of wood.

Speaking of the outlook this season, Donald Darling of Henry Darling & Son says: "I anticipate seeing a great number of Vancouver homes brightening up this spring. Orders are coming in by every mail and we are just beginning to feel the effects of the first rush of the season." Mr. Darling further added that a heavy run was expected on creams, greens and whites although many other combinations of colors were on order.

There is no particular evidence this week that money is any easier on the coast judging by the slowness of collections. Retail sales continue in seasonable volume but extreme caution is being exercised in connection with purchases of new goods. The whole trade is said to be undergoing housecleaning operations and retailers are doing their best to dispose of goods bought on a higher market before assuming new liabilities.

Some British hollow ware is coming through at declines averaging about ten per cent. A drop of 35 per cent. was announced this week on light gauge galvanized iron and 25 per cent. in the heavy gauge. German cutlery is being purchased by some of the houses, prices named being lower than quotations from the American side.

A. E. Howard, purchasing agent at Ottawa during the war period and now connected with the Hudson's Bay Company in a similar capacity is still here with four or five Russians, buying for the company's trading posts in Siberia. As stated last week, local wholesalers got a good share of the business offering but keen competition was met from the Seattle quarter.

Dealers in chinaware, crockery and toys say that trade is unusually quiet but that the volume of sales compares favorably with last year, and further that staffs are being retained and at the same salaries, which is considered a fair sign.

Germany is figuring strongly on this market in some lines of toys, especially dolls, and manufacturers are putting their products in Vancouver at more favorable prices than similar lines from the States. Dealers take the stand that the German doll is much superior to anything offered in this country and as eastern houses are buying freely, they see no particular reason why they should not follow suit.

A leading official of one of the department stores here, having charge of the toy and several other departments has just returned from a buying trip to the continent including Germany. He reports great activity in the manufacture of toys and that many manufacturers at the big Leipsic Fair were sold out long before the exhibition had concluded.

One line of English pottery was moving out fairly well this week. Aluminum ware is also coming in for its share of publicity this week. Special sales have been the rule.

WESTERN CANADA NOTES

W. T. Nichols is commencing a hardware business at Spruce Lake, Alta.

Harry Griffs, manager of Whyte and Orr's hardware store at Daysland, Alta., has been suffering from an attack from the flu but is able to be up again.

The hardware store of L. A. Ostrum at Bow Island, Alta., was entered by burglars. One hundred dollars was found and taken but no hardware was removed.

L. M. White, formerly manager of the Auto Equipment department of Wood, Vallance and Leggatt of Vancouver but now of the recently incorporated company of MacKenzie, White and Dunsmuir, Ltd., Vancouver, jobbers of automobile equipment, spent a few days in Winnipeg en route to the east on a buying trip.

Harry Sheppard of Alix, Alberta, left this week for Rimbey, Alta., where he has been engaged by the Rimbey Hardware store. He will be in charge of the harness department of that store.

A new hardware store is to be opened shortly at Vegreville, Alberta, by Mr. Valentine of the Marshall-Wells Company of Edmonton. This store will make the third hardware firm in Vegreville.

The Round Hill Trading Company, Round Hill, Alberta, are increasing the size of their hardware store. An addition to their general store is being built and the warehouse which has been to the east of their store has been moved to the south and turned into a hardware store and warehouse.

R. L. Teepfer, of Alix, Alta., has added a full line of general hardware to his furniture business. His stock is just arriving. In connection with the hardware department he will have a tin shop and plumbing department. R. F. Sanderson will be in charge of the hardware part of the store.

CLEAN UP, PAINT UP WEEK CAMPAIGN IS ORGANIZED

Winnipeg, Man.—A large and enthusiastic meeting of citizens, interested in the "Clean Up, Paint Up" campaign was held when the report of the interim committee which was appointed to draw up a list of officers and arrange other details in connection with organization, was heard. C. H. S. Bamford was in the chair and Col. W. J. Simpson acted as secretary.

The committee reported that it had created an initial campaign to raise funds and already $2,000 had been subscribed and was in the hands of the treasurer, W. E. Milner. The report further recommended that the finance committee increase this amount to $6,000, which it thought would be sufficient to cover the campaign.

Organization was completed with the following officers: Honorary chairman, Harry Sandison; 1st vice-president, C. S. Bamford; 2nd vice-president, W. P. Dutton; 3rd vice-president, J. C. Waugh; general executive, each member of which represents a certain division; publicity division, Gordon Hunter; women's division, Mrs. H. M. Speechly; municipal, W. F. Tallman; industrial, I. T. Peacock; commercial, John Drewe; beautifying, Mrs. Roxburgh and junior's division, A. T. Macintosh; H. S. Duncan is secretary; W. E. Milner, treasurer and Col. W. J. Simpson, manager.

Events in the Trade

NEW FIRMS

Ottawa, Ont.—F. Bonenfant is commencing a hardware business here.

J. D. Cody has commenced a hardware business at 479 King St., East, Toronto.

Rosie's Hardware has commenced business at 1858 Davenport Road, Toronto.

BUSINESS CHANGES

Belleville, Ont.—C. H. Maybee has bought the porperty, including house and hardware store, owned by W. S. Gordon. The store is closed for stock-taking a few days before Mr. Maybee takes over the business.

PERSONAL

James Walker, president, and David Walker, vice-president, James Walker Hardware Co., Montreal, will arrive in Montreal next week after spending the winter abroad.

Geo. C. Jenkinson, agent for B. & S. H. Thompson, Ltd., of Birmingham, Eng., has been appointed sole representative for Canada of Messrs. H. & T. Vaughan, Ltd., Willenhall, Eng.

Jas. Gelineau, formerly manager of the sporting goods department, James Walker Hardware Co., Montreal, is severing his connections with this firm to enter business for himself in Montreal west.

At the annual meeting of the Purchasing Agents' Association of Montreal and District, Thomas Robertson of Thos. Robertson & Co. was elected vice-president and W. F. Shaver of the Gillette Safety Razor Co., secretary. M. A. Hoey, Canada Cement Co. and G. C. Seybold, Starke-Seybold Limited, were among those elected to the executive committee.

OBITUARY

J. J. Daley, an employee of the James Smart works in Brockville for a continuous period of 53 years, is dead.

STEEL CO. BANQUETS FORMER OFFICIALS

Hamilton, Ont.—The Steel Co. of Canada held a banquet in honor of Chas. Knott and Geo. Simpson at the Royal Connaught Hotel here. Mr. Knott was presented with a gold watch and Mr. Simpson with a pearl stick pin. The event was brought about due to both these gentlemen severing their connections with the company.

C. M. A. ANNUAL MEETINGS

The annual meetings of the Montreal Branch of the Canadian Manufacturers' Associations and the Quebec Division of the same association will be held in Montreal on May 11th. This year marks the 22nd annual meeting of the Montreal Branch, while the Quebec organization will celebrate its third birthday. Following the meetings both sections will unite for an informal dinner in the Windsor Hotel.

CHANGE NAME TO WAYNE TANK AND PUMP CO.

Effective April 17th the name of the Wayne Oil Tank and Pump Co. was changed to Wayne Tank and Pump Company. The change in name was found advisable in view of the recent purchase of the Borromite Company of America by the Wayne Oil Tank and Pump Company, Fort Wayne, Indiana. The Borromite Company of America formerly controlled the patent rights and sold Borromite Water Softening Systems. These will be marketed hereafter under the name Wayne Water Softening Systems.

CANADIAN REPRESENTATIVE OF MILLERS FALLS CO.

Hamilton, Ont.—F. J. Macdonell who for the past three years has been branch manager here of the Victor Saw Works and Clemson Bros., Inc., and has been for seven years associated with that firm, has resigned to accept the Canadian management for Millers Falls Co. of Millers Falls, Mass., and will cover Canada personally for a time in the interests of the latter firm.

F. J. MACDONELL

CANADIAN HARDWARE CLERK WINS FIRST PRIZE

E. Rahn of the Bond Hardware Co. Guelph, Ont., won the first prize in a recent window display competition conducted by the American Artisan and Hardware Record of the United States. Mr. Rahn entered in this contest the same window which won second prize in the last Hardware and Metal Christmas Window Contest, and is to be congratulated on the double honor thus accorded his ability.

RUBEROID CO. MOVE MONTREAL OFFICE

Montreal.—The Ruberoid Co. are vacating their down-town office at 52 Victoria Sq. to move to more spacious quarters at their plant at Ville La Salle, Quebec. Recent alterations have been necessary to accommodate the office staff, but it is felt that the advantage of being in closer touch with plant production will enable more efficient service.

The change also brings the announcement that R. M. Inglis will have full charge of sales, while R. F. Lennon, former office manager, will look after the inside work. C. A. Bennet, who has been connected with the American factories for some years, has been appointed superintendent of production.

KINGSTON HARDWARE CLUB HEAR INTERESTING ADDRESS

Kingston, Ont.—The members of the Hardwaremen's Club were given a most interesting and instructive address in the Y. M. C. A. by F. J. Penberthy, vice-president of Lowe Bros., Toronto, who spoke on paint. Mr. Penberthy dealt with the manufacture of paint from start to finish and brought out many points of interest to the hardwaremen who are handling paints. His address was illustrated with lantern slides.

In addition to giving the address on the manufacture and turning out of paint Mr. Penberthy also made an appeal for combined effort on the sale of paints along the lines of "Save the Surface and You Save All." There was a good turnout of hardwaremen to hear the address and it was greatly appreciated by all.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

CLOSET SEAT HINGES

Hurtubise Limited, Montreal, Quebec.—Will you kindly give us the names of some manufacturers of closet seat hinges?

Answer.—The Canadian Brass Company, Galt, Ont.; The Stratford Brass Company, Stratford, Ont.

CONDOR TUNGSTEN BULBS

Messrs. McKinley & Northwood, Ottawa, Ontario.—Kindly advise us the direct importers in Toronto of genuine holland condor tungsten electric bulbs.

Answer.—Messrs. W. A. Hall, 164 King Street West, Toronto, Ontario.

HUMIDIFIERS

J. S. Mitchell & Company, Limited, Sherbrooke, P.Q.—There is a firm in Toronto who manufacture moisteners to hang on the side of a radiator. Will you please furnish us with their name and address?

Answer.—G. Ormsby Company, 175 Adelaide Street West, Toronto, Ontario.

TIN CANS

A. W. Dean, of 80 Park Street, Sydney, N.S.—Would you put me in communication with a firm that manufactures tin cans?

Answer.—The Thos. Davidson Manufacturing Company, Montreal; The Sheet Metal Products Company of Canada, Toronto; Macdonald Mfg. Company, Toronto; Neverfail Products Limited, Hamilton, Ontario; American Can Company, Toronto, Ont.; Soren Brothers, Toronto, Ont.; Wheeler & Bain, Toronto, Ont.; A. B. Ormsby Company, Toronto, Ont.; A. R. Whittall Can Company, Montreal, Que.; The Grimm Mfg. Company, Montreal, Que. There are several other firms in addition to these.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

3729. **Hardware.**—A London firm dealing with Brazil are open to receive particulars from Canadian exporters of hardware.

3654. **Wire nails.**—A Glasgow firm of old standing would like to hear from Canadian exporters of wire nails.

3648. **Carriage, woodenware and hardware**—A manufacturers' representative in Kingston, Jamaica, wishes to obtain representation for Canadian manufacturers of carriage, woodenware and hardware.

3649. **Glass bottles.**—An independent purchaser in Kingston, Jamaica, desires to buy a gross of one pound glass sealers in Canada. Would prefer to buy directly from the manufacturer and will place further orders if initial shipment is satisfactory. Offers should be submitted to Canadian Trade Commissioner at Kingston.

3651. **Papers, ropes, twines, trunks and suit-cases.**—A manufacturers' representative in Kingston, Jamaica, seeks agencies in Canadian lines of printing paper, fancy stationery, wrapping paper, paper bags; ropes and cordage; trunks and suit-cases. Particularly anxious to be placed in touch with a Canadian manufacturer of wicker suit-cases.

3730. **General hardware lines.**—A Manchester firm of buying agents are open to handle lawn mowers, household labour-saving devices, wire nails, tacks, screws, refrigerators, wire fencing, barbed wire, clothes pins, washboards.

3728. **Hardware and metal.**—A London firm acting as agents for Australian importers are anxious to get into touch with Canadian firms in a position to export to Australia, hollow-ware, aluminum-ware, steel sections, sheets, plates, gas tubes, etc.

3656. **Lead sheets and zinc sheets.**—The above firm would be glad to hear from any manufacturers in Canada of lead sheets, zinc sheets, lead pipes and traps. This firm are revising their agency arrangements and applications will be welcome.

3655. **Steel products.**—A Glasgow firm of iron and steel merchants are open at any time to purchase quantities from Canada of soft steel billets for re-rolling, wire rods, angles bars (in mild steel), and also rails, if prices can meet continental. This firm are revising their agency arrangements, and applications will be welcome. They are understood to possess lengthy experience in the specification and manufacture of sundry "heavy" goods, their inspection, and testing, shipment, insurance and sale, etc.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

"REACH" ATHLETIC GOODS

The annual Reach Spring and Summer sporting goods catalogue and price list have recently been issued by the A. J. Reach Co., of Canada, Ltd., Brantford, Ont. This catalogue has a strong appeal for the followers of summer sporting events, with baseball requisites receiving a prominent place in the many illustrations contained in the forefront of the book. Tennis racquets, nets and other supplies are then listed with golf sticks and bags also profusely illustrated. The various requirements of such games as football and rugby have not been overlooked. Followers of boxing are als catered to in this handy booklet.

ASHDOWN'S SUMMER SPORTS CATALOG

The sporting goods catalogue for the summer season of 1922, has now been distributed to the hardware trade by the J. H. Ashdown Hardware Co., Ltd., of Winnipeg. Fishing tackle of every description finds a prominent place in the early portion of the booklet, while canoes and boating accessories are of interest to the summer recreationist. Baseball supplies occupy the usual premier position, and golf requisites, tennis and cricket goods are also featured. Lacrosse and football are other summer sports catered to through the medium of this catalog. Such sundries as velocipedes, coaster wagons and bicycles, conclude this interesting catalogue, which is well illustrated throughout.

YALE PRODUCTS

Catalog No. 25, has been issued by the Yale & Towne Manufacturing Co., Ltd., of Stanford, Conn., U.S.A. The complete line of Yale products is illustrated therein including Yale Builders' locks, padlocks, night-latches, cabinet and trunk locks, prison locks, tank locks, safe locks, Yale door closers and checks, Yale chain clocks, Yale electric hoists and Yale electric industrial trucks.

The catalog comprises some 450 pages, is well bound and freely illustrated throughout. An introductory section dealing with the history and origin of locks, is of particular interest. The production of the Yale lock, step by step, is outlined and a sketch of the progress of the firm is also given. The Yale Co. conducts its business in Canada through a subsidiary corporation, The Canadian Yale & Towne Ltd., having a plant which employs about three hundred people, at St. Catherines, Ont.

In addition to describing the various makes of locks, door sets and many similar products, photographs illustrating the construction of builders' locks, attract attention. Miscellaneous repair parts are also included and Yale display boards with assortment of night-latches are also featured. A portion of the book is devoted to keys and blanks. This section also includes locksmiths' repair tools. This catalog will no doubt find a ready place in any builders' hardware section.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of April 12, 1902.

Notice has been given at the Tutelle office in the court house, Montreal, by Messrs. Thomas J. Drummond, McCaul & Co., and Edgar McDougall of the Caledonian Iron Works Co., that they have since April 1, been doing business at Hamilton, Ont., under the style of the Canadian Iron and Foundry Co.

A new firearms company for the Dominion has been incorporated under the style of the Ross Rifle Co., Ltd., head office in Ottawa, capital stock $2,000,000. The incorporators are Sir Thos. Shaughnessy, Sir C. H. Ross, Bart., Hon. Wm. Gibson, Hon. F. L. Bergue, D. D. Mann, Frederic Nicholls and Wallace Nesbitt.

The election of officers of the Kingston, Ont., Board of Trade resulted as president, G. Y. Chown; secretary, R. J. Carson; Messrs. J. McKelvey, J. Redden, E. Pense, Ald. Carig, J. Minns, J. Hewton, A. Chadwick, H. Richardson and W. B. Skinner.

The Maple Leaf Harvest Tool Co. Ltd., Tillsonburg, is applying for incorporation. Names of the applicants all of whom will be provisional directors include: C. J Shurley, Galt; J. C. Dietrich, Galt, and others.

It is stated with authority that the great hardware jobbing interests of the United States have consolidated into a gigantic trust, capitalized at $120,000,000.

H. Wilson who formerly managed for Clare Bros., will in future handle the goods of Finlay Bros., Carleton Place and furnaces of the Ottawa Foundry Co.

The James Smart Mfg. Co., are adding a full line of wholesale hardware to the stoves and furnaces with which they opened their warerooms last fall.

The Superior Portland Cement Co, Ltd., has been organized to work marl deposits at Caledon Lake, Ontario.

The Hobbs Hardware Co. Ltd., London, Ont., have been incorporated with capital of $300,000.

R. J. McConnell hardware merchant, Carman, Man., was married last week.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

ANOTHER lengthy list of price changes features the current hardware markets. Lower quotations have been announced on square and hexagon head cap screws, set screws, Champion scales, the Clayton & Lambert line of torches, semi-finished nuts, different lines of hand and wagon warehouse trucks, cotter pins, air rifle shot in tubes, various sizes of wooden cork-lined faucets, water glass, ice tongs, and mop wringers. Western markets record easier quotations on Toledo stocks and dies, band saws and soil pipe and fittings. On the other hand, advanced prices appear on linseed oil, fuel oil, lawn rollers, and skate screws. Eastern distributing centres also report a slight upward revision in soil pipe discounts, this change now placing quotations on these products nearer to a uniform basis. The strength recently apparent in the steel industry, is being more or less reflected in the market tone on numerous finished steel products, and indications of higher quotations on such lines as machine and carriage bolts and nuts have been noted. The recent pig iron advance heralds the general price tendency in steel, with the stiffening in the sheet markets having reached the stage where some higher quotations are developing on domestic quarters. An increased demand for crude oil with activity in forward booking, is described in some quarters as one of the resultant effects of the southern coal strike, large consumers of coal being interested in the adaption of fuel oil to meet their requirements in the event of the duration of the miners' strike. Radio equipment is in exceptionally brisk demand, producers stating that the supply is at present inadequate, although increased output is looked for. The advance in linseed oil prices reflects the trend of flax seed, coupled with an improvement in the movement to consumers. Scrap materials record a slightly firmer tone, while increased interest in such metals as spelter, tin, and antimony, has improved certain ingot markets. Lead still remains the strongest of this group. The effect of the steel situation on specific hardware products, is apparent in the firmer tone on corrugated sheets, eavestrough, conductor pipe, wrought piping, wire goods and similar lines. The warmer weather has induced the shipment of early summer goods, while general activity in seasonal buying is now indicated in the improved reports noted from both wholesale and retail circles.

Montreal Markets

MONTREAL, April 27.—There is again a number of price changes on the local hardware markets, and revisions both upward and downward are of special interest. Square and hexagon head cap screws and set screws are lowered in price through a change in discounts, while in compression goods, bath cocks and brass steam cocks are reduced in price. Cotter pins have revised discounts, and cork-lined wood faucets have new lower prices on the various sizes, and semi-finished nuts are reduced throughout. A price advance is recorded in certain sizes of soil pipe, the discount on these sizes being changed from 47½ per cent. to 45 per cent. The four-inch pipe and all sizes of fittings are unchanged. A reduction of approximately ten per cent. is made on the different lines of hand and wagon warehouse trucks, and a similar change appears on air rifle shot in tubes.

LOWER QUOTATIONS ON CAP AND SET SCREWS

Montreal

Through a change in discounts, cap and set screws are now quoted at lower prices. Square and hexagon head cap screws are now less 55 per cent., set screws having a new discount of 60 per cent. off.

REVISED DISCOUNTS ON COMPRESSION BATH COCKS

Montreal

Revisions are again made in the discounts on certain lines of compression goods, and lower prices now appear on compression bath cocks and brass steam cocks. The discount on the former is changed from 38 per cent. to 41 per cent., and standard steam cocks are now quoted at 50 off, the former discount being 43 per cent. Distributors of these products state that current trade is gradually improving, and is apparently following the trend of building activities. New construction is evident from week to week, and as this advances, the more extensive use of valves, bibbs and other compression work will be necessary. Following are present discounts, with the revision on the above two lines noted:

COMPRESSSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	41%
Bath cocks, quick opening	41%
Basin cocks, compression	34%
Basin cocks, quick opening	46%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks standard	50%
Radiator valves, standard	58%
Do., removable discs	58%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins globe, angle, check and swing check	19%
Jenkins gate or straightway	25%
Jenkins iron body, globe and angle	15%
Jenkins iron body, gate	33%
N.P. "P" and "S" traps	40%

LOOK FOR EXPORTS TO STIMULATE SCRAP

Montreal

Local dealers in scrap metals and other waste materials state that a slightly better feeling now exists in the market, and an improvement in lines of iron and steel is noted. Although this betterment is only of a very moderate nature up to the present, it is taken as a hopeful sign after the past quiet months. The opening of export trade

is now stated to be the factor that must be looked to for marked improvement in the scrap situation. If European countries can enter the market this season to a greater extent than has been possible in the last few years, scrap will again become active after the long drawn out period of quietness. Although the effect of the coal strike on the steel industry may have a tendency to stiffen prices on certain lines of scrap, there is no indication of any firmness from this factor up to the present, and following are nominal quotations:

Automobile tires		0 50
Rubber shoes		0 02¾
Yellow brass		0 05
Red brass		0 08¼
Light brass		0 03½
Scrap zinc		0 03
Lead, heavy		0 04
Lead, tea		0 02
Light copper		0 08
Heavy copper		0 10
Wrought iron, R. Rd., No. 1 per gr. ton		9 00
Malleable scrap (ton)		8 00
Pipe scrap (ton)		6 50
Heavy melting steel	6 50	7 00
No. 2 busheling,		3 00
Boiler plate		7 00
No. 1 machinery cast		20 00

SHEET MARKETS IMPROVE TONE IN CORRUGATED

Montreal.

The past week has brought little or no change in the market for corrugated sheets. Demand is still on the road to improvement, and the later Spring and Summer months should bring a fairly active movement in these lines, according to local distributors. With the stiffening of prices in flat sheets, and other steel products, the undertone of corrugated continues on a firmer basis. For the present, however, following are list prices and discounts:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 00

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

SLIGHT REVISION IN SOIL PIPE DISCOUNTS

Montreal

Discounts on 2, 3, 5 and 6 inch soil pipe are changed from 47½ per cent. to 45 per cent. The best selling size, 4 inch, and pipe fittings are unchanged at former levels. This slight advance on certain sizes is being quoted by most jobbers, although there are a few who are maintaining former lower quotations.

For some time past current quotations on these products have been considered low, the last reduction, made some time ago, was claimed to be necessary because of outside competition, and market conditions did not warrant easier prices at that time. Business in these lines gradually improves with the trend of activity in building circles, and a fairly active season is expected to follow. Revised discounts are the following:

SOIL PIPE—	
2 and 3 inch	45%
4 inch	50%
5 and 6 inch	45%
Fittings—	
2 to 6 inch	50-10%

NEW LOWER PRICES ON COTTER PINS

Montreal

New lower prices are given on cotter pins through a revision in discounts. These are now quoted at less 82½—40—10 and 10 per cent.

EASIER PRICES ON CORK LINED FAUCETS

Montreal

New lower prices are announced on the various sizes of wooden cork lined faucets. No. 2 is now quoted at $1.35; No. 4 at $1.80; No. 6 at $2.20 and No. 8 at $2.60 per dozen.

REVISED DISCOUNTS ON SEMI-FINISHED NUTS

Montreal

Through a change in discounts, quotations on semi-finished nuts show a reduction. New discounts are: up to 9/16 in., 65 per cent.; 5/8 to 1¼ inches, 60 per cent. and 1 3/8 in. to 2 in., 25 per cent. off.

IMPROVED TONE IN WROUGHT PIPE MARKETS

Montreal

Local manufacturers of wrought iron and steel piping describe the present tone of the market as somewhat firmer, although the strength is not yet of such a marked nature as is evident in many other lines of steel products. There is no present indication of a revision in prices, and the market is fairly steady with list No. 54 the selling basis. Current business is now making favorable progress, sales showing a gradual increase as the weeks pass.

SOMEWHAT BETTER TRADE IN PIPE FITTINGS

Montreal

With quotations remaining at former discounts, trade in pipe fittings is said to be gradually improving. Orders are mostly for small quantities, but are quite numerous, bringing the average volume to fair proportions. Unchanged prices and discounts are the following:

PIPE FITTINGS—	
Cast iron fittings	30%
Bushings, cast	32%
Do., malleable	32%
Flanges	40%
Plugs	30%
Flange unions	30%
Malleable unions	47%
Dart Unions, black	33%
Do., galvanized	13%
Nipples, ⅛ to 4 in., close and short	60%
Do., long	65%
Do., 4½ to 8 in., close and short	50%
Do., long	55%
Couplings, 4 in. and under	30%
Do., 4 in., and longer	10%

POUND GOODS—	Black.	Galv.
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

IMPROVED TONE IN LEAD AND ZINC PRODUCTS

Montreal

Manufacturers of lead and zinc products state that the business in these products is slowly developing along satisfactory lines, and each week shows a slightly better movement. Building activity is now reflecting on many of these lines, especially those more extensively used by plumbers in new building installations. The tone of the market is described as somewhat firmer since the revision of a few weeks ago. Lead on primary markets has recently been reported stronger, while tin has made extensive advances also. Insofar as solders are concerned, copper seems a little backward but the markets on the whole are much improved. Unchanged quotations are as follows:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 00
Lead waste, per 100 lbs.	13 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	17½%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 09¾
Do., 4 to 8 lbs., sq. ft.	0 09

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 34
Zinc sheets, casks	0 11
Do., broken lots	0 11½

REDUCED PRICES ON AIR RIFLE SHOT

Montreal

A reduction of 75 cents per hundred is made on air rifle shot in tubes, present quotations being $6.25 per hundred.

KEEN INTEREST NOTED IN STEEL SITUATION

Montreal

The steel situation is still a matter of great interest among local distributors. The market is described as remaining decidedly firm, and although higher prices on bar and steel were thought likely, there is no change in the local quotations up to the present.

It is stated, however, that apart from a stronger tendency because of a better demand, the coal strike will gradually have a more direct bearing on the situation.

It is pointed out by others that mills in some instances have not been hampered, and advices are to the effect that production will not be disturbed for some weeks yet. Warehouses are now carrying heavier stocks than formerly in anticipation of the possibility of future delays in delivery. In the meantime prices continue to stiffen at primary centres with demand losing none of its recent improvement. Following are unchanged local price levels:

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

FIRM UNDERTONE STILL EVIDENT IN SHEETS

Montreal

There is no change in local quotations on black and galvanized sheets, al-

though the stiffening tendency is still apparent, and according to certain distributors, who predicted advanced prices, developments in the near future would not be surprising as the situation has lost none of its strength. The coal strike with delayed deliveries and lower stocks resulting, is now looked upon as the factor to produce any movement in an upward direction. The market is said to be in a firmer position because of a more active demand, but the strength resulting from this is hardly sufficient to increase prices. Insofar as the English market is concerned local importers claim that higher price levels, recently announced there, would probably have a stiffening effect here when navigation enters this port in a more extensive way. Unchanged nominal price levels are as follows:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

EASIER PRICES RECORDED ON WAREHOUSE TRUCKS

Montreal.

Manufacturers of warehouse trucks announce a reduction of approximately 10 per cent. on store and factory trucks, wagon trucks, hand trucks, bag and barrel trucks, railway trucks, packing house trucks, etc.

EAVESTROUGH TRADE AGAIN MORE ACTIVE

Montreal.

Current business in eavestrough, conductor pipe and sundry lines is again described by manufacturers and distributors as improved. The movement of these products has been more or less spasmodic during the earlier spring, and in recent weeks trade was reported as moderate. With conditions, such as low dealer stocks and favorable weather, a continued improvement is looked for in the ensuing weeks. Quotations are unchanged, and following are list prices and discounts:

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$16 90	$18 70	$22 20	$29 80	$37 80

O. G. Square bead, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch

4 inch	10 50
Plain or corrugated.	dozen
2 inch	$ 5 25
5 inch	24 00
6 inch	29 00

Discount 60 per cent.

STRENGTH IN LEAD FEATURES METALS

Montreal.

The tone of the metal markets is described as generally satisfactory, the two metals showing most strength being lead and spelter. While the advance in price has not as yet been followed by any marked increase in consumption locally, this will probably follow in due course.

TIN.—This has been somewhat irregular in London, but remains above the £150 mark. Opinions differ somewhat as to this metal, but stocks are no doubt gradually being lessened and while it is not thought likely that there will be any immediate advance to any extent, it should ultimately work to higher levels. Locally supply is none too ample with the market firm at 35 cents.

COPPER.—New York is rather quiet but the feeling is fairly good, and there seems no pressure to sell. Producers are firm in their ideas of about 13 cents delivered. London shows little change, and there is no immediate sign of any particular change in either direction. The market locally is slightly firmer at 17 cents, for electro and 16½ cents for casting.

SPELTER.—This metal continues to advance, and the position seems quite sound. East St. Louis is well over the 5 cent mark for spot, and futures command a premium. The London market is also quite firm and supplies available are evidently not large. Local market is firm at 7¾ cents.

LEAD.—Lead continues to show strength, and the American market has now advanced almost one cent per lb. in about six weeks. The trust prices are again advanced this week. London is also firm, and metal has been exported from London to the U. S. A. showing scarcity of spot metal on this side. Locally this metal is quoted higher at 7 cents.

ANTIMONY.—Antimony is quiet with little changes in prices, although outside markets indicate that there is a little gain being made. Quotations remain at 6½ cents for Chinese, and 7½ cents for high grade English.

ALUMINUM.—The movement of this metal is still slow, and little or no change is reported in the market. It is still being quoted at 24 cents.

Toronto Markets

TORONTO, April 27.—Price developments are again more numerous this week, both advances and reductions being recorded on various products. A ten per cent. decline in quotations on Champion and household scales features the list of reductions, while other easier levels appear on roller skates, water glass, the Clayton & Lambert line of torches, ice tongs, nickel and nickel specialties. Revised discounts also bring lower quotations on both square and hexagon head cap scraws and set screws. Advanced prices have been announced on lawn rollers, fuel oil and skate screws. With the strength recently apparent in the steel industry being reflected in the market tone on numerous finished steel products, rumors of higher prices on both carriage and machine nuts and bolts have been noted. The advance in pig iron heralds the price trend in iron and steel lines generally, while further strength is recorded in sheet circles with some higher quotations developing on domestic quarters. There is a slightly stronger tone in some scrap materials, with lead remaining the firmest metal in the ingot group, while other metals such as antimony, spelter and tin register increased consumer interest.

ADVANCE RECORDED IN FUEL OIL QUOTATIONS

Toronto

An advance of half a cent per gallon has been announced in prices of fuel oil. The revised quotations are included in the current market pages, and are attributed to increase demand for crude oil, both on the domestic and primary centres.

There is reported some disposition to contract ahead for fuel oil, according to recent indications from southern markets, this being attributed in certain quarters to the uncertainty as to future coal supplies caused by the strike of miners. The increased demand for crude oil has resulted in a firmer undertone, although no radical changes in the general situation have been recorded. It is

pointed out that steel producers, railroads and other large consumers of coal made preparations for the strike by piling up huge stocks. Therefore, no immediate shortage of coal exists, but should the strike last indefinitely and supplies of coal become nearer exhaustion, fuel oil may enter into greater demand. Gasoline has continued very firm during recent weeks, but naturally increased consumption of this product at the current season of the year, tends to firm up the market. Coal oil remains fairly dull, with little variation noted in refined and lubricating products.

FUEL OIL—

In barrels	0.10.40
In tank wagons	0.09.40
In tank cars	0.08.40

WATER GLASS PRICES LOWER THIS SEASON

Toronto.

Prices on water glass are announced this week, the quotation this season being lower than formerly. The new level is $1.50 per dozen packets.

SLIGHT REDUCTION IN PRICES ON TORCHES

Toronto

A slight reduction is also noted this week in prices on the Clayton & Lambert line of torches. Revised quotations follow: No. 122, $7.25; No. 208, $10.25.

ICE TONGS ALSO ON EASIER PRICE LEVELS

Toronto

Ice tongs are also included among the list of products recording easier price levels this week. These are now quoted as follows: 14½ inch, $16.80 per doz.; 17 inch, $19.80; 24 inch, $27.60 per dozen.

INCREASED QUOTATIONS ON SKATE SCREWS

Toronto.

An upward revision has been announced on skate screws. These products are now quoted at 35 cents per carton, which is an advance of three cents over the previous level. In oval head bright, sixteen 3/8x6 and eight 5-8x6, equals one set. In round head bright skate screws, sixteen 7-16x6 and eight 5-8x6 equals one set.

ADVANCE IN PRICES ON LAWN ROLLERS

Toronto.

An advance has been made in prices on lawn rollers. Following are the revised levels on these products: No. 206, $16.00; No. 207, $21.00; No. 209, $22.00 each.

HIGHER PRICES ON BOLTS AND NUTS RUMORED

Toronto

Following the recent upward revisions in current price levels on many finished steel products at southern primary markets, and the reflected stiffening in similar quotations on the domestic centres, there is now apparent a rumour that a revision in discounts on bolts and nuts, both machine and carriage, is pending which will result in higher quotations on these goods.

REVISED DISCOUNTS ON SET AND CAP SCREWS

Toronto.

Revised lower price levels are now evident on both square and hexagon head cap screws and also set screws, through revised discounts. Set screws are now 60 per cent off, and cap screws 55 per cent.

REDUCED QUOTATIONS ON ROLLER SKATES

Toronto

A slight reduction has been announced in prices on roller skates. The new quotations follow. No. 2, $0.95 per pair; No. 3, $1.05; No. 6, $1.55; No. 10, $1.75 per pair.

TEN PER CENT DECLINE IN SCALE QUOTATIONS

Toronto.

A reduction of ten per cent. has been announced in quotations on the Champion and Household scales. These products are now shown at list less ten per cent. compared with the previous net-list prices. Under the revision, however, quotations do not include stamping as formerly.

LOWER PRICES ON NICKEL AND NICKEL SPECIALITIES

Toronto.

The International Nickel Co. has announced a new price list on nickel, monel metal and nickel specialities, showing a marked reduction from previous quotations. Nickel shot, ingots and electrolytic are reduced five cents per pound and hot rolled rods ten cents per pound. Cold drawn rods are twelve cents per pound lower.

INCUBATORS REGISTER BRISK SEASONAL TRADE

Toronto.

Manufacturers and distributors of incubators state that these products have experienced an exceptionally good demand this season, and not only have repeat orders been more numerous, but there is reported a shortage of some models.

RADIO EQUIPMENT IN ACTIVE DEMAND

Toronto.

An active demand for radio equipment complete sets and accessories still continues, as does the difficulty of producing adequate stocks to supply the demand from wireless enthusiasts in both city and districts.

PIG IRON ADVANCE HERALDS PRICE TREND

Toronto

The increase of $2.00 per ton on pig iron recently quoted on the domestic markets, serves to indicate the general strength of the steel industry, due to the fact that this product constitutes the basic element in manufactured steel goods. Distributors of bar products, in some quarters, herald the advancing pig iron quotations, as the forerunner of higher prices on iron and steel generally, and coupled with the stiffening recently recorded in these markets, the stronger tone is appreciably evident in practically all phases of the industry. Not only has the turn in the matter of prices on steel lines been made—at least for the present—but the trade is well on the road to recovery, due to the influences combining in the improved demand recently noticeable. Shipments from the mills are less prompt, than during the past few months, and warehouse stocks are heavier. Current quotations follow:

IRON AND STEEL—

Mild steel bars, base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 00
Spring steel	6 00
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

SOIL PIPE DISCOUNTS NEAR UNIFORM BASIS

Toronto

Discounts on soil pipe and fittings between eastern and local distributing centres are now on a more uniform basis through the recent anouncement from Montreal that a revision has been made on quotations covering 2, 3, 5 and 6 inch sizes. Little variation has been recorded locally, the movement of these products registering a satisfactory volume for this season of the year, with manufacturers and distributors keenly alive to the increased opportunities provided by the current building activity. Following are prevailing discounts:

SOIL PIPE—

2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch.	net

FITTINGS—

2 to 6 inch fittings	50 and 5%
8 inch fittings	net

WROUGHT PIPE SHOWS GAIN IN STRENGTH

Toronto

A stronger tone is now evident in wrought piping, this tendency being a reflection of the stiffening in quotations on steel products generally. The demand for steel pipe has also increased slightly, both on the domestic and primary markets. Prices in the south are described as firm, and this tendency is more or less expected to spread, based upon recent developments in basic materials. For the present, list No. 54, continues to govern domestic quotations.

ACTIVE MOVEMENT IN BUILDERS' HARDWARE

Toronto

There is apparently evidence of additional momentum to the current movement of builders' hardware, and supplies of this nature are beginning to experience a brisk demand. These products are considered to constitute one of the most active departments in the hardware trade this season, chiefly owing to

the activities being launched in construction circles generally. Both wholesalers and merchants in various localities report fairly extensive orders for a variety of goods. With building programs assuming large proportions with each successive month, a corresponding improvement in the sale of builders' hardware is generally anticipated.

FURTHER STRENGTH ADDED IN SHEET MARKETS

Toronto.

The sheet market not only continues to reflect the firmer tone recorded during the recent weeks but distributors of these products now state that higher levels are practically looked for within the near future. Warehouses and consumers have had to book ahead due to the fact that the mill delivery changed with the advent of greater demand, and prompt shipments cannot be depended upon to supply immediate needs, as heretofore. While recent base quotations remain nominally unchanged, some higher price levels than $5.25 for galvanized, have already made their appearance locally. It is stated that sheet mills are particularly favored regarding stocks of coal, but heavier operation and the uncertainty as to the duration of the strike adds further strength to the sheet markets generally. Following are prevailing average local price levels:

BLUE ANNEALED—		
10 gauge, base	3 50	4 25
12 gauge	3 55	4 30
13 gauge	3 60	4 35
16 gauge	3 65	4 40

GRADUAL IMPROVEMENT RECORDED IN TROUGH

Toronto.

The current movement of eavestrough is considered fair, with brisker trade generally looked for during the following months. The stiffening of prices on primary steel markets, has resulted in a slightly firmer undertone in these products also. As is the case with materials required in construction work, seasonal activity in this respect is generally looked for. Quotations at present, remain at the following levels:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth:	Per 100 ft.
8 in.	15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 70 and 10 per cent.

PIPE (Conductor)

Plain, round or corrugated.	Per 100 ft. in 10 ft. lengths.

SLIGHTLY STRONGER TONE IN SOME SCRAP METALS

Toronto.

On the current waste material markets it is noted that certain red and yellow scrap metals are a little stronger in tone. Dealers' quotations continue around the same levels, but any improvement in virgin copper is stated as likely to be reflected in price levels on waste. Ferrous scrap is described as a little stronger also, with orders only for hand-to-mouth consumption being obtainable as yet. Following are the usual averages of dealers' local buying prices for fairly large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 00	3 00
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	7 00	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	16 00	17 00
Stove plate	11 50	12 00
Grate bars	10 50	11 00
Standard car wheels	14 50	15 00
Scrap Metals.		
Heavy copper and wire	10 00	11 00
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 00	6 00
Heavy lead	4 50	4 75
Tea lead	2 00	2 50
Scrap zinc	4 00	4 50
Scrap Rubber		
Boots and shoes	2 25	2 50
Lumbermen's rubber boots	1 50	1 75
Auto tires	0 50	0 60
Solid tires	0 75	1 25

ELECTRIC RANGES AND OIL STOVES POPULAR

Toronto.

Manufacturers and distributors of both electric ranges and oil stoves continue to report a good movement of these products. Activity in consumer demand for electric ranges has been stimulated by the degree of new homes being erected, combined with the recent widespread interest in electrical development. The usual summer season for oil stoves, has given rise to the assurance from manufacturers that an even better season in this respect is generally looked for, and with the warmer weather now apparent, the movement is already under way. Prices on the latter products remain at the revisions recorded a short while ago, while market conditions in general are described as more stable.

LEAD REMAINS FIRMEST METAL IN GROUP

Toronto

Lead, antimony, aluminum in the order named, provide the features of an otherwise quiet ingot metal market. Lead as previously noted, remains the firmest of the group, with increased activity recorded. More interest has been noted in antimony, and while current trading is a little quieter than last week, prices have continued steady. Some increased business in aluminum has been responsible for new life being displayed in this metal, but few marked developments have been recorded. Copper conditions are quiet with the current situation in the tin markets also described as moderate.

COPPER—Current business in copper on the domestic markets continues of rather narrow proportions, while reports from primary sources indicate that export trade is also more or less moderate. Copper consumers are stated to be operating more actively, and the general tone of the metal is fundamentally unchanged. Local prices remain at 16½ cents.

TIN—This metal has remained quiet on both domestic and primary markets. There has been a little more activity in London, with some increase in prices, but these changes have not affected the general situation. The quotation of 34 cents, covers the average local trading.

LEAD—As recently noted, lead is the firmest metal of this group, and prices on southern centres have been described as on the increase. Business in lead has also improved, and the undertone of the market is firm. Domestic quotations are much steadier at $6.50.

SPELTER—Prices on spelter tended to ease a little on primary markets at the commencement of the week, to be followed later by a slight increase in activity which served to steady the general tone. More inquiries are reported for this metal. Domestic quotations remain unchanged at $6.75.

ANTIMONY—The firmer tendency recently noted in antimony is being generally maintained, although recent trade has been quiet, the market remains steady. A continuance of the gain in strength would tend toward slightly higher levels. Meanwhile, the local prices continue around 6 and 7 cents.

ALUMINUM—Increased business in aluminum is reported from southern centres, with prices exhibiting a firmer trend. Locally, the general situation in this metal is practically unchanged, with quotations hovering between 26½ and 27 cents.

London Markets

LONDON, April 27.—While price developments on the current hardware markets are not so extensive this week, the feature interest is attached to the general improvement reported in the volume of business. Seasonal trade was to some extent handicapped by inclement weather, and with the advent of warmer days, many lines now show improved activity. Collections are described as in good shape, an improvement having been noted in this respect with the general betterment in trade conditions.

LOWER PRICES ON MOP WRINGERS ON PAIL

London

A reduction has been announced in prices on mop wringers on pail, the change being approximately ten per cent. lower. Following are revised quotations:

MOP WRINGERS—
Domestic, $30.00 per dozen.
Standard, $33.00 per dozen.
Janitor, $42.00 per dozen.

FIRMER TONE IN OIL REFLECTS SEED TREND

London

With a gain of several points in the flax seed markets, this improvement has been reflected in the undertone on linseed oil. Quotations on oil, however, generally remain at the recent revised levels, with the current demand of fair proportions for this season of the year.

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal	1 05	1 08
3 to 5 bbls., per gal.	1 04	1 07
6 to 9 bbls., per gal	1 02	1 05
Less barrels, add 15 cents gal.		

TURPENTINE SUPPLIES OF MODERATE NATURE

London

Little fundamental change has been recorded in the turpentine markets during the past week. Locally, stocks are still reported as low, with fresh shipments expected to be quickly distributed owing to the general demand. Prices average the following levels:

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 30
2 to 4 bbl. lots	1 29
5 gal. lots	1 45

SEED DRILLS AND CULTIVATORS SELL WELL

London, Ont.

Seed drills and cultivators in general are now selling in seasonable volume. Following are the current prices on the Eureka line:

DRILLS—
No. 1—$9.00 each ; No. 2, $11.00 each.
CULTIVATORS—
No. 4, $4.50 each., No. 8, $6.00 each.; No. 10 $6.50 each.

LOOK FOR BETTER SALE IN GARDEN TOOLS

London, Ont.

Amateur gardeners and others who delight in digging operations at this season of the year, have had their endeavours slightly retarded recently owing to the uncertain weather which has prevailed. Garden and harvest tools, however, are now entering a better movement, and a good season is anticipated. Quotations remain at list less sixty per cent.

CALL FOR WHITE LEAD IN OIL CONTINUES

London, Ont.

The improvement recently noted in the demand for white lead in oil is described as continuing, and dealers generally look for a fair seasonal movement of this product. Prices remain steady at the previous levels, which follow:

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, Per 100 lbs.	13 30	13 65
Elephant, per 100 lbs.	13 80	14 15

IMPROVED MOVEMENT RECORDED IN PUTTY

London, Ont.

There is also a good seasonal sale of putty now generally noticed, this product registering a fairly satisfactory movement for this time of the year. Prices remain unchanged at the following levels:

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	6 30
Do., 25 lb. drums	6 55
Pure, 100 lb. drums	7 80
Do., 25 lb. drums	8 05

STEADY DEMAND NOTED FOR WINDOW GLASS

London, Ont.

Window glass continues with a fair seasonable demand, and quotations for the present appear steady. A fair amount of building in this locality has caused merchants and distributors of window glass to look for improvement in the demand as the season progresses. Unchanged quotations follow:

WINDOW GLASS—
Single Diamond, net list
Double Diamond, net list.
Cut Lights, 75 per cent. off light list.

EASIER PRICE LEVELS ON LAMP BLACK

London, Ont.

The new quotations recently announced on lamp black, record a reduction in price of approximately fifteen per cent. The revised quotations follow:

LAMP BLACK—
¼ lb. packages, 44c. per lb.
½ lb packages, 35c per lb.
1 lb. packages, 28c. per lb.

SLIGHT IMPROVEMENT IN ROPE MARKETS

London, Ont.

Distributors of rope and cordage now report that sales of these products continue to show improvement. Prices remain unchanged, at the following levels, with a fair season generally looked for:

ROPE—	lb. base
Pure Manilla	23c.
Beaver Manilla	20c.
New Zealand Hemp	20c.
Sisal	18c.

GOOD SEASONAL SALE OF POULTRY NETTING

London, Ont.

A good seasonal sale continues for poultry netting, this product being one of the primary Spring lines. Quotations on the 1 and 2 inch mesh remain at list less 12½ per cent.

ROLLER SKATES STILL IN POPULAR DEMAND

London, Ont.

Roller skates are among the popular lines at this season of the year, the current movement being reported as brisk. Quotations remain unchanged at the following levels:
No. 3, plain, $1.10 per pair.
No. 5, ball-bearing,$2.65 per pair.

Winnipeg Markets

WINNIPEG, April 27.—Price reductions are again noticeable on the current hardware markets, easier levels having been recorded this week on soil pipe and fittings, the Toledo make of stocks and dies, and band saws. Through a revision in the discounts, higher prices are now effective on wood screws. A firmer situation is evident on many finished steel products, with the stiffening in market tendencies being particularly noticeable on galvanized sheets, and bar iron. Builders' hardware lines are registering increased activity, while jobbers are now more optimistic regarding the trade outlook during the ensuing months.

LOWER PRICES ON SOIL PIPE AND FITTINGS

Winnipeg

Through a revision of discounts on soil pipe and fittings quotations are now slightly reduced. Following are the revised discounts.

SOIL PIPE—
2 and 3 in., 27½ per cent. 4 in., 37½ per cent. 5 and 6 inch, 32½ per cent. 8 inch, 10 adv.
SOIL PIPE FITTINGS—
2 and 3 in., 47½ per cent. 4, 5, and 6 in., 50 per cent. 8 in., 10 per cent. adv.

BAND SAWS ALSO ON EASIER PRICE LEVELS

Winnipeg.

Through a change made in the discount, band saws are quoted lower. The revised discount is 15 per cent.

BAND SAWS—
New List Prices:
⅛, 13c. per ft. ¼, 13c. per ft. 5-16, 14c. per ft. ⅜, 14c. per ft., ½, 15c. per ft., ⅝, 16c. per ft. ⅜, 14c. per ft., ½, 15c. per ft., ⅝, 16c. per ft, ¾, 18c. per ft., 1, 22c. per ft., 1¼, 26c. per ft., 1½, 32c. per ft.

REVISED DISCOUNTS BRING HIGHER SCREW PRICES

Winnipeg.

A revision has been announced in discounts on wood screws, resulting in an increase all through the list. Following are the new discounts:

WOOD SCREWS—

Flat head bright, 80 per cent. Round head bright, 77½ per cent. Flat head brass, 75 per cent. Round head brass, 72½ per cent.

REDUCTIONS IN TOLEDO STOCKS AND DIES

Winnipeg.

Lower prices are recorded on Toledo stock and dies, these products now being quoted as follows:

STOCKS AND DIES—

No. 1, $16.80 per set.; No. 2, $71.40 per set; No. 3, $192.50 per set.

EXTRA DIES—

No. 1, $1.75 each; No. 2, $6.12 each.; No. 3, $8.96 each.

FIRM TONE NOTED IN SHEETS AND PLATES

Winnipeg

Higher prices are looked for on sheets and plates by local distributors in the near future. Improvement in the domestic markets and the firmer tone at primary centers is described as contributing to revisions of this nature. Following are the present prices:

BLACK SHEETS—	Per 100 lbs.
10 ga.	5 35
12 ga.	5 40
14 ga.	5 45
16 ga.	5 50
18 and 20 ga.	5 90
22 and 24 ga.	6 00
GALVANIZED SHEETS—	
10¾ oz.	7 90
28 ga.	7 50
26 ga.	7 20
24 and 22 ga.	7 05
18 and 20 ga.	6 90
16 ga.	6 75

Hamilton Markets

HAMILTON, April 27— The stiffening of prices and the general improvement both in demand and consumption, remain the features of the steel industry. The coal strike has now assumed greater importance from an operating viewpoint than was originally calculated upon, but domestic centres have not yet reflected any immediate price changes, beyond the firmer tendencies in such products as bar iron and steel, sheets, wire goods, wrought piping and similar products.

Buying of steel has recently been stimulated by the increasing inability of the mills to make prompt deliveries, and consumers have found that they must lay in some stocks instead of relying immediately on producers, as has been the practice for some months past. While early reports tended to discount the importance of the coal strike, as affecting the iron and steel industry, yet it has recently become evident that there is generally developing a very firm trend in iron and steel prices, which producers in some quarters are attributing to the resultant effects of coal strike conditions. As previously pointed out, some advances have already been made in southern markets, but to what extent this movement is likely to develop, or whether it will also effect domestic products, are interesting factors in the prevailing situation.

Wire Products Active

The market for wire nails and staples, also other wire products, is now very firm, and jobbing houses state that they would not be surprised if revision would follow in the near future. Manfacturers of these products in the United States, recently announced higher quotations, and under prevailing indications, it is considered only a question of time before similar advances reach domestic centres. These lines are therefore, reported as active throughout wholesale circles at the present time.

It is noticeable that pig iron has now advanced $2.00 per ton on the domestic centers, and as this forms the basic commodity of the steel industry, similar changes in quotations on finished steel products are considered as developing. This is particularly evident in galvanized sheets, higher and base prices being more or less anticipated in the near future. A rumor has also been noted regarding advanced price levels on bolts and nuts, some revision in discounts on these products being under consideration.

Collections are now reported better by some houses, while others state they are having just as much trouble as ever to keep their accounts up to normal. This depends to a certain extent on the district where the accounts are located, and the condition of the industry upon which the general life of the community there depends.

There is a steadily increasing and good demand for baseball requirements in preparation for the current season. A shortage on some lines has already been reported in certain quarters. Repeat orders are looked for in these products, and other sporting requisites are also commencing to move in satisfactory volume.

Spring Weather Arrives

Builders' hardware continues to register activity, while spring goods in general record a swinging stride with the accompaniment of more seasonably weather. Early shipment of many summer lines is now reported, and the general hum of business life denotes brisker trade in practically all phases of the hardware industry. Increasing demand is undoubtedly greatly assisting towards the general betterment in most markets, and activity in jobbing circles becomes more evident each week. Business is now described by wholesalers as seasonably good, with every indication of fair trade being witnessed throughout the remaining months of Spring and Summer.

Increased activity among lines of garden tools is now being felt, while one local dealer aroused considerable interest in these products with a timely window display. The result was a decided increase in the proportionate sale of garden tools, over the corresponding week of the previous year. The varnish and enamel industries have also experienced a well-stimulated demand during the past few weeks. The general adoption of the Save-the-Surface campaign has proved particularly effective throughout Hamilton and the surrounding districts. Paints and brushes have become most active lines during recent weeks, with a greater volume anticipated as the season progresses.

Pittsburg Markets

PITTSBURG, April 27.—In the past few days production of coke has been approximately stationary, at about one-third the rate in March. There have been a few fresh strikes, at individual works, while on the other hand some men have returned to work and the working forces are better aligned for production. The shipments of coal out of the region are reduced more than the production of coke in the region. The regular union strike, in the Pittsburgh and other union districts, proceeds without incident and no developments in it are to be expected in the near future. The union strike was expected to last anywhere from two to six months. The non-union strikes, which are important only in Western Pennsylvania and West Virginia, are expected to begin waning about May 1. These non-union workers are not accustomed to striking, while with the union coal miners striking is quite a habit, as there has been a "suspension" almost every time the biennial scale has come up in the past quarter century. Since the war there have been two offdate strikes, a big one late in 1919 and a group of little ones in the late summer of 1920. The probability is the non-union strikes will be over before the regular union strike comes to a head. The United Mine Workers cannot pay strike benefits to its own men, not to speak of the non-union men it has induced to strike.

As a matter of bare fact there is little doubt that the coal strike has been a blessing in disguise for the steel market. There would have been trouble if buying and production had kept on increasing at the phenomenal rate of the first three months of the year, for no one can possibly imagine that consumption of steel has been increasing at any such rate. After a drastic liquidation in stocks of steel in 1921 the country was stocking up, partly in anticipation of the coal strike and partly in anticipation of better business. Now the coal strike is retarding further increases in production while it is stiffening steel prices, some

(Continued on page 60)

Planning A Local Clean up Paint up Campaign

Hardware Merchants Can Profitably Initiate Such Campaigns—Arouse Civic Interest and Enthusiasm by Meetings and Appointing Committees Representing Women's, Children's, Industrial, Commercial, Publicity and Other Interests

LOCAL CLEAN up and Paint Up Campaigns wi l do a great deal in the spring season of the year to stimulate local trade in paints and also in many other hardware lines. A campaign is being inaugurated in Toronto this year, the various hardware merchants pooling a fund to purchase advertising matter, etc. In this the paint manufacturers are taking a leading part. The co-operation of the various city departments is being sought with a view of having garbage wagons and other city vehicles carry banners proclaiming Clean Up Week, and to encourage as far as possible the cleaning up of yards, alleys, front lawns, buildings and of painting them to keep them clean. This week in Toronto is to be the second week in May, but in many other instances the campaign is held earlier.

In Winnipeg a meeting of citizens was called to arouse enthusiasm and appoint officers. C. H. S. Bamford, sales manager J. H. Ashdown Hardware Co., Winnipeg, was chairman. A campaign was instituted to raise $6,000 which would cover the cost of the campaign. The organization consisted of a chairman, 1st, 2nd and 3rd vice presidents. A general executive was formed representing various interests including publicity, women's division, municipal, industrial, commercial, beautifying and juniors' division.

In other cities as well, Clean Up and Paint Up campaigns will be conducted at this time, and to assist in the formation of these a few details are given herewith.

If there is going to be a campaign in your town and you link up with it, you stand to secure some substantial profits, in addition to doing a mighty useful work in brightening up and improving your community.

If there isn't, why not sit down right now, think the matter out, decide there WILL be a Clean Up and Paint Up Campaign—and take the initial steps to start it yourself.

The annual Clean Up and Paint Up Campaign isn't a fad. In scores and hundreds of communities it is an established institution doing a vital work to provide surroundings more sanitary and attractive and encouraging for everyday folks. And in making the annual Clean Up and Paint Up Campaign an established institution in these communities the paint dealers have performed an important part.

But there is more to the Clean Up and Paint Up Campaign than its merely aesthetic side. It isn't all sentiment; far from it. It is intensely practical. Its influence on the life of the community is intensely practical. And it has a direct and practical influence upon the financial rewards of the paint dealer.

Every dealer knows that paint selling is largely a matter of paint education. You have to instil in folks' minds the desire for clean, healthy, beautiful surroundings, and you have to show them the advantage of painting, in securing these surroundings. Then you begin to sell paint.

Once you get a man thinking along right lines—along lines of clean and sanitary and attractive living—and it's relatively easy to keep him there. And by keeping him there, you keep him in the mood where he'll buy paint whenever it is needed, and look upon painting, not as a luxury, but as one

Mats or electros of the illustrations in connection with Clean Up, Paint Up campaigns as shown on this page can be secured by retailers from the National Clean Up and Paint Up Campaign Bureau, Pontiac Bldg., St. Louis. Mats are 20c. and electros 80c. in 2 column width.

SERVICE

CONFIDENCE

FAIR DEALING

We Offer You a Helpful Thought

From "Gulliver's Travels" comes the following thoughtful excerpt. It embodies in a sentence of profound wisdom the only secret of business success.

"He gave it for his opinion that whoever would make *two* ears of corn or *two* blades of grass to grow upon the spot of ground where *only one* grew before would deserve better of mankind and would more essentially serve his country that a whole race of politicians put together."

On this principle should be built the activities of everyone who sells. For at this time, and in the future, especially, character of effort, permanency of patronage and volume of sales will determine your measure of success.

To perform *two* services and create *two* sales where before a merchant performed and created only *one* is the sales service we have to offer with an unusually meritorious, exclusive proposition. Forty-five new High Standard members, prominent in their communities, financially capable, progressive—and enthusiastic in a few months is evidence that our business principles, ideals and *practices* are ethically sound and that we thoroughly fulfil our every claim.

Should you wish it, we would be very glad to discuss and compare our proposition with you.

The Brush Department

Brush Information Your Customers Want

Hardware Merchant Passes on Information Concerning Brushes Which He Has Found is Chiefly Required by Customers

IF A CHEAP job is desired—a cheap brush may be suitable although a better brush will do wonders with cheaper paints, varnishes, and enamels.

If the sale is a good grade of varnish, paint, or enamel, recommend a good suitable but moderately priced brush. As it is inconsistent to buy a good finish and a cheap brush.

If a customer is buying and will be using considerable high grade finishes, or will take care of a good tool, sell them a practical mechanical tool.

A simple rule:

Coarse bristle or hair brushes for rough surface;

Medium fine bristle or hair brushes for average surface;

Fine, smooth bristle or soft hair for fine surface.

A Few Suggestions on Care and Use of Brushes

Brushes set in rubber should be flipped across the palm of the hand to remove dust and odd short bristles. They should then be used in finishing material at once. A good plan before actually commencing work with a new brush is to take a piece of board and brush finish on it, working material into brush and loose bristles and dust out.

Do Not Soak Brushes in Water Before Using

The bristles are porous. The water feeds up pore of bristle to the root where bristles are set. With the hundreds of bristles set, the swelling is often sufficient to break the ferrule and spoil the setting.

Kalsomine brushes should not be soaked except in kalsomine before using. A kalsomine brush should be thoroughly washed out at night and hung to dry.

Varnish brushes are best hung in the varnish over night.

Paint, enamel and color brushes are best hung in water overnight. Before using, brush out thoroughly on a piece of board. Don't let bristles rest on bottom of can as this will spoil the shape of the brush.

When Not in Use

Paint, enamel and varnish brushes can be thoroughly washed out with paint and varnish remover, and cleansed with gasoline. Then hang up to dry after which the bristles may be wrapped in proper shape and the brush carefully laid away.

Kalsomine brushes should be thoroughly washed out with clean water hung to dry, then wrapped and laid away.

Old Brushes

An old hard paint brush may be softened and cleaned with paint and varnish remover. Although very often it takes more paint remover than the price of a new brush.

An old hard varnish, enamel or color brush should be thrown away and a new one purchased and taken care of.

Brush Satisfaction and Economy

Three years ago the writer being disgusted with cheap nail brushes asked his druggist to order him one quarter dozen of a better grade than those stocked. To-day I am using the first one and still have a reserve of two neatly packed away. The one in use has been worth more to me than the price paid for the three. It looks as though I am stocked with nail brushes for life.

Know your prospect and his or her requirement, then hand them a real tool. If they once handle it they will buy it in preference to a cheaper one.

Neither the merchant nor the retailer or a customer should hesitate to buy brushes to-day as they are generally being sold for less than their present values. The manufacturer in figuring new costs allowed for a decline in two or three items which to date have not materialized. The bristle stock coming forward to-day and workmanship are superior to that of a year ago. So that a conservative estimate is at least 25 per cent. to 30 per cent. better brush value to-day than a year ago.

PLANNING A LOCAL CLEAN UP PAINT UP CAMPAIGN

Continued from page 54

of the everyday necessities of intelligent existence.

Here's where the Clean Up and Paint Up campaign plays right into your mitt.

Tackle the problem of educating your own clientele of paint buyers with no outside help whatever, and you'll find it a tremendous task. Even with the help the paint manufacturer furnishes in the way of printed matter, it's a big problem to handle a successful follow up campaign.

By enlisting under the banner of the Clean Up and Paint Up campaign you link yourself with a nation-wide movement. You get the benefit of the other fellow's efforts, and the efforts of other communities. These things help you to educate your own community to the value of paint.

The organized Clean Up and Paint Up campaign is the biggest potential factor in making customers for the paint dealer. It educates all the public to the value of paint. It reaches everybody in your community. It adds to your individual efforts as a paint salesman the backing of a nation-wide crusade which will help you to put paint on the shabby homes and paint profits in your bank account.

And paint profits are a practical factor. They represent the pay you get for the good work you do in helping to beautify your community.

The more thoroughly you can educate the community in regard to the value and importance of painting the larger wil be these profits, and the easier it will be to secure repeat orders from time to time from the same customers. There is no factor so potent in educating the paint skeptic into a paint believer, and in keeping him educated as the Clean Up and Paint Up campaign carried on right in your home town.

It will pay any dealer to take hold of the proposition right now and push it for all it is worth. The paint season is with us, and now is the ideal time to push paint. You are putting on your own campaign. Link it up with the nation-wide movement and add to its scope and its educative influence, and its profit-making possibilities.

More communities than ever before are this year linking up with the Clean Up and Paint Up campaign; and more dealers than ever before are convinced of the profit-possibilities involved. There are dealers who tackled the proposition rather timidly a few years ago who are to-day enthusiastic because they found it a profit-making venture. and have proved its value as a business builder.

If your town hasn't yet launched its Clean Up and Paint Up campaign, you are the man to officiate at the launching. It will add to your prestige to start something worth while; and the something you start will be a profit maker.

You are a business man; and the experience of a host of men who deal in paint has proved to their satisfaction that the Clean Up and Paint Up campaign is good business, because it makes for a better community and for larger profits in the paint business.

W. R. Jones of Richard Thomas & Co., London, England, is now visiting Montreal and other Canadian points. He is accompanied this week by F. B. Leslie, sales-manager of A. C. Leslie & Co., on a visit to Toronto, Hamilton, and other cities in Ontario.

Boeckh's Brush News

Does the "Paint-Up"--"Clean-Up" Campaign Pay?

YOUR own judgment will tell you that it will pay IF you will LET it.

Consider the tremendous advertising value of the efforts put forth in this Dominion-wide campaign, then utilize the opportunity this gives you of selling two, three or four times more paint and clean-up materials than you ever sold before. If you will but put forth a little extra effort, in order to make the most of this opportunity, this campaign will certainly pay you.

The "Paint-Up" and "Clean-Up" Campaign means bigger business to every man who gets into it.

It means too a cleaner, more sanitary more beautiful home, to every customer, to whom the dealer sells paint and clean-up materials.

When you realize these things you will surely say "I'm for it—what shall I do?"

The answer is in three words—"Go To It." Get your Boeckh's Brushes on display—for brushes make people think of all kinds of paint and clean-up materials. Let us help—by supplying your needs for your own campaign.

(1) If you require more display cards for Boeckh's Brushes we will gladly supply them.

(2) We will loan you small electrotypes of brushes for use in your local advertising. Write us for a list of the cuts.

(3) If you have not got one of our Brush Displays (as illustrated) write us for particulars of our attractive offer.

There is absolutely no better way of increasing sales of brushes and all kinds of paint and clean-up materials, than by keeping Boeckh's Brushes on display.

Give Boeckh's Brushes a prominent place in the "Paint-Up," "Clean-Up" Campaign. It will increase business and profits.

Weekly Paint Markets

Montreal

MONTREAL, April 27—A reduction in turpentine prices, and an increase in the quotations on linseed oil offer the chief attraction in the paint markets this week. Turpentine is reduced four cents per gallon in sympathy with the easier tendency at production centres because of the new crop and increased offerings. For the past few weeks new receipts have been only of a moderate nature, and local stocks have been reported low for this season of the year. With a better situation in the South, more ample local supplies are expected. On the other hand linseed oil registers a two-cent advance bringing present quotations again to the dollar mark. The undertone of this market is reported as the reverse of turpentine, and in the past week the flax-seed market gained, following the previous easier tendency. This question of supply still features the situation and the fact that Canadian seed from the head of the lakes is already on the water route to the American markets, is said to have a strengthening effect on the local market, and if shipments are continued, higher prices are looked for. Demand is now reported good, purchases not being confined to a present requirement basis to the same extent that was evident earlier in the year. There is still a strong tendency in the shellac market. Sources of supply report a slight improvement in obtaining fresh supplies, but not sufficient to materially change the situation. White lead in oil is active with the tone of the market also firm owing to the stronger position of pig lead.

Paint products are in seasonal demand, producers declaring themselves as well satisfied with the present movement. The feature in paint sales again this year is the great number of mail orders and other rush shipments. Although yet early in the season, manufacturers state there is already an increasing amount of this business, indicating that a repetition of last year's buying methods might be expected.

TWO CENT ADVANCE IN LINSEED OIL PRICES

Montreal

With a gain of ten points registered in the flaxseed market during the past week, linseed oil now shows an advance of two cents per gallon over previous quotations. This revision again brings oil prices to the dollar mark, the prediction being made earlier in the season that prices would not, in all likelihood, fall below this level. The chief factor contributing to the present firmer position of seed, likewise oil, is the question of supply. It is stated that a boat load of Canadian seed recently entered the American market, and a continuation of this will likely mean higher prices. A report that farmers in the prairie provinces will not plant the same amount of acreage next season because of short yield and low prices this year is not yet taken seriously by crushers, but it is pointed out that if a degree of truth is attached to this situation, it will have a firming effect on the market.

In outside markets a stronger feeling is now general, and the trend of seed is upward at the present time, Argentine, Europe and America reporting higher figures. Bye-products are again coming into prominence and higher price levels are recorded on both cake and meal. No doubt this movement is greatly assisted by decreased production, especially in southern markets.

Demand locally for oil now quite seasonable, the improvement in the past week being welcomed by crushers. Previous to this, buying was for the most part covering immediate requirements, which kept the volume at a low figure comparative with past seasons. Following are quotations at the revision:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots per gal.....	1 00	1 02
3 to 5 barrel lots, per gal. ...	0 98	1 00
Less barrels, add 10 cents per gallon.		

NEW CROP AFFECTS TURPENTINE QUOTATIONS

Montreal

Current turpentine quotations show a reduction of four cents per gallon this week in most quarters, while a few firms are quoting slightly in advance of $1.17 per gallon. The easier tendency, reported as likely to develop last week, owing to prospects of new crop in the south, now reflects locally, and the present easier prices did not come as a surprise notwithstanding local stocks are still comparatively low for this season of the year.

Southern markets are also described as a little easier, with somewhat heavier receipts now available. The new crop, which had been temporarily hampered by unfavorable weather, is now showing better progress, and it is stated that even lower prices would not be surprising if offerings increase. Demand, however, should also be heavier from now on, and to assist in this direction is the report that a heavier buying movement from Europe is expected at any time.

The local situation, insofar as shipments of new supplies are concerned, is expected to improve now that the South reports more ample offerings. Following are revised quotations:

TURPENTINE—	Imp gal.
1 barrel lots	1 17
2 to 4 barrel lots, per gal	1 16
Broken lots	1 27

SHELLAC UNDERTONE IS STILL ON FIRM BASIS

Montreal

The firm undertone in shellac owing to the unsettled situation at sources of supply still features the market. More recent reports from India state that while political situation has slightly improved, it will no doubt take some time before stocks in that country can be replenished. A shipment has just recently reached this side, but this was soon disposed of as stocks have been exceedingly low. Locally stocks are gradually becoming less, and while the shortage is not seriously felt, the question of supplies at a little later date, if improvement is not in sight, is beginning to receive consideration. Quotations are unchanged, with a variation existing among the different distributors.

SHELLAC—	
Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White, in 5 gal. jugs	5 10
Do., in one gal. jugs	5 40

LITTLE CHANGE IN WINDOW GLASS MARKET

Montreal

Trade in window glass is stated to be of a moderate nature, showing little change in this direction in the past few weeks. Building construction is not yet advanced to the stage where any great volume of glass is required, and distributors point out that some little time will still be necessary before this factor improves the movement to any extent. With navigation now opened to this port there is some speculation concerning the future trend of glass. Lower transportation costs are now obtainable, which naturally causes a slightly easier tendency on imports. It is also pointed out, jobbers have sold on import at lower prices than are now ruling, and this will have its effect on stock quotations. Whether a price development will occur is impossible to say, but it is thought that if a change is forthcoming, it should develop during the next few weeks.

AUTO ENAMEL

The Flint line of Auto Enamels is designed especially for the car owner who desires to refinish his car himself. This line is made under the same supervision as the finishes we turn out for the automobile industry. Flint Auto Enamels flow out evenly, have good hiding power and do not show brush marks.

Have this line on your shelves and be ready to supply the increasing demand of car owners for refinishing material. Write us for our attractive Spring proposition.

Toronto

TORONTO, April 27.—Linseed oil provides the centre of attraction on the current paint markets with an advance of five cents per gallon. This change is attributed to the increased demand for oil, coupled with the strengthened position of flax seed and higher prices on the seed markets. Turpentine continues to demand attention, a wide range in local quotations having appeared through certain distributors maintaining the previous levels, while other sources quote easier levels based upon primary market tendencies. The future trend in turpentine is faced on the one hand with the arrival of the new crop with consequent increased supplies available, while improvement in demand coupled with larger domestic consumption is expected to become apparent. Shellac continues to remain firm, many local distributors withholding prices, while sources of supply have failed to register any marked improvement. The seasonal activity in paints and varnishes is described as more satisfactory, repeat orders now coming to hand in larger volume which serve to substantiate earlier expectations of both manufacturers and distributors. Window glass is experiencing a moderate demand, the development of building activity not having yet reached the general stage where glass is required in more generous quantities.

PAINT AND VARNISH ENTER POPULAR ACTIVITY

Toronto.

The seasonal movement of paints and colors is now generally reported as gaining in momentum each succeeding week, and earlier expectations of brisk trade in varnishes and allied paint products are being realized. The advent of warmer weather has stimulated the incentive to paint up, while the yearly Spring clean-up campaigns in various cities and towns throughout the country are generally looked upon as materially assisting in the consumer interest in the value of paint. An active Save-the-Surface campaign is also being promoted in conjunction, with both manufacturers and distributors now reporting better bookings. Repeat orders are also looked for, while in addition to existing opportunites for paint sales, the general building activity is expected to provide additional openings for satisfying paint requirements. Prices have remain unchanged, with the market undertone steady.

CONSIDERABLE RANGE IN TURPENTINE PRICE

Toronto.

Considerable variation is apparent on the local market in prices quoted on turpentine this week. No direct changes have been announced, with the previous level of $1.30 remaining in effect, but prices ten cents per gallon or more below this have been recorded. The southern primary centres recorded easier quotations this week, due to the trade in turpentine, pending the movement of the new crop. Consumers have been purchasing as current needs demand, and generally appear to be waiting the period when supplies will be more plentiful at production centres. The domestic movement has been described as fair for this season of the year, with local stocks more or less depleted. This condition is reflected in price levels, as where stocks are normal, or nearly so, lower prices prevail, and in quarters where supplies are more or less restricted, the scarcity of the product conduces to maintain higher quotations. With the price at Savannah reacting a few cents, due to the limited volume of business and the anticipation of fresh receipts, the future developments will be closely watched in view of certain expectations regarding increased domestic consumpton, coupled with activity in export shipments. Following are the average of quotations noted on the local markets:

TURPENTINE—	Imp. gal.
1 barrel lots	1 25
2 to 4 barrel lots	1 24
5 gallon lots	1 40

Less than 1 barrel lots—15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

FIVE CENT ADVANCE ON LINSEED OIL

Toronto.

An increase of five cents per gallon in the price of linseed oil has developed on the local markets, this change being attributed to the firmer position of flax seed combined with an improved demand for oil. The variation in quotations, however, whch has recently been noted locally, is still evident, prices having been recorded at the previous level of $1.05. The advance, however, places the figure of $1.10 for raw and $1.13 per gallon for boiled on one and two barrel lots now generally in effect. The linseed oil markets have registered a steadier tone in sympathy with the advances on flax seed. The demand for oil has also been better, and the resultant interest in seed tends to renew the future strength in this direction. The demand for cake and meal is now described as spasmodic, and with nominal prices on the by-products, crushers state that this condition has an additional tendency to maintain the improvement in oil.

Following are the revised levels:

LINSEED OIL—	Per gallon Raw	Boiled
1 to 2 barrel lots	1 10	1 13
3 to 4 barrel lots	1 09	1 12
6 to 9 barrel lots	1 07	1 10

Less barrels, add 15 cents per gallon.

PITTSBURG MARKETS

(Continued from pags 53)

of which, particularly prices for bars, shapes and plates, had gotten altogether too low, far below the cost of production.

Steel Prices.—Bars, shapes and plates are now very firm at 1.50c, which has been the ordinary market quotation for nearly a month, but has hitherto been subject to more or less shading in the case of particularly desirable orders. Some mills have largely withdrawn from the market by setting their prices at 1.60c or 1.65c, but obtain some prompt business, in small lots, at these figures. Independent wire mills continue to hold nails at $2.50, while the Steel Corporation remains a seller at the old price of $2.40. Hoops and bands are up $2 a ton to 2.00c, the price established just previously by the hot rolled strip mills. There are some purchases of small lots of sheets at the prices as recently advanced, $3 a ton to 2.40c. for blue annealed, 3.15c for black, 4.15c for galvanized and 4.50c for galvanized sheets, but the amount of selling and contracting done before the advance now seems larger than was at first estimated. This develops from the fact that some sheet mills, that use purchased sheet bars instead of making their steel themselves, have been in the market to buy sheet bars, not having embraced fully their opportunity in March to buy sheet bars at the then market of $29, against their sales of sheets at the old prices. Apparently they thought they could advance the sheet market without the steel mills advancing sheet bars in turn. The lowest quotation on sheet bars is $33 as on account of the coal strike the steel mills are disposed to save their steel making capacity for their own finished products.

Further stiffening in the steel market, quite likely with some definite price advances, is in prospect, due both to the coal strike directly and to the general change in sentiment whereby there is a sellers' market in steel instead of a buyers' market. Taking steel products as a whole, purchases made in the first three months of the year are going to prove distinctly profitable.

The strength of the steel situation at the moment, and for the nearby future, is well recognized although the more conservative observers have strong doubts as to its permanence. In many quarters one hears the opinion expressed that the movement has come about six months too soon and that, but for the possible saving influence of the coal strike, it was almost certain to have an inglorious ending this summer.

Pig Iron Much Higher.—In view of the producers' claims that recently pig iron has been selling at far below the cost of production, it is entirely natural that the great majority of the furnaces in this general territory should have withdrawn from the market when coke supplies were so greatly reduced by the Connellsville region strikes.

Three Winning Features

C. C. M. Triplex Hanger — Hercules Brake — New Gibson Pedal

BESIDES many other good points, C. C. M. Bicycles have three winning features that will speed up sales.

The C. C. M. Triplex Hanger is the smoothest-working power plant ever put on a bicycle. It makes pedalling easy—gives more speed—and pep—and power!

The Hercules Coaster Brake—"The Little Fellow With the Giant's Grip"—is always sure in action. And it has no clumsy side arm.

And on this year's adult models, at no extra charge, there's the new **Gibson Pedal.** Wonderfully light, yet very strong. It has an aluminum frame. And it won't rust. There's some class to it.

These three big features, with the new reduced prices, will clinch bicycle orders for C. C. M. dealers this season.

ORDERS

IS the machinery you have been using for the past 3 or 4 years to get orders—is it getting rusty?

Are you satisfied you have the harmony in your organization that you should have?

Do you feel that your salesmen are fighting every inch of the way for business and as happy in their work as you would like to see them?

Is there the proper co-operative fighting spirit?

The Fault May be Yours?

Your salesmen, and wholesalers who help sell your goods, have a right to expect co-operation. They have a right to expect that the house they are selling for really believes that good business is to be secured. They have a right to question if the whole responsibility of selling should be placed on them. Advertising is the strongest co-operation you can give them to show that you believe in your business. Powerful copy consistently running in your dealers' specialized business paper, will stimulate dealers' interest in your goods; will encourage the salesman in his work; will help to make him a fighter, —and to sell more goods. And you know when you can get the influence of the progressive dealer behind your goods you have the biggest merchandising force in the country working for you.

Let HARDWARE AND METAL help you get the fighting spirit in your sales organization and help you line up 4,000 progressive merchants behind your goods.

TINKER TOM'S TALKS

No. 356

A Reliable Coating

One of the best reports on the value of a heavy coating of zinc on steel—commonly known as a "galvanized sheet" has recently been issued by the Research Department of one of the large zinc producing concerns.

We emphatically approve their finding that it is not the shiny mirror surface that counts for durability—and you'll find that every "Premier" Galvanized Steel Sheet lasts longer in actual service because it has the weight of coating properly applied. "Looks are only skin deep."

TINKER TOM.

How To Save the Surface Is the Important Point

Meakins Brushes

Are The Important Factor

Everyone admits the truth of the Surface Saving theory, but how shall the surface be saved? Paint or Varnish, is the natural answer. But a faulty coat of paint is no security. One defective spot in the protecting film of paint opens the way to weather attacks.

For successful surface protection it is essential that the paint should perfectly protect the surface, and Meakins Brushes, because of their superiority, are the best assurance of a perfectly applied protective film of paint.

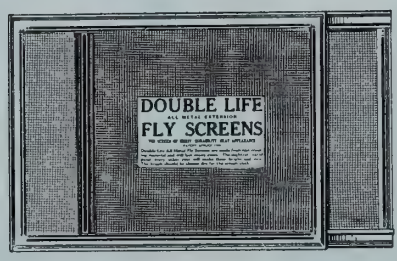
Order Now. **We don't think, we know**

DOUBLE LIFE ALL METAL EXTENSION

FLY SCREENS



PATENT APPLIED FOR

are superior to others because nails, solder, tacks or rivets do not enter their construction. They cannot fall to pieces, they are electric welded together. They slide easy. Not subject to weather conditions as they are enameled inside and out. And are the same height all along. Many other good features also.

THE SCREEN of MERIT, DURABILITY, NEAT APPEARANCE

Contrast the Burrowes all metal green enameled fly screen (which admits 20% more light) with the old style large rimmed screens that warp, get weather worn, bind and twist out of shape.

12 sizes packed in cartons. Write for discounts.

SKI-BUYERS LOOK FOR THIS TRADE MARK

If you sell NORTHLAND SKIS, you know it helps to make easy sales for you. Keep your stock complete. If low, mail order today. Prices 1-3 under last year's.

World's Largest Ski Manufacturers

NORTHLAND SKI MFG. CO. 23 MERRIAM PARK, ST. PAUL, MINN.

OUR EAVETROUGH AND CONDUCTOR PIPE ARE NOTED FOR THEIR EASY FITTING QUALITIES.

Now is the time to order conductor elbows, ridge roll, valley iron, corrugated galvanized iron roofing and siding. All kinds of eavetrough and conductor pipe accessories, galvanized iron sheets, etc.

We ship while others are thinking about it.

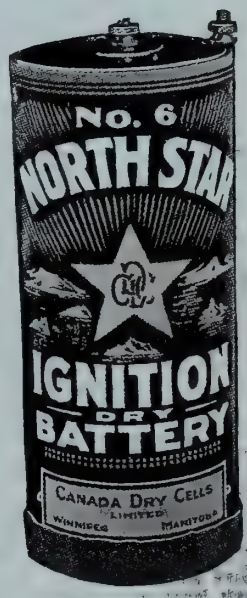
WHEELER & BAIN, LTD. TORONTO

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Guaranteed to Give Satisfaction

We guarantee full satisfaction to users of North Star dry cells and multiples, and any battery failing to live up to such standards will be replaced by us.

The added satisfaction your customers will get from North Star batteries you sell them will be reflected by the steady turnover and multiplied profits you get.



NORTH STAR MULTIPLES

are built for heavy duty ignition work. This is the season when you can sell them.

Ask your jobber.

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

Everlastic Liquid Roofing Cement

Everjet Elastic Carbon Paint

Everlastic Asphalt Multi-Shingles

Wherever there's a roof, there's a Barrett customer—

Nobody wants to put on new roofing unless he has to — he'd much rather make the old roof last longer. That's why dealers everywhere are making big profits on Barrett Roof Repair materials.

It will pay you to tell your customers about these famous products — how they put off the expense of new roofs. Your efforts plus our advertising in the leading newspapers, farm and technical publications are sure to bring quick sales and good profits. Is your stock of these two well known Barrett products ample?

Barrett Plastic Elastigum Patching Cement

This tough, elastic, waterproof cement is the best and quickest cement for all kinds of patching. It has the consistency of thick molasses and is easily applied with trowel or putty knife. Adheres to any surface — wet or dry.

Plastic Elastigum forms an air-tight, water-tight joint or patch that is proof against the action of steam, fumes, acids and alkalies. It is widely used for waterproofing gutters, stuffing cornices — for flashing work of all kinds, and for damp-proofing parapet and fire walls, etc. Can be used on metal, stone, wood, concrete, glass, terra cotta, etc. Put up ready for use in standard sized packages from 1-lb. tins to barrels containing about 600 lbs.

Plastic Elastigum being used to repair an old roof

Barrett Liquid Elastigum

Recommend this preparation to customers whose roofs are beginning to show signs of wear. It is unequalled for reconditioning roofing of all kinds—"rubber," felt, and metal.

Forms a smooth, new waterproof surface that gives new life to a roof—stops small leaks and holes—reinforces the weak spots.

Liquid Elastigum is composed of time-tested waterproofing oils mixed with asbestos fibre. It is easy to apply with either brush or squeegee, dries quickly, and stays tough and elastic. One gallon will cover 100 to 250 square feet, depending on the condition of the roof. Comes all ready for use in packages ranging from 1-gallon tins to 40-gallon barrels.

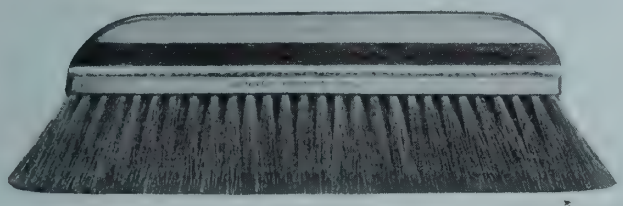
Operated by
THE CANADA METAL CO., LTD.
Toronto

Hardware and Metal is the only paper in Canada giving a weekly market service on hardware, metals, paints, varnishes and other lines allied with the hardware trade.

Hardware and Metal is the only hardware publication in Canada with circulation audited by the Audit Bureau of Circulations.

Hardware and Metal is the only weekly hardware paper in Canada.



Paper-Hanging Time Is Here

BEFORE another day passes check up your stock of brushes to anticipate the increased demand for Paper Hangers' brushes, Paste brushes, Wall brushes, Kalsomine brushes, Whitewash brushes, etc.

Order "Canada" brushes and you can honestly say to your customers "Better Brushes for all purposes" and rely on the performances of these brushes to live up to that claim.

The superiority of "Canada" brushes is known to painters all over the Dominion—that's why they mean prestige, profits, and satisfied customers to the dealers.

Manufactured by
Canada Brush Co., Limited
Head Office and Factory

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

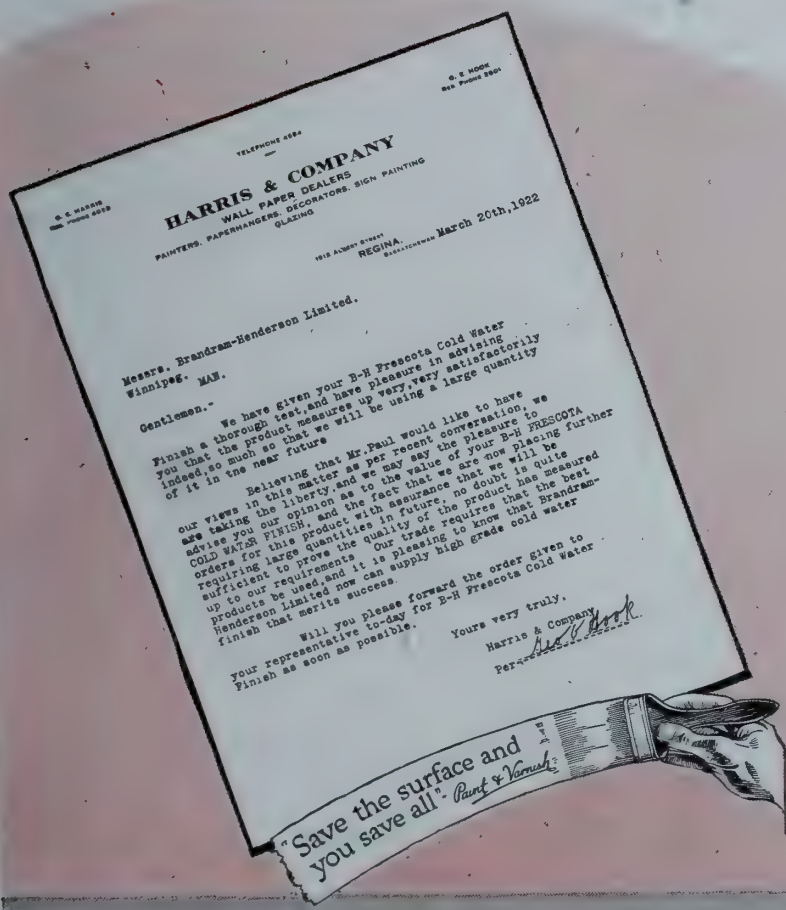
FRESCOTA

COLD WATER FINISH



HARRIS & COMPANY
WALL PAPER DEALERS
PAINTERS, PAPERHANGERS, DECORATORS, SIGN PAINTING
GLAZING
1918 Albert Street
REGINA, Saskatchewan March 20th, 1922

Messrs. Brandram-Henderson Limited.
Winnipeg, Man.

Gentlemen:-

We have given your B-H Frescota Cold Water Finish a thorough test, and have pleasure in advising you that the product measures up very, very satisfactorily indeed, so much so that we will be using a large quantity of it in the near future.

Believing that Mr. Paul would like to have our views in this matter as per recent conversation, we are taking the liberty and we may say the pleasure to advise you our opinion as to the value of your B-H FRESCOTA COLD WATER FINISH, and the fact that we are now placing further orders for this product with assurance that we will be requiring large quantities in future, no doubt is quite sufficient to prove the quality of the product has measured up to our requirements. Our trade requires that the best products be used, and it is pleasing to know that the Brandram-Henderson Limited now can supply high grade cold water finish that merits success.

Will you please forward the order given to your representative to-day for B-H Frescota Cold Water Finish as soon as possible.

Yours very truly,
Harris & Company
Per Geo. C. Brock

"Save the surface and you save all" Paint & Varnish

The letter reproduced herewith is an evidence of the high regard in which Brandram-Henderson Frescota Cold Water Finish is held. From coast to coast our dealers report record sales and thoroughly satisfied customers.

B-H Frescota has exceptional sanitary qualities. It is easily applied and is most satisfactory for wood, brick, stone or any solid surface except iron.

B-H Frescota advertising material is on a par with the product itself. Handsome cut-outs—shelf strips and other elaborate features are supplied free to our dealers.

Preserving Season is Just Around the Corner

Are you all "set" for preserving season? Got everything ready to make it the best ever? Going to sell all kinds of kettles and spoons and cullenders and sauce pans?

Our special preserving-time advertising campaign for Diamond Ware and Pearl Ware starts in Canada's best newspapers in a short while. They urge women to do their preserving in Diamond or Pearl Ware utensils.

Sell Your Preserving Utensils in Sets

We advise women to save money by buying their preserving utensils *in sets.* Instead of buying just an odd utensil, we tell them they can get a much better price by buying a complete set from hardware merchants handling SMP wares.

Follow up this scheme. It will enable you to sell more Diamond Ware or Pearl Ware. It will substantially increase your summer turnover and make the profit column bulge.

Don't lose sight of this important little fact. Diamond Ware and Pearl Ware can be bought by the public in one way only—right over the counter!

The Polar Cub Fan

ELECTRICAL APPLIANCES

Good Summer Sellers

As the thermometer goes up thoughts turn to keeping cool and there will be a demand for all kinds of electrical appliances, cooking utensils and labor saving devices. Be ready to cash in, on your customers' desire for comfort by having the stock to cultivate their tastes by the power of suggestion, in your windows, interior displays and newspaper advertising.

The New Hotpoint Water Heater is a splendid summer line—Hot water in one minute from turning on the current. It can be easily attached to any domestic tank and is extremely economical in operation. It will make a decided hit with the housewives these hot days.

The Electric Fan is Another. Easily within the means of any customer with electricity in the home. Display these in action and you will find they have strong magnetic powers to draw customers inside. We carry in stock **The Polar Cub, Nickel Plated Star** and other makes.

We carry a full range of **Hotpoint** best sellers. **Irons, Toasters, Grills, Plates and Percolators.**

In Vacuum Cleaners, The Ohio and **The Cadillac.** Both good sellers and just the things for making lighter work around the home this summer.

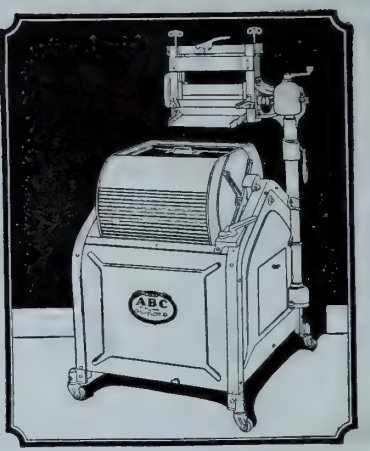
A B C OSCILLATOR

$135

(Retail Price)

Except in B. C. and the Maritimes



Model No. 80-E. A wonderful "leader" at a price that attracts. Full-size, six-sheet copper tub—same heavy gauge as in $200 Super Electric. Same gear assemblies and vital moving parts as successfully used for years in other A B C's. Free from experiment! Quiet, *springless* mechanism. All moving parts safely, yet accessibly enclosed in handsome galvanized iron cabinet. Heavy angle-iron frame—absolutely rigid. Swinging electric wringer. Finished all over in gray. Highest quality throughout—a *true* A B C!

It Helps to Sell the Full A B C Line!

This new $135 full-size, heavy copper tub A B C Oscillator, wherever it is being advertised and featured, is shattering many a sales record!

First, it is a value that attracts a great deal of attention—*a value that actually brings people into a store.* Second, when shown and demonstrated, it is easy to sell—for no other standard make oscillating washer to equal it has yet been offered at the price.

Third, however—and this is the best feature of all!—many of the people who come in to see it can easily be interested in, and sold, the higher-priced A B C models.

As high as three out of every four people attracted by advertisements on the Oscillator are being sold A B C Super Electrics instead!

The Oscillator is the magnet that draws the trade. You, too, could successfully feature it as a "leader"—and in that manner use it to sell all three types of A B C's—Alco's, Oscillators and Super Electrics.

And, by handling the full A B C line, you are enabled to combine your orders and get quantity discounts—which means extra profits for you!

This is the best proposition in the washing machine field today. Look into it—there's no obligation! Write or wire for all particulars.

Are you overlooking this Profit Maker?

THE Bassick Wizard Swivel Socket Caster is designed especially for use on office chairs.

It is equipped with the new patented point bearing with an inner tube to hold the stem in place. This exclusive feature guarantees perfect swiveling of the caster in the socket. It also holds the caster firmly—no chance of it falling out when the chair is lifted.

The strength and operating smoothness of this caster makes it an extremely fast seller and a sure profit maker.

The Bassick Company manufactures all types of casters for every use, for the small chair, for the piano, for trucks; casters for hardwood floors, for carpets, for linoleum.

Write us for more information. You are sure to be interested.

DAVIDSON

Made in DAVIDSON'S GOODS MADE IN CANADA THE SEAL OF DURABILITY *Canada*

Always buy Goods bearing this label

ENAMELEDWARE

The **CLEAN** *Ware*

"MARATHON"	"PREMIER"	"COLONIAL"
Chocolate and White	**Blue and White**	**All Grey**

THE Davidson "Seal of Durability" on any article of Enameledware is the equivalent of the sterling hallmark on silverware.

It denotes a quality and a workmanship which is recognized everywhere as the best.

The dealer who sells Davidson Enameledware has absolute confidence in it, because of his past experiences.

The housewife who has used it knows that for its wearing qualities alone, it is the most satisfactory Kitchen Ware she has ever used.

So it always pays to carry a full stock of these brands, because they create a steady demand and are, moreover, very profitable lines.

If you are not as yet on our books let us send you a sample order.

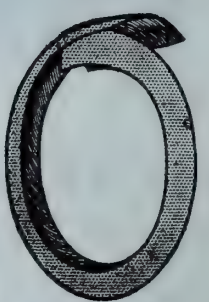
GUTTA PERCHA

Accessories

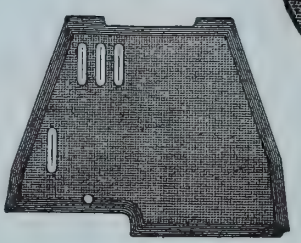
Are Good Salesmakers

Reliners.—When the "blow out" is nearly due, and the "soft-spot" causes anxiety, this handy Reliner comes to favorable attention and effective use. This reflects goodwill to the man who sold it. You'll find their agreeable experience with the Reliners brings you good business in other lines.



Reliners

Windproof Mats.—There are good all-the-year-'round sales for these effective Mats. In winter, they stop the cold draft; in summer, they keep out the odors, dust and heat from below. Supplied in suitable models for Ford Coupes, Sedans and Touring Cars. Fit closely over brake and clutch lever openings.



Windproof Mats (for Fords)

Lace-on Boots

Lace-on Boots.—These give promptly the effective reinforcement needed immediately when a soft spot begins to cause anxiety. They are easily slipped on and held firmly in place with the staunch leather lace through the brass grommets.

Sealtite Patches

Sealtite Patches—A handy, reliable way to avoid long roadstops for punctures. Sealtite Patches are quickly and easily applied with no other tools but the hands. The tube can be used at once. Just having them in the car eliminates the anxiety that spoils many a motor trip. Customers like them.

IMPERIAL Floor Dressing

Does away with dusting -

There is no time for dusting in busy stores—no necessity for it, either, if you use Imperial Floor Dressing. It eliminates practically 90% of the atmospheric dust which would otherwise settle on your goods, show cases and fixtures, and detract from their appearance.

The reason is simple. Imperial Floor Dressing catches and holds dust on the floor, where it is easily gathered up and removed by sweeping. One gallon will treat up to 700 square feet of surface, and one application lasts for weeks.

Imperial Floor Dressing is an economical, sanitary preservative for wood, linoleum or oil cloth. It keeps floors looking like new, and the spick and span atmosphere it creates in your store helps to sell it to its wide market. Let the Imperial Oil Salesman furnish you with details and prices.

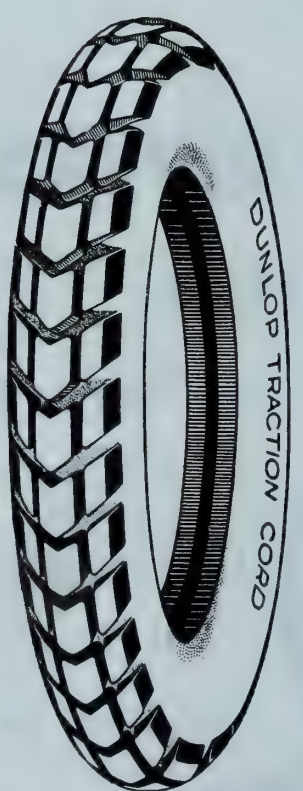
Making "Mile-ionaires"

THESE are great days for the motor car user—in a tire sense. Your dollar never before bought as much. Your speedometer never before registered as much. Your repair kit never was as idle. All because **Dunlop Cord Tires** came and ushered in a new era. Five years ago you paid half as much again for the same size tire; ten years ago you paid twice as much. Prices have been tumbling. Quality has been mounting. One time we thought 3,500 was mileage to boast of; to-day we may run into half a dozen "25,000 milers" in a forenoon. "Dunlop did it" says one enthusiast. "The 'Two Hands' are making us Mile-ionaires," says another; and so on.



The sign "Mileage Wanted" is now changed to "Mileage Supplied"

Reduce Your Selling Costs

Butterfield tools need no general introduction to competent mechanics—they are an accepted standard of efficiency.

"Butterfield's" bring quick, clean-cut sales and save the cost-per-minute of all your store expense—rent, light, taxes, depreciation, clerk hire, etc.

Your customers will likely specify Butterfield—if not, beat him to it—and recommend them.

They lower production costs by increasing each machinist's output, use less power and require less grinding and toolmaker's attention.

The Butterfield variety includes almost every possible need.

Have a Big Store in a Small Town

When your customers board the train to buy in distant cities they seek something they ought to be able to get in their home town.

If you could hold this trade your business would grow more consistently.

Long Distance puts the jobber's and manufacturer's warehouses at your elbow. Spend a cent to earn a dollar. That is the secret of having a big store in a small town.

"Use the Bell to Sell"—and to Buy.

Every Bell Telephone is a Long Distance Station

THE BELL TELEPHONE COMPANY OF CANADA — LOCAL LONG DISTANCE TELEPHONE

FIRE-RESISTANCE

There is no building material absolutely fire-proof. Everything used in building is affected in some way by fire. Wood burns; slate and stone crack; metal becomes so hot it burns the wood beneath. The best that can be said is that a material is fire-resistant.

Brantford Leatheroid Roofing

resists the action of fire. It will not support combustion. Sparks and burning brands falling on Brantford Leatheroid die out without causing the roof to ignite. It is rated by Fire Insurance Companies as "non-combustible" and is allowed a lower rate. Besides it wears long and well. It does not rot nor can it rust. There is satisfaction at low cost in Brantford Leatheroid Roofing.

Compass and Sun - Dial

The Ansonia *Sunwatch*

The Ansonia Sunwatch is a combination Compass and Sun-Dial, in a thin, satin-finished brass case, with longitude, latitude and variation tables on inside of cover, giving corrections for all parts of Canada. (The American Sunwatch is not adjusted for Canadian longitude and latitude.) The Compass is accurate and reliable, and the Sun-Dial tells the correct time anywhere in Canada.

Invaluable to motorists, hunters, fishermen, canoeists, Boy and Girl Scouts, guides and all outdoor people.

It sells for $1.50, and is so attractively made that it is bought on sight.

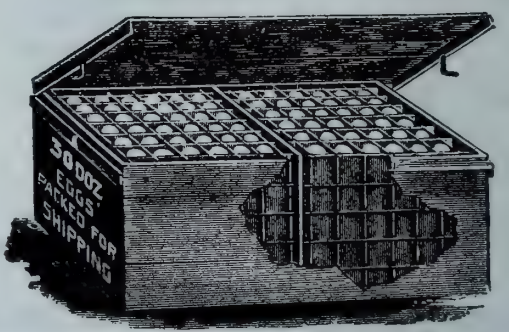
How to avoid Egg breakage



One broken egg in a crate will destroy others—and no one wants to receive a crate with any broken eggs.
For extra long hauls recommend **Special No. 1 Fillers.** They are calendered to a hard, smooth surface. This makes the outside tips answer the purpose of a buffer for any shocks, jars or impacts, transmitting the force from point of impact to the opposite end of the case. This eliminates the strain on the cells and prevents telescoping. Invaluable for ocean shipments.
No. 1 Filler. Very high grade and good for long hauls, but not as strong as the Special.
No. 2 Filler. Should be used for local use only.
Help your customers to buy the right filler to minimize egg breakage.

Budget Changes Alter Hardware Prices

Prices on Domestic Hardware Advance Because of Increased Sales Tax Whereas Certain Imported Hardware Declines in Price Because of Removal of Importing Restrictions—Revision in Wire, Iron and Steel, Etc., May Be Forerunner of Higher Prices

THE TARIFF and taxation changes announced in the budget have been thoroughly discussed by Montreal manufacturers, wholesalers and retailers, and to the hardware trade with a few exceptions the revisions are received quite favorably having in mind the necessity of increased revenue. It is a foregone conclusion that new taxes will arouse protest, and no matter what provisions were contained in the budget, criticism may be expected. However, from opinions expressed throughout the trade, it is generally recognized that the hardware field is quite fortunate in the 1922 tax and tariff proposals.

Increased Sales Tax

The increase of 50 per cent. in the sales tax is now a matter of fact. Preparations are being made by the wholesalers to "get under cover," and the same might be said of the retail trade. To the jobbers, it apparently means an increase in prices on most lines, slight in most cases, but general. As a forerunner, the revision in wire, wire nails, staples, bar iron and steel, which was recorded last week, may be taken as an indication that other commodities are to follow in the same trend. In speaking to one Montreal wholesaler, Hardware and Metal was informed that the revision in these products was announced because a sale usually amounted to a fair sum in comparison with other shelf hardware lines, and the latter would undergo the same change, although it would take some little time before the revisions would be completed.

While in some instances the retail merchant has not yet decided on what procedure will be taken, it is plainly seen that absorbing the higher amount is almost impossible. Formerly the practice of not including the tax in costs, not passing it on to the consumer, was undoubtedly too common, and with a little more thought and time, the retail merchant will not now be obliged to bear the burden that he was carrying previous to the budget.

The Stamp Tax

From its present reading, the Stamp Tax is under much criticism by some, while others seem willing to allow this item to pass with little concern. This extra tax naturally affects the larger business houses more than the smaller establishments, or the retailer. Manufacturers and many hardware jobbers join in the protest to the Government and are anxiously awaiting the outcome of recent deputations. That the Finance Minister will make a drastic change in this direction is hardly expected, but some modifications, such as a flat rate, is thought probable. One wholesaler suggested that a tax of 3 cents on cheques up to $100, 5 cents from $100 to $1,000, with a further proportionate increase for higher amounts, would meet the requirements of needed revenue and would no doubt be more acceptable to all.

With slightly higher prices on most commodities, following the increased sales tax, it is quite obvious that lines of German importations will follow the opposite trend. To allow direct import of German goods means, according to importers, an immediate reduction of approximately 10 per cent. on lines of German shelf hardware and smaller wares. This is for the present; the future trend of these foreign goods is considered problematic. On some, the depreciated currency clause in the budget will not have the material effect that many expect. Productive costs in Germany are on the increase, and it is only natural that she will adjust her prices to higher levels in the existing circumstances. Added to this, one local wholesaler asked the question: "Is it not reasonable to expect that Germany will take advantage of the Canadian tariff revision, and not allow her goods to come in to Canada at ridiculously low prices?"

For heavier goods, lines appertaining to the steel industry, the future result will be watched with interest. Opinions are expressed that because of Germany's inability to supply even present demands, there is little chance of her entering this market to any extent.

Increases Cost of Living 10 and 20 Per Cent.

"We as manufacturers, believe that while the sales tax is the proper method of taxation, trouble and expense would be saved if collection was made from the manufacturer only. By taxing the Canadian manufacturer, and foreign goods at point of import, there would be an appreciable saving in collection expenses alone. There is bound to be leakages in the present method, and a pyramid is formed, with the government making no extra gain, but the consumer losing out. Instead of the consumer paying the amount of tax, I believe a conservative estimate is that the cost of living is increased from 10 to 20 per cent. through the accumulating process," said Royal Cluxton, general manager, Canada Paint Co.

Adding "Plus" Entry to Monthly Accounts

A method of passing the sales tax on to the consumer, and claimed to have worked out satisfactorily during the past year, was explained by J. H. Lambert, proprietor of the Outremont Hardware, 1205 Van Horne Ave., Montreal. This store is located in an outlying section of the city and customers become very well known both to the store proprietor and salesmen, and for this reason a fairly extensive credit business is done with tenants and house owners. Various manufacturing plants are also located in this section, and payment of accounts are only made by these once a month.

Every thirty days each account on the books is forwarded, and to take care of the sales tax 1½% last year a "Plus 1½%" was added at the bottom of each statement. Mr.

Lambert states it worked out quite satisfactorily, and while some of his customers at first complained of it, when fully explained there was little or no difficulty in collecting. Although the entry did not read as a tax, it was explained to the various parties that it was added because the store had to pay this amount, and sometimes more on all goods bought and the government did not expect the retailer to pay. They were also told that the tax was not added in the price of the goods such as was the practice with many other merchants. Certain manufacturing concerns had at first complained, but the difficulty here was soon overcome, they no doubt taking a broader view of it, and realized that they were charged the same amount from the jobber, and a higher rate from any manufacturer with which they did business.

"What about cash sales?" asked Hardware and Metal.

"We lost out on these, but it was not altogether a total loss because we charged 1½ per cent. on retail prices on credits, while we only paid this amount on resale prices. While we realize we were only partially covered, it was better to collect part than to lose all such as many other retailers were doing," replied Mr. Lambert.

It was further explained that an inventive was offered for cash payments in this practice, and he was sure that while it was only a small amount, it was considered worth while by some of his customers.

Not Applicable With Increase in Tax

Although this method could be followed out when the lower tax was in vogue, the recent increase in sales tax would involve too much of a loss for them to continue to absorb even a part. With the tax now 2¼ and 4½ per cent., it was too large an amount to "play" with, and the only reasonable way for the retail merchant to clear himself was to add it to the cost of his goods.

Injures Reputation of "Sheffield Ware"

Report of Trade and Commerce Department for Fiscal Year Shows 109 Seizures of False Measures Were Made—Prices of Sisal and Manila Fibre More Evenly Balanced—Decreased Oil Production—Silverware Manufacturers Handicapped—Metric System

SOME INFORMATION has been secured by Hardware and Metal concerning the operations of various sections of the Department of Trade and Commerce during the last fiscal year which reveals some facts of interest to the retail hardware trade.

During the year 109 seizures were made of false and incorrect measures and thirteen court proceedings taken in which eight convictions were secured with fines amounting to $120, two cases were withdrawn, one case was lost and two are still pending. Five of the cases were for selling short weight. It is pointed out that short weight cannot be adequate y controlled until net weight legislation is passed.

The Inspector of Binder Twine reports twine in all plants and warehouses up to the standard and consumers well satisfied. He reports that manufacturers indicated that the year had been satisfactory, prices of sisal and manila fibre having been more evenly balanced than usual and the transportation of raw material much improved. The quantity of binder twine manufactured in the year amounts to twenty thousand one hundred and ninety-eight tons.

Oil Production

Oil production for the year was not equal to the production of the previous year, severe storms having interfered with oil plants, derricks, etc. A total decrease of 40,000 barrels for the year is reported. Mention is made of the new development in the Mackenzie river district and it is anticipated that big development will take place in the coming season. The total oil production for the period amounted to 6,545,571 gallons or 187,016.11/35 bbls., on which bounty amounting to 98,183,38 was paid.

Gold and Silver Marking

W. J. Ryan, Inspector of the Gold and Silver Marking Act, reports as follows: "Canada has endeavored to emulate Britain in establishing a standard of fineness for her manufactured articles of gold and silver, but being situated closely alongside a country that has no national standard or obligation in regulating the fineness of gold and silver she is somewhat handicapped especially in competition with that country's product. The Marking Acts of Britain and other European countries apply only to gold and silver, and not to materials known in this country as gold-filled, rolled gold plate, gilt and electro-plate, all of which are truly American and in no sense do any of these terms define quality. No Government other than our own has ever attempt to regulate by statute the marking of goods mentioned in the foregoing and I regret to say that section 10 of our Act which attempts to regulate the marking of such goods is far from satisfactory.

Sestion 11 governing the marking of silver electro-plate prohibits the abuse in this country of a practice that the British Chamber of Commerce recently complained of as being common in the U. S., i.e. usurping the marks of British manufacturers, and passed a resolution at their meeting in Toronto dealing

(Continued on page 56)

One Stitch in Time Saves Nine, But— Two Flies in Time Save 1,555,200,00

Dr. Hastings, M.O.H., of Toronto, has issued his annual warning to swat flies. He says:

"Actual figures handed out from Washington and Ottawa, where most careful observations have been made, reveal the fact that a pair of flies starting off on the first of May, if not interfered with, by the first of August, will mean 1,555,200,000 adult flies, one-half of which are females and capable of laying 120 eggs each. Start your swatting early."

Dr. Hastings declares it is now established that house flies transmit not only typhoid, but many communicable diseases. This provides hardware merchants with some arresting "copy" for ads. and window cards to sell screens, swatters, etc.

Garage Accommodation, Curb Pumps Etc. Help Auto Accessory Trade

One Western Hardware Merchant Conducts "Hardware-Motor Inn" Which Invites Prospects for Hardware and Motor Supplies and Suggests a Safe Place for Temporary Parking of Cars—Linking Accessories Up With the Curb Pump

MANY hardware merchants throughout Western Canada have worked up excellent trade in automobile accessories in combination with garages and also as a department of their retail hardware business with a curb pump to attract motorists.

In one of the photos shown herewith a window display of automobile accessories as used by Scroggie & Meyers of Moose Jaw, Sask., appears. It will be noted that this display is in the window closest to the curb pump also shown. The gasoline pump is the first one that motorists reach on entering the city from the south, and linking up accessories by the window displays and by suggesting various lines to motorists while looking after their gasoline and oil requirements, has developed an active business in automobile accessories for this firm.

The two principals of this firm are well aware of the possibilities which exist for the sale of auto accessories and kindred lines, having both traveled Western Canada as commercial salesmen until they commenced business together in 1920. J. M. Scroggie began his hardware career twenty-two years ago with J. H. Ashdown retail store in Winnipeg under the direction of Jim Lindsay. In those days it was an apprenticeship proposition of three years at a salary of $16 per month. From there he went to the McDonald Fleming store in Winnipeg as manager of the builders' hardware department. Mr. Scroggie was later a traveler for Martin-Senour Co., and was consequently Western manager for Pratt & Lambert, Inc.

A. Clarke Meyers, the other member of the firm also traveled the West prior to joining the partnership which forms the present firm. This is the only hardware store in South Hill, a suburb of Moose Jaw, and a population of 5,000 is available for business. Aggressive tactics are applied to each line of hardware, particularly builders' hardware as many customers are working men who construct their own homes or do considerable repair work.

Operates Garage and Hardware Business

Witzke Bros., hardware and garage at Mossbank, Sask., have developed extensive business in auto accessories an is looked upon as one of the most up-to-date hardware and garage businesses in southern Saskatchewan. The layout of the building is admirable for the purpose, as will be noted in the illustration. The building is 80 x 90 ft. and the major portion of it is used for the garage and accessory business. The garage business was a new venture for this firm up until two years ago, before which they carried only hardware. The two businesses are still kept separate as far as accounting is concerned. If anything is taken out of the hardware or accessory stock for the garage or vice versa it is charged up the same as if it were going out to a customer. In this way the expenses and earnings of each department can best be established.

Small Tables a Big Help

In connection with the hardware stock small display tables are found effective. Ten of these are on the floor of the store with small ware displayed and placed where customers may handle it. Prices are given on each line. Customers look over these tables, select what they want and bring it to the counter to be wrapped when the store salesmen are too busy to give immediate attention.

Heavy hardware is kept at the rear, and a complete tinshop is also located in a separate department at the rear of the store. The sign on the front of the store "Hardware-Motor Inn" is meant to be an invitation to the passing motorist to come in for his motor car and hardware needs. Or if it is a traveler or tourist who reads the sign it suggests to him an "automobile hotel" where he can register his car and

(Continued on page 33)

The way in which certain hardware firms are linking up with auto accessory business is indicated in these illustrations showing curb pump and auto accessory window of Scroggie & Meyers, Moose Jaw, Sask., and a combination hardware garage business conducted by Witzke Bros., Mossbank, Sask.

Welcomes all Mail Order Competition

"We Meet All Legitimate Mail Order Competition, and Welcome It," States Montague, P.E.I. Store—Re-built and re-modelled to Assist Towards Better Service, aand Gain Confidence—Enlarged Store With Modern Fixtures Saves Sales Help

MAIL order competition has been met successfully by many merchants, while others are able to cope with it only to an extent. In recent years this competition is perhaps not considered as serious a menace to trade in the home locality as formerly, because of merchants putting forth their efforts in this direction. By educating the people in the locality, pointing out the advantages of buying at home, and for cash, has helped. Actually showing a customer by comparison of prices has been, perhaps, the biggest factor in remedying the situation. Poole & Thompson, Montague, P. E. I., have found that by inviting the customer to compare prices, and announcing the fact that this competition is met to the satisfaction of the purchaser, invariably the sale can be made.

"We meet all legitimate mail order competition, and welcome it," states C. W. Thompson of the above firm. "We mark our goods so as to compete with prices given in the mail order catalogs for goods that can be readily identified. Customers are then invited to bring their catalogs to check prices, allowing us to show them how they can do just as well at home. By advertising in the press, by circulars, and by placards posted throughout the store, we announce that we meet this competition, and invite the public to bring their cash to us instead of sending it out of the locality."

No Price Advantage

When the merchant has educated the people in his community that there is no price advantage in buying from the outside, the would-be customer has little further argument to offer. Reasoning that money sent out of the town or community is lost, insofar as any further benefit can be derived, can often help along educational lines, but a money saving is really uppermost in the minds of those who would purchase. Cash with purchase is all important, and is the only way in which the merchant can deal with the situation. Cash is forwarded to the mail order house in advance, surely the merchant is entitled to cash on delivery.

Meeting prices on hardware commodities listed in mail order catalogs on the whole is not such a difficult problem. True, there are certain lines offered at prices that leave very little margin for the dealer. Usually these are lines where a "special" is shown, and to meet this the merchant is forced to be content with little or no profit. However, his dollars are working, and by sacrificing on one article he invariably gains on others. A mail order is very seldom made out for one item only, but

What Sport is Your Locality Interested In?

Though all summer sports are now being indulged in to a considerable extent throughout the country it is generally found that certain districts specialize on certain sports. The display shown herewith has been very effective in developing business in sporting goods for early summer as it carries a broad appeal. A tennis net has been strung across the back with balls and racquets shown throughout, some in cases and some out of them. Golf sticks and bags, baseball outfits, canoe paddles, flashlights, etc., are all summer sporting needs which are included. The pyramid in the centre adds to the effectiveness of the window. A cup donated to some local team is always helpful in attracting interest of prospects.

usually consists of a selection from the various pages of the catalog. Profit is to be had on the majority of these selected articles, gained by the house, local or outside, who receives the order.

Attractive Store Invites Customer

To be able to keep the interest of the local buying public centred in the home town, Poole & Thompson were convinced that a modern attractive and inviting appearance to their store was necessary, and recent re-modelling and rebuilding has been undertaken. In so doing they have more than doubled their floor space, equipped their premises with modern fixtures throughout, and have taken on the appearance of one of the most up-to-date establishments in the province. Mr. Thompson stated that people were entitled to an attractive display of the lines they were purchasing, and were willing to patronize a neat and well kept store as it offered them something to feel proud of, more so in a small town such as Montague.

With increased floor space, and a general enlarging of the store, also the hope of extending better service to their customers, it would be only natural to suppose that the sales force was also increased. In reply to a question in this direction, Mr. Thompson stated: "No, we did not increase our staff as the layout and fixtures enabled us to do much more business with the same number of salesmen, and at the same time render much better service."

Business with the store has been on the increase each year, and securing a good share of trade that formerly went to outside firms is responsible for a share of the advancement. The confidence of customers, service, and catering to known requirements, playing their own parts in helping to gain this standing. "We attribute the increase in our business to the fact that we have gained, and are endeavoring to hold, the confidence of our customers. We cater to them in every possible way, and try to give a service which we believe is appreciated," is Mr. Thompson's explanation.

GARAGE ACCOMMODATION CURB PUMPS

(Continued from page 31)

find a nice warm place for it on a cold night and be sure of finding it intact in the morning which is not always the case when left on the street.

Witzke Bros. are pioneers in the hardware business in this part of the country having shipped the first car of hardware into the town of Expanse, eight miles north east of Mossbank before the railroad line was completed. Thus it is seen that this firm is a pioneer not only in the respect of having been located in the early days but they are still pioneering in the respect that they are introducing a number of new ideas which promise wider usage in the future.

"Hitting The Nail On The Head" For More Business

Following up Local Prospects Brings Much More Business in Various Lines of Hardware—Where to Look For Leaders—June Weddings and Business

(Written for Hardware and Metal by Major L. L. Anthes. President Anthes Foundry, Limited

IT HAS always been a mystery to the layman how the city daily newspaper obtains the various news items that give us such a fund of information regarding the world's events.

Before I became a reporter some twenty odd years ago I was as much puzzled as anyone else, but after I became "initiated" the "mystery" was a "mystery" no longer.

About this time of the year preparations are under way for the multiplicity of "June Weddings" of which there are sometimes dozens in one day during the leafy month.

In those days, the reporter had a number of reliable sources of information particularly as regards the more imposing events.

What were these sources of information?

Why the florists, caterers and livery stables. The man or woman who was assigned to "weddings" kept in daily touch with the leading people of these trades. As orders for carriages, flowers and refreshments were usually placed a few days ahead, the reporter had sufficient advance notice to obtain his details and his "story" for the paper was usually "set up" and "held" for the day of the "big event."

Well, what has this got to do with selling hardware?

I'll tell you.

In a little town less than fifty miles west of Toronto, a well-known merchant has his store on the main street of the town, this being the main artery of the country.

Almost any day during the winter and inclement weather "Billy" the proprietor, can be seen on the inside looking out, and in fair weather, on the outside looking around.

One day I was standing on the outside with "Billy" discussing things generally when he suddenly said "Excuse me," and made for a load of lumber which happened to be crossing the intersection of the main street half a block away.

"Are you building a house?" I asked him on his return. "No," he answered. "I just wanted to find where that load of lumber was going."

Then he explained to me that he kept tab on the movement of all building supplies in his township and as a result he always had advance information on new residences, rural and otherwise. This information he followed up and in the majority of cases talked the builder into placing considerable business with him.

He was doing exactly what the reporter was doing when he went after information on "weddings."

They were both using simple but effective business methods, which required only alertness, quick action and perseverance.

This same simple business expedient, if put into practice and continued would keep every merchant in the country busy, and they all could have an attractive store and a comfortable home like my good friend Billy.

Keep in touch with the building supply men, planing mill operators, brick-makers and other kindred tradesmen in your locality, and the success of the big daily newspaper will be to you no longer a "mystery."

TO MANUFACTURE PRODUCTS IN CANADA

Announcement is made by the Alemite Products Co., of Canada, Belleville, Ont., that they are planning to manufacture in Canada the Dole line of products comprising, double compression couplings, compression shut-off cocks, needle seat straight priming cups, angle cups, and gasoline shut-off cocks. These goods have previously been produced in the United States.

Electrical Manufacturers Say Hardware Trade a Electrical

THE PUBLICATION "Electrical News" which is highly regarded among the electrical trade which it serves and the editorial opinion of which is generally well balanced, has unfortunately run wild in its recent expressions in connection with the distribution through the hardware trade of electrical equipment. Its recent exhortations to the electrial industry to eliminate the hardware trade from the sale of electrical goods represent a wrong perspective or viewpoint on the subject due either to an unfortunate lack of data which this paper should have at its disposal or a wilful desire to pass over facts which should be taken into consideration on the subject, the desired result being to guide electrical business into unnatural channels of distribution.

Some excerpts from editorials appearing in Electrical News on this subject are given herewith.

Concerning the reported action of the Ontario Retail Hardware Association in securing from electrical manufacturers a statement of policy in regard to their business the statement appears "this quotation indicates that electrical manufacturers are not finding the hardware store as satisfactory a medium as formerly, or as they expected, and are withholding patronage. This is a foregone conclusion of course, but it is happening sooner than most of us expected."

This editorial continues "the fact is that electrical manufacturers never seriously considered using the hardware store as a permanent sales medium. It has been mutually satisfactory to do so temporarily—while the electrical merchant was getting his second wind, so to speak—but for an ultimate outlet for his merchandise it is safe to say we believe that such a thing was never contemplated by the electrical manufacturers."

Hardwareman is Shrewd

Proceeding further the article gives the hardwareman credit for being shrewd in that he has realized the attractive appearance of electrical goods and has been quick to see the value of these goods as a "shop front for their own rather unattractive stock."

The article continues "That is the end of the interest most hardware merchants take in electrical equipment. They are not good electrical merchants. They have no sympathy with the electrical industry. They don't understand the uses of the goods they sell. They are unable to arouse enthusiasm in their customers over their electric purchases. They are poorly equipped to give service. In a word, they are a make-shift as electrical merchandisers and are merely used because they seem to promise better results, temporarily, than the drug, millinery or grocery store, so filling up the interval while we are developing real electrical merchants."

Another editorial states: "If manufacturers and jobbers continue to encourage hardware stores to sell electrical goods and sit back and wait for the electric stores to develop of their own accord, it may be a long time before the retail end of the industry is able to stand on its own feet."—"The sooner we eliminate the hardware store from the electrical trade the better for everybody concerned."

Dealing With Facts

When the hardwareman is given credit for aggressive merchandising, for shrewd buying and selling and for taking advantage of every opportunity for selling goods, the editorials in Electrical News are dealing with actual facts, and hardwaremen will not object to being held up as an example to electrical contractor dealers of what can be accomplished by such methods. But when radical action is called for to eliminate the hardware trade from selling electrical goods, and when the hardware merchant's ability to sell such lines is scorned, this editorial opinion must of necessity lose much weight because it is not founded on fact and fails to represent current practice. Furthermore its efforts at confining the distribution of electrical equipment are not in line with today's principles of business.

Hardware merchants have been prominent in the sale of electrical goods in future will no doubt result in and towns throughout Canada hardware merchants have been the pioneers in introducing electrical lines and still retain the biggest volume of local trade in such equipment. Where lines are sold which require any amount of service such as electric lighting systems, stoves, etc., arrangements are made in most cases to give intelligent service, and if such were not being given the sale of electrical equipment through the hardware trade would hardly continue to increase as it has been doing steadily for some years. Then there are hundreds of hardware merchants selling electric toasters, percolators and other small appliances on which service is reduced to a minimum.

On the Wrong Track

As the Electrical News truthfully reports, the hardwareman is unexcelled when it comes to merchandising and the continued application of this ability to the sale of electrical goods in future will no doubt result in further increasing the volume of electrical business done by him. Taking the opposing viewpoint the Electrical News points out that it is safe in believing that electrical manufacturers never seriously considered using the hardware store as a permanent sales medium but as a temporary medium while the electrical merchant was getting his second wind. On the contrary letters which have been received from electrical manufacturers on this subject reveal the greatest appreciation of the hardware trade in the distribution of their product and a permanent medium of distributing an increasing volume of electrical equipment.

In view of the opinions expressed by these manufacturers hardwaremen do not feel their position is at all insecure. As a matter of fact the retail hardware trade of Canada has so firmly established itself in the distribution of electrical equipment that should these manufacturers do the illogical thing which the Electrical News desires, these retailers would secure supplies from other sources and no doubt there are plenty of manufacturers of electrical supplies who would be only too glad to make use of such important and extensive facilities for the distribution of their product.

Permanent Outlet For An Increasing Volume Of Supplies

That Canadian manufacturers of electrical goods have the highest appreciation of the retail hardware trade as a permanent and important means of distributing their product is indicated in the following letters from practically all manufacturers in Canada as received by the Ontario Retail Hardware Association:

HARDWAREMAN DESIRABLE AND LOGICAL MEDIUM

"Gentlemen:

"Whilst we know nothing of the movement referred to we are not unwilling to state our views for your information.

"We consider the hardware merchant a desirable and logical medium for the development of propaganda to consistently interest the general public in the most modern applications of electricity. As far as our manufacturers are concerned, namely, electric lamps and flexible conduit, we shall continue to consider the hardware merchant as a desirable and satisfactory customer, and would be glad to have the members of your own and other hardware associations make their members aware of our views.

"Without knowing the actual reasons for the movement to which you refer it would seem from a business viewpoint that any such movement to restrict merchandising and advertising methods is more likely to act as a boomerang to the detriment rather than to the advantage of those promoting it and for that reason appears to us to be a somewhat short-sighted policy."

HARDWARE TRADE IMPORTANT

"Gentlemen: It has been our policy in the past to sell to both hardware and electrical trade and wholesalers and we see no good reason why we should change our policy in this regard. We have always looked upon our hardware connection as important and worthy of every consideration."

HINGES ON STORE ITSELF

An electric washer manufacturer writes:

"Dear Sir: Our experience is varied. In some places we have good local representation through a hardware store, while in other places our interests are looked after by electrical stores.

"We consider that the decision hinges on the store itself.

HARDWARE DEALERS GOOD OUTLET

A manufacturer of electric heating appliances writes:

"Regarding the sale of electrical appliances through the hardware merchant, we wish to advise that we consider the hardware dealers a good outlet for electrical appliances.

"It is quite obvious that in order to make a success in selling electrical appliances, a dealer must be in a position to give service, this is very important, and if taken care of, we are perfectly satisfied with that retail outlet."

HARDWARE MERCHANT IMPORTANT AND VALUABLE OUTLET

"We have not planned to change our policy regarding the channels of distribution of electrical appliances. We have found the hardware merchant a very important and valuable outlet for our appliances providing, of course, he can take care of the servicing required in the handling of these goods."

HAVE ALWAYS SOLD HARDWARE TRADE

"Dear Sir: We have always sold the hardware trade and found them good outlets in the main for our merchandise.

"We believe, however, that where the hardware stores are desirous of handling electrical appliances they should have someone in their organization with sufficient knowledge of electricity to see that they are installed and sold under proper conditions and then be able to render proper service on the appliances that may be required."

RESTRICTION OF SALES NOT FEASIBLE

"Dear Sirs:

Re restriction of sales of electrical appliances to electrical dealers, please be advised that we have heard very little about this move.

"Personally, we do not think that it is feasible on the part of the electrical contract dealers to induce manufacturers to restrict the sales of electrical appliances exclusively to the electrical dealer. We ourselves enjoy too much business outside electrical appliances at the hands of the hardware dealer to make it posible to withhold from them the sales of such a commodity as the electric washing machines we make. As a matter of fact the splendid introduction so far of our washers has been largely through the hardware dealers both in the provinces of Ontario and Quebec. We are sure, to try to restrict the trade in this commodity to electrical dealers would hurt our business considerably and therefore we could not be a party to it."

KEEP ALL SOURCES OF OUTLET OPEN

"Gentlemen: It is not our intention to discontinue selling our appliances through the hardware trade. We believe it is necessary at this time to keep all possible sources of outlet open.

"It has been suggested, however, by our association that a greater success would be made of the appliance business by hardware merchants if they would give better attention to service after goods are sold, as if any criticisms were to be made of their handling these goods in the past, it would be in connection with the service or the lack of service."

GOOD HARDWARE ACCOUNTS

"Gentlemen:

We have not had any of the electrical contractor dealers approach us individually, or as an organization, protesting against the sale of our electrical appliances to the hardware dealer. We have some good accounts with both the contractor and the hardware dealer, which are appreciated. We hardly believe that any such action as your letter conveys could be seriously contemplated or successfully carried out."

SUICIDAL POLICY TO REFUSE TO SELL TO HARDWAREMAN

"Dear Sir:

"Your letter of the 15th instant, is the first intimation that there has been any concerted action on the part of the electrical contractor dealers to induce manufacturers to confine sales of electrical supplies to the exclusive electrical dealer. As you are aware, our distribution is entirely through the hardware channels and, needless to say, we have no thought of changing our selling policy as regards electric washing machines. In fact, to do so would, looking at the matter from purely a business standpoint, be a suicidal policy on our part."

HAS MORE SUCCESS WITH HARDWAREMEN THAN ELECTRIC DEALERS

"Gentlemen:

"In your letter you draw our attention to the fact that there is a movement on foot to market all electrical equipment through the electrical dealer. We heard of this movement some time ago on the other side of the line but as yet we did not know that the movement was making any headway in Canada.

"We can assure you that it is not our intention to in any way discourage the hardware dealers of Ontario from handling our electric washer. Our experience has been that the hardware dealers, in the small towns especially are very highly regarded by the buying public. We know that if we failed to put our goods across with the retail hardwaremen we stand very little chance of making a sucess with any other class of dealer. Our policy in selling electric washers has been to sell the hardwareman in each town if possible. If we fail to sell a good live hardware dealer we go next to the electrical dealer, but we find that in the majority of towns we have more success with the live hardware merchants.

"We might go on and explain just why we consider the the hardware trade the most satisfactory but we do not think that this is the time or the place to go into that question. Some time when the writer has a chance to talk to you personally he would be willing to give you some very interesting details as to the difference we have found between the two classes of trade.

"We wish to express our appreciation of the work that the Hardware Association is doing in Ontario and also to thank the officers of the association for the courtesy shown to our representatives at the Hardwaremen's Convention held at Hamilton last winter.

"We wish you every success in your work."

SHOULD ENCOURAGE ALL CHANNELS

"Dear Sir:

"Your letter of May 15th to hand and very briefly we may reply to the effect that we believe that the manufacturers of electric goods should keep open and encourage as many channels of sale for their goods as possible."

Steel Trend Affecting Hardware Prices

HIGHER PRICES on iron and steel, chiefly bar products, in Toronto district this week indicate that the range of increased prices as commenced in Montreal last week is steadily widening in effect. These increases are no doubt due in some part to higher prices on coke, scrap, pig iron, etc., but primarily the situation seems to be considerably affected by the coal strike. Higher steel prices are already being reflected in hardware prices in Canada, shovels, scoops and such lines increasing five per cent. this week.

The increase in prices now quoted in Canada on iron and steel correspond with the first increase made by U. S. mills due to the coal strike. The fact that a second increase has been made on these products by U. S. mills this week may be significant of action to follow in this country. Producers are being forced to use a larger percentage of high priced coal thus raising costs. The only check on prices is said to be the policy of the Steel Corporation in adhering rigidly to the present sheet and tin plate prices on third quarter business. On sheets, however, this action is limited to July shipments and after that the market for sheets will be subject to current conditions.

That immediate requirements for steel have been fairly well met seems to be indicated by the fact that though prices are very strong at base rates, there is not as much paying of premiums to secure early delivery as was expected. In some cases a postponement of delivery until after lower freight rates on iron ore come into effect is being sought. The probability of lower freight rates on iron ore, pig iron, billets, wire rods, scrap iron, etc., within the near future in Canada, as outlined by railway authorities in connection with the hearing being conducted at Ottawa, will probably have a somewhat similar effect in this country.

Hardware Costs Move in Both Directions

NO VERY drastic changes are likely to be made in connection with the tax and tariff changes made in the budget as result of the debate which is now in progress in parliament. The hardware trade in its various branches is putting the new regulations into effect with a minimum of friction though some of the provisions are having considerable effect on prices. It is an odd result of the application of the new Sales Tax and the cancelling of the Marking of Imports and Depreciated Currency regulations that prices on domestic hardware are advanced while corresponding reductions are being made in imported hardware from countries whose currency is much below normal value. This is but a natural result of the cancelling of these regulations because in the case of German hardware, while formerly imports direct from that country bore duty at the rate of nearly 1,000 per cent. on some lines, these are now admitted under the average 35 per cent. general tariff.

Another result of the enforcing of the regulations has been to increase prices to the consumer on many lines where formerly the merchant absorbed the tax. Investigations made by Hardware and Metal this week among retailers indicate that in many cases the retailer is being forced to pay the Sales Tax to the whole saler for the first time, the latter having decided to collect it rather than absorb it themselves, and the retailer in turn is passing it on to the customer. This is as the government intended it should be, but difficulty is still encountered on certain lines where resale prices are established. One hardware merchant quotes the price on the article minus the amount of the tax and when a counter check is being made out for it the amount of the sales tax is shown separately. He finds that losses of sales under this method are very light and that people have become so accustomed to paying a few odd cents on amusement tickets, etc., that they soon realize what the odd amount is for and that it must of necessity be paid. This renders the tax somewhat similar to the luxury tax which other merchants had so much difficulty in collecting but the sales tax percentage is so much smaller than the luxury tax that this policy might be followed with little difficulty and much advantage to the retailer.

Can Stimulate Business to Aid "Slump"

"THE ONLY man to suffer from a summer slump this year will be the man who thinks people spend all summer in a hammock."

The foregoing truth will be worth bearing in mind by all business men during the next few months. If this is done the wheels of industry will not slow down during the mid-summer months but keep business active and prepare the ground for better business in the latter part of the year.

A great deal of preaching has been done by business experts that the return of active business on a profitable basis can be assisted a great deal by aggressive merchandising action on the part of retailers. No doubt every retailer has been putting forth greater effort for business in the last year than for some months prior to that time, but in many cases there must be a lack of appreciation of the amount of energy which is required to stimulate business.

The result of this situation was clearly demonstrated to a representative of Hardware and Metal who made some investigations among the trade in various parts of Ontario this week. The fact was revealed that of the merchants called upon about thirty per cent. reported the turnover of merchandise for the past six weeks to be in advance of that of the best year in the past. In certain other cases where only the value of turnover was known it was reported that this was within fifteen or twenty per cent. of the value of turnover for the best equivalent period in the past. With the decline in hardware prices it is therefore evident that the actual turnover of merchandise was probably as great as the best equivalent period.

In other cases merchants complained of poor business, of unemployment, of high prices, etc., and reported business to be in a very bad state. A closer investigation revealed the fact that the former merchants were turning such factors as unemployment to good use and utilizing every possible selling help. This comparison was sufficiently extensive to prove that despite average local conditions business could be greatly stimulated providing the right methods were used. To avoid that "summer slump," thought should be given now to methods of stimulation.

Better Hardware Movement in B.C.

Wholesalers and Retailers on the Coast Report More Activity and Better Tone to Trade This Week—Shipping to the Yukon is Commenced—Lumbering Industry is Active

VANCOUVER, B. C.—A distinct change for the better is the information gleaned this week from a tour of the wholesale and retail hardware houses in Vancouver. This is due to two or three reasons. First, weather conditions have been decidedly favorable if a maximum daily temperature of from 75 to 82 may be considered a factor. Gardening operations are at their height and this is having a good effect upon the buying of garden tools and repair parts. More money is available and retailers are said to be meeting their accounts with greater promptness.

Then the departure of the first direct C. P. R. boat, the Princess Louie, to the Yukon has resulted in good shipping business while at the same time, the better demand for lumber is keeping the logging camps active and this, in turn, is reflected in orders for tools for this trade.

Trade is quiet on Vancouver Island. In the Nanaimo district, the mines are operating on a two to three day a week basis which is less than normal for this season of the year with the result that buying is very conservative from that center. There is not much change in the Okanagan although some new construction work is felt in local distributing houses.

Possibly the greatest amount of out of town business is that which comes this week from the line of the Pacific Great Eastern, a goodly number of orders for general lines having been received. There has also been a lot of good buying from the Cariboo as a result of the gold rush.

There have been no price changes of consequence this week, the only reductions coming with special sales put on by two of the larger retailers in general lines and one of the department stores on aluminumware. Paints are holding fairly steady here but there is a strong sentiment that prices will be adjusted on a higher basis within the next month or two.

One of the Granville Street houses, which is selling out a number of lines, is giving many really good bargains, ranging from twenty to forty per cent.

The chief event of the week was the opening by Lieut.-Gov. W. C. Nichol, of the exhibition of British Columbia products and manufactures in which the hardware trade is well represented. Representative of all the service clubs and public bodies occupied every seat in the assembly hall of the Cassidy building when the opening ceremonies were under way. The large gathering then made an inspector of the exhibits and highly complimentary remarks were passed as to the lines displayed by hardware firms.

FIRE LOSS

In a fire which wiped out almost an entire business block at Alliance, Alberta, the store of Darcy's Hardware, suffered much damage, as well as several other business establishments.

NEW STORE

Norman D. Nairn, formerly salesman with Armstrong Smyth & Dowswell, Regina, Sask., has opened up a hardware store at Turtleford, Sask. He will carry a full line of shelf and heavy hardware, do tinsmith repairing, and later intends to put in a stock of furniture.

WESTERN CANADA NOTES

Kronau, Sask., Fred Schneider, hardware, has been succeeded by Ebenel & Schneider.

The Standard Sheet Metal Works Roofing Co. has been formed in Vancouver with W. N. Murray and R. J. N. Murray as partners.

Woodrow, Sask., Wright & Son, hardware, suffered recent loss by burglary.

Alliance, Alta., W. A. D'Arcy, hardware, suffered loss by fire.

The appointment of Metals, Limited, Calgary and Edmonton, as distributors for Berry Bros., Inc., varnish manufacturers, Walkerville, Ont., has been made for Alberta and East British Columbia.

The Kitsilano Cash Stores, Fourth Avenue west, Vancouver, have taken new premises a block away, and with their removal, Mr. Ashton has put in a line of household hardware, giving up one of his street windows for display purposes.

WESTERN CANADA NOTES

H. W. Reid & Co. have commenced hardware business at Selkirk, West Man.

Eight hundred travelling men and their wives are in Vancouver attending the annual convention of the Washington, Oregon and British Columbia district. The evening session was given over to a big stunts programme in the form of a smoker while the ladies of the party were given a theatre and dinner evening.

John F. Moss, manager of the Lee Hardware Co., Salina, Kansas, was in Vancouver this week, concluding a nation-wide advertising campaign. He was so impressed with the industrial possibilities of British Columbia that he announced he would open a distributing house shortly in Vancouver. The firm maintains factories at Salina, Kansas City and Cudahy and has a capitalization of $10,000,000 according to the visitor.

The will of the late W. G. Mackenzie, managing director of the Wood, Vallance and Leggat Company, Vancouver, recently sold to Marshall, Wells and Co., was entered for probate in the supreme court this week. The net estate is valued at $250,000. Mrs. Jane Drysdale Grassick a sister, of Toronto, is left $15,000 and a niece, Grace Mackenzie also of Toronto $1,500. The balance is left to the son W. G. Mackenzie on his attaining the age of 30. The latter was married a short time ago to Miss Eileen Kloepfer, daughter of J. C. Kloepfer, local hardwareman.

PROGRESS IN MONTREAL BUILDING

Montreal.—Building operations in the city continue to show an improvement for the first four months of the current year, as compared with the same period last year, the increase in estimated expenditure being $1,662,578.

The official figures supplied by the city building department show that during this period 2,187 building permits were issued for a total value of construction work estimated at $6,583,597, the figures for the same period last year being $4,921,019. The record by month in 1922 is as follows: January, $216,460; February, $561,100; March, $933,713; April, $2,038,834; and May, $2,831,490.

Events in the Trade

BUSINESS CHANGES

Pt. Colborne, Ont.—Harrison's Hardware has been sold to Messrs. Jno. C. Rawlins and J. Roy Martinson, and will be known in the future as the Rawlins and Martinson Hardware Co. Mr. Harrison has been in business here for the past thirteen years, having taken over the present business from Messrs. Congdon and Marshall, of Dunnville, on March 4th, 1909. Both of the new principals are known in town, Mr. Rawlins having been in the employ of Mr. Harrison since he began business here and Mr. Martinson since March, 1917. The new owners took possession on June 1.

NEW FIRMS

The Lyons Hardware are in business at 789 Weston Rd., Mt. Dennis, Ont.

Wm. Lindsay has opened a new hardware business at 1625 Dundas St., W., Toronto.

Beatty's Hardware are open for business at 994 Weston Rd., Mt. Dennis, Ont.

George Murray has commenced hardware business at 59 Prescott Ave., Toronto.

Kirkby Bros., have opened a hardware and electrical business at Islington, Ont.

NEW FIRM WANTS CATALOGS

Arthur O. Simoneau, Nicolet, Que., has taken over the store formerly occupied by Jacques Courteau. Mr. Simoneau desires to receive manufacturers' catalogs covering staple hardware and specialty lines, with prices and discount sheets.

OBITUARY

The death is announced in St. John, N. B. of Mrs. Elizabeth Anne McAvity, wife of Thomas McAvity, president of T. McAvity & Sons, Ltd.

William Davidson, managing director of Marlatt & Armstrong Company, Limited, Montreal, died after a prolonged illness, in his 69th year.

The death is announced of ex-Mayor Archibald Hunter, of Durham, Ont., who for the past twelve years has conducted a hardware business in partnership with his son. He died in his seventy-second year following prolonged disability. He was a grandson of the late Archibald Hunter, founder of Durham and had lived there all his life.

The death is announced at Brantford, Ont., of Edwin Chalcroft, retired hardware merchant, at the age of 89 years. He was at one time connected with the Wm. Buck Stove Company for 25 years. Later he engaged in the retail hardware business for 15 years. He then sold out and lived retired.

PERSONAL

Among the visitors to the Montreal trade this week were; F. R. Cougevan of Pratt & Lambert, Inc., Bridgeburg, Ont., and Mr. Van Cleef of Van Cleef Bros. Chicago.

Garfield Hood, sales manager, Ontario Steel Products Ltd., Gananoque, Ont., was a visitor at the Toronto office of Hardware and Metal this week. Congratulations are being extended to Mr. and Mrs. Hood upon the announcement of the birth of a nine-and-a-half pound baby boy.

WILL ADDRESS HARDWAREMEN ON RADIO

The next meeting of the Toronto Hardware and Paint Club will be held at Hunt's Tea Rooms, 788 Yonge St. on Mon. evening June 12, at seven o'clock. The main subject for discussion will be Radio supplies, to be introduced by Mr. Walkover of the Cam-Fish Company.

ANACONDA COPPER SUBSIDIARY ENTERS THE CANADIAN FIELD

Anaconda Copper Company, an important concern in the U.S. copper industry is entering Canada through its subsidiary acquired last year, the American Brass Company, which is completing arrangements for the acquisition of the Brown Copper and Brass Rolling Mills Ltd. at New Toronto, Ont. Several representatives of the American Brass Company have been conducting negotiations with the Toronto firm in New York.

The American Brass Company, itself a subsidiary, operates seven plants and the normal turnover of the smallest of these is $50,000,000. Anaconda Copper is rated as a $150,000,000 concern. It is reported that a new plant may be constructed in Toronto shortly to work in conjunction with the Brown Mills, and that Anaconda is negotiating for some zinc-copper properties in Western Canada.

TINPLATE INDUSTRY REVIVES IN NEW SOUTH WALES

A gratifying revival of trade has occurred in the New South Wales tinplate industry, which, despite the total absence of buying from Central Europe, is now working at 70 per cent. of capacity. One of the most reassuring features is declared to be the recovery of certain business in the Canadian market.

WILL SOON START FREIGHT AUDIT

Secretary W. F. Macpherson of the Ontario Retail Hardware Association advises Hardware and Metal that arrangements are now being completed for the service which the association is planning on giving its members in connection with the auditing of freight bills. Freight tariffs and classifications are being secured and already some bills have been received for attention. It is expected this service will be commenced within a month, and it will be conducted on the basis of 25% of the amount payable to the association for its work.

OPEN NEW PREMISES IN TORONTO

Taylor Instrument Companies, Rochester, N. Y., have just completed the purchase of property at 110-112 Church street, corner Lombard St., Toronto, which has been known as the Stevenson building and which will now be called the Tycos building. This branch has commenced with the repairing of the various instruments made by this firm and the assembly of certain instruments. The extent to which manufacturing or assembling will be done in Canada will depend entirely upon the development of business in this territory.

OPEN DOWNTOWN OFFICE IN TORONTO

The International Business Machines Co. Ltd., manufacturers of Dayton Scales, International Time Recorders, etc., have opened a sales and service store at 32 King Street West, Toronto, where a full line of International products will be attractively displayed. The new store, is centrally located in the heart of Toronto's downtown section, and will enable out of town visitors to inspect the various International lines without going away uptown. Demonstrators will be in attendance to explain the operation of any of the company's products, and interesting window displays will be a regular feature.

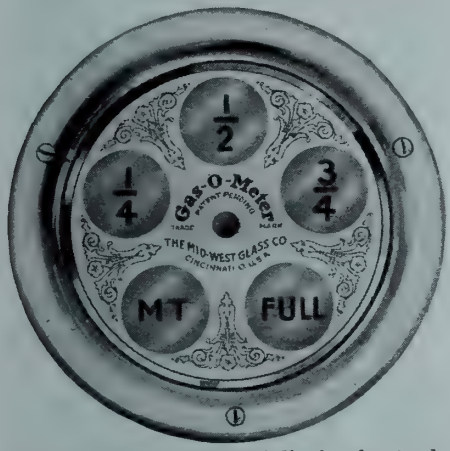
New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

GASOLINE SUPPLY METER

A gasoline supply indicator, called the Gas-O-Meter, is being produced by the Mid-West Glass Co., of Cincinnati, Ohio. This product is built for adaptation to every type of car, except those having the gas tank inside the cowl. It is made in two sections, the indicator in the tank, and the meter on the dash board, under the observance of the driver.

The indicator consists of a copper, air-tight float, attached to a steel shaft,



and the float rises or falls in the tanks as the gas rises or lowers. This operates a shaft through the medium of two brass milled bevel gears. The inside shaft actuates an arm within the indicator head, and causes it to touch upon electrical segments, separate and distinct for each division of the gasoline supply. As the float rises or falls, it turns the indicator arm to the segment showing its location in the tank—empty, ¼, ½, ¾, or full—and as each segment is connected separately to the dash instrument the connection established by this indicator arm is in turn shown upon the meter.

WATER POWER HEATER

This device, which is called the World Beater, is described as a mechanical water power whipper and mixer, which may be attached to any standard kitchen faucet. It operates with ordinary water pressure and will develop between two and four thousand revolutions per minute.

This product consists of a water power device located in the top, and a tube which carries the water to the sink level thus keeping it away from the contents of the jar, and also the beater itself, which extends to the bottom of the receptacle.

It is produced by the World Novelty Co., of Elgin, Ill., who claim that it not only beats eggs but whips cream and mixes batters, and that it does so effectively and more easily than by hand.

An adapter is supplied with each beater so that it may be used on any kitchen faucet, whether it has a screw spigot or not. The jar if broken may be replaced with an ordinary mason jar. All metal parts are stated to be rust proof.

COMBINED TABLE DISHWASHER

A combination electric dishwasher and kitchen table, has been placed on the market by the Western Electric Co., of New York City, who are represented in Canada by the Northern Electric Co., 121 Shearer St., Montreal. This product has a porcelain white top when used as a kitchen table. The top is opened on the hinge and the dirty dishes placed in two wire racks and the top folded back in place. A touch of the finger on a convenient switch starts the motor. The dishes are washed by the continuous spray of hot water which is thrown over and around each of the dishes by the motor driven paddle wheel. Clean hot water rinses them the same way and they are dried by their own heat. The makers point out that the dishes need only be scraped and then put in the washer.

FAUROT-SCOPE AUTO LOCK

The Faurot-Scope lock is described by the makers as a compact anti-theft device made of a special composition metal. When the operator of the vehicle locks the device, the ignition system is completely paralyzed and a red diamond tell-tale is displayed. The auto cannot then be moved under its own power. The device is attached permanently to the left forward fender. The ignition system is put out of commission when a plunger capped with a red diamond tell-tale is locked in a socket sunk in the top of the Faurot-Scope.

The ignition system is restored to normal, and the automobile can be operated only when the plunger is unlocked, withdrawn, and replaced by another plunger capped with a plain white metal disc. Removing either plunger sounds an alarm on the horn with which the car is equipped, until one of the plungers is reset and relocked in the socket. It is made by the Faurot-Scope Corporation, 152 W., 42nd. St., New York City.

DASH MOTOR METER

The Borg & Beck heat indicator is described as a scientific instrument which records the true motor temperature in plain sight, on the dash. It tells at all times, it is said, the operating temperature, and indicates the approach of motor trouble before the danger point is reached. The manufacturers state that its efficiency does not depend on the water circulating system.

The principle of operation of this device is purely mechanical. It consists of three main parts—the actuating unit which clamps against the motor cylinder

a flexible shaft, and a gauge which is attached to the instrument board. The actuating unit contains a thermostat, with any variation in the temperature of the motor causing it to expand or contract, in proportion. A small gear segment and pinion are so connected that a timing motion is given to a flexible shaft, which connects the pinion with the indicator hand. The temperature ranges are designated on the gauge dial by contrasting colors, so that the operator can see at a glance the condition of the motor. A special model is designed for air-cooled motors. The Borg & Beck Co., are located at 920 S. Michigan Ave., Chicago, Ill.

ALEMITE GRAPHITE OIL

A graphite penetrating oil for general lubricating purposes is now being produced by the Alemite Products Co., of Canada, Belleville, Ont. A variety of uses are claimed by the manufacturers for this graphite oil, it being adaptable especially for motorists, but also suitable for the mechanic, for plumbers, for the farmer and for household service. For lubricating springs, for dissolving rust and thus releasing bolts, king pins, pipe joints and connections, for oiling farm implements, locks, hinges and for numerous other purposes, the producers point out that Alemite graphite penetrating oil has a specific service to perform. It is also claimed to be a rust preventive.

Half Holidays And Daylight Saving

List of Cities and Towns Throughout Canada Showing How Hardware Stores Are Observing Half Holidays, Hours of Closing and Daylight Saving

Alberta

BANFF.—No half holiday. Open every evening until 10 p.m. No daylight saving.
BROADVIEW.—Thursday half holiday from 1 noon. April to August 31st. Close at 6 p. m. except Saturday. No daylight saving.
CALGARY.—Wednesday half holiday from 1 noon. All year round. Close at 6 p.m. except Saturday. No daylight saving.
CAMROSE.—No half holiday. Close at 5 p.m. during June, July and August and 6 p.m. rest of year except Saturday. No daylight saving.
CARDSTON.—Wednesday half holiday from 1 noon. May, June, July and August. Close at 6 p.m. No daylight saving.
CARLYLE.—No half holiday. Close at 6.30 p. m. except Saturday. No daylight saving.
CASTER.—General Stores Wednesday half holiday from 1 noon. May 15 to Aug. 31. Close at 6 p.m. except Saturday. No daylight saving.
EMPRESS.—Wednesday half holiday from 1 noon. May 24th to July 31st. Close at 6 p.m. except Saturday. No daylight saving.
FORT SASKATCHEWAN—No half holiday. Close at 6 p.m. except Saturday. No daylight saving.
GLEICHEN.—No half holiday as yet. Close at 6 p.m. except Saturday. No daylight saving.
HANNA.—Wednesday half holiday from 12 noon. June, July and August. Close at 6 p. m. except Saturday. No daylight saving.
HIGH RIVER.—Wednesday half holiday from 1 noon. June, July and August. Close at 6 p.m. except Saturday. No daylight saving.
INNISFAIL.—Wednesday half holiday from 12 noon. May to August inclusive. Close at 6 p.m. except Saturday. No daylight saving.
LACOMBE—Wednesday half holiday from 1 p.m., June, July and August. Close 6 p.m. except Saturday. No daylight saving.
MACLEOD.—Wednesday half holiday from 1 p.m. All year round. Close at 6 p. m. except Saturday. No daylight saving.
MEDICINE HAT.—Wednesday half holiday from 12 noon. All year ound. lCose at 6 p.m. except Saturday. No daylight saving.
NANTON.—Wednesday half holiday from one noon. June, July and August. Close 6 p.m. except Saturday. No daylight saving.
PEACE RIVER.—No half holiday. Close at 6 p. m. except Saturday. No daylight saving.
PINCHER CREEK.--Wednesday half holiday from 1 noon. All year round. Close at 6 p.m. except Saturday. No daylight saving.
PONOKA.—Thursday half holiday from 12 noon May 11 to September 21. Close 6 p.m. except Saturday. No daylight saving.
RAYMOND.—Wednesday half holiday from 1 noon. May to September 1st. Close at 6 p.m. No daylight saving.
RED DEER.—Wednesday half holiday from 12 noon. May, June, July and August. Close 6 p.m. except Saturday. No daylight saving.
STETTLER.—No half holiday. Close at 6 p.m. except Saturday.
DIDSBURY.—Wednesday half holiday from 1 noon. May 17th to September 1st. Close at 6 p.m. except before holiday or Saturday. No daylight saving.
TABER.—Wednesday half holiday from 1 noon. May, June, July and August. Close at 6 p.m. except Saturday. No daylight saving.
WAINRIGHT.—Wednesday half holiday from 12 noon. July and August. Close at 6 p. m. except Saturday. No daylight saving.
WETASKIWIN.—Wednesday half holiday from 12 noon. June, July and August. Close at 6 p.m. except Saturday. No daylight saving.
YOUNGSTOWN.—No half holiday. Close at 6 p.m. No daylight saving.

British Columbia

ARMSTRONG.—Thursday half holiday from 12.30 noon. All year round. Close at 5 p.m. during summer except Saturday. No daylight saving.
CHILLIWACK.—Wednesday half holiday from 12.30 noon. All year round. Close at 6 p.m. except Saturday. No daylight saving.
COURTENAY.—Wednesday half holiday from 12.30 noon. All year round. Close at 6 p.m. except Saturday. No daylight saving.
CUMBERLAND.—Wednesday half holiday from 12.30 noon. All year round. Close at 6 p.m. except Saturday. Daylight saving not as yet.
GRAND FORKS—Wednesday half holiday from 12 noon. All year round. Close at 6 p.m. excepting winter months then 5 p.m. except Saturday. No daylight saving.
KAMLOOPS.—Wednesday half holiday from 1 noon. Entire year. Close at 5.30 positively, except Saturday. No daylight saving.
KELOWNA.—Thursday half holiday from 12 noon. All year round. Close at 6 p.m. except Saturday. No daylight saving as yet.

DUNNVILLE.—Wednesday half holiday from 12.30 noon. April to October. Close at 6 p.m. except Saturday at 10.30. No daylight saving.

ELMIRA.—Wednesday half holiday from 12.30. May to October 1. Close at 6.15 except Saturday. No daylight saving.

ELORA.—Wednesday half holiday from 12 noon. April to October. 31st. Close at 6 p.m. except Saturday. No daylight saving.

EMBRIN.—No half holiday. Close Monday Wednesday and Friday at 7 p.m. No daylight saving.

ELMIRA.—Wednesday half holiday from 12.30 noon. May to Sept. Inc. Close at 6.15 p.m. except Saturday. No daylight saving.

EXETER.—Wednesday half holiday from 12 noon. June to September 1. Close at 6 p.m. except Saturday. No daylight saving.

FERGUS.—Wednesday 12 noon, half holiday, all year except December. Close at 6 p.m. except Saturday at 10. No daylight saving.

FOREST.—Wednesday half holiday from 12 noon, May to September 30, irrespective of other holidays.

FENELON FALLS.—Wednesday half holiday from 12 noon. May to October 1st. Close no particular hour mostly 8 p.m. No daylight saving.

GOWN—Thursday half holiday from 1 p.m. For 12 months. Close at 6 p.m. except Saturday. No daylight saving.

GUELPH—No half holiday. Close at 6 p.m. except Saturday. Some of the trade stores close on Wednesday but not the Hardware. No daylight saving.

GODERICH—Wednesday half holiday from 1 p.m. May to Oct. 1st. No regulations common consent all close 6 p.m. No daylight saving.

HAILEYBURY.—Kednesday half holiday from 12 noon. May till Sept. inclusive. Close at 6.30 p.m. except Saturday till 10 p.m. No daylight saving.

HANOVER.—Wednesday half holiday from one o'clock. May to August. Close at 7 except Saturday. No daylight saving.

HAMILTON.—Wednesday half holiday from 12.30 (some do not observe this) July and August. Large stores close at 6 p.m. small ones at 8 p.m. No daylight saving.

HIGHGATE.—Wednesday half holiday from 12 noon. April, to November 1. Close 6 p.m. Monday and Friday. No daylight saving.

HESPELER.—Wednesday half holiday from 1 p.m. all except December. Close at 6.15 No daylight saving.

HAGERSVILLE.—Thursday half holiday from 12 noon. May till October 1. Close at 6 p.m. except Wednesday and Saturday and before holiday. No daylight saving.

INGERSOLL.—Wednesday half holiday from 12.30 noon. May to September 30. Close at 6.30 except Saturday at 10.30. No daylight saving.

KENORA—Wednesday half holiday from 1 p m. May to Sept. 30th. Close at 6 p.m evenings before holidays and Saturday at 9.30. **No daylight saving.**

LONDON.—Wednesday half holiday from 1 noon. Close at 6 every evening. No daylight saving.

LISTOWEL.—Wednesday half holiday from 12 noon. May to September. inclusive. Close 6.30 except Saturday. No daylight saving.

LINDSAY—Wednesday half holiday from 12.30 p.m. May 31 to Sept. 1st. Close at 6 p.m. No daylight saving.

LAKEFIELD.—Thursday half holiday from 12 noon. June to October 1st. Close at 6 p.m. except Wednesday and Saturday. No daylight saving.

MORRISBURG.—Early closing Monday, Wednesday, Friday at 6 p.m. No daylight saving.

MADOC.—Wednesday half holiday from 12 noon. June to August. Close at 6 p.m. Monday, Wednesday and Friday. No daylight saving.

MARKHAM.—Wednesday half holiday from 12 noon. May to September 30th. Close 6 p.m. Mondays and Fridays. Wednesday 12 noon sharp. Daylight saving *no, no, no.*

MILTON.—Wednesday half holiday from 12.30 noon. May to September. Close at 7 p.m. Saturday open. No daylight saving.

MARTON —Wednesday half holiday from 12 noon. June to September 1st. Close 6 p m. except Saturday. No daylight saving.

MIDLAND.—Wednesday half holiday from 1 p.m. June to Sept. 1st. Close at 7 p.m. except Saturday. No. daylight saving.

MATTAWA—Wednesday half holiday from

12 noon. May to Nov. 1st. Close at 9 p.m. except Wednesday, close at noon. No half holiday.

MITCHELL—Wednesday half holiday from 12.30. May to Oct. Close at 6.30 except Saturday. No daylight saving.

MILDMAY — Thursday half holiday from 12.30. May 18 to Oct. Close about 8.30. No daylight saving.

MOUNT FOREST—Thursday half holiday from 12.30 noon. May to Oct. 1st. Close Wednesday, Saturday open other evenings. No daylight saving,.

NEWMARKET.—Wednesday half holiday form 12 noon. May to end of September. Close 6 p.m. except Saturday and nights before public holidays. No daylight saving.

NIAGARA FALLS.—Wednesday half holiday from 12 noon. May to October 1. Close at 6 p.m. except Saturday 9. Not observing daylight saving but soon.

NIAGARA ON THE LAKE.—No daylight saving. Close at 7 p.m. except Saturday. No half holiday.

NEW LISKEARD.—Wednesday half holiday from 1 p.m. June to September 1st. Close 6 p.m. except evenings before holidays and Saturday. No daylight saving.

NORTH BAY.—Wednesday half holiday from 1 p.m. May to September, inclusive. Close 6 p.m. except Saturday at 10. No daylight saving.

NEW HAMBURG.—Wednesday half holiday from 1 p.m. May 1st to September 30th. Close 6 p.m. except Saturday and before holiday. No daylight saving.

NAPANEE—Wednesday half holiday from 12 noon. June 14th to Aug. 23rd. Close at 6 p.m. except Saturday. No daylight saving.

OTTAWA.—Saturday half holiday from 1 p.m. Juiy and August. Close at 6 p.m. Saturday included.

OWEN SOUND.—Wednesday half holiday from 12 noon. May to Sept. 30th. Close at 6 p.m. except Saturday at 10. No daylight saving.

ORILLIA.—Wednesday half holiday from 12 noon. May until October 31. Close at 6 p.m. except Saturday. No daylight saving.

OSHAWA.—Wednesday half holiday from 1 noon. June to October 1. Close 6 p.m. except Saturday. Are not sure about daylight saving yet.

ORANGEVILLE.—Wednesday half holiday from 12 noon. May 1 to September. Close at 6 p.m. except Saturday. No daylight saving.

PENETANG.—Wednesday half holiday from 12.30 noon. From May 17 to September 30. Close at 6 p.m. except Saturday. No daylight saving.

PARIS.—Wednesday half holiday all year round closing at 1 noon. Closing at 6 p.m. No daylight saving.

PORT COLBORNE.—Daylight saving time effective May 15.

PORT BURWELL.—Wednesday half holiday from 12 noon. May to Sept. Close 6 p.m. 6 p.m. except Saturday. No daylight saving.

PORT DOVER — Wednesday half holiday from 12.30, June to September inclusive. Close 6 p.m. except Saturday. No daylight saving.

PORT DOVER—Wednesday half holiday from 12.30 June July August and September. No daylight saving.

PRESTON.—Wednesday half holiday from noon all year. Closing between 6 and 8. Saturday at 10 p.m.

PORT ELGIN.—Thursday half holiday from 12 noon. May till September. Close at 6 p.m. except Wednesday and Saturday. No daylight saving.

PORT HOPE—Wednesday half holiday from 12 noon. All but the hardware stores. Close at 6.30.

PETROLIA—Wednesday half holiday from 12 noon June to September inclusive. Close 6 p.m. except Saturday. No daylight saving.

PICTON.—Thursday half holiday from 12 noon. July and August. Some close at 8 and some at 6 p.m. No daylight saving.

RIDGETOWN.—Wednesday half holiday from 12 p.m. April 1 to October 30. Close Monday and Friday at 6 p.m. open other three nights.

ROCHNEY.—Wednesday half holiday from 12 noon. May to October. Close Monday, Wednesday and Friday at 6 p.m. No daylight saving.

ST. THOMAS.—Wednesday half holiday from 1 p.m. June to August. Close at 7 except Saturdays. No daylight saving.

STRATHROY.—Wednesday half holiday from 12.30 noon. May till August. Close at 6.30 except Saturday at 11.30. No daylight saving.

SEAFORTH.—Wednesday half holiday from 12.30 noon. May to October. 1. Close at 7 p.m. daily. No daylight saving.

ST. MARYS.—Wednesday half holiday from 12 noon. May to September 30. Close at 6 p.m. except Saturday. No daylight saving.

STURGEON FALLS.—Wednesday half holiday from 12.30 noon. June to October 1. Close at 6 p.m. except Saturday. No daylight saving.

SAULT STE. MARIE.—Wednesday half holiday from 12 noon. Eleven months. Close at 6 p.m. except Sat. at 10. No daylight saving.

SOUTHAMPTON — Thursday half holiday from 12.30. May to Sept. 30th. Close (nothing more than a mutual agreement) from 12.30 till next morning. Open Wed. and Sat. No daylight saving.

SUDBURY—Thursday half holiday from 1 p.m. June to Sept. 1st. Close at 6 p.m. except Saturday.

TILLSONBURG.—Wednesday half holiday from 12 noon. May to September 30. Close 6 p.m. except Saturday. No daylight saving.

THESSALON—Wednesday half holiday from 12.00 noon. May to Oct. inclusive. Close at 6 p.m. except Saturday all year. No daylight saving.

TILBURY.—Thursday half holiday from 12 noon. May 1st to Sept. 30th. Close 6 p.m. except Wed. and Sat. at 10.30. No daylight saving.

TEESWATER.—Monday half holiday from 12 noon. May to September 30. During months of half holidays open on Wednesday and Saturday evenings close Wed. when half holiday stops. No daylight saving.

UXBRIDGE—No half holiday. Close 6 p.m. except Saturday. No daylight saving. is a move to have city by-law quashed.

WALKERTON.—Close Thursday afternoons during summer months.

WEST TORONTO.—Wednesday half holiday from 12 noon. year round. Closes July, August, September every night except Saturday and Wednesday at 1 noon. Daylight saving.

WALLACEBURG.—Thursday half holiday from 12 noon. February. 1st. to November 1st. Close 6 p.m. open Wednesday and Saturday nights. No daylight saving.

WINCHESTER.—No half holiday. Close at 6 Mon., Wed. and Friday. No daylight saving.

WEBBWOOD.—Wednesday half holiday from 12 noon. June, July and August. Close at 6.30 all except Saturday. No daylight saving.

WEST LORNE.—Wednesday half holiday from 1.30 p.m. May to October. Close at 6.30 p.m. No daylight saving.

WINGHAM.—Wednesday half holiday from 12 noon. May for 6 months. Close 6 p.m. except Saturday. No daylight saving.

WOODSTOCK.—Wednesday half holiday from 12.30 noon. May to September. No daylight saving.

WHITBY.—Wednesday half holiday from noon. May to September 30. Open until 8 p.m. No daylight saving.

WELLAND.—Wednesday half holiday from 12 noon. May to September inclusive. Close at 6 p.m. except Saturday. Expect to begin daylight saving May 15 but there

Prince Edward Island

CHARLOTTETOWN—Wednesday half holiday from 1 noon. June 15th to Sept. 15th. No agreement. Close at 5.30 p.m. year round. No daylight saving.

Quebec

BUCKINGHAM—No half holiday. Close 6 p.m. except Tuesday and Saturday. Daylight saving April 31st to October.

BLACK LAKE—No half holiday. Close 7 p.m. except Saturday. No daylight saving.

COWANSVILLE—No half holiday. Close 6 p.m. Tuesday, Wednesday and Thursday. Open after December 15th every evening. No daylight saving.

COOKSHIRE—No half holiday. Close 6 p.m. Tuesday, Wednesday, Thursday, Friday. No daylight saving.

FRELIGHSBURG—No half holiday. Close 10 p.m. No daylight saving.

FARNHAM—No half holiday. Close 6 p.m. No daylight saving.

GRAND MERE—No half holiday. Close 7 p.m. Daylight saving May to September 1st.

HUNTINGDON—No half holiday. Close 6 p.m. Tuesday, Wednesday and Friday. No daylight saving.

LOUISVILLE—No half holiday. Close Wed. and Thursday 6 p.m.

LACHINE—No half holiday. Daylight saving from May 1st to 30th September.

LEVIS—No half holiday. Close at 6 p.m. except Friday and Saturday. Daylight saving May to October.

LAUZON—No half holiday. Close 9 p.m. Daylight Saving May 1 to October 1.

LAKE MEGANTIC—No half holiday. Close 7 p.m. Tuesday, Wednesday and Thurs-

MAGOG—No half holiday. Close 6 p.m. Daylight saving from June 1st for three months.

MONTREAL—Half holiday Saturday from 1 p.m. All year round. Close 6 p.m. Observe daylight saving.

QUEBEC—Few close Saturday 1 p.m. Close 5 p.m. Daylight saving May 1st to October 1st.

ROCK ISLAND—No half holiday. Close 6 p.m. except Thursday and Saturday. Daylight saving May 1 to Oct. 1.

ROCK ISLAND—No half holiday. Close 6.30 p.m. Wednesday, Thursday, Friday. No daylight saving.

ST. JEROME—No half holiday. Close 7 p.m. Tuesday, Wednesday, and Thursday. No daylight saving.

THEDFORD MINES—No half holiday. Close 7 p.m. No daylight saving. day. No daylight saving.

THREE RIVERS—No half holiday. Close 6 p.m. No daylight saving.

VICTORIAVILLE—No half holiday. Close 6 p.m. Daylight saving 1st May to 1st October.

VALLEYFIELD—No half holiday. Close 6.30 p.m. Wednesday, Thursday, Friday. No daylight saving.

Saskatchewan

BATTLEFORD — Wednesday half holiday from 12 noon. May, June, July and Aug. Close 6 p.m. except before holidays and Saturday. No daylight saving.

CANORA—Wednesday half holiday from 1 p.m., June, July and August. Close 6.30 p.m. except Saturday. No daylight saving.

CRAIK—No half holiday. Close 6 p.m. except Saturday. No daylight saving.

DRINKWATER—No half holiday. Close 6 p.m. except Wednesday and Saturday. No daylight saving.

ESTEVAN—No half holiday. Close 6 p.m. except Saturday.

GRENFELL—Thursday half holiday from 12 noon. May, June, July and August. Close at 6 p.m. except Saturday. Daylight saving May 1st to October 1.

(Continued on page 56)

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

THE general re-arranging of prices by hardware jobbers continues, with a firm market prevailing in the majority of lines. This trend is reflected by advanced quotations on spades, shovels and scoops, through a revision in the discount, bar iron and bar steel, galvanized sheets, copper scrap, as well as lead and other grades. Paris green quotations have advanced three cents per lb. on all sized packages and containers, with a brisk call for this line having resulted in low stocks. Price declines are evident on boiler tubes, asbestos paper, ruby lantern globes, tungsten and nitro electric lamps, linseed oil and arsenate of lead. Certain wholesalers and distributors of German made hardware lines have announced a ten per cent. reduction in quotations on such products, this change being attributed by these interests to the recent budget tax regulations. The revised list prices on boiler tubes, both lapweld and seamless, reflects the easier trend of these markets in recent weeks, coupled with the current light demand. Bar iron and steel remains in a strong position, with sheet products also responding to the firmness generally evident throughout the steel industry. In the ingot metal markets, tin, copper, lead and spelter maintain a firmer attitude, with improved interest in consuming channels. Business in wholesale circles is described as very good, with optimistic reports having been generally succeeded by business activity in fair proportions. Such seasonal lines as lawn mowers, ice cream freezers, screen wire cloth, rubber hose, screen doors and windows, harvest tools and insecticides, are experiencing a brisk movement. Collections are described as improving, and while much of this activity is of a seasonal nature, a determined effort is being made in many quarters to offset the customary summer slackness with increased selling efforts and stimulating business campaigns. The coal strike situation is undoubtedly playing an extensive part in steel price developments, and numerous hardware products, such as eavestrough, conductor pipe, and corrugated sheets, reflect the upward tendency. As a unit, the steel industry has gathered sufficient momentum to carry it over the usual dull summer period, and with a continued general movement in the building trades, similar developments are considered possible in hardware circles.

Montreal Markets

MONTREAL, June 8.—Interesting price developments are again recorded on the local hardware markets, the majority of changes in quotations being in an upward direction. An advance is recorded on spades, shovels and scoops, the discount being revised from fifty-five per cent. to fifty-three per cent. off black list prices. The list and net extras remain unchanged. Galvanized sheets again feature the sheet markets with a further advance of twenty-five cents on all gauges. Quotations are now given on English brands, American sheets being practically off the local market at the present time. The undertone of copper both in primary metal markets and on scrap markets continues strong, and on the latter both light and heavy copper are slightly increased in price. Copper goods, such as sheets, rods and tubing, are firmer but prices are still unchanged. Reduced quotations are announced on both tungsten and nitro electric lamps, and the various sizes of boiler tubes have new lower prices. The tube market has been very unsettled in recent months, and present quotations are purely nominal.

FIRM TONE IN BRASS AND COPPER GOODS

Montreal.

The stronger tendency in brass and copper goods, such as rods, sheets and tubing, becomes more apparent from week to week, but up to the present no change has been made in local quotations. It will be noted that other domestic markets have announced an upward revision, but this change brings quotations on a more uniform basis where formerly there was a wide variation between the two centres. Copper in primary markets remains in a strong position, and is now reported as firm both in London and New York with consumption on the increase. Considering the present low level of prices on this metal dealers state that it is only reasonable to expect a continued gain will be made, with its reflection on finished products. Unchanged local quotations are as follows:

	Base
BRASS—	
Sheets	0 24
Rods, ½ to 1 inch, round	0 22
Tubing, seamless	0 30
COPPER—	
Rods, ½ to 2 inch	0 29
Soft sheets, plain, 16 oz. and heavier, lb.	0 32
Plain tinned, 16 oz. and heavier, lb.	0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are for full sheets or bars. Cuts 5c. per lb. higher.

REDUCED QUOTATIONS ON ELECTRIC LAMPS

Montreal.

New lower list prices are announced on both the tungsten and nitro electric lamps, and following are new quotations:

ELECTRIC LAMPS—	
Tungsten,	
10 to 50 watt	0 40
60 watt	0 45
100 watt	1 00
Nitro,	
75 watt	0 80
100 watt	1 10
200 watt	2 10

Less 30 per cent.

COPPER SCRAP AGAIN INCREASED IN PRICE

Montreal.

The stronger tone of copper on primary markets is reflected locally, light and heavy copper scrap being advanced in price this week. The light metal is increased one-half cent per lb., and heavy copper is one-quarter cent higher. Lead also shows a slight increase in prices. Copper is undoubtedly the most active metal in the waste markets, consumption in the United States having increased appreciably in recent weeks. There is also the improvement in other lines, iron and steel scrap still advancing in outside markets, and dealers continue to view the future with mucn more optimism than they have been permitted for some time past. Hopes are based on export trade, the opening of foreign markets to a greater extent, accompanied by the improvement already in evidence, placing the market in its old-time standing. Following are average quotations:

WASTE MATERIALS—

Automobile tires	0 50
Rubber shoes	0 02¾
Yellow brass	0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 03½
Lead, heavy	0 04¼
Lead, tea	0 02½
Light copper	0 09
Heavy copper	0 11
Wrought iron, R. rd., No. 1, per gr. ton.	10 00
Malleable scrap (ton)	9 00
Pipe scrap (ton)	6 50
Heavy melting steel	9 00 to 9 50
No. 2 busheling	3 00
Boiler plate	8 00
No. 1 machinery cast	21 00

LOCAL CEMENT TRADE IS REPORTED GOOD

Montreal.

Local dealers in cement report an active demand, the call for this product becoming more extensive in recent weeks. Sales throughout the city are particularly heavy at the present time because of the active building program requiring supplies. For outside centres, the movement has been a little backward during the spring months, but compares favorably with last year. Quotations are unchanged at following levels:

CEMENT—

Car load lots, per bag, f.o.b. cars	$0 92
Per bag, delivered	1 00
Less car lots, per bag, f.o.b., yard	1 00
Per bag, delivered	1 10

Less 5 per cent.
Rebate of 20 cents for empty bags.

STRONGER TENDENCY STILL SEEN IN CORRUGATED

Montreal.

The stiffening of prices on flat galvanized sheets continues to add strength to the undertone of corrugated, and dealers now state that the market is in a much improved position. There is less room for price shading, this practice having been more or less common especially on the heavier gauges, during spring months. Although present stocks are said to be ample to take care of present requirements, the inability of southern mills to make prompt deliveries, and the active demand for sheets from overseas, is reflected on the corrugated market to an extent, and a continuation of the present ratio of business will greatly tax available supplies in the ensuing weeks unless an improvement becomes evident in the flat sheet supply. List prices and discount are as follows:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

TONE OF LEAD PRODUCTS MARKET IS MAINTAINED

Montreal.

The recent stronger tendency in the undertone of lead products, because of firmer prices of metals on primary markets is well maintained, and market conditions in these products are described by manufacturers as steady to firm. A seasonal demand is now being felt, particularly in lines used in building construction, and dealers anticipate a steady movement during the summer months. Following are present prices:

LEAD AND ZINC PRODUCTS—

Lead pipe, per 100 lbs.	12 00
Lead waste, per 100 lbs.	13 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	17½%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 09¾
Do., 4 to 8 lbs. sq. ft.	0 09

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 34
Zinc sheets, casks	0 11
Do., broken lots	0 11½

SPADES, SHOVELS AND SCOOPS QUOTED HIGHER

Montreal

A revision has been made in the quotations on spades, shovels and scoops. These lines are slightly advanced in price through changing the discount from 55 to 53 per cent. off. List prices and net extras are unchanged. Prevailing quotations will be found on current market pages.

GALVANIZED SHEET PRICES ARE AGAIN ADVANCED

Montreal.

With the firm tone continuing in the sheet markets, local quotations on galvanized sheets now show an advance of twenty-five cents per 100 lbs. of all gauges. In recent weeks there has been a series of price increases among the various distributors, but it is only this week that this development has been generally noted. Low stocks are still an important factor in the local situation, many warehouses now reporting very little available supply on hand, with some of the best selling sizes now depleted. Another feature is the practical withdrawal of American sheet quotations. Owing to the non-arrival of U. S. standard to this centre recently, firms who have sheets for sale are quoting on overseas brands.

The tin plate market is described as fairly firm, with a moderate demand now in evidence. With the approach of summer months, a more active trade is expected for fall requirements, also in Canada plate. Following are revised quotations:

BLACK SHEETS—

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS—
U. S. Standard.

English Standard—	Queen's Head	Fleur de-lis
28 gauge	6 75 to 7 25	6 50 to 7 00
26 gauge	6 50 to 7 00	6 25 to 6 75
24 gauge	5 90 to 6 40	5 85 to 6 35
22 gauge	5 55 to 6 05	5 40 to 5 90
18-20 gauge	5 35 to 5 85	5 25 to 5 75

NOTE.—These prices are full bundles, an extra charge of 25c. to 35c. per 100 lbs. is made for broken lots. Extra for sheets 4 ft. wide, 50 cents per 100 pounds. Extra for sheets 3 ft. wide, 28 ga. and 10¾ oz. 25 cents per 100 lbs.

BRIGHT TIN PLATES—

20 x 28 x 100 lbs. basis	13 50
20 x 28 IC, 112s	14 00
20 x 28 IX, 112s	16 00
20 x 28 IXX, 56s	9 25
20 x 28 IXXX, 56s	10 00

TERNE PLATES—

CANADA PLATES—Half Bright

18 x 24 x 52s	5 40 box
18 x 24 x 60s	5 50 box
18 x 24 x 75s	5 65 box

WELSH CANADA PLATES—
Polished—

12 x 24 60s	7 50 box
18 x 24 x 52s	7 25 box

NO CHANGE IN LISTING MALLEABLE FITTINGS

Montreal.

Local jobbing houses are still quoting malleable pipe fittings at former pound list, although Toronto houses report a change to the new piece list with discounts. It is stated here that the change may be brought into effect at any time, but it is pointed out that quotations remain practically unchanged at the new method of pricing. Current trade in fittings is now showing a little more activity, owing to requirements of construction work. Following are prevailing discounts:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk. and galvd. ⅛ to 4 in., close and short	60%
Do., 4½ in. and larger	50%
Do. long, ⅛ in. to 4 in.	65%
Do., 4½ inch and larger	55%
Do., running thread	40%
[illegible] and under	30%
Do., 4½ in. and larger	10%

	Black	Galvanized
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 18	0 20

RECESSION IN BOILER TUBE QUOTATIONS

Montreal

The unsettled state of the boiler tube market is further evidenced by the announcement of lower prices on practically all sizes of seamless and lapweld tubes. With the undertone of the market little changed, a marked reduction is made, particularly in the larger sizes. Present quotations are purely nominal, and while the following levels are given for general business, it is stated that size and specification of orders govern prices to a large extent, and fair sized inquiries may receive a further concession. Only a moderate degree of activity is now in evidence, the larger tubes being particularly quiet, and with the spring season now over, dealers look for little improvement throughout the summer months at least. Following are nominal quotations:

BOILER TUBES—	Seamless	Lapweld
1 inch	18 00	.....
1¼ inch	20 00	.....
1½ inch	19 00	.....
1¾ inch	20 00	.....
2 inch	19 00	19 00
2¼ inch	22 00	20 00
2½ inch	25 00	25 00
3 inch	29 00	27 00
3½ inch	34 00	28 00
4 inch	43 00	36 00

ACTIVE MOVEMENT IN TROUGH AND PIPE

Montreal

A brisk trade is now being enjoyed in eavestrough, conductor pipe, and conductor elbows, and sales for the month of May are said to be quite satisfactory. The present month has opened well and dealers anticipate an active movement throughout the coming weeks. Owing to the stiffening of prices on galvanized sheets, these products are firmer in tone at the following list prices and discounts:

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$16 90	$18 70	$22 20	$29 80	$37 80

O. G. Square bead, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$15 90	$17 70	$21 20	28 80	$36 80

CONDUCTOR PIPE:—round, plain and corrugated, per 100 ft.

2 inch	3 inch	4 inch	5 inch	6 inch
$18 40	$22 30	$29 60	$40 00	$49 00

Discount 70/10 per cent.

CONDUCTOR ELBOWS—

3 inch	6 00
4 inch	10 50
Plain or corrugated.	dozen
2 inch	$ 5 25
5 inch	24 00
6 inch	29 00

Discount 60 per cent.

BAR IRON AND STEEL IN STRONG POSITION

Montreal.

Fundamentally, the market for bar iron and steel remains in a strong position, with local prices reflecting this firmness, and no abatement from the strong undertone. With the new higher prices now in effect distributors look for little further change in the near future, the hope being expressed that the market remain on a steadier basis, with the absence of the unsettled condition such as existed in previous weeks. As in certain sheets, it is noticed that deliveries from the mills are not as prompt as they were a few weeks ago, and this may have a tendency to maintain a steady situation. In southern markets little change in the coal strike situation is reported, but the increased cost of production, through higher prices on coal, coke, pig iron, scrap, etc., still has a determining effect on the present market. Following are local quotations:

IRON AND STEEL—	
Common bar iron, 100 lbs.	2 95
Refined iron	4 45
Irish finish machinery steel	3 00
Mild steel	2 95
Single reeled machinery steel	5 05
Band steel	3 30
Spring steel	4 55
Sleighshoe steel	2 95
Tire steel	3 15
Harrow tooth steel, per lb.	3 10
Mining tool steel, per lb.	0 20½
Toe caulk steel	3 85
Black Diamond tool and cast steel, per lb.	0 20½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

GERMAN-MADE GOODS REDUCED TEN PER CENT.

Montreal

Certain wholesalers and distributors of German-made hardware lines have announced a ten per cent. reduction in quotations, this change being attributed to the recent budget regulations. An extra discount of ten per cent. is being quoted, which places an even greater reduction on some goods, but the above-mentioned decline is the approximate average.

ACTIVE MOVEMENT NOW IN SEASONAL LINES

Montreal.

A brisk trade is now reported throughout jobbing circles in seasonal lines, lawn mowers, ice cream freezers and screen wire cloth being particularly active at the present time. Dry weather during last month stimulated garden and lawn hose sales, and with recent rains the weather is ideal for an active movement of lawn mowers. A good sale of mid-summer lines is expected to continue during the present month as in many cases dealers' bookings have been comparatively light.

FAIR SEASONAL DEMAND FOR ROPE AND CORDAGE

Montreal.

Manufacturers and distributors of rope and cordage report the present movement as fairly seasonal, but incate that buying is still of a very conservative nature. Notwithstanding the period of earlier harvesting is fast approaching, dealers are still holding off apparently awaiting the actual consumptive demand. Binder twine orders are now being shipped, and sales this season are stated to be quite satisfactory in comparison with last year. The undertone of the market is described as steady, with both manila and hemp little changed.

FIRMER TONE CONTINUES IN INGOT METALS

Montreal.

Ingot metal markets this week have been rather quiet partly owing no doubt to the Whitsuntide holidays in England when all markets were closed. Changes generally have not been very great, although firmness is still the prevailing feeling at primary points. Up to the present it cannot be said that this has been followed by much increase in buying on the local market, but it is hoped that an improvement will follow later on.

TIN.—This metal has been firmer in London recently, and owing to higher exchange, prices in New York are also on a higher basis. Under existing conditions it is stated to be difficult to see how any great advance can take place, and probably this is one of the minor fluctuations in an irregular market, Statistics at the end of May show an increase in supply which can hardly be termed a bullish factor. Local quotation is higher at 36½ cents.

COPPER.—The quotation in New York is unchanged from last week, and the market is a little quieter but without any sign of weakness. The future of this metal is said to depend largely upon export trade, and if Germany can arrange her finances she can no doubt absorb a considerable quantity. Demand in the U. S. is improving and spot metal is now reported rather scarce. Locally prices are unchanged but firm at 17½ cents for electro and 17¼ cents for casting.

SPELTER.—Although this metal has had a considerable advance it cannot be said that there is any sign as yet of a reaction, and new high levels are being recorded at primary points each day. The advance would not appear to be artificial as it is supported by a goo demand and there is no apparent surplus of metal. The European situation is also strong, and it is probably only a matter of time before further exports will be made from this side. Locally the market is firm at 8 cents.

LEAD.—A further advance in trust price is recorded this week and the market has now advanced to $5.60 East St. Louis. There is a genuine demand for lead, but prices have had a considerable advance and a slight reaction would probably give the market a healthier tone. London continues to hover around the £25 mark, and it is still considered difficult to see how this price can be obtained in face of increased supplies. Locally the market is firm at 7 cents.

ANTIMONY.—There is little change reported in this metal, the market being comparatively quiet with other lines and quotations remaining at former levels. Chinese is quoted at 6¾ cents and high grade English at 7½ cents.

ALUMINUM.—Slightly more activity is reported in aluminum on U. S. markets, but locally it remains dull with quotation unchanged at 24 cents.

Toronto Markets

TORONTO, June 8.—Spades, shovels and scoops have been increased approximately five per cent. in price through a revision in discounts on these products, higher costs of raw materials such as steel being cited as contributory elements in this development. Advanced price levels are also recorded on bar iron and steel, as outlined in previous issues of Hardware and Metal. The recent lower quotation still prevails on certain large orders, but the new increased price is generally being adopted. On the other hand, lower quotations are recorded this week on ruby lantern globes, asbestos paper, and boiler tubes. The revised list on tubes, both lapweld and seamless, has generally become effective owing to easier trend of these markets during recent weeks, combined with lack of current demand. The sheet markets remain firm at the recent advance, with some distributors stating that they would not be surprised if further increases were recorded in the near future, as the primary tone is very strong, with deliveries somewhat delayed. Scrap materials maintain a fair ratio of improvement, with higher asking prices now recorded on lead and zinc scrap, as well as a firmer trend in other grades. Ingot metals show a stronger tendency, copper being active on outside market, with the usual reflection of more consumer interest on domestic centres. Prices generally remain at the higher levels recently announced.

TWELVE PER CENT DROP IN ASBESTOS PAPER

Toronto.

A reduction has been recorded in prices on asbestos paper, the quotation on this product now being revised to $6.75 per 100 lbs., whereas the former level was $7.70. This change amounts to a decline of approximately twelve per cent.

LOWER QUOTATIONS ON RUBY LANTERN GLOBES

Toronto.

A reduction has been announced this week in prices on Ruby lantern globes, these now being quoted at $4.25 per dozen, compared with the previous level of $5.40 doz.

REVISED PRICE LIST ON BOILER TUBES

Toronto.

As outlined in previous issues of Hardware and Metal, in reports covering the boiler tube market, the general inclination to shade prices in order to secure any order that may be going, is still prevalent among local distributors. This tendency has resulted in further lowering the nominal list prices on these products, the new quotations being approximately five per cent. lower on lapweld, and of varying extent according to the different sizes on seamless tubing. Current conditions are described as quiet, with the following list being the revised local prices for fairly large quantities:

BOILER TUBES—

	Seamless	Lapweld.
1 inch	$18 00	$.....
1¼ inch	20 00	.....
1½ inch	19 00	.....
1¾ inch	20 00	.....
2 inch	19 00	16 00
2¼ inch	22 00	19 00
2½ inch	25 00	19 00
3 inch	29 00	24 00
3¼ inch	34 00	26 80
4 inch	43 00	34 25

HIGHER PRICES QUOTED ON BAR PRODUCTS

Toronto.

Bar iron and bar steel quotations are now advanced fifteen cents per 100 lbs. on the local market, this change having been more or less anticipated during recent weeks, owing to the firm trend in the steel industry generally. The new prices are almost uniform on small purchases, although it is admitted that large buyers can shade this level by a few cents, the previous quotation of $2.75, being reported in certain quarters. However, the higher prices are generally expected to become uniform in the near future, for if the customary spread between mill and jobbers' quotations was being put into effect at present, a further advance would likely be in order. It is pointed out that other eastern market centres increased their prices a couple of weeks ago, the local distributors failing to immediately follow suit, but intimating that similar change would soon be forthcoming. The situation has now developed, and the revised levels are given below:

IRON AND STEEL—

Mild steel bars, base	2 90
Mild steel bands, 3-16 in. base	3 40
Bar iron, base	2 90
Angle iron, base	3 00
Horseshoe iron	3 75
Tire steel	3 15
Spring steel	6 00
Sleigh shoe steel	3 00
Hoop steel	3 15
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

INCREASE ON SPADES SHOVELS AND SCOOPS

Toronto.

Shovels, scoops and spades are now quoted at higher price levels through a revision in the discounts. The new quotation is 53 per cent. off list, compared with the previous level of 55 per cent. This amounts to an approximate increase of five per cent., and higher prices of raw materials such as steel are cited as the cause for the advance in shovel quotations. Lists and net extras remain unchanged, however, the revised levels being included in the current market quotation pages.

SHEET MARKET FIRM AT RECENT ADVANCES

Toronto.

Conditions in the steel trade are described as increasingly favorable, there being no apparent slackening in the firm tone of the market. The demand for sheet products continues brisk, with the uncertainty regarding the delivery dates adding further strength to the situation. Owing to the recent announcement of a ten per cent. cut in freight rates on American railroads, some holding up of shipments from southern producers is looked for. In the meantime, domestic galvanized sheets are experiencing a very brisk call, with the possibility of additional price advances in the near future being considered the natural sequence to general developments on primary centres. English sheets are being imported in greater volume, the coal strike in southern fields having produced much unsettlement regarding future prospects. As a unit, the steel industry remains almost at the outlook recorded last week, with the collapse of the coal strike being looked for in certain quarters.

BLUE ANNEALED—

10 gauge, base	3 60	4 10
12 gauge	3 65	4 15
13 gauge	3 70	4 20

LEAD PRICES FIRMER ON PRIMARY MOVEMENT

Toronto.

Lead product prices are now described as strong, in view of the recent developments in the primary metal centres, where higher quotations on ingot lead have been recorded. While the general tone has fluctuated slightly during recent weeks, the movement has been gradually upward, this improved position being attributed to increasing demand and greater consumer interest. Domestic distributors report that lead products are holding their own, and while the degree of improvement may not continue indefinitely, yet the current result is found in the strength of prevailing prices. No further price revision has been announced during recent weeks, the following quotations representing the average local level.

LEAD AND ZINC GOODS—

Lead pipe, list, per lb.	0 12
Lead waste pipe, list, per lb.	0 13
Do., over 8 in., list, per lb.	0 14
Lead pipe is subjected to a discount of	10%
Lead traps and bends	17½%
Lead sheets 4 to 6 lbs. sq. ft in rolls, lb.	0 09
Cut sheets, ½c. to ¾c. lb. extra and cut sheets to size 1c. lb. extra.	
Solder, wire, per lb.	0 30
Do., strictly, lb.	0 22½
Do., wiping, lb.	0 21
Do., guaranteed, lb.	0 24
Do., commercial, lb.	0 21
Zinc sheets, per lb. 0 09	0 10
sheets to size 1c lb. extra.	

COPPER GOODS REFLECT FIRM PRIMARY MARKET

Toronto.

While quotations on copper and brass goods such as sheets, tubing and rods, remain at the advanced levels recorded last week, the firmness noted in these products has continued to gain in strength and additional increases are looked for in certain quarters if the present movement on primary markets and in the virgin metal progresses to any marked extent. It is noticeable that recent local changes bring domestic prices generally on a more uniform level, and with increased interest in copper, coupled with a reduction in the visible supply of scrap grades available, the apparent strength in the finished market is expected to remain evident under these conditions. Distributors state current trade is moderately fair, with the following price levels in effect locally:

BRASS—	
Sheets, base, per lb.	0 22
Tubing, base, per lb.	0 25
Rods, base, per lb.	0 19
COPPER—	
Rods, base, per lb.	0 28
Soft sheets, plain, 16 oz. and heavier, lb.	0 28
Do., plain tinned 16 oz. and heavier, per lb.	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 29

FLUCTUATIONS IN RAW COTTON AFFECT WASTES

Toronto.

Fluctuations in the raw cotton markets continue to reflect a more or less unsettled feeling in all cotton products, and while this trend is stated to be a minor factor in cotton wastes, yet the conditions in primary centres are referred to as the ultimate basis of price developments. Quotations on cotton wastes, however, are at present remaining at the revised spring levels, and trade is described as generally satisfactory for this season of the year. When compared with last season, a brighter market is recorded, although one distributor pointed out that it would indeed be a dull season which failed to improve over that of twelve months ago.

SCRAP MARKETS MAINTAIN RECENT IMPROVEMENT

Toronto.

The scrap material markets are maintaining the improvement recorded during the past few weeks, with prices on certain grades still reflecting an upward tendency. Both lead and zinc are quoted higher this week, thus indicating the trend of the primary metal markets, where increased interest has resulted in firmer quotations. Copper has also shown a little more excitement, while cast iron scrap remains strong and is the most active of the ferrous metals. Much uncertainty appears to revolve in the steel industry, owing to such conflicting elements as the coal strike, the ratio of production and the consumer demand. Steel turnings and cast iron borings are, however, reported quite firm. There is very little life in scrap rubber at any time. The usual averages of dealers' buying prices follow:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	$13 00	$14 00
Borings and turnings	6 00	7 00
Rerolling rails	14 00	15 00
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25

Lumbermen's rubber boots	1 50	1 75
Auto tires	0 50	0 60
Solid tires	0 75	1 25

EXPERIENCE BRISK CALL FOR RADIO EQUIPMENT

Toronto.

No slackening in the general demand for radio equipment and supplies can be discerned, in fact business in radiophone sets and parts is reported to be steadily increasing. Present indications point to renewed popularity in the future for radio-telephony, both privately and commercially, as well as an entertaining feature. Parts for radio sets are selling exceptionally well. Jobbers say it is getting difficult to keep an adequate supply of brass rods and copper wire on hand for all requirements. Binding posts also are rated as among the "best sellers." Brass nuts and brass machine screws, rubber, bakelite, sheet brass, etc., are in urgent demand and limited supply. Prices on all of these are very firm.

INGOT METALS NOW SHOW FIRMER TENDENCY

Toronto.

A slightly firmer tendency continues evident throughout the ingot metal markets. The recent improvement noted in tin, lead and spelter, is being held, and increased consumer interest is now reported as lending a brighter outlook in the metal market generally. Prices are generally remaining at the higher levels recently announced with a stronger market tone reported from certain primary centres. While copper and lead are firm, with more activity in tin, antimony and aluminum continue quiet locally.

COPPER.—Fair buying of copper is generally reported, with prices continuing firm at the recent higher levels on both primary and domestic centres. The market tone of copper has been gradually improving during recent weeks, and in spite of the fact that production of this metal has also been increasing, consumption is fairly brisk and stocks are not considered larger. Outside markets continue to record slight price advances, but local quotations remain at 17 cents.

TIN.—While there was an increase in the total visible supply of tin during the month of May, yet this amount was smaller than expected in most quarters and consequently the general tone is brighter. More activity in consumer circles is credited with the prevailing improvement. Local quotations continue at the level of 35 cents.

LEAD.—The lead market is described as exceptionally steady with a good consuming demand evident on most centres. Slight advances are reported in certain quarters, but while the local market tone is firm, prices are unchanged at $7.00.

SPELTER.—A better demand for spelter has recently been evident, while the general situation of this metal has improved owing to future export prospects. The domestic market condition is described as fair, with prices steady and unchanged locally at $7.25.

ANTIMONY.—Antimony is quiet on the local market and little new is recorded in general primary conditions. The light demand has led to some slight concessions being offered in some circles, but this is not yet general, the low range of 6 and 7 cents remaining on the domestic market.

ALUMINUM.—While aluminum was reported again a little brighter from southern primary centres due to improved buying of automobile manufacturing interests, local distributors report this metal to be in a moderately quiet condition, no reflection of this movement having been generally experienced. Quotations hover between 20 and 21 cents.

London Markets

LONDON, June 8.—Several price changes go into effect this week, including slightly higher quotations on spades, shovels and scoops, through revised discounts. A reduction is recorded on dry arsenate of lead. Reports show collections as good, while hardware business is described as very good. Both jobbers and merchants reflect a hum of activity, and the volume of seasonal business is described as satisfactory.

LOWER PRICES ON DRY ARSENATE OF LEAD

London, Ont.

A reduction of from one to five cents per lb. has been announced in quotations on dry arsenate of lead. The following are revised price levels now in effect.

DRY ARSENATE OF LEAD—

	Cts. lb.
½ lb. pkgs.	0 32
1 lb. pkgs.	0 30
5 lb. tins	0 29
10 lb. tins	0 28
25 lb. drums	0 25
50 lb. drums	0 24
100 lb.	—

ANOTHER FIVE CENT ADVANCE IN TURPENTINE

London, Ont.

Another increase of five cents per gallon in the local price on turpentine is recorded this week, the change emphasizing the peculiar situation now evident in this product, the scarcity being marked on both southern and domestic markets. This revision brings the average price to $1.45 per Imperial gallon in one barrel lots, with steel drum five cents lower.

TURPENTINE—

	Imp. Gal.
1 bbl. lots	1 45
2 to 4 bbl. lots	1 44
5 gal. lots	1 50

REVISED DISCOUNT ON SPADES AND SHOVELS

London, Ont.

Through a revision in discounts, spades, scoops and shovels have been increased in price. The advance is approximately five per cent. The new level of 53 per cent. off prevails, compared with the former discount of 55 per cent. Following are net prices on some of the popular lines:

SPADES AND SHOVELS—

	Per Doz.
Black Finish:	
Black Cat	11 28
Star	11 28
Fox	11 75
Olds	11 75
Burns	13 16

Moose, No. 6	17 62
Moose, No. 8	18 32
Moose, No. 10	19 02

LINSEED TONE EASIER OWING TO SEED PRICES

London, Ont.

Linseed oil prices generally remain unchanged locally, with a fairly strong undertone owing to the current brisk trading in this product. While flax seed prices fluctuated during the past few days, and are now noticeably weaker, this move is described as not of sufficient extent to immediately affect oil quotations.

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 15	1 18
3 to 5 bbls., per gal.	1 14	1 17
6 to 9 bbls., per gal.	1 12	1 15

Less barrels, add 15 cents gal.

SCYTHE STONES NOW IN OPPORTUNE TRADE

London, Ont.

Dealers report that scythe stones are also selling well at present. Following are prevailing quotations on these products:

SCYTHE STONES—

Western Red End, per box of 3 doz.	3 00
Quinebog	4 00
English Round, box of 25	5 25
Harts Emery, doz.	1 90
Mower's Friend, doz.	1 75
Carborundum, List Less	15%

FENCE STAPLES AND FENCE WIRE POPULAR

London, Ont.

Dealers also report a brisk movement at present for fence wire and wire staples. Following are current unchanged quotations on these products:

FENCE WIRE—

	Per 100 lbs.
No. 9 Galvanized Wire	3 75
No. 12 Galvanized Wire	3 90
No. 11 Oiled and Annealed Wire	3 87
No. 12 Oiled and Annealed Wire	3 95

FENCE STAPLES—

	Per 100 lbs.
Galvanized, kegs	5 15
25 and 50 lb. boxes	6 15
Bright, kegs	4 15
25 and 50 lb. boxes	5 15

BASEBALL AND TENNIS REQUISITES POPULAR

London, Ont.

An excellent sale is now recorded in many quarters for baseball requisites and also tennis goods. Summer sporting lines are generally in demand, but baseball outfits receive special attention. Prices on these goods are naturally firm and unchanged.

CUT AND WIRE NAILS REGISTER GOOD SALES

London, Ont.

With the local building activity still in full swing, a brisk demand continues for both wire and cut nails. Prices are steady, and the following levels prevail:

NAILS—

Wire, base	3 65
Cut, base	4 35

GRASS HOOKS ALSO IN SEASONAL ACTIVITY

London, Ont.

A good seasonal sale is recorded for grass hooks, with the following range of prices at present in effect:

GRASS HOOKS—

Canadian	Per Doz.
No. 2	3 90
No. 3	4 00
No. 4	4 10
No. 5	4 30
Fox (English)	
No. 2	5 75
No. 3	6 00
No. 4	6 50
Little Giant	6 50

SEASONAL MOVEMENT OF FLY OIL COMMENCES

London, Ont.

The seasonal movement of fly oil has now commenced, and a brisk sale is recorded in many quarters. Following are current prices:

FLY OIL—

Dr. Williams	Per Doz.
1 gal. cans	12 00
½ gal. cans	8 00
Crenoid	
1 gal. cans	12 00
½ gal. cans	8 00

EARLY CALL EXPERIENCED FOR FLY SWATTERS

London, Ont.

Many merchants record a brisk demand for fly swatters, thus heralding the approach of summer. Following are present quotations:

FLY SWATTERS—

	Per Doz.
Canada	0 90
Dunlop	1 15
Plain Wire	0 45

BRISK ACTIVITY NOTED IN HARVEST TOOLS

London, Ont.

Hoes and hay forks are numbered among the leading sellers at present, these products, as well as scythes and snaths, experiencing a brisk movement. Quotations remain at list less sixty per cent.

Winnipeg Markets

WINNIPEG, June 8.—A reduction in prices is recorded on the Potts' line of sad irons, and also on game traps. Higher prices are reported pending on wire nails, while turpentine has been increased another five cents owing to shortage. Trade has improved during the past week, and it is thought a big volume of business will be done in the hardware trade during the next few months.

PRICE ON TURPENTINE ADVANCES FIVE CENTS

Winnipeg.

On account of turpentine stocks being low, distributing interests are in a firm position to ask for any price, and so another advance of five cents per gallon has been announced. The price

per gallon is now $1.50 in one barrel lots.

LOWER QUOTATIONS ON POTTS SAD IRONS

Winnipeg.

The prices on Mrs. Potts sad irons are recorded lower and are as follows:
No. 55 $1.75 per set
No. 50 $1.80 per set

SUBSTANTIAL DECLINE IN GAME TRAP PRICES

Winnipeg.

New quotations on game traps for next season are announced showing a substantial reduction from prices of last year. Following are revised prices:

GAME TRAPS—

No.	Victor	H. & N.	Jump per dozen	New House
0	1 95	....	....	5 55
1	2 30	4 35	2 95	6 50
1½	3 50	6 65	4 25	9 75
2	4 80	9 25	6 50	14 65
3	8 15	12 35	8 80	19 50
4	9 90	14 55	....	22 75

IMPROVEMENT NOTED IN SOIL PIPE TRADE

Winnipeg.

Current trade in soil pipe and fittings is reported as fairly brisk, with special improvement in this direction having been noted during the last few weeks. Discounts remain at recent levels and are as follows:

SOIL PIPE—	
2 and 3 in.	27½%
4 in.	37½%
5 and 6 in.	32½%
8 in.	10% adv.
SOIL PIPE FITTINGS—	
2 and 3 in.	47½%
4, 5 and 6 in.	50%
8 in.	10% adv.

FIRM TREND EVIDENT IN NAIL MARKET

Winnipeg.

On account of the increase in sales tax it is felt that a slight advance may be made on the base price of wire nails. Cut nails may also be included in such an advance. Trade is rather good and with an active building program throughout the summer months, a brisk demand is anticipated. Present prices on nails follow:

Wire $4.60 base.
Cut $6.50 base.

LINSEED OIL TRADE IN MODERATE VOLUME

Winnipeg.

Linseed oil continues to be in good demand. Prices remain at the higher level recorded recently. Following are the unchanged prices:

Raw $1.20: boiled $1.23 per gal, in barrel lots.

Hamilton Markets

HAMILTON, Ont., June 8.—Local hardware conditions on the whole are described as fairly good. The building industry is enjoying a good year, and paint jobbers have optimistic reports. Increasing activity in the small tool field also is reported, and the resulting demand for hardware supplies is reflected in the greatly increased volume of sales recorded by supply houses.

The accessories business is exceptionally good, the entire line being in good demand, with of course, warm weather accessories, such as ventilators, water pumps, extra tire carriers, etc. particularly sought after.

The connection between the new budget rulings and price developments is illustrated by the following: One hardware wholesaler outlined an interesting result of the new sales tax legislation in that it is now considered necessary to go over their entire stock and reprice same to take care of the advance in sales taxation, and also decreases in tariff. This movement will be continued until all lines have been revised. It was also pointed out that where the jobber in a great many cases was previously absorbing the one-and-a-half per cent. sales tax, it is now evident that they cannot be expected in justice to themselves to absorb the two-and-a-quarter per cent., so that readjustments of this nature will likely be in order as outlined above.

Both distributors and producers of paint and the allied products, now generally report a marked increase in general buying activity during the past few weeks. The seasonal movement of these goods is assuming more normal proportions, with many repeat orders coming to hand which swell the volume of current business in no uncertain fashion. The stimulus of paint-up campaigns conducted in various city and country districts has reflected a beneficial effect in the call for paints and varnishes and many merchants record brisk trading in this department. While the full force of the movement was a little late in arriving, probably owing to delayed weather conditions, it is now considered apparent that the paint industry is entering upon a swing of enthusiasm and enlarged influence which will carry a marked degree of activity throughout the following months in all phases of the trade.

Higher Turpentine Price

Recent repeated advances in turpentine quotations reflect the development of a more or less unusual situation in this product, which is evident in both southern and domestic centres. Reports from producing circles indicate that the present strong position of turpentine is the result of a combination of circumstances, included among which are such factors as increased foreign demand, similar insistent calls from consumers in practically all market centres, the uniform late crops and a distinct shortage of reserve supplies both in the hands of producers and distributors. Consequently, turpentine on the domestic markets has recorded a number of price advances during the past few weeks, with the latest movement in this direction bringing prices to the highest level that has prevailed this season.

How long this condition will remain is problematical, but it evidently depends upon the consistency of consumer's current requirements, combined with the ratio of new receipts in production localities. At present, the demands are reported larger than the volume of fresh supplies, thus rendering the replenishment of stocks a difficult problem.

Pittsburg Markets

PITTSBURGH, June 8.—On June 2 the Steel Corporation interests opened order books for new periods at unchanged prices, $4.75 for 100-pound coke tin plate, $2.40 for blue annealed sheets, 10 gauge; $3.15 for black sheets, 28 gauge; $4.15 for galvanized sheets, 28 gauge, and $4.50 for automobile sheets, 22 gauge.

In tin plate, order books were opened for the usual periods, second half of the year in the case of manufacturing consumers, and the third quarter for jobbers. In sheets there was an unprecedented action, as books were opened for July only. The old practice was commonly to name prices for six months at a time, but of late the practice has been to take the market a quarter at a time.

The book opening was unusually late this time, due no doubt to some uncertainties growing out of the coal strike. The majority of independent sheet producers have been disposed to seek higher prices, and in the past three weeks several have "announced" advances, most of these so-called advances being $5 to $7 a ton. On account of increases in costs there was some basis for making an advance, but the Steel Corporation was reluctant to do this on account of the increases in cost being due largely to the coal strike, the essence of which is an effort on the part of coal producers to get costs down.

Then there has been plain evidence in the market that while a number of independents had announced advances in their prices, there had been much selling into the third quarter, if not through the whole quarter, at the old prices. These, presumably, are the considerations that moved the corporation to continue its old prices, but to limit sheet sales to July so that if necessary an advance could be made later.

It has been no secret that a part, and probably a considerable part, of the strength of the steel market in the past few months has been due to the coal strike, making buyers of steel fearful that they might not secure all the deliveries they would need.

A New Angle to "Save The Surface" Effort

Merchants' Work Has Been Chiefly Along Merchandising Lines But Expert Instruction in Application of Paints and Varnishes is Very Necessary to Continued Appreciation of the Value of Paint to Protect the Surface

Editor's Note.—A great deal of editorial matter has appeared in Hardware and Metal dealing with sales methods for impressing upon customers the value of "Save the Surface and you Save All." One angle of this question which has had less attention, however, is educational work concerning proper application of paints and varnishes so that the surface may really be protected. If customers buy paint to protect the surface of woodwork, etc., in their homes, and find that the paint is not as durable as was claimed by the merchant, they will perhaps lose some faith in the basic principle on which they should be sold. Much of this may be the merchant's own fault for not having properly instructed the buyer in the correct application of the paint. Herewith are some helpful pointers continued from last week's issue, which paint salesmen should study:

THE USUAL limitation placed upon paint is that so long as it hides the surface satisfactorily, it can be spread as far as it can be brushed out. This is a great mistake for there are two classes of paints that cannot be so treated with best results from the standpoint of durability. First, there are those dark paints which possess such splendid hiding power that they can be brushed to the furthest limit. We will consider the second class a little later.

Let us take for example one of the red oxide or the graphite paints, which come in the first class. It is possible to spread them out so thin that the coat will be less in thickness than tissue paper and it is unreasonable to expect a paint film as thin as this to afford maximum protection. If four or five coats are applied of this thinness the results would be very satisfactory, but the labor cost would be too great to make this proposition one to be considered.

450 Square Feet of Metal Surface

We are then brought back to the question, "How much surface to the gallon of paint?" and qualify it by adding "and obtain greatest durability?" In our opinion for one coat work on metal or wood a gallon of paint should not be spread over 450 square feet per coat for maximum protection no matter what its color or body.

The second class referred to above are those light colored paints that will not cover or hide the surface satisfactorily if spread as thin as the dark paints.

The tendency is to apply these paints as heavy as possible in order to hide the surface; this results in being impaled upon the other horn of the dilemma and we have a paint film too thick to dry satisfactorily and one that is sure to give trouble sooner or later in peeling, cracking, chalking, or scaling. It makes an unsafe foundation for subsequent coats of paint and is altogether unsatisfactory.

No matter how deficient in power to hide, such a paint should be brushed out to as thin a film as those that hide perfectly with one coat and enough coats be applied to hide the surface to the satisfaction of the painter. It is unreasonable to expect a light colored paint to cover as well as a dark paint.

No one should yield to the temptation of attaining covering at the expense of durability by applying paints relatively poor in covering qualities in heavy coats nor on the other hand, should they apply paints relatively strong in covering power in coats too thin for durability.

There are limits then on either hand beyond which it is not safe to go, and care and judgment must be exercised to keep within bounds.

Painter's Standard for Testing Paint

The painter usually judges a paint by four points:

First—Its power to obscure or cover.

Second—The ease with which it is applied. That is to say, if it slips off the brush easily and is easily spread or brushed out over the surface so as to cause the minimum of fatigue.

Third—The time it takes to harden or dry. (The painter wants a paint to harden with reasonable speed.)

Fourth—The durability which cannot be determined beforehand, and this accounts for the conservative attitude of painters regarding paint of which they know nothing.

Outside and Inside Paints

Paints intended for exterior use require liquids that will withstand the exposure, but paints for most interior use cannot be made with the same liquids and give satisfaction.

Numerous cases have occurred where inside white and colored paints have been ignorantly used for outside use with disastrous results. This brings up the subject of putting up exterior house paints in packages smaller than quarts.

Many dealers cannot seem to understand the practical difficulty the manufacturer is "up against" in this matter of continuing the same colors as shown on the exterior house paint card down to the smallest cans. The facts are that paint bought in small cans are usually used for interior work.

This being the case it would be sure to cause trouble on account of slow drying or turning yellow if exterior house paint quality were put into these small packages.

On the other hand, if a change were made in the quality of the material put into the small packages to make them

The Brush Department

An Effective Display Board for Brushes

Merchant Wires Various Styles of Brushes to Board Covered With Green Baize and Hinges it Between Shelving in Paint Department—Selling the Samples so Stock Won't be "Shop Worn"

A DISPLAY board is used by a number of hardware merchants to good advantage in showing brushes. Such a board can be made very attractive, it takes up little room in the store and it can be made to fit in with various arrangements in the brush department to good advantage. The board can be painted, varnished or enamelled or a green baize cover put on it. The brushes can then be nailed or wired to the board, these arranged in various sizes whether round, oval or flat. One merchant uses such a board hinged between the shelving in the paint department where it is easily referred to for samples when selling paint to customers.

There are other ways in which the public can be shown the stock of brushes carried, but whatever method is employed, care should be taken not to allow display or sample brushes to appear "shop worn" or become unsaleable through hanging all season on the board. More particularly does this apply to the better grade of brushes or the painters' tools. When the painter enters the store and asks for a brush, he is looking for a tool that is of first quality, and one that will stand perpetual using and does not want to be troubled with the bristles continually loosening and showing on the painted surface. He may be given one from stock, but what becomes of the sample? It has taken on an appearance that is not inviting to him and cannot be guaranteed that bristle will not come out, because it has been exposed too long. Eventually it is placed in the drawers at the end of the season or sold at a reduced figure.

Replace Samples

To overcome this, sell the sample at regular periods, every three or four weeks. Thus also allowing your sample board to have a new and snappy appearance. Accomplish this by having a small hole bored through the brush handle and suspended on a steel pin driven into the board or panel. The price and number tag will always remain if gum label is glued directly under, so that all that is necessary is the drilling of new brush and it is unlikely, the painter or amateur will offer an objection to receiving a brush with a small hole in the handle.

Substituting will also prove profitable at the commencement of next season in the early spring months, when samples have again to be shown. Rather than having the previous year's display brush as an eye-sore, you can pick at random any brush in the box, they are all new and any one may be used.

Money-Saver for the Brush Department

To the merchant who carries a stock of twenty-five different kinds of flat wall, oval, flat varnish and round types, also from eight to ten varieties of kalsomine brushes, the estimated cost of his samples is in the neighborhood of thirty-five or forty dollars. These figures, or a good percentage of them, are quite an item when having to be deducted from the net profits of the season's brush sales, caused by the depreciation of samples that are continually on display. Thus, while brushes are considered a very staple and profitable line to the hardware store, it might be much more so, if leakages such as this were avoided.

PROVIDES PAINT TO BRIGHTEN UP TOWN

Belle River, Ont.—Announcement was made that Mr. James Cooper will provide a carload of paint at actual cost in order to induce the residents of the village to paint and clean up the town. He will also donate a prize of $25 to the most attractively painted house in the village after the clean up drive. A prize of $50 will also be given for the best kept lawn or boulevard.

(Continued from Page 50)

more suitable for interior use they would be certain to cause trouble because of occasionally being used out of doors. Therefore, in order to avoid this difficulty most manufacturers put up two lines, one for interior and one for exterior use, and purposely change the shades so that the purchaser cannot buy a can of interior paint to match the exterior paint, or vice versa.

How Much Paint Can a Man Apply in a Day?

This depends upon conditions.

If he is painting a house and he is working alone on a ladder he can apply little more than a gallon per day. If he has a companion to help move ladders and they use a plank supported by braces from two ladders, he can apply 1½ gallons per day. If working from swing staging or on horses he can apply 1½ to 2½ gallons per day. If painting floors or walls while standing on the ground he can apply from 2 to 2½ gallons per day. If working on structural steel in the yard or in the shop, he can paint about 900 square feet or about four tons of structural steel of the average sizes; this will consume about 2 gallons of paint, figuring 450 square feet to each gallon.

Painting steel that is erected is very difficult to estimate. It varies according to the conditions.

Painting New and Old Work

Many kinds of woods are used in house building. On new work of white pine, poplar or white wood, the priming coat should be of the color with which it is intended to finish and it should be thinned with a half gallon raw linseed oil to the gallon of paint; if of red cedar, cypress, Oregon pine, Southern pine or other pitchy lumber, reduce with one-fourth turpentine, one-fourth raw linseed oil and one-sixteenth gallon of benzol to the gallon of paint. The second coat in both cases should be thinned with one pint of turpentine to the gallon of paint (no benzol, for it will soften the first coat and spoil the job). The third coat should be applied as it comes from the can or if too heavy to brush well, add one pint of raw oil to the gallon. Great care should be taken to stir the paint thoroughly before using. By all means avoid ochre primers.

In painting houses that have previously been painted the treatment varies according to the condition of the surface. If scaling and cracking, first scrape or burn off the paint and then proceed as for new house. If blistered, burn off where blistering occurs and use turpentine in thinning the paint. If peeling, burn off and proceed as for new house. If surface is in good condition but dry and powdery, add one-eighth to one-fourth gallon raw linseed oil to the gallon of paint for each coat. If surface is in good condition but hard and firm, add one pint of turpentine to the gallon of paint for first coat and one pint of raw oil for second coat. Allow from five days to one week between coats. Never paint a house after a rainstorm without waiting at least a day for it to dry out.

Boeckh's Brush News

The Value of a Reliable Process

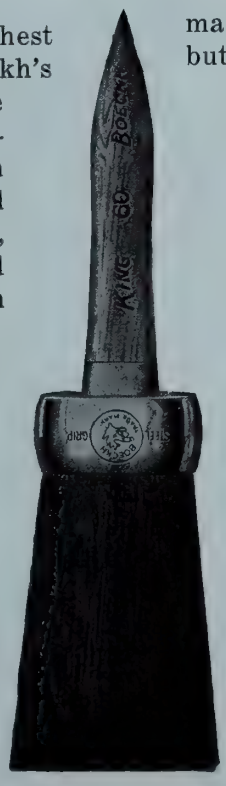
To gain satisfied customers, you must sell a satisfactory brush, a brush that will result in good-looking paint jobs—and many of them.

Boeckh's Rubberset Painter's Brushes are just this kind. Because of our special process of manufacture, they are stronger and have greater resilience than ordinary brushes. They give longer and more satisfactory service.

Bristles or hair of the very highest quality are used in all Boeckh's Brushes. The butt of each bristle is completely covered with semi-liquid pure rubber, which is then vulcanized by steam heat, until absolutely hard. By this process, each bristle is so firmly fastened into the rubber that it never can come out.

Steam Heat Vulcanizing

is the method we employ. We know it is safe. Brushes vulcanized by steam heat give better and longer service. The bristles retain their strength, firmness and elasticity. Steam heat vulcanizing does not destroy them. Gas, used by some manufacturers, we know, is much faster than steam heat vulcanizing, but it is very dangerous, unless extreme care is taken, the life of the bristle is destroyed by the very dry heat.



Throughout our many years as manufacturers, we have used none but reliable, "safety first" methods in the construction of our brushes. It is because of these methods that Boeckh's Brushes are perfect—and give unequalled satisfaction.

Selling brushes made by Boeckh's reliable, "safety first" methods gains satisfied customers. It also establishes your store as a "Quality House."

If you are not already selling Boeckh's Brushes, write us at once for particulars.

Weekly Paint Markets

Montreal

MONTREAL, June 8.—An advance of three cents in local Paris green prices in all sized packages and containers and turpentine offer the features of the paint markets. Local turpentine quotations are further advanced three cents per gallon, bringing a new high level for the product this season. The undertone of turpentine remains strong with local available stocks still at a low level. During the past week shipments from the south have been received, but these have not been sufficient to take care of present demands and at the same time replenish stocks to a satisfactory extent for this season of the year. Further arrivals are looked for during the coming week, and while supplies will be none too ample, the shortage is not expected to reach serious proportions. Southern markets report demand still exceeding fresh receipts, with stocks also comparatively low for the present season. The flax seed market has weakened to an extent, and as a result linseed oil has developed a somewhat easier tone. Local oil prices, however, remain unchanged, the present active demand being a strong factor assisting in maintaining present levels. There is little change in window glass, quotations remaining at recent revision, with moderate activity reported for this season of the year. Paint and varnish sales are active, manufacturers still expressing themselves as being quite satisfied with the present volume of business. Current quotations on all lines are unchanged, lead and linseed oil contributing a fair amount of strength to the market, because of their present firm tone.

TURPENTINE STILL ON AN UPWARD CLIME

Montreal.

Another increase of three cents per gallon on the local turpentine market again offers the price change in the paint markets. This further revision brings turpentine to a new high level of $1.38 per gallon in one barrel lots. Although the local market was relieved this week by shipments from the south, practically all the supplies received were immediately taken up, either for orders already on hand or for manufacturing purposes, and there is still very little stuff available. One local dealer stated that they were practically in the same position as last week, their stock being depleted and demand still active. For present demand it can be stated that the call for this product is generally described as insistent. Further shipments, however, are expected during the following week and the temporary shortage is not expected to reach serious proportions. For the market in the south, reports indicate that demand still exceeds available supplies, and although theoretically prices should ease off at this season, there is no present indications of a weakening. The crop has been delayed this season and the market has been dependent on producers, offerings. With the beginning of this month, however, receipts are expected to increase, and with this a gradual improvement locally may be looked for. Quotations at the revision are as follows:

TURPENTINE—	Imp. Gal.
1 barrel lots	$1 38
2 to 4 barrel lots, per gal.	1 37
Broken lots	1 48

SEED MARKET WEAKENS: EASIER TONE IN OIL

Montreal

Following recent fluctuations, after a strong market for some weeks past, the flax seed market has developed a somewhat weaker tone, with prices at the end of the week some few cents less than at the commencement. Local quotations on oil, however, have not yet reflected the softer tone, and are again unchanged. The demand for linseed oil is still good, the present activity in paint manufacturing circles requiring its usual volume. Whether a continuation of the present ratio of consumption will be a factor strong enough to offset any tendency from an easier market is thought problematic, but it is noted that crushers are not quite as firm in their ideas as formerly, or even as they were one week ago. If flax seed continues to sag, there is little doubt but that a lowering in oil prices will follow in the not far distant future. It must be remembered, too, that the heaviest consumptive demand for oil is usually fairly well over after the close of the present month.

Reports from outside markets have also recently taken on a little different aspect. With improved seeding reports and fall prospects in the Northwest, a brighter outlook is lent for future. Added to this, and perhaps having a more direct bearing on the present situation, are more ample supplies reported in the Argentine. Unchanged quotations are as follows:

LINSEED OIL—	Raw	Boiled
8 to 5 barrel lots, per gal.	1 08	1 10
1 to 2 barrel lots, per gal.	1 10	1 12
Less barrels, add 10 cents per gallon.		

CONTINUED BRISK TRADE IN PAINT CIRCLES

Montreal.

General satisfaction with the present movement of paint, varnishes and sundry lines is again expressed by manufacturers. Comparatively low dealers stocks at the beginning of the paint season is still assisting sales, and a continued good trade is looked for during the remainder of the month at least. Generally speaking, the volume of business in these lines is keeping pace with last year, and although a slight falling off in industrial trade has been in evidence during the past month, dealer trade is said to have filled the gap in an encouraging way. The same might be said of white-lead-in-oil, sales of this product showing that much outside painting is at present under way. The undertone of the market of all products is still fairly firm, lead and linseed oil contributing strength through their present strong position.

MODERATE BUSINESS IN WINDOW GLASS

Montreal.

The recent announcement of a discount added to former net prices on window glass leaves the local market in a somewhat improved condition insofar as prices are concerned, although keen competition is still in evidence. It is also noted that the Belgium market is somewhat weaker, the mark having sagged in recent weeks. With frequent arrivals from this source, there is still a soft tone to the market notwithstanding the price decline of two weeks ago. Current business is stated to be fair for this season through building requirements, and with a continuation of brisk construction work dealers anticipate that trade will at least reach the record of previous years throughout the summer months.

THREE CENT ADVANCE IN PARIS GREEN PRICES

Montreal.

An advance of three cents per lb. is made on Paris green quotations in all sized packages and containers. It will be remembered that two reductions in prices were announced at the beginning of the season which brought current price levels to a much lower level than last year, and the present revision still leaves prevailing quotations considerably lower than one year ago. Revised prices will be found on current market page.

Toronto

TORONTO, June 8.—An advance of three cents per lb. in paris green quotations coupled with a recession of five cents per gallon on linseed oil, supply the premier price developments on the current paint markets.

THREE CENTS ADVANCE IN PARIS GREEN PRICE

Toronto.

An increase of three cents per lb. all through the list has been announced in quotations on paris green. This change reflects the brisk call for these products at this season of the year, which has resulted in stocks being very low locally, and fresh supplies now more difficult to obtain. Following are the new higher price levels:

PARIS GREEN	100-lb. lots
½-lb. paper cartons, per lb.	0 40
1-lb. paper cartons, per lb.	0 38
½-lb. tins, per lb.	0 42
1-lb. tins, per lb.	0 40
25-lb. tins, per lb.	0 36
lb.	0 34
250-lb. kegs, per lb.	0 32½
600-lb. barrels, per lb.	0 32

LINSEED OIL LOWER: FLAX SEED WEAKER

Toronto.

Owing to the weakness apparent in the flax seed markets, which development was outlined in last week's paint market reports, the price of linseed oil has recorded a decline of five cents per gallon. This change brings the average current quotation to $1.10 for raw and $1.13 for boiled in one barrel and two barrel lots. During the week the previous level of $1.15 was not being uniformly adhered to, and with the prevailing call for oil registering a recession from the brisk movement of recent weeks, the lower prices were generally announced. The quieter tone of the market is attributed to the fact that large consumers are thought to have covered their requirements, but in view of the heavy call for mixed paints now being experienced, some renewal of oil supplies may be evident later on in the season. Numerous inquiries indicate that buyers are keeping in close touch with the market, but trading is reported light. Revised price levels follow:

LINSEED OIL—	Per gallon Raw	Boiled
1 to 2 barrel lots	1 10	1 13
3 to 4 barrel lots	1 09	1 12
6 to 9 barrel lots	1 07	1 10

TURPENTINE SITUATION REFLECTS LOW STOCKS

Toronto

The current situation in the turpentine markets continues to attract more than the customary degree of attention, in view of the exceptional conditions evidenced at this season of the year. No recession has been tabulated from the firm showing of the last couple of weeks, and the high level of the season announced last week, continues to remain in effect locally. Distributors of turpentine describe the domestic conditions as hinging almost entirely upon the extent of new deliveries from the south, which are at present very indefinite. Until fresh arrivals are of sufficient volume to take care of pending orders and leave a surplus stock on hand, it was stated that the price will most probably remain where it is, or, on the other hand, if the scarcity becomes even more pronounced—a development which is not expected—higher price levels might become effective until relief was in sight. Buyers are showing little desire to purchase beyond their immediate requirements, which evidently reflects the feeling that lower prices cannot be very far off, but in spite of this lack of extensive commitments, the prevailing demand is described as brisk enough to take care of all available supplies with shipments on the way also booked up. Local quotations follow:

TURPENTINE—	Imp. gal.
1 barrel lots	1 45
2 to 4 barrel lots	1 44
5 gallon lots	1 60

Less than 1 barrel lots—15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

INJURES REPUTATION

(Continued from page 30)

specifically with those imitators of British Hall Marks, which sometimes are applied not only to American sterling wares but also to plated wares as well.

Another unscrupulous practice, to which attention is now being drawn, is the manufacture and sale in America of plated wares purporting to be "Sheffield ware" or "Sheffield reproduction," and which, since they are never the former, and seldom the latter, have the effect not only of defrauding the public, but of doing incalculable injury to the name of Sheffield in the eyes of the purchaser who may discover the low quality, but not the origin of its purchase.

"Unfortunately, our customs laws permit the importation of such articles made in the United States bearing the marks "Sheffield" or "Sheffield reproduction" provided these marks are accompanied by the words "Made in the U. S. A.," and as there is no stipulation as to the manner in which these marks shall be applied, invariably the word "Sheffield" is applied quite conspicuously and the words "Made in the U. S. A." very obscurely. However, all such cases are subject to the scrutiny of your inspector, who will see that there is no contravention of the Gold and Silver Marking Act by the application of marks that are calculated to mislead.

The agitation for the compulsory introduction of the Metric System has become less apparent. The propaganda of the World Trade Clubs of San Francisco has, however, served the useful purpose of disturbing the laissez-faire attitude of many interested industries, particularly in the textile and engineering world, who have lodged official resolutions against any such compulsory change. England has lately considered the advisability of introducing a decimal currency, retaining the sovereign and florin but involving a slight reduction in the value of the half-penny. But a special committee under Lord Southwark has rejected the scheme, notwithstanding the unquestionable advantages of decimal currency. I mention this by way of illustrating the seriousness of making changes in the advanced industrial and financial stage the world has reached to-day. If currency which is transitory and merely the medium of exchange cannot be altered, it must be far more serious to alter the units of measurement and production, which are permanently rooted in the vast engineering and architectural structures and industries of our Empire.

HALF HOLIDAYS AND DAYLIGHT SAVING

Ask Your Editor to re-print this Editorial

The Editor of your local newspaper from whom you buy advertising space undoubtedly will be glad to support the "Save the Surface and You Save All" educational campaign as it is a national issue. Get in touch with your editor and a little co-operation will work wonders.

Many leading newspapers have published strong editorials in support of the idea of surface protection.

"The Value of the Surface

Suppose you were in the market for a house and were offered two structures that were of the same age, shape, size, constructed of the same material, and equally attractively located; were built from the same plans and by the same workmen and on the day when they were finished, were as like as two peas in a pod and worth the same amount of money; and the only difference between them, when you went to look them over, was that one of them wore a fresh coat of paint, while the clapboards of the other dripped shabbily with the scales of the last coat it had received years before.

Which would you choose? The house that had not been painted since it was erected, whose appearance was desolate and uninviting, and whose walls, exposed to the weather season after season, were already showing signs of general decay? You would not. You would put your money into the house that had been protected from the rains and snows of winter and the blistering heat of summer by frequent applications of protective and preventive paints. Your mind would be made up for you as much by the knowledge that this house was sound from sill to ridgepole as by the appeal which its neat and brilliant exterior made to your eye.

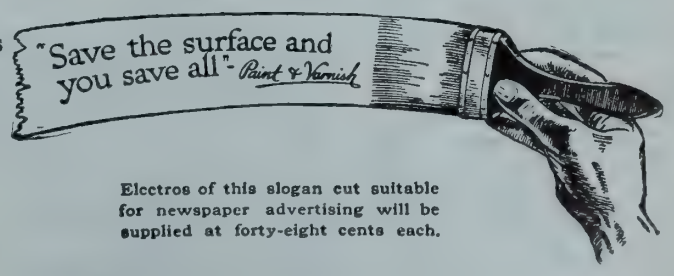
And the other man's mind is made up just as yours is. You may not be buying a house, you may not want to dispose of it this year, but you may want to sell it next year or five or ten years from now. And when you do want to sell it, your property will be judged by the same standard that you would employ if you were buying instead of selling.

A house that can't be turned into cash is about as profitable an investment as bonds and stocks for which there is no market, and it can't be turned into cash at full value unless it has been kept in shape. The realty world has a long memory. "Oh, that house has gone ten years without a touch of paint. It is water-logged and wormeaten. It won't hold together much longer." These observations are frequently heard in discussions of realty offerings. A few coats of paint in the last ten years would have robbed them of any foundation of truth. And then there is the other side of the matter. You may not want to sell your house at all. You may expect to make it your home as long as you live; but you can't do this without keeping it in repair. Shingles and clapboards will wear out and if the weather gets further in, other timbers will go. A preventive coat of paint applied in time will save much unnecessary outlay in actual reconstruction. Whether the exposed material is wood or metal or any of the other structural materials, weather will eat its way into it and finally destroy it if its surface is not protected. Save the surface and you save all.

70

Save the Surface Campaign

509 Royal Trust Chambers
107 St. James Street
MONTREAL



Electros of this slogan cut suitable for newspaper advertising will be supplied at forty-eight cents each.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

SUPREME CUTLERY

FLY TERROR

Sells to Campers

Fly Terror wins! It makes the sales. It never disappoints anybody. Fly Terror absolutely protects from black flies and mosquitos. Still better; it protects and is agreeable to use also. This is an unusual advantage, Fly Terror is agreeable in odor, non-greasy, non-poisonous, non-injurious to the hands and very pleasant to use—for everybody but the flies and mosquitos.

MADE IN CANADA

The Fly Terror Manufacturing Reg'd
7 Notre Dame Square, Quebec, Canada

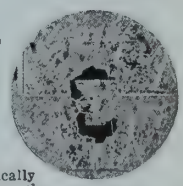
"CROWN" METAL SHINGLES

Securely Locked On All Four Sides



"Crown" Lock-All Around Shingles are the most scientifically constructed on the market. They are so locked together on all four sides that they become, in effect a continuous piece. They are fastened securely every few inches, yet are self-compensating in heat and cold. These reliable metal shingles are absolutely water and fire-proof, free from solder, exposed nails, or anything that permits deterioration through the action of natural elements.

For details and information on any sheet-metal problem write—

McFarlane-Douglas Co.,
Limited.
Ottawa, Canada.

If interested tear out this page and place with letters to be answered

TINKER TOM'S TALKS.

No. 362

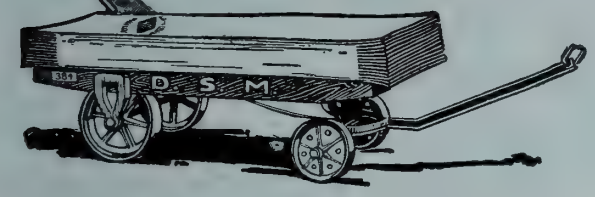
You've heard of the old time three-handed card games—two sharks and a sucker?

You'll see the same thing duplicated to-day in the **Coal Strike.** The owner three months ago couldn't sell soft coal at $1.50 per ton, now he has a whale of a trade at double that.

The miner who was working less than half time is now working every day and the non-union mines are full of union men working "open shop."

As to the sucker, the poor old public is filling that role, and the queer thing is the way business in all lines is reviving.

TINKER TOM



MADE IN PREMIER CANADA

DOUBLE-NEEDLE TORCHES GIVE DOUBLE SERVICE

The Improved Double Blunt Needle Burner produces the maximum heat, burning gasoline or kerosene by changing the jet block. The Upper Needle has wire tip that cleans the orifice, lower regulates the flame. A perfect gas mixture is secured as orifice can not be enlarged by forcing the Needle, a fault with other makes. No. 208 Torch is extra large and powerful, two quart size, No. 208 quart size and 210 pint capacity. Always reliable and save time and money. Jobbers supply at factory prices. Send for our catalogue now.

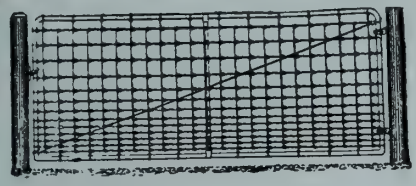
Good Fencing Saves Property and Money

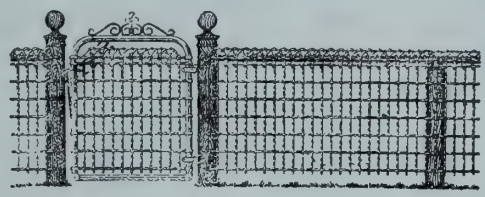
HEAVY TITE-LOCK Horse and Cattle Fence has 5 line wires, 40 inches high; nine stays to the rod. It is all No. 9 wire; spaced 10, 10, 10 and 10. Weighs about 7 lbs. per rod and comes in 20 and 40-rod rolls. There is also a horse, sheep and cattle fence with 7 line wires, with spacing 5, 6, 6, 7, 7½ and 8½. Weighs about 9 lbs. per rod. This is fence that you can sell a lot of and make money on. This fence is really "horse-high, bull-strong and pig-tight."

Well Fenced Property Is More Valuable

Ashdown service will back you with a wide variety of ornamental fence and gates, trellis, flower guards, etc. We can supply just the thing to turn most of your customers' inquiries into orders.



Good, substantial farm gates that add to the appearance and value of a place, pay the farmer and pay you to sell. The illustration is Style "C" Iron Pipe Frame, Painted. It is 48 inches high, and comes in widths 8, 10, 12, 14 and 16-foot.



You Are Backed by the Ashdown Organization With 53 Years of Merchandising Success and Service.

Barrett Roofings, Cements Industrial Paints etc.

The Wise Dealer Looks Ahead

HE wants to make profits, of course, but he must make friends of his customers—he must win and hold their confidence by selling them reliable goods at fair prices.

That's why wise dealers like to sell Barrett products. Our sixty years' successful manufacturing experience insures the absolute reliability of every article bearing the Barrett label.

The Popular Fly Oil

Lice Destroyer, Cow Spray

Creonoid is wonderfully effective in eliminating flies, lice and other vermin, and a fast seller in every farm community.

When the worry caused by flies and other insects is removed by Creonoid, horses do more work, hogs fatten more quickly, cows give more milk, and hens lay more eggs. That means bigger farm profits.

The farm where Creonoid is used is healthier, too. For Creonoid kills the malarial mosquito and other germ carrying insects. It also kills the dangerous, blood-sucking flies.

We Help You Sell It

Our advertising plans include many farm paper and newspaper advertisements featuring this remarkable Barrett product. We are making customers for Creonoid right in your territory. If you order now you will be prepared to make the profit on this demand.

Comes ready for use in 1- and 5-gallon cans, ½ barrels (about 20 gals.), barrels (about 40 gals.), and steel drums (43 gals.).

Spraying hen house with Creonoid

WINNIPEG VANCOUVER HALIFAX, N. S. **The Barrett Company LIMITED** MONTREAL TORONTO ST. JOHN, N. B.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Five 1-lb. pkgs. of Putty!

Ask a friend to go into your store to-morrow at five different times, and buy and have weighed out for him a pound of putty each time. Have him bring these five one-pound packages to you—and you go out and weigh the whole five. Note the total weight. Result? An order to us for a

Dayton Hardware Scale

It weighs—it counts—it computes

The live merchant has only to see for himself the absolute money savings there are in the Dayton Hardware Scale for him to sell himself one or more of these modern scales, built specially for the hardware trade. It means that the "murderous down weights" are stopped—that your cash drawer gets every cent for every fraction of weight of every article you weigh and sell. Price calculations are also made by the scale, so even "green" clerks can give perfect service.

How about your Nails?
How about your Wire?
How about your Rope?
How about your Screws?
How about your White Lead?
How about your Dry Colors?

Your customers don't thank you for overweights. But it is hard, with the ordinary scale, for the clerk to avoid tossing in the extra few nails or ounces of other product, to make the scoop go down, without seeming to be stingy. Yet those last few nails, or ounces of product, must be paid for out of your net profits, Mr. Merchant. Remember this goes on all day long, day after day, month after month. Why not save this money for yourself and family?

The Famous Dayton Hardware Scale, Showing Counting Scoop and Extra Capacity Platform Rack.

Dayton Hardware Scales are sold on attractive monthly payments without interest. Discount for cash. Write to-day for descriptive circular.

INTERNATIONAL BUSINESS MACHINES CO. LIMITED

You Can Sell Many Flashlights and Batteries This Summer

EVERY man, woman and boy who comes into your store to purchase fishing tackle, ammunition, auto tools and other outdoor accessories is a prospect for the sale of an Eveready Flashlight. Keep your Eveready Flashlights prominently displayed, "ask 'em to buy" and you'll be surprised how easily and quickly sales are made. Every flashlight sold means a larger volume of battery renewals—and an ever-increasing profit for you.

Your jobber can supply you with a stock of the fast-selling Eveready Flashlights and Batteries. Order now to get the full benefit of the vacation season.

CANADIAN NATIONAL CARBON CO., LIMITED

Montreal Toronto Winnipeg Vancouver

Eveready Unit Cells are the liveliest, longest-lived flashlight batteries made. You need stock only two sizes to fit all tubular flashlights. Ask for Eveready Unit Cells.

EVEREADY FLASHLIGHTS

Eveready flashlights are made in a variety of shapes and sizes, ranging from the vest pocket cigarette case type to the powerful spotlight with the 300-foot range.

You'll make a hit with

SAMSON HAMMERS

The heads are carefully shaped to ensure perfect balance and striking power.

The pitch of the claws gives a fast and powerful draw.

The handles are shaped at the grip so as to give the hand a firm hold; wax finish, special steel wedges prevent the handles from working loose.

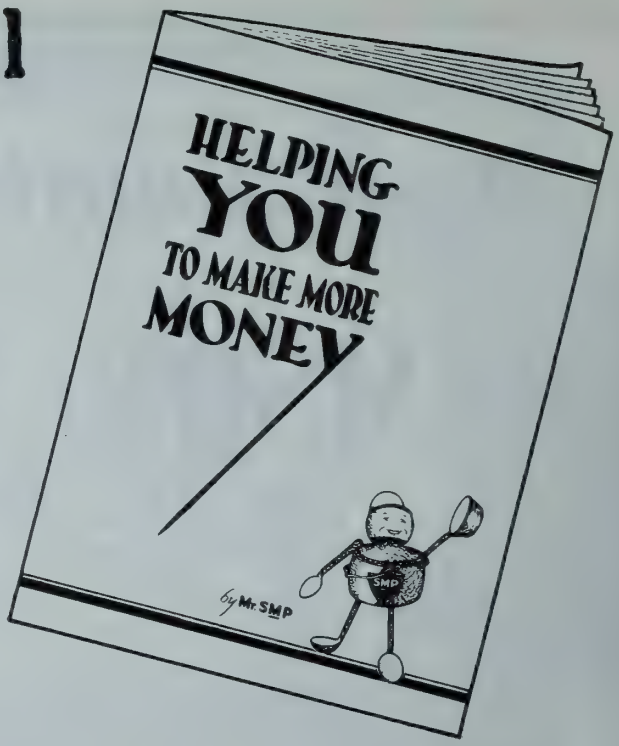
A Free Bookful of Money Making Ideas!



Here it is! The handiest book on selling that has been produced for many a day. It's a regular mine of information for merchants handling Diamond Ware or Pearl Ware. It is a manual of selling points.

Many Successful Selling Secrets

The information contained in its pages was gathered from some of the most successful hardware merchants in Canada. You'll find many of their best selling secrets. There are tips and hints galore on all kinds of subjects. Such as sizing-up different customers, how to cash in on the different season's trade, how to dress windows and the duty of a good display.

Then there are several keyed diagrams of good displays, tips on how to display goods in the interior of your store. A long list of what salesmen should know about SMP wares, a summarized list of selling points, an interesting test, illustrations of our cuts and so on.

Write for it!

We will supply one of these books free of charge to every hardware merchant carrying Diamond Ware or Pearl Ware. Write for it at once or ask our traveler to send one. You will find it highly interesting reading, and very useful if kept close at hand.

The Window Trims are Going Fast

Have you ordered your window trim yet? You have your choice of four trims, two of them Diamond and two Pearl. If you haven't ordered yet do so right away. They are going like hot cakes.

Marlin Repeaters

Put New Life into the Gun Business

Because of our advertising and sales campaign your customers will soon be asking you about *Marlin* guns. How will you answer?

Have you realized that *Marlin* guns are the finest repeating firearms in the world?

You sell .22 caliber rifles! Therefore you know that your customers will appreciate these features of superiority in all *Marlin* .22 caliber repeaters:

Side-Ejection—we discarded all old style top-ejecting guns 30 years ago.

Standard 24-inch barrels—we make no guns with stubby, sawed-off barrels.

Standard length buttstocks—no short length, cheap-looking buttstocks on any Marlin guns.

Ivory Bead Sights are standard equipment!—they cost extra on any other make.

Ballard Rifling—that has made *Marlin* accuracy famous.

All *Marlin* .22 Repeaters use in the same rifle .22 Short, .22 Long and .22 Long-Rifle cartridges.

Model No. 20—a modern side-ejecting gun—not an old style, top-ejector. Has the fast-handling slide action, with visible hammer, for the shooters who prefer a visible hammer rifle, and has a full magazine that gives 25 shots at one loading. Standard length barrel and buttstock. Has Marlin accuracy and Ivory Bead sight—yet retails at a reasonable price.

Model No. 38—is the wonderful new slide action *Marlin* repeater; hammerless, with instantaneous take-down—the cleanest and sweetest little rifle ever made. Has *Marlin* accuracy and Ivory Bead sight. Made with Round and Octagon barrel. Retails at reasonable prices.

Model No. 39—made with lever action, is the choice of expert and professional shooters and all others who like to use the lever action in a small game and target rifle as well as in their big game rifles. Side ejection, *Marlin* accuracy, Ivory Bead sight—the best made .22 rifle in the world! Retails at a reasonable price.

This advertisement tells only part of the story. To get it all send for our new trade price-list and latest *Marlin* illustrated catalog—get your name on our list—and write your jobber to ship you a few of the standard *Marlin* Models.

Marlin Prices

Bring Customers to Your Store

We are telling millions of shooters through our advertisements, catalogs, etc., of the superiority of *Marlin* guns. They will know that we make the best guns in the world; they will know that our guns are sold by live dealers at prices they are glad to pay. Are you prepared to handle these orders?

Have you received our new price-list with lower prices?

Marlin Repeating Shotguns have every up-to-date feature. They have exclusive advantages not found in other guns. **They are sold at prices that make sales for you.**

Model No. 28, 12 Gauge Hammerless—the gun that won the World's Championship at the Olympic Games. The safest breech-loading shotgun ever built. **Solid Steel Breech**—not a wooden breech; solid top, side ejection; **barrel matted on top entire length**—a feature that costs $9.00 extra on other makes; **press-button cartridge release; automatic safety device** for protection against hang-fires; **double extractors** that pull any shell; the most practical and convenient **take-down;** quick acting **trigger safety.** This *Marlin* has better lines and more style than any other similar construction, and is a wonderful gun for ducks, geese, foxes, trap-shooting and all long-range shooting. Retails at a reasonable price.

Model No. 31, 20 Gauge Hammerless—The only real 20 Gauge repeater—Handles the new powerful duck loads in 2¾-inch shells; also all ordinary 2½-inch loads. **Barrel matted on top entire length**—this desirable feature costs extra on other makes. **Solid Steel Breech**—not a shell of wood; **solid top; side ejection; press-button cartridge release; automatic safety device** for protection against hang-fires; **double extractors** that pull any shell; **quick take-down feature** for convenient cleaning and packing; quick acting trigger safety. There's no other "20" like this gun. Retails at a reasonable price.

Model No. 42, 12 Gauge Visible Hammer—A quick-handling, hard-hitting, long-range gun—it makes kills far beyond the range of the average 12 gauge gun. **Solid top receiver;** closed-in breech-bolt that sheds all the rain, snow and sleet of good wildfowling weather; **side ejection**—ejected shells do not cross line of sight; **double extractors; improved automatic safety device** that guards against hang-fires and defective cartridges; **chambered to handle 2¾ and 2⅝-inch shells; compensating device**—barrel always fits up tight on receiver. Has **Matted barrel**—the matted barrel alone costs $9.00 extra on other guns. Retails at a reasonable price.

This advertisement tells only part of the story. To get it all send for our new trade price-list and latest *Marlin* illustrated catalog—get your name on our list—and write your jobber to ship you a few of the standard *Marlin* Models.

ADVERTISING

By DR. FRANK CRANE

(*Copyright by Frank Crane*)

ADVERTISING is the greatest business in the world. That is not because it enables business people to sell more goods, not because it is a way to make great profits. Nothing can be really great for any purely dollars-and-cents reason.

It is because, in advertising, business becomes vocal. When, in the course of evolution, the animal acquired speech and became able to utter himself, he had made the longest stride in development. He had stepped from brute to man.

The human soul dates back to the first word. "In the beginning was the Word."

Advertisement is the utterance of human energy. Craftsmanship is good, and industry, and organization, and business ability; but they are dumb giants until they find speech—dumb and dangerous.

Business, including manufacturing, farming, transportation, and selling, is to the new world what fighting was to the old. The old world organized only to kill, and its genius was displayed by great generals. Its heroes were the mighty killers. To them it set up its statues.

The new world, typified by, led by America, is organized to serve, to make human life richer, deeper, stronger, more complex and heterogeneous.

And business is simply service. Business comes to itself, attains maturity and full self-expression only through advertising.

Advertising is the breath of life breathed into the nostrils of business, by which it becomes a living soul.

Thus advertising not only enlarges business; it radically changes the nature of business.

By it business passes from bureaucracy and autocracy into democracy. It takes the whole people into its growth. It enters the veins of the commonwealth. It becomes a function of communal life.

Without advertising comes decay and death.

Nations need advertising. If they would advertise they would prevent war. War is the self-expression of dumb brute force. *Advertising is the self-expression of intelligent strength that knows how to speak.*

It is the something plus in advertising that is significant. It is this something plus that makes advertising to business what art is to handiwork, what music is to feeling, what language is to the soul.

Better Business Is Comin

Be Wise In Time

LIGHTNING GEM BLIZZARD

Better business is coming to the merchant who has the goods on his shelves, ready to hand out to the customer when he (or she) is in a humor to buy.

Don't get caught, be wise in time. Avoid the painful necessity of passing up good business to your competitor.

The time to order our Freezers is NOW. They are always in demand. They sell on a reputation established by more than 30 years of high-class service, and their future performance keeps them sold. So there you are—quick sales and permanent net profits.

Hadn't you better get busy with your jobber at once? We are all ready to serve you. Let's get together.

OUR NEW OFFER
on Our New Brace Display

IN the last few months this beautiful business-getting brace display has been holding the center of the stage in the windows of hundreds of Millers Falls dealers.

We want to make this display of still greater help to our dealers, and to make this possible, we have decided to reduce the size of the order from 1½ to 1 dozen.

From now on, this Millers Falls brace display will be sent free to each customer ordering one dozen braces in the following numbers and quantities:

Numbers	Quantity
772	2
8132	2
732	2
32	2
322	2
422	2

The display stands 32 inches high, is 18 inches wide, and has a tin container which holds about 50 folders. With every order for the display and braces, we include a liberal quantity of folders, with our dealer's name imprinted thereon.

From all parts of the country we have been receiving enthusiastic reports on how this brace display is helping to speed up sales and increase the turnover of Millers Falls braces. Under our new offer, let it go to work for *you* on *your* counter and in *your* windows.

Where YOU should use "Armco" Ingot Iron

We are not so foolish as to say you should always use "Armco" Ingot Iron.

There may be occasions when you should use copper—when your customers should pay the price for copper.

There may be—but this is so doubtful we don't like even to suggest it—there may be times when you should use an inferior, cheaper metal than "Armco" Ingot Iron. This could only be on work that was temporary, that was made for a few months' service.

The big bulk of your sheet-metal work is made to last as long as it can, in defiance of weather and other conditions it has to face.

For this work you should *always* use "Armco" Ingot Iron. Every gutter, leader, downspout, cornice—all roofings and sidings, pipes and ducts for heating and ventilating—these should be made with "Armco" Ingot Iron.

"Armco" Ingot Iron is rust-resisting. It is commercially pure iron. The "texture" is smooth and even. When galvanized, the coating and the base metal become as one, with no tendency of the galvanizing to crack and split and peel where the stresses come.

"Armco" Ingot Iron is soft enough to work into form easily and quickly—strong and tough enough to bear the strain of working.

"Armco" Ingot Iron is well known. It bears a trade mark honored in industry, commerce and business—in homes, in factories, and on farms. Whatever prestige the name "Armco" has won in building our business, it will lend to you to build yours.

Use "Armco" Ingot Iron wherever you want long life, good service, and the satisfaction of your customers.

Receipt Tax Would Increase Expense

New Measure Suggested in Amendments to Budget Would Increase Retailers' Overhead Expense if Applied to Counter Receipts—Why Not Increase Sales Tax to Even Amounts of 2½% and 5% to Raise Extra Revenue Needed?

ONE OF THE most interesting of the final amendments to the Budget of the Minister of Finance before its being sanctioned in Parliament was that imposing a tax of two cents on all receipts of from $10 up. This particular point will be of much interest to retail hardware merchants.

Discussing the subject with a Toronto wholesale hardware merchant who is conversant with the British act governing tax on receipts which it is said will be followed to some extent in framing the Canadian regulations, it was stated to Hardware and Metal that the regulations in Britain are not so onerous as to be objectionable, that the tax applies only to formal receipts bearing the words "received from" etc., and that generally a person is so glad to receive payment of a bill exceeding the set amount that they are quite willing to pay the amount of the tax which is but a very small percentage of the amount paid.

Doesn't Apply to Cash Slips

This wholesaler states that in Britain the tax does not apply to ordinary cash slips or bills which accompany purchases such as are issued by certain retail stores. Furthermore, this tax is not required with railway or theatre tickets as these are not the customary formal receipts though in a court of law they might be received as evidence of payment of moneys. He thinks it unlikely that cash register slips will be considered as receipts. They might be good evidence of money paid, but he expressed doubt that they would come under the wording of the resolution "for moneys acknowledged or expressed to have been received."

In connection with the possibility of a tax on sales over the counter the British practice apparently is to exempt from receipt tax any cash transaction over the counter unless a formal receipt is issued and to place the tax only on a formal receipt issued. In Britain wage receipts are exempt. The person issuing the receipt must cancel it by writing his name in such a way that it crosses the stamp. Legally the receipt is worthless unless it bears the stamp.

Working on the Regulations

According to advices given the Ottawa representatives of Hard- and Metal by officials of the Inland Revenue Department, the application of the tax to counter sales is a question which will likely go unanswered for a few days. Hardware and Metal put this up to a high official of the Department who replied: "That is a question we cannot answer at present. It will probably be a few days before we can give you a definite answer. There are a number of points to be worked out in connection with this tax, and there is no immediate rush as it does not go into effect until next January."

Precisely the same answer was given to the assistant secretary of the Dominion Board Retail Merchant Association of Canada, who was asked by a number of the leading retail merchants to get an accurate and definite ruling, if possible.

"How are the stamps to be cancelled?" was Hardware and Metal's next query.

"We don't know yet," was the answer.

"Can you say if the old machines are likely to be called back into play?"

"I don't think that is likely to happen, but there is not much use in your asking any more questions, because nothing whatever has been decided upon in that connection. The announcement was only made in the House last night and we have practically six months to work out those problems."

Retailers Object to Small Minimum

While satisfaction, is expressed in some quarters in Ottawa there is no great outburst of enthusiasm over the reductions in the budget modifications. Strong exception is taken by many retail merchants to the tax on receipts. They describe it as being both impracticable and irritating. A. J. Freiman, former president of the Ottawa branch, Retail Merchants' Association, was indignant. He said the tax was going to involve a lot of unnecessary intricate detail for retail trade. If the minimum amount of the receipt taxable had been $50 instead of $10, the tax would have worked out more equitably.

Adds to Overhead Expense

In discussing the recently announced changes in the budget proposals with Hardware and Metal, one Toronto retail hardware merchant expressed some dissatisfaction with the suggested tax on receipts, owing to the fact that this innovation would

GIVES RULING ON SALES TAX COLLECTION BY RETAILERS

Some uncertainty exists as to whether a retailer is permitted to show Sales Tax separately on an invoice to the consumer, in order to ensure its collection. Some jobbers have advised retailers that this is not according to regulations. Hardware and Metal is securing definite written advice from the head of the Inland Revenue Department on this point, but meanwhile as we go to press the following wire is received from our Ottawa representative:

"Official ruling Inland Revenue Department. No objection to retailer showing amount of Sales Tax separately on invoice as long as he states on invoice, "Above amount includes Sales Tax paid by me amounting to $0000."

tend to add to the overhead expense of the merchant. While a large number of sales receipts were under ten dollars and therefore would be exempt, yet it was admitted that in some of the larger business such as builders' hardware contracts and similar work which this store specialized in, the additional tax on receipts was somewhat unfair, because the retailer would have already paid sales tax to the extent of 4½ per cent. on the merchandise covered by the receipt. If the proposed new receipt tax was to be paid by the retail merchant, and nothing has been announced which would give the contrary opinion, it would lead to the partial abolition of sales receipts, according to this merchant. Dealers would instinctively discontinue the issuing of receipts, with the exception of special instances.

Increased Sales Tax Preferable

A prominent metal dealer in Toronto when interviewed by Hardware and Metal deplored the introduction of tax regulations which added clerical work and involved uncertain methods of collection. If revenue was the chief objective, the opinion was expressed that this would have been achieved through a more simple ruling on the sales tax with a range of three per cent. to the wholesaler and six per cent. to the retailer, or 2½ and 5 per cent.—instead of the fractional ramifications now introduced. A receipt tax might have the effect of introducing the custom of asking for receipts where, in a great many instances, no such practice was in vogue at present.

PROMOTION OF ROLLER SKATING HELPS HARDWARE MERCHANTS

Roller skating is thriving in numerous cities and towns and when roller skating is progressing the dealers sell a great many roller skates.

Recently under the direction of the public schools' athletic league a skating carnival was held in the heart of one city which attracted some 5,000 persons and some 700 roller skaters, boys and girls. This means that 700 boys and girls had roller skates. The carnival was such a success that the mayor and chief of police have given their consent to skating carnivals every Saturday morning in various sections of the city. Streets are roped off from 9 until 11 o'clock and during these two hours the boys and girls enjoy themselves under proper supervision. In the carnival, races were run from 35 to 100 yards and afterwards it was thought that races of 75 yards for girls and 150 yards for boys would have been better. By the time the summer wanes there should be thousands of juvenile roller skaters in this city.

HARDWAREMAN ON STRATFORD R. M. A. EXECUTIVE

Stratford, Ont.—The officers of the Stratford Retail Merchants' Association met in the Chamber of Commerce rooms to select a secretary and name an executive committee, representative of the various lines of retail business. At the annual meeting in April, W. White, who has acted as secretary for several years, was re-elected but he insisted on resigning and the matter was left over for action by the executive.

At the last meeting Mr. White was prevailed on to accept the secretaryship for another year.

A. W. Fisher, hardware merchant, was elected a member of the executive committee.

"Made in Stratford Week" was discussed and a resolution was passed whereby Stratford merchants would cooperate with the exhibition by special displays of goods and added publicity. The exhibition is to be conducted the first part of the week, commencing June 19th.

HOLD "MADE IN STRATFORD" EXHIBITION

Stratford.—From June 19-24 a "Made in Stratford" exhibition is being held. The lieutenant-governor will attend on the 22nd. Special instructive and entertainment features are being arranged.

Last Minute Changes in Taxes and Tariffs Affecting Hardware Lines

OTTAWA, Ont.—Just prior to being sanctioned by Parliament, the Budget proposals of the Minister of Finance, as outlined fully in recent issues of Hardware and Metal, underwent considerable amendment which changes the requirements somewhat for the retail hardware trade.

The Stamp Tax which received much opposition in its original form has been changed. The new tax is two cents on every cheque or express order for $50 and units of $50 up to $5,000 so that in no case can this stamp exceed a total of $2.00. The tax on telegrams and cables is reduced from five cents in the original regulations to three cents. Both of these taxes come into force on July 1.

Probably the most interesting item in the changes is the new tax on receipts. Up to $10 receipts are to be exempt. On every receipt from $10 up a tax of two cents is charged, payable by stamp. It does not matter what the size of the receipt is above $10 the tax remains the same. This regulation will not be in effect until January 1, 1923.

A change is also made in the automobile tax, cars valued at not more than $1,200 paying 5% on the value, cars valued at more than that amount pay 5% on the amount up to $1,200 and on the excess a tax of 10% is levied. Formerly in the latter case a 10% tax was levied on the whole amount if the car exceeded $1,200 in value. This does not apply on cars purchased before May 24 and imported and entered for consumption on or before July 1.

Fertilizers are cut from the list of articles formerly exempt from Sales Tax.

The dangers outlined in connection with removing the former regulations regarding depreciated currency have been overcome in a somewhat novel manner. Under the new regulations if an article is imported from Germany the standard of English value is to apply; that is, if the same article is made in England the German article shall be given the English value and the customs duty assessed on that value. Failing to find a parallel in the English article the value in a neighboring country such as Holland or Switzerland will be taken as the basis on which duty will be charged. This new regulation is in effect on all goods entered for consumption on and after May 24.

No intelligent consideration of the effect of the changes can be given until the regulations governing their application have been made known. So far it is merely in the form of a resolution. No regulations or Act has yet been framed for the application of the tax on receipts. Among business men in the hardware trade it is taken to mean that any transaction involving $10 and over, where a receipt figures in the deal, a stamp or stamps amounting to two cents in value must be placed on the receipt by the person issuing the receipt. The text of the resolution regarding the definition of a receipt as introduced by the Minister of Finance is as follows:

"The expression 'receipt' shall mean any note, memorandum or writing whereby any money amounting to $10 or upward or any bill of exchange or promissory note for money amounting to $10 or upward, is acknowledged or expressed to have been received, deposited or repaid, or whereby any debt or demand or any part of a debt or demand of the amount of $10 or upward is acknowledged to have been settled, satisfied or discharged, or which signifies or imports any such acknowledgment and whether the same is or is not signed with the name of any person."

German Knives Imported At 70c Doz.

Discussion in Parliament Brings Out Interesting Facts Regarding Importation of German Cutlery and Protection Required for Canadian Manufacturer

By Ottawa Correspondent Hardware and Metal

OTTAWA, Ont.—In connection with the Budget debate in Parliament, Hon. H. H. Stevens outlined some interesting information in connection with what was alleged to be unfair competition of European producers in the Canadian market. As applied to the subject of pocket knives hardware merchants will be interested in the discussion. In his address Mr. Stevens spoke as follows:

"I wish to go into a phase of this question. Let me take a specific case, that of knives—and I am using this one illustration, because I think it conveys clearly the whole situation. The figures which I am going to give are absolutely authentic and accurate and may be verified. Germany is exporting to Canada all sorts of stuff, and while I have in my possession a list of articles, I am not going to go into that, because to do so would only confuse the issue; I will take the one article to which I have just referred. A certain standard pocket-knife is recognized in connection with all manufacturers of cutlery and knives; it is what is known as the pocket-knife, and it may be taken as a sample article. That pocket-knife can be landed in Canada by Germany for 70 cents a dozen, including duty. I want to give my hon. friends who argue that we ought to be privileged to buy in the cheapest market, a few facts and let them come to their own conclusions. This is what will occur, if this clause is removed, that Germany can land pocket-knives in Canada at 55 cents a dozen, plus a duty of 16 cents, or 71 cents a dozen. Let them figure this out on the basis of the depreciated currency clause now in the act. This 55 cents is equivalent to 165 marks, and the duty at 50 per cent. depreciation would be as follows: 165 marks valued at 11½ cents to the mark, $18.98; the duty at 30 per cent. amounts to $5.69 which, plus the 55 cents, would mean $6.24 a dozen for this particular kind of knife. Now, then, I admit at this point that it would appear that this figure of 50 per cent. depreciation is perhaps high. I would suggest to my hon. friend, if that were considered to be so, that he reduce it to, say, 35 per cent.—there is no particular objection to that—or do as the Americans are doing, make the market value in Canada the basis on which to assess the duty.

But let me take the depreciation of 20 per cent. and then you will see the significance. Suppose we enact that the depreciation be put at 30 per cent. instead of 50 per cent. Then we find the duty would be $3.45, and the value of this knife per dozen would be $4. The British knife, exactly the same as the German knife, is laid down at $5 a dozen; $4.75 a dozen; the Canadian knife can be laid down and is sold at $4.50 a dozen.

Unfair to Canadian Manufacturers

Now, this is what I want to emphasize. The Canadian manufacturer to-day is manufacturing at a lower cost and under-selling both the British and the American manufacturer of this particular article. Why should we ask him, however, to compete with such utterly unfair competition as that to which I have referred with this depreciated currency? I might give a few interesting figures regarding the importation of this German knife, but I shall not do so at this moment.

What I wish to point out particularly to the Minister of Finance (Mr. Fielding) is that by the present system of valuation that knife is shipped into Canada at one-third what it can be produced for in Germany; that is, when you take the depreciated value of the mark as the value upon which the knife is entered and the value of the mark for domestic purposes in Germany, which is three times its value abroad. That, I submit, is utterly unfair competition to which to subject our Canadian industries.

Where Profit Goes

Now, let me bring the House back to the pocket-knife and show where the profit is going. As my hon. friend said, the Germans ship that knife to Canada through Great Britain, Holland and the United States. That is true to a certain extent But. how do they ship it? That knife is shipped to an agent of the manufacturer in London, who receives 5 per cent. commission. He is virtually a member of the German firm. It is then reshipped to a firm in Montreal —Dorkin, I think, is the name, who are also agents of the manufacturers. That firm enters the knife for duty purposes at the figure which I mentioned, 55 cents. I wish the House would follow me closely in this, because I think it amply justifies the position I am taking. That agent in Montreal, representing the manufacturer in Germany, enters the knife at 55 cents, and pays, of course, a low duty. Do the Canadian public get that knife at 70 cents, or a small profit added? No. That agent distributes this particular kind of knife to the wholesaler at $3.75. Now, do my hon. friends get the point? In other words there is a differential between 70 cents the landing price to the agent, and $3.75 the distribution price to the wholesaler, of $3.05. Where does it go? To the German manufacturer; it does not go to the Canadian people at all.

That German manufacturing firm—and this applies to all the goods they ship—ship their goods into New York or Montreal, or wherever it may be, in this case Montreal, to a special agent, who in turn distributes those goods at a price just low enough to undersell the

CUSTOMS DUTIES REFUNDED UNDER DRAWBACK CLAUSE

Replying to a question asked in Parliament as to the amount of Customs duties refunded to manufacturers under the Drawback Act during the fiscal year ending March, 1922, Mr. Lapointe representing the Minister of Customs gave $5,196,107.27 as the amount refunded on goods imported and used in the manufacture of goods for export and $1,391,459.15 as the amount refunded on goods imported and used in the manufacture of articles for home consumption.

Replying to a question as to the names of the twenty-five firms receiving the largest amounts and the amount received in each case, Mr. Lapointe gave the following list:

Atlantic Sugar Refinery, $1,572,846.81; Ford Automobile Co., $755,185.03; Harris Abattoir Co., $384,111.09; Canadian Kodak Co., $335,823.72; Davies, Wm. Co., Ltd., $335,757,30; Massey Harris Man'f'g. Co., $293,628.91; St. Lawrence Sugar Co., $273,632.70; Spanish River Pulp & Paper Co., $192,397.66; Algoma Steel Corporation, $187,488.42; Fort Frances Pulp & Paper Co., $167,114.85; Steel Company of Canada, $159,050,36; International Harvester Co., $158,903.80; Quaker Oats Co., $155,745.34; Canadian Car & Foundry Co., $152,691.91; Canadian Consolidated Rubber Co., $152,286.73; Canadian Packing Co., $121,516.14; Dominion Corset Co., $120,152,82; Brompton Pulp & Paper Co., $117,341.88; Montreal Locomotive Co., $113,890.83; nIternational Plow Co., $111,673.28; Laint Produce Co., $111,183.87; Singer Sewing Machine Co., $108,174.86; Page Hersey Co., Ltd., $107,234.64; Maple Leaf Condensed Milk Co., $101,688.07.

For the Man Behind the Counter

Putting Yourself In The Customer's Place

A Retail Salesman Who Has Made Good Progress for a Number of Years is Suddenly Halted By Shortcoming Which he has Taken no Steps to Overcome—Develop the "Ask Them to Buy" Habit to the Nth Degree

Written for Hardware and Metal by A. G. KEENEY

DO YOU sell your customers or merely wait on them? Does your interest in a customer cease when you have said, "Thank you, call again?"

Will that customer "look you up" when he calls again, or will he seek out another clerk who possibly will anticipate his wishes and cater to them with greater alacrity and courtesy?

These are only a few of the important questions every clerk should propound to himself at "personal inventory time." "Personal inventory time" should be every day in the year.

In a little Southern town there is a clerk who has been with the same store for fifteen years. His employer pays him what might be considered a good salary and in the estimation of many of his friends this clerk is an ideal salesman. He is always well groomed, and has a speaking acquaintance with every man, woman and child listed among the store's customers. He knows the stock of goods thoroughly and can talk entertainingly and convincingly concerning the merchandise he handles. He is courteous, considerate and energetic. But he recently lost his opportunity to become department manager in a larger establishment because of one shortcoming.

This clerk merely "waits on" customers; he falls short of becoming the ideal salesman because he cannot "put himself in the customer's place" while retaining the salesman's viewpoint. He never realizes that customers can be induced to purchase merchandise not included in their shopping list, provided the salesman who attempts this task knows how to go about it diplomatically and in a fashion that prevents the customer from suspecting that [illegible] being induced to buy more than he originally planned to buy at this store.

In the same store there is another salesman who possesses the same qualities as the man who has been with the establishment for fifteen years. He, however, has the "ask 'em to buy" habit in the nth degree. Old customers of the store, who have had unpleasant experiences with this salesman, deliberately avoid him. He attempts to sell every customer everything in the store. Without endeavoring to convince the customer that he actually wishes to be of service during the shopping trip, this clerk keeps a mental list of slow-moving merchandise and tries to palm some of it off on every customer who visits his department. The inevitable result is that this clerk is shunned by regular customers and is forced to be content with "roping in" newcomers—who never become regular customers because this clerk antagonizes them and renders himself obnoxious because of his undiplomatic tactics.

His town contains several factories and because many transients visit the store, this clerk's sales compare favorably with those of the man who has been with that establishment for fifteen years. He probably will be with the same store for the remainder of his life—unless his employer takes a careful inventory of his selling force.

Ideal Salesman Born as Well as Made

The manager of this store recently engaged a high school student who wanted employment on Saturdays. The student had no prior experience in a store, but because of the Saturday rush he was stationed behind a counter and told to "wait on" customers.

This young clerk immediately demonstrated that the ideal salesman is born as well as made. He quickly mastered a working knowledge of the merchandise in that department and seldom found it necessary to consult his fellow clerks concerning problems he encountered. After his fourth Saturday behind the counter the manager of that department noted that customers manifested a genuine desire to have this clerk "wait on" them. The manager investigated.

He found that the young clerk not only studiously catered to his customers' announced wants, but he seemed to sense in a remarkable degree what his customers needed without their announcing it. One purchase frequently seemed to suggest to this clerk several other articles of merchandise that logically might interest his customer.

That his deduction usually was correct was evidenced by the fact that his suggestions resulted in many sales that certainly never would have been made had he not started the customers

to thinking. When his department manager spoke to this clerk about the latter's selling methods, the clerk reasoned thus: "The average man doesn't buy all he needs or intends to buy. After making several purchases at one store, he often discovers after leaving the store that he needs one or two more articles that could have been obtained in the store he just left. Instead of coming back, he saves himself time and inconvenience by dropping in at the nearest store and making those purchases. By making one or two suggestions, which are suggested to me by things he has just bought, I find that I can render the customer a real service as well as make more sales for the store."

A New Standard of Efficiency

The manager's discovery of the qualities of true salesmanship in this youngster ultimately resulted in creating a new standard of efficiency in that department. New methods of selling are in force, and the regular customers of that store have sensed the better service, the spirit of helpfulness that obtains in the entire establishment.

The young clerk now is not the best salesman in the store. Several other clerks in the establishment realized the worth of the system, and because of their longer experience were able better to recognize the possible needs of their customers.

Persons entering that store now are not surrounded with clerks evidently eager to make sales. They appreciate the store where their wants often are anticipated, and it is human nature to enjoy trading at a store where every clerk obviously is desirous of rendering efficient service in a quiet, unobtrusive manner.

The two salesmen first described have not yet absorbed this new asset, injected into the selling force for the first time by the youngest member of the organization. Habit of long standing is difficult to eradicate, but constant association with clerks who really serve their customers eventually must react favorably upon every salesman in the establishment.

Selling instead of "waiting on" customers marks the dividing line that separates salesmen from near-salesmen, and the distinction is great. At "personal inventory time" it behooves every salesman to ascertain whether he is on the selling side of the dividing line.

"The sweetness of low prices never compensates for the bitterness of poor quality."

"This is the slogan that our clerks have come to thoroughly believe in," stated the manager of this store. "In selling goods over the counter or over the telephone, the quality phase of the subject is always put foremost. We believe that poor goods are never cheap and the buying public is finding the truth of that each day. We believe it good policy to encourage clerks to sell goods over and above what is requested by the customer and we have found that the fact that we make a special drive on quality has been of material assistance to our sales people."

That it is a good policy to place more confidence in the clerks, assisting them in every possible manner by making certain clerks responsible for certain departments, asking their opinion in regards to the buying or otherwise showing the clerks that they are something more than a mechanical part of the business machine, is evidenced by the experience of merchants who are getting good results and whose turnover is greatly augmented.

This Idea Was a Money Maker

"The most outstanding and lucrative idea conceived by one of our staff and the best from many angles that I have seen, resulted in a tremendous increase in sales on brushes," continued the manager. "Our Mr. Gordon suggested that if brushes were properly displayed that is, kept clean and free from dust it might be profitable to boost them. This entire department was therefore given over to Mr. Gordon to handle in his own way and according to his own judgment. He buys the brushes and oversees the selling. His idea is to devote one window to featuring brushes. He has them kept under glass, free from dust and they always look attractive. I can say without hesitation that since Mr. Gordon has taken complete charge of the brush department that sales have practically quadrupled. When people buy brushes they want them clean."

This merchant says it is as important to train clerks in the cost of goods as it is in making them thoroughly acquainted with the selling price. Their system of keeping a record of the costs is somewhat unique, but nevertheless accurate. They have a thumb indexed book in which every purchase is entered. For instance, under the letter "B" is entered purchases of brushes, showing the date bought, quantity, from whom purchased and the price. These entries are made by the bookkeeper at the some time invoices are entered in the purchasing ledger, so that the book is kept up to date every day.

This book is open to all clerks and they are encouraged to use it freely and become familiar with the cost of the goods they are selling. This merchant claims that by so doing, the clerks are encouraged to stay with the business, take more interest and are less inclined to waste. But the biggest point, this merchant claims, is that knowing the cost price the clerk is more inclined to sell the article that shows the greatest profit.

NO MEETING DURING SUMMER;—PICNIC ON JULY 19

At the monthly meeting of the Toronto Retail Hardware and Paint Club this week it was decided to hold no regular meeting of the club during the months of July and August, and the question of a meeting in September was left to the Executive committee to decide later.

Final arrangements for the picnic have not been concluded but it is probable that it will be held on Wednesday, 19 at High Park. Further information regarding this will appear in Hardware and Metal.

TORONTO DISTRIBUTORS FOR WALKER TWIST DRILL CO.

The J. A. M. Taylor Tool Co., 77 Adelaide St. W., Toronto, will now act as distributors for the Walker Twist Drill Co., Walkerville, Ont., and the Greenfield Tap and Die Corporation, Galt, Ont. It is stated that a complete stock will be carried in the Toronto office, this being a distributing point, but that all business closed will be invoiced from the head offices of the principals.

Trade Marked Lines Have Advantage

Established to Assist Manufacturers in Giving Individuality to Their Product, Trade Marks Now Looked Upon as Indication of Quality—Retailer Looks Upon Trade Marked Goods as Being Guaranteed by the Maker and if Generally Advertised are Given Retailer's Support

Who steals my purse steals trash.
'Tis something, nothing; 'twas mine, 'tis his,
And has been slave to thousands.
But he that filches from me my good name
Robs me of that which not enriches him,
And makes me poor indeed.
—Shakespeare.

WHETHER or not it was the inspiration of Shakespeare's poetic conception of the sacredness and value of a name that prompted the first man to originate, and, for his own protection register a trade mark represents, in many cases, the labor and the final achievement of years on which a manufacturer or wholesaler is willing to accept the verdict of a critical public. The trade mark stands sponsor for a name; a name is a reputation, and if the reputation be gone the name is no more a thing on which reliance and faith may be placed. The trade mark is the guarantee of the firm so using it that it is prepared to stand behind that name through good and ill report, that any damaging charge made against that name will be defended in the courts of the land to the fullest extent. To tamper with the name is to tamper with something sacred, with something that represents the entire future of a business; for this reason many interesting cases have developed in the courts with regard to trade marks.

The Merchant and the Trade Mark

The trade mark to the merchant is his guarantee to the consumer that the merchandise which he sells bears the stamp of quality and carries with it the assurance of the manufacturer that it is what it is represented to be. According to history, many of the old-time merchants were noted for sharp dealing. Some of them bartered, cheated, and even swindled customers by substituting something which they claimed was just as good, but which in many cases was a very inferior article, until by advertising, the merchant and the public became familiar with trade marks and to know the quality and quantity for which they stood. When, therefore, a manufacturer through advertising educated the public to the value of his product, he had built up a name for himself which he transcribed into a trade mark. Not only the holder of the trade mark, but the distributor of his goods reaps the benefit of the trade mark. Through systematic advertising, it becomes so well known that it is impossible to deceive the ultimate consumer if he or she is looking for the trade mark on the goods being purchased. The use and the advertising of the trade mark, therefore, becomes an asset in the hands of the merchant in the sale of his merchandise, not alone because of the guarantee accompanying it but also because it is now considered that trade marks are the standard for good quality.

Protection of Trade Marks

The law takes a very stern view of the encroachment on an established trade mark. In cases where a name has been associated with a well known product for a great number of years and the merchant and public have become accustomed by advertising to associate the name with a certain article, the court will protect the use of the name and restrain by injunction any infringement of that right.

The real question which the court to try in a case of alleged infringement of a trade mark whether what the defendant has done is calculated to deceive or whether there is so much imitation that goods bearing the one mark may readily be mistaken for goods bearing the other and whether a more careful inspection than an ordinary purchaser would be likely to give is necessary to distinguish the mark and appearance of the former goods for those of the latter.

When an action is commenced having for its object the restraint of an alleged unfair competition in trade carried on by means of an employment of another of a trade mark identical or nearly identical with the plaintiff's there must be established in order for the action to be successful the existence of the trade mark, the plaintiff's right to exclusive use therein and the fact of an imitation and the absence of license or acquiescence on the part of the plaintiff.

Where it can be shown that a dealer has imitated an article in his store and offers it for sale as the genuine article, even though he has only made a single sale, that is sufficient ground for an injunction and the dealer will be restrained from making any further sales.

If the defendant uses a distinct and obvious trade mark on his goods which he is alleged to be passing off as the plaintiff's and if he states plainly and in clear type that these goods are manufactured by himself, there is a very strong indication that the defendant has no intention of deceiving the public and it is doubtful in such a case if the court would restrain him.

When the defendant has not used the registered trade mark but something to be considered similar to it, the plaintiff has to satisfy the court that the use of this is calculated to deceive. But when the defendant has taken the material and essential part of the plaintiff's trade mark, the burden is upon the defendant then to disprove the probability of deception and not upon the plaintiff.

If the plaintiff cannot prove that the public are deceived or that there is a reasonable probability of deception, he has no right to interfere with the use of the name of others. All the court can do is to say that no trader can adopt a trade mark so resembling that of a rival that the ordinary purchasers purchasing with ordinary precaution will be misled.

Purchaser Must Not Be Misled

If a purchaser looking at an article offered to him would naturally be led from the mark impressed on it to suppose it to be the production of a rival manufacturer and would purchase it in that belief, then the court considers the use of such a mark to be fraudulent. In fact, it has been held that if the goods of a manufacturer have from the mark or device he has used become known in the market by a particular name, the adoption of a rival trader of any mark which will cause his goods to bear the same name in the market may be as much a violation of the right of that rival as an actual copy of the device itself.

The function of trade-marks or tradenames provides the most striking in-

(Continued on page 46)

TRADE MARKED GOODS IN MODERN MERCHANDISING

The trade mark on merchandise stands sponsor for a name.

A name is a reputation and if this is not upheld the name is of little value.

Trade mark is a guarantee of quality to the retailer and the consumer.

Trade marks facilitate the memory of an article and thus facilitate retail distribution.

Trade marked lines given general publicity are easier for the merchant to sell.

Handling Odd Hardware Customers

Did You Ever Have a Customer Remark That There Had Been a Decline in Price of Raw Materials in a Certain Product and Want a Corresponding Reduction in the Finished Article?—Making Store Keep the Workshop Busy—Some New Angles on Early Summer Trade

THAT the hardware merchant can never tell what is in store for him when a passer-by drops in to price an article is evidenced by the statement of Charles P. Grannan, of Phillip Grannan, Ltd., hardware merchants, St. John, N. B. Mr. Grannan said to Hardware & Metal in a recent interview: "A stranger to St. John was passing our store window, when he caught sight of an ash sifter in a prominent place. After looking it over from the outside, he stepped into the store and asked the price, saying that he was about to locate in St. John, and would be needing a good sifter. He did not appear to be a buyer, but we made him feel that we were glad to meet him, and hoped that when he took up his residence in St. John we would be favored with some of his business. He bought the ash sifter and promised us some more business. We got "some more business" from him, but never once thought that this business would mean as much as it eventually did. Our stray customer had come to St. John to open up a laundry, and in less than two years from the time that he purchased the ash sifter, we received more than four thousand dollars worth of trade from him.

Messrs. Phillip Grannan, Ltd., conduct a stove and hardware business on Main Street, St. John, and in connection with the sales department, they operate a tinsmiths and sheet metal working plant. Despite the fact that some merchants declare that they cannot run a workshop in conjunction with a store, Mr. Grannan says that they find the workshop and store work together in a most satisfactory manner. "Our store keeps the work shop busy," he said. "Customers make their purchases, and naturally, if they are satisfied with the service they receive at our hands, they give us their jobbing as well. During the winter months we keep sixteen men busy on repair and manufacturing work."

Phillip Grannan, Ltd., handle a full line of furnaces, heaters and ranges, as well as a complete stock of hardware. Enamelled and tinware is one of their big lines, and a very comprehensive stock is carried. It is the boast of the firm that they can supply everything needed for the kitchen and for the heating of the home.

Phillip Grannan, Ltd., were one of the first merchants to stock the pipeless furnaces in St. John, and believe that it has a great future.

June Bride Business

During the months of April, May and June, a special effort is made to get after the "June bride" business, and by regular advertising and window displays, they have educated the public to look upon their store as headquarters for prospective brides and grooms to secure their requirements in tinware and stoves. The Grannan advertising differs to that of many merchants because of the fact that they do not believe in advertising a long list of commodities, but specialize on one or two articles, with an invitation to visit the store. Speaking on advertising, Mr. Grannan stated that he found a long list of articles was not so effective as the advertisement which specialized. A customer reading the advertisement, if it is in the form of a stock list, will pass over the ad. if the article is not mentioned that he or she desires to purchase, but if only one or two articles are named, and an invitation to the store is extended, the chances are that the reader will feel sure that what is required will be found at the store.

It is the opinion of Mr. Grannan that window trims should not be left in for more than a few days, especially in a store situated as theirs is.

Attract Business People

The Grannan store is situated between the residential and business section of St. John, and thousands of people pass the store during the hours of eight and nine in the morning, twelve and two, and six to seven in the evening. These people are passing three or four times a day, and see the store window trims as many times, so that a display is stale after a few days, as it can be taken for granted that everybody has seen it. This is an idea that all merchants should make a note of, for it is useless showing the same articles day after day to the same people. Unless the trim is changed frequently, the public develop the habit of passing without looking at the window at all. A few days is long enough for any trim in a district where the same people are passing all the time. Mr. Grannan relates an amusing instance where a customer had been studying the metal market, and discover-

Household goods department of Philip Grannan Ltd., St. John, N.B., showing a wide range of oil stoves and ranges, kitchen utensils, etc. Interest is centered in this department at present in connection with early summer weddings. Many stoves and items of kitchen utensils are sold to the young couples about to furnish a home and to people to give as gifts for showers. The means taken to centre the interest of prospects in this department are outlined in this article.

JUNE BRIDES

Don't you think the logical place to seek a range is at the store that is not confined to one line of ranges but is able to show you the choice of the leading makers? We have stoves of several makes.

Won't you let us show you them?

PHILIP GRANNAN LIMITED

ed that there had been a drop in iron of so much per hundred. This customer wished to purchase a stove, but demanded a proportionate reduction in the price, hinting that the stove merchants were doing a little profiteering. The hardware mercant readily agreed to make an allowance for the decline in the price of iron, and showing the weight of the stove, much to the customer's surprise, he found that his rebate would not buy him many postage stamps. He bought the stove, and left the store a sadder but wiser man.

Separate Household Goods Dept.

Messrs. Grannan's stove and kitchenware department, as the cut shows, is so arranged that customers can see a complete display of stoves and kitchen utensils immediately upon entering the door. On the shelves are displayed all the necessary pans, stove pots, kettles, etc. used in connection with cooking. Mr. Grannan states that it is a good idea to have cooking utensils in such a location that they are before the eyes of stove buyers, for in many cases a stove sale is accompanied by the sale of something in the pan or kettle line. On the right of the department pipeless furnaces and oil cook stoves are shown. During the summer months much prominence is given to oil stoves for cooking purposes, and also a large amount of space is used in the local papers, asking the public to inspect their stock. Hundreds of St. John citizens own summer cottages and camps, and the oil cooking stove is very popular with them because it is so much handier to take into the country than a coal range, cooler to work with, and no labor sawing wood. These points are all brought out in the Grannan advertising with good results.

MR. GROOM

Bring your bride-to-be over to our store to see our line of Ranges. You will be well repaid for the trip. We handle only the best lines of the leading makers and are not confined to any one make. Naturally we have a better assortment. Come on over. We are open every night until 7.30.

PHILIP GRANNAN, - Ltd.

Sharpens 600 Lawn Mowers In Spring Season

MAKING a specialty of lawn mower sharpening and maintaining a high standard of efficiency in such work over a long term of years has been responsible for developing an extensive business in such work for John Caslor, hardware merchant, Queen Street, West, Toronto. Mr. Caslor is a familiar figure in the hardware trade having been treasurer of the organization now known as the Ontario Retail Hardware Association since its inception and a pioneer in the hardware business in the City of Toronto. Mr. Caslor is still active as indicated by the fact that he has sharpened as many as thirty mowers in one day during the Spring season, and as many as fifty mowers in two consecutive days. Taking the Spring season as a whole he has sharpened approximately 600 mowers. A sign hanging outside the door, and plainly visible in the above picture, combined with the long established reputation of Mr. Caslor for such work are the only mediums by which this active business is retained. Mowers are brought to him from all parts of the city, and as a rule the machines he handled constitute "repeat" business because he advocates a sharpening each Spring or more often if the machine is given more than ordinary use.

KINGSTON RETAILERS ELECT OFFICERS

Kingston, Ont.—At a meeting of the Retail Merchants Association W. Y. Mills was re-elected president unanimously. The other officers elected are: First vice-president, H. Moore; second vice-president, Bert Abernethy; third vice-president, E. Walsh; secretary, Gordon Smith; treasurer, Frank Kinnear.

W. Y. Mills presided and introduced J. C. Campbell, Dominion secretary, Ottawa, who discussed the work of the Dominion Board and dealt with a number of matters of vital importance to the retailers, the application of the minimum wage law, and the automobile tax. He expressed his conviction that the automobile dealers were to have refunded to them about $1,000,000 collected as taxation last year. He explained the new combines and resale bill of the Ontario government. The Retail Merchants Association protested against the operation of this bill, and it has been delayed for one year, and will be taken up again at the next session of the legislature.

He announced that a general meeting will be held at Brockville on July 18th and 19th. President Mills presented his annual report on the activities of the association during the past year.

NO PRESENT PLAN TO MAKE CEMENT

Assurance was given by Hon. F. C. Biggs, Minister of Public Works, for Ontario, that the Government had no intention of entering into the manufacture of cement as long as it believed cement prices to be reasonable.

"As long as the price of cement is not higher, that is, reasonable in relation to the cost of labor and coal, it is not our intention to go in," said Mr. Biggs. "If conditions change we may consider entering the business."

Early Summer Sale Of Electric Goods

Shower and Wedding Gifts for Early Summer Brides Combined With Suitability of Electric Toasters, Grills, Percolators, for Preparation of Hot Weather Meals Makes Excellent Basis for An Early Summer Sale of Such Lines

ELECTRICAL goods at this season of the year are particularly desirable from several standpoints. In the first place they make admirable gifts for showers and weddings, and secondly because they provide a ready means of preparing a warm meal for hot summer days without the heating of the home which results from the use of stoves and ranges. Giving a little study to early summer electrical requirements will provide the merchant with plenty of material for effective selling ideas.

Housework is inevitable and perennial; the woman who amounts to anything takes it as "her job," but—she no longer meekly accepts it as a hereditary drudgery. She takes it as the greatest and most important business in the world, the one upon which all others are dependent. It is up to her to make the home from which the children she brings into the world shall go forth decent, vigorous and aggressive. It must be confessed that she has been a long time waking up to these facts, but Progress knocked loudly and she is awake now and she will never again take even a cat-nap. She demands the same equipment for her work that any other business has, and science has answered with a rapidly enlarging list which will soon cover every department. The development of household equipment is the marvel of the age. It has brought forth giant industries, put whole towns on the map—and made a dreary hopeless routine into a recognized branch of science.

The actuating principle of household equipment is different from the usual one. There is no experiment in comparison to what usually exists. Each and every machine or device is the result of some definite demand—some expression of practical mechanical possibility. They are simple to operate and definite in result.

Electricity does the work of the housekeeper's hands quicker and better but not very differently. One by one it takes her tasks and learns how to do them. Sometimes it takes time to perfect the mechanical substitution, or it is too costly or too intricate, perhaps, but just as surely as the modern super-equipped kitchen has arisen from the cave woman's fire of sticks will the electrical equipment of the entire field of housework come in time.

It is well worth the dealer's while to know what is doing in the world of electrical goods for the home, even about those items which are at present pausing a while in a phase of costliness or the need of mechanical knowledge which takes them out of the ordinary and average sales.

The Old Reliable Pioneers

The pioneers of electrical goods in the home, the perennial standbys, are the percolator, the grill and the toaster. In the most remote and primitive places where electricity reaches, the electrical meal has come to be a matter of course, and these rudimentary utensils of at least breakfast are to be found everywhere. The most timid dealer has them and supposedly stocks them over and over again for they are always to be seen. There seems to be growing favor for the all-round utility table stove with the inclosed unit on which it is possible to boil water, make tea or coffee and toast or cakes. The inclosed unit heats

(Continued on page 46)

A number of retail hardware firms are planning on opening up, during the early summer months, a separate department for the showing of household hardware lines such as are shown herewith. This merchant, along with many others, finds housewives like to shop for electrical and other household lines at leisure and examine closely the construction and finish of such lines as oil stoves, refrigerators, washing machines, vacuum cleaners, kitchen utensils, etc. An attractive layout for such a department is shown here with separate display tables for various utensils where good light is provided and plenty of room for many customers to be dealt with.

Authority Says Hardwaremen Are Natural Purveyors Of Radio-Telephone Equipment

Retail Distributors Should Handle Only Very Best Material in Radio Supplies—Evidence Which Proves Radio is Not a Fad But a Science of Rapidly Increasing Importance—Equipment Which is Mostly in Demand—Percentage of Profit in Radio Equipment for Hardwaremen

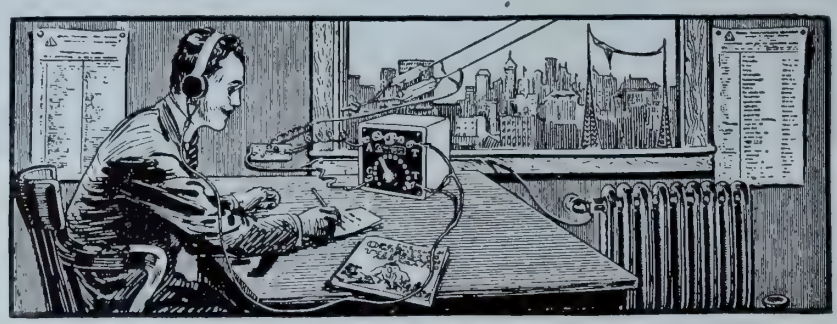
Editor's Note.—The subject of radio-telephony has been of much interest to hardware merchants recently due to the enthusiasm which has been aroused and the possibilities which exist for profitable business in radio supplies. Being a more or less technical subject and one on which the average hardwareman has comparatively little knowledge, the Toronto Retail Hardware and Paint Club at its regular monthly meeting this week secured as speaker of the evening, Mr. W. A. Walkover, official of the Cam-Fish Co., Ltd., Toronto, who has a broad knowledge of the technicalities of wireless and who has also made a study of the merchandising of such equipment. His address and answers to questions of retail hardwaremen are outlined fully herewith for the information of readers throughout Canada:

"THERE IS only one way to put radio across," said Mr. Walkover in commencing his address, "and that is by handling only the very best material. There is a wide variation in the quality of material offered and if you give a customer some poor material you will find they will be dissatisfied and be inclined to be prejudiced against the whole idea.

"There is one very interesting thing about the early development of radio, and that is Marconi's observations. The story is told that while out in the woods one day he observed that the song of a bird made a leaf quiver. From this radio telephony has developed.

"In commercializing radio the point is often raised as to whether or not it is just a fad. I believe you can rest assured that this is not a fad, radio is going to stay, it is going to grow. You are favorably situated and should be the natural purveyors of radio equipment, and you will also find you can commercialize what is an interesting study.

Some statistics were quoted by Mr. Walkover in confirmation of his stand that radio had a big future and was not a fad. He stated that the potential value of the field for buying of radio supplies among farmers alone in the United States was estimated at $7,500,000. There were said to be 40,000 licensed operators in that country, and the number of amateur operators was unknown but would be over a million. There were estimated to be 39,000,000 potential buyers of radio equipment in that country. A proportionately large field was said to be offered in Canada, and attention was drawn to the fact that so far only the large cities in Canada such as Toronto, Montreal, Winnipeg, Vancouver, had taken up the idea to any extent and made provision for broadcasting. Smaller cities such at Peterboro, Hamilton, Guelph, etc., were said to be just commencing to be interested in the subject, thus opening up a much larger field for business. It was also thought that people in the smaller cities and towns and in the rural districts would be more interested in radio than those in the larger centres due to the fact that other entertainment is closer at hand for those in the larger centres.



"In radio there have been two eras," continued Mr. Walkover, "first the ordinary crystal set, followed by the vacuum tube set. The youngster starts with a crystal set because he can buy parts for it easily and its construction is simple. He can head a radiophone for a radius of about twenty miles with such a set and a spark can be heard much farther distant. The parents will only need to listen in once before their enthusiasm is aroused and they want a vacuum tube set with a wider range.

"Dealing with the sentiment which has been expressed that the present is the preliminary and inefficient stage of radio, Mr. Walkover remarked that such statements come from those who know nothing of what has been accomplished. He outlined how a U. S. battleship during the war was manoeuvered safely through a mine field and past many treacherous rocks in a thick fog by sending out direction finding calls and plotting its position on the map. He also told of how the U. S. fleet of battleships when it returned from Europe came in a blinding snowstorm and was successfully manoeuvered through dangerous places solely by the use of radio.

"The crystal set is not very efficient," said Mr. Walkover, "and we have to be very careful about this set for the good of radio. It has a maximum dependable range of fifteen to twenty miles. I have heard with a crystal set 1,500 miles, but this was very exceptional. There are crystal sets on the market to-day ranging from $1.50 to $50 each. I advise you not to touch the poor set. I always induce amateurs to buy the parts for such sets because it teaches them the construction and explains many points which are hard to appreciate such for instance as the fact that there is no physical connection between the two coils which are connected with the aerials and the phones respectively. In such a set the ear phones are in series with the crystal and the crystal is in series with the secondary coil. All radio transmission is done by an alternating current and the purpose of the crystal is to eliminate one half of the range which the electric current would normally undergo. Without the crystal such a current would hold the diaphram in the phones stationary and you would hear nothing.

"The condenser is not absolutely necessary on this set. It stores up energy and passes it on in quantity. This condenser also controls the tuning in a vacuum radio set."

Emphasizing the importance of honesty in merchandising radio equipment Mr. Walkover stated that one day he was in a radio supply shop when a customer was purchasing a crystal set. He was told by the clerk that the set had a range of 500 metres. He required a cheap set with a fairly long range and of course took it for granted that this set had a range of about 500 miles whereas it was merely adjustable to 500 metre wave lengths and probably had a range of only 15 or 20 miles. Such sales methods applied to radio particularly were discredited by the speaker.

In explaining the technicalities of the more expensive, longer range vacuum tube sets, Mr. Walkover stated that such sets had a regenerative idea which greatly increased their range and effectiveness. This regenerative idea he compared to a hill climbing locomotive which has two cylinders on each side compared with the average locomotive hav- only one cylinder on each side. The passing of live steam from one cylinder to the other greatly increases the

power and effectiveness of the steam. This is a regenerative process in the same sense as the vacuum tube set of radio is regenerative as compared with the ordinary crystal set.

Patents on Equipment

Much has been said about patent rights on certain radio equipment and hardware merchants have feared difficulty in this respect. Mr. Walkover explained that certain parts that are patented bring prices out of proportion to their intrinsic value but that the price must be paid because of the protection they are afforded. No infringement is possible on a number of such lines. As to patenting complete sets it was pointed out that the plan has been followed by some distributors of practically assembling a set with the exception of connecting one or two wires and then selling it "knocked-down" and letting the buyer make the final connections. In this way he stated some dealers were making a handsome profit by buying parts for such a set and selling them "knocked-down" with instructions for reassembling.

Describing some of the apparatus, Mr. Walkover dealt with the radiophone bulb, resembling an ordinary electric lamp bulb which he said consisted of a grid, filament and plate, the grid being the principal factor. The patents on the various parts of this bulb were held by three different firms who have formed a holding company for production.

The difficulty of producing sufficient supplies of radio equipment in Canada were dealt with, it being pointed out that distributors were still buying most of their supplies from the United States. As indication of the fact that Canadian manufacturers will soon be into production on a broad scale and as proof of the future importance of the industry, Mr. Walkover stated that one Canadian firm has invested over $200,000 in dies alone. One firm which had extensive patents on equipment had established four distributing agencies and of this number three were said to be musical firms. In view of the greater mechanical inclination of the hardware trade than music dealers, Mr. Walkover thought the former would have a better opportunity for this business than the latter. As indication of what can be accomplished in the retail sale of radio supplies he cited the case of a comparatively small hardware firm in the U.S. which had within a few months increased its radio business from $200 to $2,000 a week.

Swamped With Business

Dealing with the current opinion that the radio business has "gone flat" Mr. Walkover stated that his company as well as others, were literally swamped with business and it had recently been necessary for them to add new shipping facilities. He anticipated a big revival of interest in the Fall when the indoor amusements come in for more attention. In this connection he bespoke the popularity of special groups of equipment which are being offered by distributors to aid the retail merchant who is unacquainted with the best lines to stock.

Answering a number of questions on the subject, Mr. Walkover replied that the aerial plug, that is a plug which can be placed in the ordinary electric light socket and which uses the electric light company's wire for an aerial is guaranteed mechanically perfect by the distributors but is not guaranteed to give results. Its use has not been entirely satisfactory, he stated.

Replying to a question as to whether galena was as good as carborundum in crystal sets, Mr. Walkover stated that quite a little added equipment was necessary with the latter and furthermore it is patented by Marconi. He pointed to the fact that crystal sets are gradually being eliminated by the vacuum tube variety. Dealing with vacuum tubes, Mr. Walkover showed the merchants a number of samples. The Mullard tube, he pointed out, was the standard of the British navy wireless, and guaranteed purchasers against any action regarding patents. He pointed out that this particular type of tube was dark and this was a disadvantage which had to be explained in selling it.

Replying to question as to promptness of delivery, Mr. Walkover stated that his firm had had supplies on order for six months which are just now coming through.

The amount of money invested in radio in New York state alone was said to be $78,000,000, this being given as an indication of the value of equipment in use.

Future of Prices

"What are chances of a decrease in prices between now and the fall on radio equipment?" asked one member.

"There are a few firms that have overbought and some of these being pressed for money might offer some cheap prices," said Mr. Walkover, adding that supplies of good materials were so difficult to get that efficient equipment would not go begging with lower prices. In view of the big anticipated revival of buying in the fall he thought any merchant who held back waiting lower prices on equipment would find that he would gain little advantage and probably find himself facing a loss of possible business in the fall through being unable to supply the demand.

"Audion detectors are $5 in the U.S. and sell for from $8 to $9 here. Why this difference in price?" asked another member. To this Mr. Walkover replied that some firms were getting outlandish prices for their equipment, but that within two months when certain Canadian manufacturers start producing these prices are expected to be stabilized. The retail price on a Mullard bulb was quoted at $6.30 but one retailer present said he had bought them at $5 each, thus indicating the wide range of prices available. Mr. Walkover stated that the new price on the Mullard bulb would be $7 which would include a base that fits the ordinary socket.

If Broadcasting Ceases

"What will be the effect if the newspapers stop sending out concerts?" was asked. To this Mr. Walkover replied that if present broadcasting stations stopped sending, others would start. He did not think present stations would cease, however, particularly as certain of them are making more or less permanent connections for broadcasting. He pointed out that some producers have a large amount of money invested in this industry and they could not allow the business to drop because of providing entertainment for radio users. He stated that a broadcasting station was now being erected in Hamilton and others were being planned in Brantford and other cities.

"What is the best way to buy galena?" was asked. To this Mr. Walkover replied that the best way to purchase it was in little boxes. Each crystal is tested and guaranteed and a group of them make a nice display. He did not approve of the mounted crystal because it was generally mounted in solder and this reduced the effectiveness of the crystal. It should be put in a cup with three screws and be made secure against vibration because the sensitive point on it is so small.

Asked as to what tenants in apartment houses could do to

(Continued on page 64)

EARLY SUMMER SALE OF ELECTRICAL GOODS

(Continued from page 43)

very quickly and, of course, does not harbor dust.

Some manufacturers are putting out very useful literature which will do a great deal toward saving the dealer trouble and complaint. It is on the matter of wrong use of electrical household goods; for example—pull the plug out of the iron instead of turning off the socket, and it is not possible to have the iron overheat, or burn out the fuse. Wherever possible connect table cooking appliances from different circuits. Do not let the electrical connection on the appliance get wet, etc. Facts so simple and obvious to those who understand the current that they are often not mentioned to the novice.

Yet these form a good basis for the merchants' advertising of electrical goods showing that he is anxious to attend to electrical customers' interests.

GERMAN KNIVES IMPORTED AT SEVENTY CENTS DOZEN

(Continued on Page 37)

Canadian-made article, in this particular instance at $3.75. The $3.05, the difference between the cost laid down and the distribution cost, goes to the German manufactured in Germany.

Now, my point is this. We ought to have that $3.75 in the treasury, it ought to go into the funds of Canada, to be credited, if you like, to German reparations account, but I do not think that is necessary, I think it ought to go into the general revenue of Canada. Even then we are allowing those German goods to enter at a figure of 75 cents under the Canadian manufacturer's price.

Mr. ROBB: If I may interrupt my hon. friend—does he argue that these pocket knives have been coming in during the past year, or that they can come in under the proposed changes?

Mr. STEVENS: These knives have been coming in through the mediums mentioned by the hon. Minister of Finance through Great Britain, Holland, and the United States. I reiterate what I said a few moments ago, that these agents established in England, Holland, New York and elsewhere are agents of the German manufacturers, not bona fide jobbers. Do not forget that. The British jobber does not make a profit, the United States does not make a profit. Bokers' are the greatest cutlery manufacturers in the world. They ship to their agent in New York who in turn distributes the goods in the United States. I have the figures for the United States: 75,000 dozen pocket-knives at 70 cents a dozen; 38,000 dozen razors at 71 cents a dozen; 44,000 shears at 95 cents a dozen—all of which were cleared to the agent of the manufacturer. He paid the duty on the low exchange value of the mark and then he distributed them to the American wholesalers at the increased high price, making a tremendous profit of four hundred to six hundred per cent. for the German manufacturer. The Canadian government, the British government, the United States government, in these cases, get nothing, the profit goes into the pocket of Mr. Stinnes, whom I mentioned a moment ago, and the other German manufacturers, who, instead of having those funds remitted to them in Germany keep them in New York for use in invading the Mexican market and other markets in competition with this and other countries. And we are feeding them the wherewithal to compete with us, without getting for the Canadian purchaser one cent of value.

Now let me refer to our sister dominion of Australia. These words were uttered by Premier Hughes of Australia:

If you think that I will vote in favor of trade with Germany, my life has been lived in vain.

What prompted Premier Hughes to say that? It was brought to his attention that German sewing machines had been offered in Capetown and sold there at 18 shillings, umbrellas at 3 shillings, safety razors at 4 pence and so on. And what did Australia do? Australia passed an act, which they call the Preservation of Industries Act—under which the value of goods landed in Australia from Germany was raised to the cost of a similar article made in Australia. What I say to the Minister of Finance and to the Prime Minister is this: Either take that basis of valuing goods for import at the Canadian value of the article imported, or—and this is what we believe is the right thing to do— value them at 50 per cent. depreciation, or not less than 35 per cent. depreciation. I may say—and I say it advisedly, after a good deal of thought—that I would not object to dropping the depreciation of 35 per cent; I would object, though, to going below that.

TRADE MARKED LINES

(Continued from page 40)

stance of the importance of making a vivid and permanent impression. The mark or name facilitates the memory of the article, aids in its recollection at the moment of need, and assists in its identification at the time of purchase. Therefore, recollection and recognition may be said to constitute the primary functions of trade-marks. The more easily and correctly the mark or name is recalled and the more quickly it is recognized, the higher will be its value.

Many Recent Changes in Trade Symbol Procedure

In recent years the growth of competition and the multiplication of brands has brought about many changes in trade symbol procedure as well as in laws governing the use of these devices. The natural tendency on the part of the purchaser to buy goods undere trade names has made it necessary that these names be not only ornamental and printable, but also short, and easily pronounced.

The merchandising power of the well-chosen trade-mark is greatly enhanced if the name or symbol can itself suggest the qualities of the commodity. The name that is distinctive and unique has obvious advantages.

There has been a steadily increasing persistence on the part of manufacturers toward choosing descriptive marks. Attorneys have been kept busy explaining that it was not the Government's intention that the trade mark should advertise the goods, but rather that advertising should make the trade mark valuable. This surely cannot be regarded as undue restraint. See how valuable advertising has made Kodak, B. V. D., Arrow, and others, which are not in the least descriptive of the goods.

On the other hand, many manufacturers of eminently successful products have chosen descriptive trade marks and have consequently been refused registration.

Is Primarily an Advertiser

Why does the manufacturer so often choose a descriptive mark without regard to its registrability? Because the manufacturer is primarily an advertiser. On certain classes of goods a mark that does not serve to advertise the goods is regarded by many as a dead weight. To make a trade mark advertise the goods is to make the mark describe some valuable quality of the goods, such as Kitchen Kleanser, Wrenchless this-or-that, Everhot this-or-that.

A manufacturer will go to his attorney and say, "Someone else is using the word 'Wrenchless' on his device. It is wrenchless all right, but I used the term long before he did, and I want to get the word registered as a trade mark to prevent him from using it. He's cutting in on my business by stealing my thunder."

The manufacturer is evidently no longer content to confine trade marks to the non-descriptive sort. The fact that so many successful products are represented by descriptive marks indicates to many persons that the descriptiveness of the mark had a great deal to do with the success of the product.

Due to the thought which is given by the manufacturer in the selection of a good trade mark, the money spent by him to give this mark general publicity, and the fact that such guarantees a certain standard of value, the retail merchant might well put his influence behind such lines of merchandise as are given such attention.

TO MANUFACTURE BABBITT

The Georgian Bay Spring & Babbitt Works, have erected a new factory in Collingwood, Ont., and are preparing to manufacture a high-grade British babbitt. This product will be introduced to the trade as Gray's special No.'s 1, 2, and 3. The company also contemplate the manufacture at an early date of automobile springs.

Western Hardwaremen Claim Insufficient Protection For Sale Of Oil And Gasoline

Present Margin of 5% Between Price to Consumer and Price to Retailer is Too Small—Advocates Sale of Kerosene and Gasoline for Cash Only—Want Names of Paint Manufacturers Selling Direct to Consumers—Support Good Roads Movement

REGINA, Sask.— The handling of oils was the topic of discussion at the hardware section of the Saskatchewan R. M. A. Convention. A resolution was brought forward from the hardware section asking oil companies to give the retailer handling their commodities a fair discount. Quite a few of the companies are giving the consumer a discount of 20 per cent. as compared with the 25 per cent. discount to the trade. H. A. Stone stated that the present policy provided only a small margin of 5 per cent. between the price to the consumer and it was unfair to the retailer. W. C. Paynter of Tantallon stated trat he had great difficulty in getting rid of his stock of oils. A company after selling him oils then established a station in the same town and were selling small quantities, including 5 pound packages of grease. Another retailer expressed his views that if the oil companies were going to handle the larger sales they should not expect the retailers to handle the smaller ones such as gallon lots. A. Huck of Vibank, suggested that the retailer refuse to handle any of the oil products and that the oil companies do their business direct.

Sell Kerosene for Cash

J. Montgomery of the Canadian Oil Company, stated that he thought under their present system the retailer was getting a fair margin of profit. They did not have to buy in large quantities as they could take their orders from their customers first and then place them with the company. Kerosene and gasoline, he contended, should be sold for cash and the failure to do this was responsible for losses in handling this trade. V. E. Green of the Imperial Oil Company stated that his agents were instructed to do business as much as possible through the local dealers. Their agents were paid a commission of 7 per cent. when they sold direct to the consumer but were not paid this commission when the sale they solicited was booked through the local dealers. Outlining the policy of his company, Mr. Green said that the former system of handling oils had not been up to expectations as some of the retailers had been price-cutting, and as a result it had been decided in March to give the owners of tractors who bought in barrel or half barrel lots a discount of 20 per cent. from list price. He said this had been done to meet the competition of other concerns who were selling oils of uncertain quality. Under the present system the dealer was given increasing discounts on a sliding scale according to quantity purchased and his profits would net him from 14½c to 20c a gallon which was a larger profit than they were getting on other lines when a quick turnover was taken into consideration. J. Lowden of the British American Oil Company, declared that competition forced the companies to adopt the policy of selling to the consumer in order to get business.

Making Agent a Philanthropist

One of the merchants present said that he had been getting a brand of oil at 67c and the price was raised to $1.50 with a discount of 25 per cent. and he did not feel justified in charging the consumer this increase for stock purchased and this no doubt explained the price-cutting referred to by Mr. Green. Another retailer expressed his opinion that the policy of giving an agent 7 per cent. commission for selling direct to the consumer and at the same time instructing him to work through the merchant for which he would receive no commission would not work out very satisfactorily. The oil companies, he said, are trying to make the agents a philanthropist. Jack Wood, their chairman summing up the discussion expressed his opinion that the policy outlined was a very poor one and a very expensive method of doing business. There might be some argument for it if the farmers were going to get their oil cheaper but as this is not the case the oil companies would find that it was necessary to have merchants distribute their goods.

JACK WOOD
of Swift Current, Sask., who presided at the convention of Saskatchewan Retailers in Regina

Messrs. Stockton, Reis, Allen and Alexander were appointed to meet the representatives of the oil companies with a view to trying to arrive at some satisfactory arrangement.

The question was taken up with the representatives of the oil companies but they could not reach any decision. A resolution was put through to the effect that the retail members of the association considered that the practice of the oil companies in this respect was unfair to the retailers and a resolution was passed asking the companies either to discontinue to sell direct to the consumers or else provide a greater margin in the discounts.

Object to Sale of Paint to Consumers Direct

A motion protesting against paint and varnish companies selling their products direct to consumers was carried. The members of the association were urged to report instances of this to the provincial R. M. A. offices whenever they were discovered so that the name of the manufacturer could be published in the organ of the Saskatchewan branch—The Western Retailer.

Merchants Support Good Roads

Hon. S. J. Latta, Minister of Education emphasized the interest which the merchants should have in this subject "Good Roads." He was sorry to find that in some of the towns there was not a great deal of interest shown in this important matter. It was a mistake to leave the propaganda for good roads entirely in the hands of the people in the country as the town and city folks were vitally interested in the question from an economic view point.

A resolution commending the work of the persons who have interested themselves in the promotion of good roads in Saskatchewan and pledging the support of the retailers to the new provincial branch of the Canadian Good Roads Assoociation was passed unanimously.

W. C. Paynter, Tantallon; G. W. Stockton, Carlyle; J. Huck, Vibank; S. Whittacker, Briercrest; E. B. Tedford, Mortlach; S. Sherman, Webb; T. W. McEwen, Kindersley; Ralph Miller, Prince Albert; A. J. Humphries, Raymore; J. Appleton, Yorkton.

Sask. Retailers Discuss Many Questions

Annual Convention in Regina Last Week is Representative Gathering, and is Marked by Much Interesting Discussion on Vital Subjects—T. H. Masterson, Regina, the New President

By Staff Correspondent Hardware and Metal

REGINA, SASK.,—The 9th annual convention of the Saskatchewan Provincial Board of the Retail Merchants' Association opened in the City Hall Auditorium here. Delegates from all parts of the province started to register at 9 o'clock, and for an hour the reception committee greeted them. Attendance numbers were up to expectations.

His Worship Mayor Grassick extended the welcome of the city to the delegates and in his address stated that the people of Regina knew what problems the retail trade have been up against during the past year and more. They appreciated the difficulties of the association and of its members. "I know I speak for them," he said, "when I say they are glad to see you gather together to discuss your problems, and I hope the convention will be successful in every way."

E. B. Gass, president Regina Chamber of Commerce, also welcomed the members of the R. M. A., and stated that the retailers were coming together to discuss business at a critical time. He had been engaged in trade in Western Canada a long time, and he remembered the time when such an organization as the retail merchants had now, would have been impossible.

"There was too much distrust in the old days, but the co-operation that the members have to-day is a splendid idea," he said.

He brought out this fact, that he would like to see the merchants take up the question of good roads in this Province, as they are very essential for the betterment of business. He also reminded the merchants of the association of the Boards of Trade of Saskatchewan and pressed for co-operation between the two organizations.

G. W. Stockton, retailer of Carlyle, replied to the address of welcome on behalf of the retailers and thanked the mayor and Mr. Gass. He believed, he said, that the business of retailing is second to none. It is necessary to have good retailers. He believes that the people of this country were coming more and more to realize the difficulties of the merchants, and the sooner they realized them, the problems of the association would greatly disappear. In speaking of the middleman, Mr. Stockton stated that he is performing a service that is necessary, and as the people demand it and are paying for the same there should be no kick coming. It is up to the retail merchants' association, however, to see that there were no more middlemen than the people want.

The President's Address

Jack Wood, of Swift Current, president of the association, referred to the financial difficulties of the past year or two. "We have been forced to study the strictest economy," he said, "in order to bring the association to the position in which it now stands. No doubt as many of you are aware, our financial conditions did not appear any too rosy last year, but through cutting down the different departments and overhead expense, we are glad to say we are in a strong position.

"The financial position of many of the merchants was still not as good as might be desired, but it was steadily improving, and the members of the organization might look to a brighter future." Speaking of the discontinuance of the collection department, which had been maintained by the association, he said it had been decided to drop it because it was costly and it had never given the service it was originally intended to give.

"The reason why this department did not pay," he continued, "is because the bills sent in by the members for collection were old debts on which every effort for recovery had been made before they were turned over to the department, and in many cases the majority of them were impossible to collect. Under this condition the association was not given a fair chance to make good. The cost was more than we could afford to pay for the service, and therefore it was discontinued, which had also resulted in the cutting down of the staff and further economy."

He referred to the amendments enacted at the last session of the Provincial Legislature to the Hawkers and Pedlars Act. They were partly satisfactory, but further representations must be made before the government in regard to this contentious law.

He referred briefly to the freight rate problem and said that the association was strongly represented on group dealing with this problem and the members might expect results.

Mr. Wood pointed out the cash and credit systems in vogue in the province, and stated that more retail merchants to-day than ever before were doing a strictly cash business. The members might emulate the systems adopted by the mail order houses of the country, and would do well in adopting their system. In conclusion Mr. Wood thanked the executive that worked with him during the year to make the work of the association so successful.

Unable To Be Present

J. A. Banfield, Winnipeg, president of the Dominion Board of the Association was to have spoken at the convention but a telegram was received from him stating it would be impossible for him to attend. He extended his congratulations to the assembled delegates and wished the convention success.

A telegram from the officers and board of the Ontario Provincial Association containing greetings to the Saskatchewan Convention was received and read to the audience by the chairman, J. Wood.

The exhibit of manufacturers and wholesaler producers in the basement of the city hall received many visitors not only among the delegates attending this convention but also among citizens.

Income Taxation Discussed

In his address on taxation P. McAra, federal inspector of taxation for Saskatchewan, outlined his work. He referred to the difficulties he has encountered in reaching all the taxpayers and finally went into technical details in regard to filling out of returns by merchants. The West is a difficult place to collect taxes with its population scattered over miles of country. It is relatively easy to collect taxes in an urban community but to go into the highways and byways of Saskatchewan was work for a large and highly efficient organization. In respect to the willingness of the people to comply with the act, the Province of Saskatchewan was up in the front rank of the Dominion. Mr. McAra gave figures of tax collection in this province for 1920, stating that in that year there was a gross income of $40,000,000 out of which no tax was collected because of the exemption provisioned in the act. About 100,000 families filed returns in that period and about 50,000 of them were not assessable. These figures were exclusive of the income derived from mercantile businesses. There were several classes of retailers doing business in the West and the worse ones were those who did not see the necessity for annual stock taking. The ones who did not worry about the wholesalers and the banks and the one who did not see why he should submit to the government a statement of his expenditure and revenue assets and liabilities. The speaker declared that the branch of the department in Saskatchewan was trying to make friends of the people. It was trying to make the merchant, the professional man and the worker co-oper-

ate with it, for that is the only method by which it could be efficiently operated.

Dean Rutherford of the University of Saskatchewan in addressing the retail merchants of Saskatchewan remarked that the big problem of retailers, farmers and every citizen of the province was to strive to establish permanent homes, thus making for the progress and stability of Saskatchewan.

Say Banks Have Advantage

A question of importance was presented by the executive committee in regard to the Dominion Government Bank Act, section 88 which allows banking institutions to take liens on crops, threshed grains or seed grain in return for loans to the owners and does not make it necessary for these liens to be registered within a certain time limit as other instruments are required to be. It is explained that a lien taken by a bank is the first charge in all cases against the grain or chattels or stock of a farmer. It may be taken in secret, that is by agreement between the bank and the owner who is accepting a loan and is not registered and in reality gives the bank power of attorney.

Secretary F. E. Raymond read a letter which stated that he had confidential information from a bank clerk that arrangements were being made between the elevators and the banks under which all grain cheques issued during 1922 and 1923 would only be made payable to the persons to whom the cheques were issued. This would be a very serious matter to the retail merchants as it would mean that if this action were taken the grain cheques would have to be paid through the local banks, and when the latter were creditors, they would seize the money before the creditor merchant had a chance to get his share, even though it was the intention of the owner of the cheque to divide up the proceeds.

A. J. Humphries of Raymore, said that a farmer had told him that a bank manager had stated that all grain cheques must be cashed through the bank. While he characterized this as a bluff he expressed the opinion that it was a practice which should be discountenanced.

This was generally conceded to be an injustice to creditor retailers who are thus excluded from ascertaining prior claims to their own. A resolution was unanimously passed urging the federal government to amend the bank act requiring such encumbrances to be subject to registration.

Secretary's Report

Provincial secretary F. E. Raymond made his report in part as follows:

The year through which we have just passed has been one of re-adjustment for us as it has been for you who are actively engaged in commercial pursuits. You have felt the pinch of falling prices and have had to take your losses, in some cases serious in the extreme. Doubtless, there are those among you who protected against this loss by taking advantage of a rising market in previous years as you were quite justified in doing. Many did not do so, but rather gave to their customers full advantage of the price at which they were able to buy. As a result of this, there are some who found it extremely difficult to tide over these strenuous times, and have only been able to do so because of leniency shown them by their creditors. The situation has been accentuated by the conditions surrounding the 1921 crop from the time it was put into the ground until sold. As you all know the crop was sown and harvested under war prices and about the time it was ready for market the price dropped to practically a pre-war basis, with disastrous results to the agricultural interests. This reacted with almost equally serious effect upon the retail trade for two main reasons. First, that quite generally speaking, retail merchants were unable to collect their outstanding accounts. Secondly, because buying among those interested in agriculture was restricted to a very large extent. This condition still obtained, although perhaps not to the same degree because of the favorable prospects surrounding crop conditions at the present time, and because also of those who were able to hold grain for a time secured a better price for it, which allowed them something to the good on the year's operation. There is a lesson here which I think we can all take to heart to good purpose and that is the utter dependability of the commercial life of the country upon agriculture, and I feel that we should strive with all the forces at our command to assist agriculture to the very limit of our ability.

The conditions which I have very briefly outlined have, of course, had their effect upon the Association through falling membership and in other ways which will be dealt with in some detail later on in this report. However, I am pleased to say that owing to the vigilance of your Provincial Executive we have weathered the storm successfully and are now in an easier position financially than we have been for some time. We have not been able to do all that we would like to have done, by way of holding meetings in various parts of the Province. That the importance of this is appreciated is illustrated by the fact that we have been requested during the course of the year to arrange for meetings at which merchants from a number of towns would be brought together at some central point. We were compelled to forego them for financial reasons.

During the months of August and September we were privileged to have with us our Dominion President, J. A. Banfield of Winnipeg, and our Dominion Secretary, E. M. Trowern of Ottawa, who, following the close of the Dominion Convention at Winnipeg, addressed meetings at Regina, Moose Jaw, Swift Current, Prince Albert, North Battleford, Saskatoon and Yorkton, at all of which the attendance was good. In every case the merchants in the district surrounding the city where the meetings were held were circularized, which resulted in quite a number from outside points being present on one occasion. It is my hope during the coming year to arrange a number of meetings throughout the province and to have at each one a speaker of some note along commercial lines in addition to an Association representative.

Closes Collection Department

We found it necessary in January of this year to close our Collection Department in the Provincial Office in so far as the handling of accounts on a commission basis is concerned, owing to the loss incurred in its operation. Moreover, due to existing conditions the results being obtained were not satisfactory to ourselves, nor were they to those for whom we were handling the accounts.

Decrease in Membership

Our membership at the present time is somewhat less than it was at the beginning of January, 1921, but it has not decreased to the extent that one might think considering the trying times through which we have passed. Many of those who have not renewed their membership would have done so gladly had they considered that their financial position warranted them in doing so. Whether they were justified in taking this stand is an open question, but the fact remains that they could not see their way clear to pay out any more money for any purpose than was absolutely necessary. Our actual paid up membership on December 31, 1921, was 2,157. At the present time it is 1912. A decrease of 245 covering a period of seventeen months. This reflects a considerable amount of credit on our two organizers, Messrs. McQuarrie and Anderson, and also speaks well for the esteem in which the association is held.

During the year six executive meetings and two interviews with the Government were held. We were also represented by our president and two other members of the Executive at a joint conference called by the Government on November 11, to consider general conditions. With but one exception all members of the Executive were present at, and took an active part in the proceedings of our Dominion Convention held in Winnipeg last August.

At our first interview with the Government which took place on October 11 and which in addition to the Executive, was attended by representatives of the Music Dealers, Grocers and Butchers Trade Sections, the following legislation was proposed.

1. An amendment to the Hawkers and Peddlers Act, exempting piano and organ salesmen from the necessity of taking out a Provincial license, also to provide for more stringent regulations governing the sale of meat by farmers and others not regularly established in the business.

2. An amendment to the Attachment of Debts Act reducing the amount of the exemption from $75 to $50, also to provide that no exemption will be allowed in the case of accounts incurred for food and clothing in addition to board and lodging.

3. An amendment to the Egg Marketing Act to provide for compulsory marking on the part of the producer.

4. That in the case of the Government appointing a Municipal Tax Commission, retail merchants be allowed representation on the same.

5. An amendment to the Small Debts Act to provide for a Judgment Summons.

6. An amendment to the different Municipal Acts affected giving the right

T. H. MASTERSON, REGINA, IS ELECTED PRESIDENT

Election of officers for the ensuing year resulted in T. H. Masterson, Regina, being elected president; G. G. Wray, Regina, 1st Vice-President; Ralph Miller, Prince Albert, 2nd Vice-President; A. J. Humphries, Raymore, 3rd Vice-President; S. E. Fawcett, Saskatoon, Treasurer, and F. E. Raymond, Saskatoon, Provincial Secretary.

J. Wood, of Swift Current, expressed the pleasure he had in his work as president and paid a warm tribute to the assistance rendered by the executive and the devotion of the staff of the provincial office.

T. G. Masterson, the newly elected president, in accepting office expressed appreciation of the services rendered by his predecessor, Jack Wood. The merchants endorsed the remarks by rising and singing "He is a Jolly Good Fellow." Three cheers and a tiger.

Retailer Holds The Strategic Position

"If it Were Not for the Work of the Retailer the Whole Economic Fabric Would Collapse," Declares Prof. Swanson of Saskatchewan University in Addressing R.M.A. Convention—Premier Dunning Urges Patience in Matter of Credits

By Staff Correspondent Hardware and Metal

REGINA, Sask.— Addressing the retail merchants of Saskatchewan at their annual convention, on the occasion of their banquet on the closing evening, Hon. C. A. Dunning, Premier of Saskatchewan, was the chief speaker. The newly elected president, T. H. Masterson was in the chair. Other speakers on this occasion were W. W. Swanson, professor of economics at the University of Saskatchewan, and N. S. Jones of Hamilton, Ont.

In the course of his address the Premier enumerated some of the more important resources of the southern part of the province, dealing with their recent progress and the possibilities for future development on a large scale, instancing the clays, sodium sulphate deposits, epsom salts and lignite coal.

Premier Dunning, speaking on the problem of credits as related to existing conditions, declared there were three kinds of credits; merchants' credits, wholesalers' credits and bankers' credits. The trouble with all three classes of credits in the past had been that when credit was not needed badly it had been very free but when it became a vital necessity they had all got cold feet. Credit had always been either too free or non-existent. In the matter of credit they had been extremists.

Referring to the credits extended by merchants to their customers, the Premier said Providence had not intended that one crop should pay for the debts of five years and he urged them to "be easy and if you cannot be easy, be as easy as you can." The province of Alberta, he said, had had to pass legislation to compel creditors to be easy. He did not want to see legislation of that kind enacted in Saskatchewan and he felt sure as the result of conferences the Government had had from time to time that such legislation would not be necessary here.

Unjustly Criticized

Prof. Swanson, in his address, remarked that retailers and wholesalers had been unjustly criticized on the ground that they stood between the producer and consumer, but people did not stop to consider the countless services they rendered between the production of the raw articles and its receipt by the consumer. If it were not for the work of the retailer and the middleman the whole economic fabric would collapse. The retailer held the strategic position in the realm of commerce and if he did not live up to his responsibility there was suffering all along the line.

It was decided to hold the 1923 convention in Prince Albert in June and a proposal to adopt the policy of pooling fares of delegates attending the convention in future as a measure for distributing the burden of traveling expenses equally among the delegates.

The speaker emphasized the necessity for proper preparation for the business of merchandising. Both farming and retailing were highly scientific industries and special preparation was necessary to ensure success and to render service. If the retailer prepared for his job he had one of the biggest opportunities and tasks in life. Some of the troubles of the present day were due to the fact that men had gone into the business in a haphazard way without making efficient preparation. It was not only necessary to prepare beforehand but after they were in business it was essential to be on the alert and to keep up-to-date.

In this province it was the first duty of the retailers, professional men, and everyone who made a livelihood here to understand the problems of others and particularly the problems of the agricultural classes. In this province above all else it was necessary they should be rural minded. Their first obligation was to study the problem of the farmer, not in an academic way but by linking up with his organization and activities. They could not as a class achieve anything unless they linked themselves in close association with other classes of the community.

Favors Cash Basis

Another necessity for the present day was to get down to a cash basis of doing business, or nearly as possible to a cash basis. People had been spending too much on things that counted little in life. Until people met their debts they had no right to the moving picture class of luxuries.

In his concluding remarks the speaker emphasized the importance of co-operation among the retailers to promote efficiency, co-operation with one another and co-operation with their employees in order that real service could be rendered. What was needed was the kind of co-operation that sank personal differences for the benefit of the community as a whole. They must get that kind of thing in the local community if they were going to have it the world over.

SASK. RETAILERS DISCUSS MANY QUESTIONS

(Continued from page 49)

to assess as stock in trade such commodities as flour and feed, handled through grain elevators and sold in a retail way.

Our suggestion that the marking of eggs by the producer be made compulsory was also looked upon with greater favor than on former occasions, and while the Egg Marketing Act itself does not require this, regulations have been passed which provide that upon request, the producer shall be furnished with a stamp for that purpose. A meeting of retail merchants interested together with representatives from the department of Agriculture, the wholesalers and the transportation companies to discuss this whole matter has been arranged for during the course of this convention.

We were given no encouragement in connection with our request for a Judgment summons under the Small Debts Act and in spite of repeated efforts have not been successful in this respect. No particular objection was taken to our request that provision be made for assessing flour, feed, etc., sold in a retail way from grain elevators and we were promised that the matter would be given full consideration. Evidently, however, the Government could not see its way clear to grant this request as no amendment to the Act was passed.

S. F. Fawcett, treasurer of the Saskatchewan association presented a financial statement of a very healthy character showing a surplus on May 31, 1922 of $5,-095.29.

Those in Attendance

The following Saskatchewan merchants registered as delegates to the Convention. R. Maze, Assiniboia; John G. Klotz, Alan; A. T. Forrester, Aneroid; H. Elliott, Admiral; W. M. Sisson, Assiniboia; S. Pergamit, Aneroid; T. G. Grosby, Broderick; S. Whittaker, Briercrest; Harvey Ashton, Briercrest; Andrew Walton, Benson; A. H. Griffiths, Benson; W. M. Johnston, Corinne; G. W. Stockton, Carlyle; W. J. Robinson, Davidson; M. Bronstone, Darmody; Ben Brachman, Edenwold; T. B. Dynes, Fleming; A. Wedin, Griffin; D. Brownstone, Herbert; A. M. Brownstone, Herbert; George B. Sharpe, Herbert; J. F. Funk, Herbert; J. A. Leoppky, Herbert; Roy J. Rinker, Hazenmore; F. J. Hoskin, Hearne; T. E. Maxwell, Grand Coulee; W. M. Aitkin, Gull Lake; S. J. Smith, Gull Lake; W. Thatcher, Limerick; S. K. Gryde, Leader; H. A. Stone, Leader; F. W. Dalzell, Liberty; S. S. Hall, Lloydminister; K. M. Taylor, Moose Jaw; C. Williams, Moose Jaw; Hugh Rorison, Moose Jaw; J. W. Allen, MacRorie; W. E. Clothier, Indian Head; R. C. Finley, Kincaid; J. A. Williams, Kincaid; J. Haddadd, Kincaid; William Maxwell, Kincaid; A. J. Wyman, LaFleche; John Bullied, Lumsden; W. B. Scott, Langham; W. Ballingall, Moose Jaw; George J. Morrison, Moose Jaw; Clem Alexander, Moose Jaw; A. B. Tedford, Mortlach; A. T. Breton, Montmartre; E. E. Andrews, Moose Jaw; A. F. Haddad, Meyronne; R. A. Miller, Prince Albert; R. Foret, Pontiex; H. S. Andrews, Pangman; A. M.

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Much Imported Hardware Coming to B.C.

Sporting Goods, Toys and Other Hardware Arriving From European Countries—Better Anticipation of Future Requirements by Buyers

VANCOUVER, B. C.—More of a spirit of optimism is evident both in jobbing and retail circles. The holiday period is at hand but it is having little effect upon buying which continues to be steadily maintained. Buyers are taking no chances on overstocking and are purchasing very little in advance of immediate needs. Vessels arriving from the Atlantic seaboard are bringing in small lots from the Old Country and the continent. German toys are being carried in increasing lots, production costs being such that American goods are being left across the line.

Sporting goods houses in one or more instances have increased their staffs to provide for the early summer demand which is unusually heavy. Baseball is having a record season and local houses are sharing the resultant trade. The trade also reports good business in fishing tackle particularly during the week-ends. All this is having a good effect upon the business of the distributing houses. Several new lines of tennis racquets have been introduced here this season and have met with success particularly a French line—new to the trade—which is retailing at $15. In a recent article in a local paper it was stated by one who had studied the question, that playing on the public and private courts in Vancouver were upwards of 10,000 players.

Trade is showing a gradual improvement from upper country districts. For a considerable time buying has been on a hand to mouth basis but conditions are becoming more settled and retailers are in a better position to anticipate their requirements. Activity continues in the gold strike area of the Cariboo and as a consequence shipping orders have been of fairly good volume this week.

Distributors report more promptness in payment of accounts although on Vancouver Island collections are more tardy.

On the mainland special sales have been limited this week, only two houses making any display of cut price offerings. For the last three days of this week one house is giving low prices on standard weight aluminumware. In the list are double boilers at $1.48, ten-quart dishpans at $1.63, combination cookers at $2.54 and saucepans at $1.18.

Auto accessories are also in the list of specials of another house. Tire covers of $4 value are priced at $2.25, No. 2 Niagara jacks at $3.45, spotlights with mirror attachments at $6.65 and Dodge seat covers for $14.85. A refrigerator is on the market this week at $18.25 against the regular price of $21.50. This however, is a one day sale only. Suit cases, hand bags, valises and trunks have been sharply lowered. Other lines have been changed very little within the week.

WESTERN CANADA NOTES

Rouleau Hardware Co., Ltd., Rouleau, Sask., has been incorporated.

C. McMurachy is commencing a hardware business at Hamiota, Man.

Dauphin, Man.—Jacob Slopen is commencing a hardware business here.

The Standard Sheet Metal Works and Roofing Co. has started business in Vancouver.

Morris, Man.—Mitchell Bros. have sold their hardware business to W. W. Humphries.

The Campbell Hardware Co. has been formed in Vancouver to engage in the retail trade.

John Gilchrist, manager of the National Cash Register Co., Glasgow, was in Vancouver this week on a pleasure trip.

Howard Hill manufacturers' agent of Regina, Sask., has just returned from a business trip to Alberta and British Columbia.

This week's incorporations include the name of the Western Canada Radio Supply Co., head office Victoria, B. C., to carry on the business formerly operated by Kenneth G. Moffat. The capital is $50,000.

British Columbia continues to ship about 1,250 tons of copper to the Atlantic refineries every month. The increased movement together with the advance in price is having a very favorable effect upon the mining industry of the province.

The Inter-Empire Trade Development Co. Ltd., a Vancouver company has just been incorporated at Victoria. The purpose of the concern is to introduce to the Canadian market goods manufactured in England or produced in other parts of the Empire. At the first meeting this week, the following officers were elected: Lieut.-Col. G. D. Hamilton, president; Capt. D. F. Gorrie, sec.-treas., and Dr. J. W. Mahan, managing director.

MOOSE JAW HARDWAREMEN PLAY BALL

Moose Jaw, Sask.— The McKenzie-Stewart baseball team defeated the Moose Jaw Hardwaremen by a score of 9 to 4 in a recent game. Features of the contest were the home runs by Pallie Pascoe of the Hardwares, and Robinson of the McKenzie-Stewarts, and three-baggers by Peterson and Innes of the Hardware team.

The teams lined up as follows:

Moose Jaw Hardware—McCulloch, 2b; Pascoe 1b; Nairn ss; Peterson 3b; Mowbray lf; Banting p; Gibson rf; Innes cf; Bryant c.

McKenzie-Stewart — Henderson cf; Robinson 2b; Macdonald 1b; McKeown ss; Hunter rf; Lee 3b; Patterson lf; Johnston, Haigh p; Dixon c. Umpire, Nairn.

PAINT COMPANY IN CALGARY

The Rocky Mountain Paint Company, recently incorporated, which has located in Calgary, controls vast deposits of color-bearing material in the western area of the Province and is utilizing these western resources in the manufacture of paints and colors. Arrangements are said to have been made for placing the local products on the western markets.

CALL IT ZINC

At a recent meeting of the Birmingham (England) Metallurgical Society, the example of the United States in abandoning the use of the word "spelter" and also in regard to standardization was commended.

BETTER TOOL DEMAND

A better demand for taps, dies, gauges and various lines of small tools is reported from some quarters. The Greenfield Tap and Die Co., Galt, state that recent orders indicate a much more encouraging buying tendency and are in larger volume.

May Be Handicap to Merchandising

THE AMENDMENTS to the Budget of the Minister of Finance as made just prior to the adoption of the measure make some changes of interest to the hardware trade. The change in the stamp tax will be welcomed as some slight alleviation of the difficulties expected from the former legislation. The automobile tax is reduced on cars valued over $1,200. Provision has been made for valuing for duty goods imported from countries where the currency is at greatly depreciated value on the basis of the English value of such goods. This will likely make little difference in the practice followed by importers under the former regulations, namely, importing German merchandise through Holland.

The new tax on receipts, as dealt with elsewhere in this issue, is one of the most interesting changes because of its novelty on this continent. A leaf has evidently been taken from the experience of European countries in this regard where this tax is applied in such a way as to be productive yet not onerous. The regulations have yet to be framed for the Canadian receipt tax, and in so doing it would be well for the government officials to keep in mind the fact that the present operation of the Sales Tax is such as to make any further increase in the retailers' overhead expenses most undesirable. A tax on counter receipts payable by the party issuing the receipt would not only increase retailers' overhead expenses but be a distinct handicap to merchandising comparable to the luxury tax stamps formerly in use. Means are wanted to-day to facilitate merchandising rather than to make it more difficult.

And Nobody Benefits

A YEAR AGO now Hardware and Metal first published under strike conditions. On the first of June, 1921, the mechanical department of this company and of many other publishing houses in the city were deserted. Since then the majority of these concerns have operated in defiance of the ill-considered order issued from Indianapolis and the unions have paid nearly $1,000,000 in strke pay.

The whole thing has been unfortunate. The union officials foolishly made demands for higher pay and shorter hours at a time when the public were calling for lower prices all round. The publishers realized that they could not pay these increases because conditions were such that they could not make increases in their charges. Backed by public opinion they have been able to carry on in the face of the strike. They have lost a lot of good workmen but they have by now been able to organize on a basis which permits of normal production.

The men have either found other employment or they are still existing on the funds paid out by the union. Their organization has paid out nearly $1,000,000 and as this has in no way meant production it means that this money collected from the wages of workers has been dissipated by those who have become loafers not because of individual desire on their part but because their leaders failed to realize that unionism cannot successfully combat economic conditions.

"Spilling the Milk Into Hardware Coffers"

ONCE AGAIN our electrical contemporary, which has been assailing the hardware trade for selling electrical goods, has broken from the ranks of propriety in venomous denunciation of every other trade but the electrical contractor dealer, who dares embark upon the sale of radio supplies.

We would suggest taking a look at the situation which has developed in the United States where merchants have had longer and broader experience in the sale of radio supplies. There unfortunately practically every store, hardware, electrical, opticians, drug stores, novelty shops, music stores, etc. are handling radio supplies and every one is getting a share of the business. This may not be altogether desirable but it is an indication of the futility of laying claims to exclusive distribution of such supplies when enthusiasm is at such a height that people will buy wherever they see supplies on display. Those who have returned from Detroit say they have watched radio "fans" walk from one end of Woodward Avenue to the other, and stop in front of every display of radio supplies irrespective of the store in which the display is made.

While the industry is in a comparative stage of infancy in Canada it may be possible to avoid such a broad ramification in the distribution of this equipment, but the electrical dealer certainly has no claim to exclusive distribution in any sense of the word, certainly not as much as the music dealer who figures in it from an entertainment standpoint, or the hardware merchant who is the natural source of supply for many radio requirements. Of the lot, the hardware merchant has so far proved himself the best merchandiser of radio equipment, both in the United States and in Canada. Having in mind the words expressed to Hardware and Metal by Mr. F. D. MacKay, manager of the Canadian Independent Telephone Co., namely, that it was up to the merchants themselves to show manufacturers who were best able to merchandise this equipment, it would seem to indicate that the hardware trade was well in the lead.

At a meeting of the Toronto Hardware and Paint Club held this week, W. Walkover, official of the Cam-Fish Co., Ltd., distributors of radio supplies, stated "the hardware trade are the natural purveyors of radio equipment and a splendid field for business in this line is open to those hardware merchants who develop it."

This situation answers well the heading on our contemporary's editorial "Who does the radio business belong to?"

An indication of how great is the wrath of this editorial against the hardware trade is given in the following excerpt: "But are we going to cry over spilt milk—spilled into the coffers of the hardware and department store? Don't let's do it. Let us have backbone enough to write our past losses off as 'experience' and set our teeth against spilling any more milk."

If the hardware trade were presumptious enough to offer advice to the electrical trade it would be that something more than their teeth should be set in order to make sure that no further milk will be spilled.

Events in the Trade

NEW FIRMS

N. Smith has commenced a hardware business with an up-to-date store at 2443 Yonge St., Toronto, Ont.

F. S. Newton of Essex, Ont., is leaving shortly for Windsor, where he has secured premises on Church St., and intends opening a hardware store early in July.

FIRE LOSS

Georgetown, Ont.—R. H. Thompson, hardware merchant suffered loss by fire.

OBITUARY

Death has claimed one of Wyoming's pioneer citizens in the person of John A. Rice, hardware merchant, aged 76 years. Mr. Rice came to Lambton county over 50 years ago and assisted in clearing up the land adjacent to that upon which Wyoming village now stands. He leaves an invalid widow and five children.

Wm. G. Cooper of the Mechanics Supply Co., Quebec City is dead.

Hiram J. Willard, age 73, hardware merchant died in Chatham Ont., following an illness of nine weeks' duration. Born in Amherst Island in 1849, the late Mr. Willard came to Tilbury Township when eighteen years of age, moving to Chatham in 1897. In 1911 he entered into the hardware business, retiring a few years ago. Surviving are two sons and one daughter.

PERSONAL

John S. Boa of Lefevre Arms Co., Utica, N. Y., visited the Montreal jobbing trade this week.

Kenneth Armstrong, formerly of the Bank of Commerce, has taken a position in the Lochead Hardware at Forest, Ont.

P. J. Pybus, Managing Director of the English Electric Co., was in Toronto and proceeded to St. Catharines to inspect the plant of the English Electric Co. of Canada.

Pilkington Bros., Ltd., have received the total contract for plate glass, window glass, mirrors, etc., on the Mount Royal hotel, Montreal. Also the store front fixtures for the retail stores on the ground floor.

Howard Crummer and Chas. McKerlie of Cowan Hardware Ltd., London, Ont., were visitors at the Toronto office of Hardware and Metal this week and with a representative of Hardware and Metal visited a large number of Toronto hardware stores with a view to picking up new ideas for the big Cowan store now in course of erection at London. The new store will be about 40 feet wide by 185 feet long and four stories high. The store will have two strictly up-to-date entrances, one on Dundas st. and the other in the market square. It is expected that the new store will be in shape for business by October.

PROGRESS ON NEW STORE

Work is proceeding rapidly at London, Ont., on the steelwork for the splendid new store of the Cowan Hardware. The firm has also bought a large garage building on York St., and is adding another storey to it and will fit it up for offices.

HARDWARE FIRM SUPPLY LARGE LOCK ORDER

Walkerville, Ont.—Long & Wilson, hardware merchants, supplied the locks for the new Prince Edward Hotel in Windsor. In all there are 1,041 keys needed for these locks.

DOMINION INCORPORATIONS

British Empire Cutlery Corporation, Ltd., head office Welland, capital $1,000,000 to manufacture, grind, polish, knives, scissors, razors, tools, etc. Incorporators include G. T. Grantham, manufacturer.

Canadian Distributing Co., Ltd., head office Montreal, capital $50,000 to act as manufacturers' agents and distributors of cutlery, silverware, glassware and hardware.

Ciba Co., head office Montreal, capital $100,000 to manufacture and deal in pigments, guns, oils, glues, chemicals, metals etc.

CITY MERCHANTS SPEAK AT PERTH

Perth, Ont.—Local officers of the Retail Merchants' Association of Canada addressed a large and enthusiastic meeting of members of the Perth Branch of the Ottawa District and Eastern Ontario Branch of the Retail Merchants. The Ottawa party included Henry Watters and J. C. Campbell, respectively president and secretary of the Ottawa and Eastern Ontario Branch; F. R. Perrott, assistant Dominion secretary of the Retail Merchants' Association of Canada, and J. W. McElroy. M. Walker, of Perth, was the chairman of the meeting. Mayor Conway announced that the Town Council would shortly take action on a petition demanding the passage of an early closing bylaw.

OBJECT TO HOLIDAY ON JULY 3

Kingston, Ont.—The announcement that the Retail Merchants' Association have decided to close their stores and celebrate Dominion Day on Monday July 3rd., instead of on Saturday has aroused considerable criticism. The merchants themselves are not a unit on this matter of changing the day, and some have very strong objections to the practice which they say is making the observance of our national holidays very ridiculous.

Some of the merchants who were not at the meeting of the Retail Merchants' Association, when it was decided to make the change are in favor of asking the city council to proclaim the national holidays to be observed on the right date, excepting Sunday, so that all citizens may observe such days at the proper time.

"As it is now," one merchant pointed out, "owing to the juggling by a certain number of merchants, part of the people celebrate on the right day others on another day, and all are more or less inconvenienced. Moreover, the patriotic object of the holiday is utterly lost because the business interests of a few predominate over every other sentiment, a most deplorable condition of affairs to exist in a community."

HARDWARE HALF-HOLIDAYS

(Additions to list published in last week's issue of Hardware & Metal.)

ALBERTA

GRANDE PRAIRIE.—No half holiday. Close 6.30 p.m. except Sat. No daylight saving.

MANITOBA

KILLARNEY.—Thursday half holiday from noon June 1 to August 10. Close 6 p.m. No daylight saving.

SASKATCHEWAN

ASSINIBOIA.—No half holiday. Close 6 p.m. except Sat. No daylight saving.

ONTARIO

SMITHS FALLS—Wednesday half holiday from 12 noon, June, July and August. Close 6 p.m. except Sat. No daylight saving.

ALLENFORD—Wednesday half holiday, June to September inclusive. Open Tuesday, Thursday and Saturday evenings.

ST. CATHARINES.—Wednesday half holiday throughout entire year. Close 6 p.m. Observe daylight saving.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

PETERBOROUGH MANTLE SETS

The Peterborough Lock Mfg., Co., of Peterborough, Ont., announce that they are now producing a complete line of dome dampers, grates and mantle sets in various finishes both iron and brass. This line, to a great extent, is a new departure with this concern, the manufacturers, however, pointing out that certain of these products are not entirely new, but they now have the facilities for turning out such lines to a greater extent than formerly.

O. K. VACUUM BRUSH

An electric cleaner for use on upholstered furniture, stair-carpets, auto and carriage upholstery, and other household uses, is being made by the O. K. Machine Co., of Fort Wayne, Ind. This device is described by the manufacturers as a complete electric vacuum in itself, and they also especially point out that it is not an attachment. The total weight is three pounds, and the power is controlled by a handy thumb switch. Another feature is the elimination of the dust bag, the handle of this device being hollow and therefore acting as a receptacle for dirt, which can easily be removed and emptied. In addition to the air suction, the O. K. vacuum has a motor brush which the producers claim helps to loosen the dirt without injuring the article being cleaned.

RED DEVIL WRENCH

The "Red Devil" socket wrench is described by the makers as a wrench set that fits almost every bolt and nut on practically any car. It is manufactured by Smith & Hemenway Co., Inc., of Irvington, N. J. It is described as a useful set for the average car owner and mechanic. The sockets are of drawn pressed steel sockets fitting hexagon nuts and bolts. There are also three pressed steel square sockets and one spark plug socket.

NEW "SECURITY" FENCING

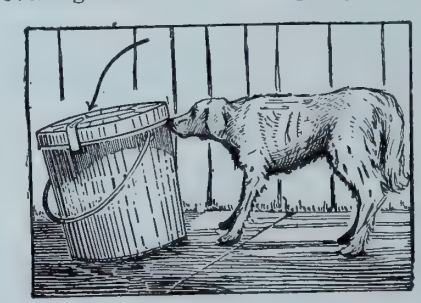
Security Fence Limited, Montreal, are now placing on the market their "Security" fencing. It is claimed that by the use of a new patented fence making machine, erosion, scoring and cracking of the galvanized coating on the wire is prevented. This Blashill machine handles the galvanized coil spring wire by a new method; eliminates rough and injurious usage of the wire, and produces fencing in one operation at a high speed. Security fence is also said to be distinguished by its vertical locks.

KINGFISHER CULTIVATORS

Garden cultivators in various styles are being manufactured by the Riverbank Mfg., Co., New Glasgow, N. S. These "Kingfisher" cultivators are described by the makers as light and durable, with every prong made from tempered steel. They are produced in five and three-prong styles, with handles of different lengths, from four to 14 feet. A line of Kingfisher stove shovels is also being made by the Riverbank Mfg. Co.

LOCK FOR GARBAGE COVERS

A new "Sure-Lock" for garbage can covers is being made by E. T. Wright Co., Limited, Hamilton, and is also being supplied with their regular garbage pails and ash cans. The manufacturers point out that this lock secures the cover against removal except by human hands. Dogs cannot "nose" off the covers—rats cannot claw them off—if the can falls over, the cover remains on. The lock is described as simple, but secure, while the covers can be put on or taken off by using one hand only.



WATERPROOF SANDPAPER

The production of a waterproof sandpaper, has recently been announced by the Minnesota Mining & Manufacturing Co., of St. Paul, Minn., U. S. A. This new product is described as taking the place of pumice stone on certain classes of work, while it can also be used when dry as a substitute for ordinary sandpaper. It is expected to be especially applicable to the automobile painting trade. It can be used with water in rubbing out color varnish coats, and also on first coats of rubbing varnish. The water is said to be a factor in keeping down all dust, especially in work of this nature.

STEEL SASH CHAIN No. 00

The Smith and Egge Mfg. Co., of Bridgeport, Conn., has recently placed on the market a new steel sash chain No. 00. This is described by the manufacturers as being especially applicable for sash weighing not over one hundred lbs. The tensile strength is stated to be 250 pounds, and the chain is made from cold rolled steel, .035 thick. It is supplied in plain finish or can also be furnished in both copper plated and sherardized finishes, if desired. The manufacturers also recommend it for any other purpose where a strain of not over one hundred pounds is experienced. This sash chain is put out in 500 foot lengths on a steel reel.

NEW STARRETT TOOLS

The L. S. Starrett Co. has recently issued a special supplement to its No. 22 catalog, in which are illustrated and described seventeen new Starrett Tools of interest to many machinists. Among them are the following:

Metal case for 1″ micrometers; nickel plated; made with round corners; lined with velvet.

Micrometer depth gauge: especially designed for mechanics requiring a depth gauge with 1-in. movement to the screw. Equipped with 3 measuring rods; capacity 0 to 3 inches, by thousandths of an inch.

Inspector's micrometer caliper gauge: facilitates accurate measurement of walls of hollow cylindrical forms.

Dial sheet gauge, for measuring the thickness of sheet products. A slight pressure on a thumb button permits the sheet to be inserted between two contacts. Release of the pressure causes the thickness of the sheet to be indicated on the dial.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

THIS week's budget of price developments again includes both recessions and advances of an important nature. Higher quotations are recorded on bar iron and steel, galvanized sheets, black and blue annealed sheets, wrapping twines, candle wick packing, copper sheets, cotter pins and cement. Easier price levels are noted on linseed oil, manila clothes lines, the cheaper grades of cast rim locks, electrician's bits, asbestos pipe covering, and also sleighs for next season. A substantial drop has been announced in one brand of aluminum ware, while the issuing of another revised shoefinders' tack list brings a ten per cent. reduction on steel wire shoe rivets, heel or shoe nails, hob and hungarian nails and channel nails. The scrap markets continue to reflect a more active tone, while a re-action is apparent in ingot metals, copper and lead experiencing a quieter demand, with tin prices down one cent and antimony quotations slightly higher in some cases. Eastern market centres also record an increase of one cent. per lb. on various grades of solder. The influence of the coal strike is maintaining a strong tendency in practically all steel products, deliveries from the mills gradually extending with a brisk demand still evident. New tonnage is stated to be in excess of current shipments and prices continue to soar as producers are forced to utilize larger quantities of higher-priced coal. Current hardware business is reported as very good, seasonal lines registering a proportional movement.

Montreal Markets

MONTREAL, June 15.—A stronger tendency in the cotton market with its reflection on cotton twines and candlewick packing, features the hardware markets this week. Both of the above lines are advanced in price, twines three cents per pound and candlewick one cent. Cotton rope and sash cord are for the present unchanged but higher quotations on these in the near future would not be surprising. Slightly higher levels are quoted on the various grades of solder, the strength of metals on primary markets having a stiffening tendency on these products in recent weeks. Cotter pins have revised discounts and quotations are increased ten per cent. A price reduction is again announced on asbestos boiler covering and asbestos sheathing, while the cheaper line of rim locks have new lower prices. Plymouth manila clothes lines are reduced, also the Mephisto line of electricians' bits. A strong tendency is still apparent in the iron and steel trade, and galvanized sheets are again reported firm with an active demand.

REVISED QUOTATIONS ON ELECTRICIANS' BITS

Montreal.

A revision is made in the "Mephisto" line of electricians' bits, and following are new lower quotations:

BITS, ELECTRICIANS—	
10/16	6 00 doz.
11/16	7 00 "
12/16	7 00 "

COTTON MARKETS ON A FIRMER TREND

Montreal.

Following a period of fluctuations the raw cotton market in primary centres is now reported as firmer. This stronger tendency has reflected on certain finished products, but up to the present no change is made in cotton wastes on the local market. Sales of this product are now fairly brisk and show an appreciable increase over this period last year.

Following are unchanged local quotations:

COTTON WASTE—	Per lb.
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13
X Press	0 11½
Colored—	
Fancy	0 13½
Lion	0 12
Popular	0 09
Keen	0 07½
Wool Packing—	
Arrow	0 24
Axle	0 20
Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

FIRM TONE EVIDENT IN WROUGHT PIPE

Montreal

Wrought iron and steel pipe are still reported on a firmer trend, and although list No. 54 continues to cover quotations, the present position of the market lends a strong outlook for the future. Improved demand at this season, coupled with recent gains made in the steel industry generally, has a strengthening effect, and although the recent tariff change announced in the Government Budget, tends to ease the market, domestic mills seem satisfied that this will have little or no immediate effect. Markets to the South have recently recorded an upward trend and with home demand on the increase, little competition is expected from this source for some time at least.

PRICES LOWER ON CERTAIN ASBESTOS PRODUCTS

Montreal.

A further reduction in prices is announced on asbestos pipe covering and sheathing. The former is now quoted at $1.50 per bag, a reduction of 40 cents, and sheathing is now quoted at $7.50 per 100 lbs. This is the second revision on these lines in recent weeks. Dealers state that keen competition is now playing an important part in these products, and although the undertone of the market is quite steady, price concessions are offered for attractive inquiries, size and specification of orders governing quotations to a great extent. Following are nominal prices:

ASBESTOS PRODUCTS—	Off list prices
2 ply pipe covering	67½%
3 ply pipe covering	65%
4 ply pipe covering	60%
85% magnesia covering	45%
Boiler covering	$1.50 per bag
Asbestos sheating	$7.50 per 100 lbs.

SOLDER PRICES ADVANCED ONE CENT PER POUND

Montreal.

Quotations on the various grades of solder are advanced one cent per lb. the strength of metals on primary markets now reflecting on this product. Lead, tin, spelter and copper are reported a little easier but the strength of the past weeks has resulted in increased quotations being announced on both domestic and outside markets. Although fluctuations have occurred in these metals during the past few months, the present trend is thought to be of a healthier nature. Current trade in the finished products continues fairly brisk, building activity requiring supplies of many lines. Following are prevailing quotations:

LEAD AND ZINC PRODUCTS—

Lead pipe, per 100 lbs.	12 00
Lead waste, per 100 lbs.	13 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	17½%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 09¾
Do., 4 to 8 lbs. sq. ft.	0 09

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 21½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

EXPECT IMPROVED TRADE IN COMPRESSION GOODS

Montreal

Slightly increased trade, and a stronger tone in copper and other raw materials offer a little firmer tone in the market for compression goods. According to one local distributor, trade up to the present, has shown only a gradual improvement, but owing to the building program throughout the summer months a brighter outlook is now promised, the commencement of this trade only now being felt. Stocks in all quarters are at a low level, and with a healthier condition prevailing, the improvement is expected to be general. Quotations are unchanged at following discounts:

COMPRESSSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	41%
Bath cocks, quick opening	41%
Basin cocks, compression	34%
Basin cocks, quick opening	46%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks standard	50%
Radiator valves, standard	58%
Do., removable discs	58%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins globe, angle, check and swing check	19%
Jenkins gate or straightway	25%
Jenkins iron body, globe and angle	15%
Jenkins iron body, gate	33%
N.P. "P" and "S" traps	40%

SEASONAL ACTIVITY IN SOIL PIPE AND FITTINGS

Montreal.

Notwithstanding the revision in discounts last month, when both solid pipe and fittings were brought to higher price levels, a fairly brisk demand is reported in these products, building operations stimulating sales, especially in recent weeks. Dealers' stocks have, for some time, been at a comparatively low level, and a more active consumption demand would not allow a curtailment of buying which would naturally result through higher market values. This steadier buying movement, assisted by a firmer undertone in raw materials, is said to be maintaining a stronger tendency in the market than has existed for some months past. Following are prevailing discounts:

SOIL PIPE—

2 and 3 inch	40%
4 inch	45%
5 and 6 inch	40%
8 inch	20%
Fittings—	
2 and 6 inch	50%
8 inch	20%

NO FURTHER CHANGE IN RADIATOR DISCOUNTS

Montreal.

Manufacturers of boilers and radiators state that present trade in water and steam heating systems is fairly active, the movement showing a marked improvement in recent weeks. Building under construction has in many instances now reached the stage where heating systems are required. In this regard, one manufacturer reports that material for numerous installations are now being forwarded to buildings which are not yet ready for heating systems, and the recent announcement of reduced quotations has brought a considerable amount of this trade to hand. Bookings are also on the increase, doubtless being placed in an effort to get under cover at prevailing prices.

With this improvement in current trade, and the present firmer undertone in the market, as in other iron and steel products, a stronger undertone is evident in both radiators and boilers. The gradual elimination of price-shading, which is said to be now almost prohibitive at existing price levels, is also improving the situation on these products. Although revised discounts were originally effective only until the end of May, it is now stated that present quotations are indefinitely extended.

EASIER PRICES ON CHEAPER RIM LOCKS

Montreal.

New lower quotations are announced on the cheaper lines of cast rim locks, and No. 1516 or equal are now quoted at $3.00 per dozen. Porcelain, jet or mineral knobs are now quoted at $2.75 per doz.

MALLEABLE FITTINGS NOW QUOTED ON PIECE LIST

Montreal.

Local distributors of malleable fittings have now generally adopted the new piece list with a discount of 70 and 5 per cent. This new method of pricing, although effective from June 1st, was not uniformly adopted until this week. Quotations are little affected, the present discounts bringing prices practically to former net figures per pound. Other lines of fittings remain at former discounts, with trade continuing in fair proportions. Present quotations are as follows:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	28%
Do., galv., add to black	30%
Niples, black and galvd. ⅛ to 4 in., close and short	60%
Do., 4½ in. and larger	50%
Do, long, ⅛ in. to 4 in.	65%
Do., 4½ inch and larger	55%
Do., running thread	40%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

Price list effective June 1st, 1922. Discount 70-5 per cent.

MODERATE CONDITIONS IN RANGE BOILERS

Montreal.

Manufacturers and distributors of range boilers describe present trade as fairly good, the requirements of home building construction stimulating sales in the past two weeks. Business apparent in these products during the spring months has been more or less spasmodic, but on the whole sales have reached favorable proportions with fair prospects for continued activity during the summer. There is no change in quotations, and while both net prices and list with discount is still being quoted, $8.75 is most generally quoted on the 30 gallon standard boiler. Following are list prices and discount:

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.: Extra heavy, 40 per cent.

PLYMOUTH MANILA CLOTHES LINES AT REDUCED PRICES

Montreal.

A reduction in the quotations on Plymouth manila clothes lines is given and these are now quoted at $2.95 per dozen.

ADVANCED QUOTATIONS ON COTTON TWINE

Montreal.

The strength in raw cotton markets is now reflected in cotton twines, and quotations are advanced approximately three cents per pound. Following are new prices:

COTTON TWINE—

3 ply, in sacks, per lb.	0 48
4 ply, in sacks, per lb.	0 51
3 ply, in cones, per lb.	0 46
4 ply, in cones, per lb.	0 49

CANDLEWICK NOW QUOTED AT 54 CENTS PER POUND

Montreal.

Accompanying the revision in cotton twine prices, candlewick packing is also advanced in price, the present quotation being 54 cents per pound.

ANOTHER REVISION IN COTTER PIN PRICES

Montreal.

A further revision is made in quotations on cotter pins, and these are now advanced ten per cent. Resale discount is 82½-40-10 per cent.

STRONG TENDENCY STILL APPARENT IN STEEL MARKET

Montreal

Conditions in the iron and steel trade locally are little changed this week, quotations remaining between $2.90 and $2.95 among distributors, with the tone of the market still described as firm. Although it was expected that the higher figure would be uniformly adopted before this date, there are still a few jobbing houses quoting the lower level. However, prices are on a much more settled basis than they have been for some time past. The appearance of English pig lead on this market is said to have caused a slight disturbance, but owing to little variation in quotations, the importation of this material is not expected to have much material effect on the situation in the future. While the trend of the market is strong, the improvement is little encouraged by any increased buying movement. Trade during the spring months has been of a spasmodic nature, but on the whole does not yet reflect the improvement noted in southern markets. General sorting business continues in fair volume, but there is still the absence of bigger business. Prevailing quotations are as follows:

IRON AND STEEL—

Common bar iron, 100 lbs.	2 95
Refined iron	4 45
Irish finish machinery steel	3 00
Mild steel	2 95
Single reeled machinery steel	5 05
Band steel	3 30
Spring steel	4 55
Sleighshoe steel	2 95
Tire steel	3 15
Harrow tooth steel, per lb.	3 10
Mining tool steel, per lb.	0 20½
Toe caulk steel	3 85
Black Diamond tool and cast steel, per lb.	0 20½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

SHEET DELIVERIES STILL SLOW FOR DEMAND

Montreal.

Demand for sheets is of a more active nature than in other lines of steel trade, and galvanized sheets in particular are still experiencing a brisk call. While this is undoubtedly one of the chief factors in maintaining a firm undertone in the market, there is still the question of available supply which is also assisting in this direction. Local stocks are still at a low level, and with the curtailment of shipments from mills to the south, a heavy call is made on sheets from overseas. Importers of the latter state that while there is no immediate indication of higher prices, the market will in all probability continue in a very strong position if demand continues active. Following are present quotations:

BLACK SHEETS—

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS—

English Standard—	Queen's Head	Fleur de-lis
28 gauge	6 75 to 7 25	6 50 to 7 00
26 gauge	6 50 to 7 00	6 25 to 6 75

18 x 24 x 52s	7 00 box

SLIGHTLY EASIER TONE IN SOME METALS

Montreal.

Metal markets have maintained a fairly firm tone although there are now signs that recent advances are drawing to a close, with a slightly easier trend in certain lines. Possibly this may not extend very far, but it is onlv considered natural that some re-action should take place after the steady advance of the past month.

TIN.—The London market has been a little easier this week with a decline to the £150 mark, and with exchange also lower the New York market has declined in sympathy. This is not surprising in view of ample stocks available and moderate consumption, especially on the continent. An irregular market is expected for a time but with little change in prices. Locally the market is easier at 35½ cents.

COPPER.—London has been easier in tone possibly owing to the failure of the International loan to Germany which it was thought would increase exports from this side. The situation in the U. S. A. is said to be quite satisfactory and domestic demand is better than export at the moment. At the same time lower prices would not be surprising. The local market is unchanged at 17½ cents for electro and 17¼ cents for casting.

SPELTER.— Demand for this metal continues good and there is as yet no sign of any weakening in price. The higher level prices naturally tend to increase production, but the coal strike is an important factor both with regard to production and consumption. The London market remains firm with supplies none too plentiful. Quotation is unchanged at 8 cents.

LEAD.—London at last shows a downward trend, although it is impossible to state how far this will go. This is hardly unexpected in face of a heavy premium for spot metal. The situation in the U. S. would appear to be quite sound and at the present time there is no apparent cessation in demand with no foreign lead available to steady the market. Local price is a little easier at 6¾ cents.

ANTIMONY.—This metal is slightly firmer in New York but supplies are still plentiful and little change in prices is expected. Chinese is quoted at 6¾ cents, and high grade English at 7½ cents.

ALUMINUM.— Aluminum remains dull on the local market with quotations unchanged at 24 cents.

Toronto Markets

TORONTO, June 15.—Another extensive budget of important price developments is apparent in the current hardware markets. Both declines and advances are again numerous, the reductions appearing on such lines as aluminum ware, shoefinders tack list, manila clothes lines, and sleigh quotations for next season. Higher price levels are recorded on wrapping twines, bar iron and steel, galvanized sheets, black and blue annealed sheets, cement, and sheet copper. Other steel products such as corrugated sheets, and wrought piping reflect a strong primary market, while scrap materials continue to show more activity. A re-action is now apparent in ingot metals, tin prices having receded one cent, while antimony has been advanced one-half cent in some cases.

PRICES ON BAR IRON AND STEEL AGAIN RISE

Toronto.

Another increase of ten cents per 100 lbs. has been recorded in local quotations on bar iron and steel, angle iron and tire steel. This change places the average local base on bar iron at $3.00, although it is admitted in certain quarters that large buyers can still purchase at the previous level of $2.90. However, these revised quotations are reported generally adopted for small purchases, and also local price levels on a more uniform basis with other domestic market centres. Reflection of higher production costs—some of which are undoubtedly attributable to the coal strike

—combined with brisk activity in warehouse and jobbing centres, has resulted in a strong market in steel products generally. Revised local prices follow:

IRON AND STEEL—

Mild steel bars, base	$ 3 00
Mild steel bands, 3-16 in. base	3 50
Bar iron, base	3 00
Angle iron, base	3 10
Horseshoe iron	3 75
Tire steel	3 25
Spring steel	6 00
Sleigh shoe steel	3 00
Hoop steel	4 00
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

PRICES REDUCED ON MANILA CLOTHES LINES

Toronto.

Prices on manila clothes lines show a slight reduction this week, these products now being quoted at $3.00 per dozen.

WRAPPING TWINES NOW HAVE HIGHER PRICE

Toronto.

Prices on wrapping twines have been advanced approximately three cents per lb., this development being solely attributed to the sudden upward course of raw cotton prices. Quotations on the raw cotton markets recently took a wild leap, increases as high as $4.50 to $5.00 per bale having been recorded. Big rains in southern territory, resulting in a heavy covering of available stocks, places the cotton market generally in a technically stronger position. Other cotton lines such as sash cord, cotton ropes and clothes lines, at present remain unchanged in price. New prices on wrapping twines follow:

WRAPPING TWINE—

5-lb. sack, 3-ply, lb.	$ 0 51
Do., 4-ply, lb.	0 53
Cones, 3-ply, lb.	0 48
Do., 4-ply, lb.	0 50

TEN PER CENT. REDUCTION IN SHOEFINDERS LIST

Toronto.

A revised shoefinders tack list effective from June 7, has been announced with an approximate reduction in effect on steel wire shoe rivets, heel or shoe nails, hob and Hungarian nails and channel nails. Other lines such as brass wire shoe rivets, tacks and shoe tacks remain unchanged, while the usual extras applying to the previous list continue in effect. Quotations covering the revised lines are contained elsewhere in this section.

SUBSTANTIAL PRICE DROP ON ALUMINUM WARE

Toronto.

A reduction averaging approximately twenty per cent has been announced this week by the manufacturers of Wear Ever aluminum ware. In certain instances, the quotations on kitchen utensils have been lowered thirty per cent., while some other lines show a minor reduction. The new price levels are stated to be effective from June 15.

COPPER SHEET PRICES INCREASED ONE CENT

Toronto.

Copper sheets have now been advanced in price to the extent of one cent per lb. a development outlined in a preious market report in Hardware & Metal. This change reflects the firm tone apparent in copper products generally, a condition primarily attributed to the strength of the virgin metal during recent weeks. Other copper and brass goods such as rods and tubing remain at the upward revisions of two weeks ago. Following are prevailing quotations:

BRASS—

Sheets, base, per lb.	0 22
Tubing, base, per lb.	0 25
Rods, base, per lb.	0 19

COPPER—

Rods, base, per lb.	0 28
Soft sheets, plain, 16 oz. and heavier, lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned 16 oz. and heavier, lb.	0 41
Tubing	0 29

ALL COTTON CORDAGE AT ADVANCED LEVELS

Following a period of fluctuations, the cotton market has advanced sharply with resulting increases in wrapping twine and candle wick prices. As Hardware and Metal goes to press, advice is received that similar advances on practically all cotton cordage will be made effective within the next few days. Cotton rope, sash cord, clothes lines, seine twine, mason and chalk lines are affected, the extent of the advance varying between three and five cents on the different products.

SLIGHT ADVANCE IN CEMENT QUOTATIONS

Toronto.

Slight advances have been recorded in the local quotations on cement, this development being generally attributed to the increased sales tax. Cement in carload lots has been increased five cents per barrel; while in less than carload lots the advance is ten cents per barrel. Following are revised quotations:

Per barrel	$ 3 75
Less Carload Lots—	
Per barrel, f.o.b. yard	4 40
Per barrel, delivered	4 60

Single bags, $1.15 each; 4 bags to barrel.

Extra charge of $1.50 per load on less than 24 bag lots.

Rebate of 20 cents for empty bags.

NEXT SEASON'S SLEIGHS ON LOWER PRICE LEVEL

Toronto.

A slight reduction has been announced in quotations on sleighs, the new price level for next season being thirty-five per cent discount off the regular list.

TIN PLATE MARKET DESCRIBED AS FIRM

Toronto.

While quotations on tin plates are described as firm, no price revision has been announced covering those products. Distributors state that there is not the exceptionally brisk demand for tin plate that now exists for sheets, otherwise a similar trend would probably be apparent. It is noted that tin plate quotations at American mills are generally adhering to the $4.75 level, which if strictly maintained for the third quarter would constitute a technical advance in many cases, as certain mills are reported to have made sales during the second quarter at prices fifteen to twenty cents below the present firm quotation. Local prices remain as follows:

PLATES, CANADA—

Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25

PLATES, COKE TIN—

IC, 20 x 28, 112 sheets	12 50
IX, 20 x 28, 112 sheets	16 00
IX, 20 x 28, 56 sheets	8 50

PLATES, CHARCOAL TIN—

IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00

PLATES, TERNE—

IC, 14 x 20, 112 sheets	11 50

STEADY TONE RECORDED IN SOIL PIPE MARKET

Toronto

A brisk demand for soil pipe and fittings is generally reported as evident, building activities at this season of the year, contributing to the larger volume of trade in these products. Quotations on both pipe and fittings are described as steady, with little change anticipated on local centres, according to distributors, owing to such elements as coke and pig iron having recently been increased in price, which factors enter into the production costs of soil pipe. The recent revision in discounts on eastern distributing centres, now brings quotations on a more uniform level, with the following unchanged prices in effect locally:

SOIL PIPE—

2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch.	net

FITTINGS—

2 to 6 inch fittings	50 and 5%
8 inch fittings	net

PRICES ON SHEETS AND PLATES AGAIN ADVANCED

Toronto.

As pointed out in the last week market report covering sheets and plates, additional price advances on domestic centres have now materialized, these increases bringing local quotations on these products to new high levels for the current year. Blue annealed sheets have been advanced forty cents per 100 lbs; black sheets record an increase of forty-five cents, while galvanized sheets show an additional increase of twenty-five cents per 100 lbs to the higher prices announced two weeks ago. Distributors state that this change reflects the trend of primary markets as well as specific conditions affecting the local

situation. Deliveries are steadily extending and the brisk demand shows no appreciable signs of receding, as yet. The duration of the coal strike is generally considered to be a decisive factor in prevailing developments. Reports from the mills indicate that the receipt of new tonnage is still in excess of shipments and steel prices to the south continue to gain strength as producers are forced to utilize larger quantities of higher priced coal. Altogether, the steel industry as a whole is now in a favorable condition with the business in hand described as generally in excess of expectations for this time of the year. Domestic distributors report trade as brisk and with the upward trend in prices has developed a noticeable increase in activity all along the line. Revised quotations follow:

BLUE ANNEALED—

10 gauge, base	4 00
12 gauge	4 05
13 gauge	4 10
16 gauge	4 15

BLACK—

18-20 gauge	4 60
22-24 iauge	4 65
26 gauge	4 70
28 gauge	4 80

Charge of from 25c. per 100 lbsl is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Hd.	Fleur-de-lis
28 gauge	7 25	7 00
26 gauge	7 00	6 75
24 gauge	6 40	6 35
22 gauge	6 05	5 90
18 and 20 gauge	5 85	5 75

	Premier and Apollo
10¾ oz.	6 40
U. S. 28 base	6 00
U. S. 26 base	5 70
22 and 24	5 55
18 and 20	5 40
16	5 25
12 and 14	5 10

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown is 20c. per 100 pounds.

BRISK TRADE RECORDED IN WARE PRODUCTS

Toronto

Manufacturers of aluminum ware and similar kitchen utensils are reported to have recently introduced revised prices on certain lines thus passing along any reduction in the cost of materials and production. It is rumored that some corresponding changes may materialize in the near future on other ware products, and while prevailing discounts remain unchanged, any revised levels are stated to be primarily dependent upon the future trend of raw material markets, although in some instances such as galvanized sheets, some advances have recently been recorded. Brisk activity is reported by distributors and manufacturers of practically all ware products, the current movement being described as distinctly satisfying for this season of the year, and well up to expectations.

STRENGTH MAINTAINED IN WROUGHT PIPING

Toronto.

The wrought pipe market is still described as strong, and while the recent revision in the budget reduces the tariff to some extent on imported piping, distributors state that this condition has not materially changed the prevailing tone. The current demand is very favorable and in discussing future prices, it was stated that there was hardly likely to be any reduction, as small sizes are experiencing a very brisk movement due to the requirements of buildings now under construction. Under these circumstances deliveries are getting slower, which, combined with the fact that warehouse stocks have been drawn upon

Price Cutting Brings Slash in Aluminum Ware Prices

Other Manufacturers of Aluminum Ware State Their Prices Still 15% Below Wearever With the New Reduction, Despite Increase in Cost of Sheet Aluminum

BIG reductions even to the extent of over 30 per cent. on some lines, have been made on Wearever aluminum products effective from June 15. The average reduction throughout the range of utensils made by this firm is approximately 20 per cent., though on certain lines, notably straight covered pots this reduction amounts to 30 per cent.

Such a drastic reduction in price, inspired some enquiries to be made by Hardware and Metal as to the reason for this action and as to any steps that might be contemplated for rebate or other protection to retailers who obviously would be forced to sell many of such lines at less than the cost price, so big was the reduction on some lines.

Enquiries made by Hardware and Metal at the offices of the Northern Aluminum Company, manufacturers of the Wearever line, elicited the information that such action was brought about due to the fact that other manufacturers of aluminum ware had been cutting prices. It was stated that the Northern Aluminum Company's prices had always been higher than those of other lines but that recently some exceptional price cutting was being done by other manufacturers. One official of this company related how he had recently noted an aluminum utensil of a competitive make in the window of one store marked at a price less than his company's price to the retailer.

Another manufacturer of aluminum ware when advised of these developments stated to Hardware and Metal that even if the Wearever line was reduced 20 per cent. on the average, the prices on his lines would still be about 15 per cent. lower than those on Wearever. Just what similar action may be taken by other manufacturers in regard to prices is doubtful particularly in view of the fact that the price on aluminum sheets, as supplied by the Northern Aluminum Co. to other manufacturers in Canada, have just been increased from ½ to ¾c lb.

Revised Shoefinders' Tack List

Shoe Rivets

In 1 lb. papers, per 100 lbs.

Steel Wire--16 Ge. and Heavier—⅜, $20.75; 3½/8, $17.50; 4-4½/8, $15.25; 5-5½/8, $14.50; 6-6½/8, $14.00; 7-7½/8, $13.00; 8-8½/8, $12.50; 9/8-11½/8, $11.75; 12/8-17/8, $11.00. 17 Ge. add $1.00. 18 Ge. add $2.00.

Clinch point—3/8, $22.00; 3½/8, $18.75; 4-4½, $16.50; 5-5½/8, $15.75; 6-6½/8, $15.25; 7-7½/8, $14.25; 8-8½/8, $13.75; 9 8-11½/8, $13.00; 12/8-17/8, $12.25. 17 Ge. Add $1.00. 18 Ge. Add $2.00.

ers' Rivets—3/8, $23.50; 3½/8, $20.75; 4-4½/8, $17.75; 5-5½/8, $16.75; 6-6½/8, $16.25; 7-7½/8, $15.25; 8-8½/8, $14.50; 9/8-11½/8, $13.75; 12/8-17/8, $13.00. 17 Ge. Add $1.00. 18 Ge. Add $2.00.

Heel or Shoe Nails

14 Ge. and heavier 4/8 to 16½/8; in bulk, $11.00 per 100 lbs; in 1 lb. papers, $11.75 per 100 lbs. 15 and 16 Ge. Add 65c to above price. In 100 lb. quantities. One size 17 Ge. Add $1.60 to above price. In 100 lb. quantities. One size.

Swedes Iron—14 Ge. and Heavier, 4/8 to 16½/8; in bulk, $11.75 per 100 lbs.; in 1 lb. papers, $12.50 per 100 lbs.; 15 and 16 Ge. Add 65c to above price. In 100 lb. quantities. One size 17 Ge. Add $1.60 to above price. In 100 lb. quantities. One size. 17/8 and longer add 65c per 100 lbs.

Silver Point—All sizes. In bulk, $11.75 per 100 lbs. In 1 lb. paper, $12.50 per 100 lbs. Hard Steel Nails, $22.00 per 100 lbs. Wood Heel Nails, $19.75 per 100 lbs. Army Heel Plate Nails, $14.50. per 100 lbs.

Hob and Hungarian Nails

In 1 lb. Papers

11-12-13 Ge. and heavier, 3/8 and shorter, $17.00 per 100 lbs.; 3½/8 and longer, $16.50 per 100 lbs. 14 Ge. 3/8 and shorter, $18.00 per 100 lbs.; 3½/8 and longer, $17.50 per 100 lbs. 15 Ge. ⅜ and shorter, $18.00 per 100 lbs.; 3½/8 and longer, $18.20 per 100 lbs.

If in Bulk deduct 75c per 100 lbs. from list.

Channel Nails

In 1 lb Papers

3/8, $18.25 per 100lbs.; 3½/8, $17.50 per 100 lbs.; 4/8, $16.75 per 100 lbs.; 4½/8, $16.75 per 100 lbs.; 5/8 and longer, $16.75 per 100 lbs.

With usual extras unchanged, prices on brass wire shoe rivets, tacks, and shoe tacks also remain as previously.

somewhat heavily during recent weeks, has resulted in a strong tone pervading the market. List No. 54 continues to govern current selling prices

SCRAP MARKETS REFLECT MORE ACTIVE TONE

Toronto.

The waste material markets show a more active tone, with higher prices and more strength in certain departments. Considerable iron and steel scrap is reproted to have changed hands during recent weeks, while an impression has developed that scrap copper grades are likely to reach even higher levels, and for this reason it is stated that stocks are being withheld. Altogether, the non-ferrous market is described as in a very satisfactory condition, thus showing a remarkable change since a few months ago. It is noted, however, that white metals still have considerable improvement to make.. The scrap rubber market also remains dull. Following are the usual averages of dealer buying prices for fairly large quantities:

SCRAP MATERIALS—		
Scrap Iron		
Heavy melting steel (Hamilton)	$13 00	$14 00
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	15 00	16 00
Grate bars	14 00	15 00
Standard car wheels	15 00	16 00
Scrap Metals		
Heavy copper and wire	10 75	11 75
Light copper	9 25	9 75
No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 50	7 75
Light brass	3 50	4 50
Heavy yellow brass	5 50	6 50
Heavy lead	5 00	5 50
Tea lead	2 75	3 50
Scrap zinc	4 50	4 75
Scrap Rubber		
Boots and shoes	2 25	2 50
Lumbermen's rubber boots	1 50	1 75
Auto tires	0 50	0 60
Solid tires	0 75	1 25

REACTION NOW APPARENT IN INGOT MARKETS

Toronto.

An easier trend has now become apparent in certain ingot metals, this condition evidently being a reaction from the upward movement recorded during recent weeks. Current business in ingot metals is described as slightly below normal, there being apparently no permanency to market. Copper is slipping again with the current domestic demand being quiet. Tin remains fairly active, but prices are down one cent, while lead is well controlled but the demand is now light.

COPPER.—Ingot copper is slipping again, this reaction being principally due to inactivity on outside markets. A noticeable recession in the current demand has introduced an easier tone in practically all circles. No price variations, however, have been recorded the local quotation remaining at 17 cents.

TIN.—This metal is reported fairly active on the domestic markets, but prices are down one cent, this change bringing the local price to 34 cents. It is stated that the failure to put through the proposed loan to Germany has resulted in an easier tendency in this direction, as European consumption of tin was expected to increase.

LEAD.—The lead market is somewhat quieter but still fairly firm. The situation is stated to be well in hand, although the prevailing demand is lighter. Recent reports covering the outlook retain an optimistic viewpoint. Local quotations are steady at $7.00.

SPELTER.—Zinc prices continue firm, although the market is generally quiet. Consuming requirements are not so extensive as were recently apparent, but short intervals of dullness in this direction are more or less expected. Local price is unchanged at $7.25.

ANTIMONY.—There is stated to be a better demand for antimony on the domestic markets, with local prices up one-half cent. Little new developments however, are recorded on primary centres, conditions generally being quiet but steady. Local quotations now range between 6½ and 7 cents.

ALUMINUM.—There are not many buyers in the aluminum market, and no change of any importance has been in evidence. Local quotations hover between 20 and 21 cents.

London Markets

LONDON, June 15.—Current hardware price developments include a further revision on the shoefinders tack list with a reduction of ten per cent in most lines, a three cent advance in Paris green quotations, and a recession of five cents per gallon on linseed oil. Malleable pipe fittings are now quoted at the new price list with a discount of seventy and five per cent., instead of by the pound as formerly. Trade in this district continues good, with warm weather lines experiencing a brisk demand.

SHOEFINDERS TACK LIST AGAIN REVISED

London, Ont.

Through the issuing of a revised shoefinders tack list, certain makes of tacks are now reduced approximately ten per cent. Lower quotations are effective on steel wire shoe rivets, heel or shoe nails, hob and Hungarian nails, and channel nails. Brass wire nails rivets, tacks and shoe tacks remain unchanged. The new prices are reproduced elsewhere in this issue.

PIECE LIST EFFECTIVE ON MALLEABLE FITTINGS

London, Ont.

Malleable pipe fittings are now sold per piece, instead of by the pound, as formerly. A new piece list has been issued, with the quotation of 70 and 5 per cent. being in effect. These discounts place the net prices on a practically unchanged level.

TURPENTINE SITUATION REFLECTS LOW STOCKS

London, Ont.

The current situation in the turpentine market continues to attract more than the customary degree of attention in view of the exceptional conditions evidenced at this season of the year. No recession has been tabulated from the firm showing of the last couple of weeks, and the high level of the season announced recently, continues to remain in effect locally.

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 45
2 to 4 bbl. lots	1 44
5 gal. lots	1 60

THREE CENT ADVANCE IN PARIS GREEN PRICE

London, Ont.

An increase of three cents per lb. all through the list has been announced in quotations on paris green. This change reflects the brisk call for these products at this season of the year, which has resulted in stocks being very low locally, and fresh supplies now more difficult to obtain. Following are the new higher price levels:

PARIS GREEN	100-lb. lots
½-lb. paper cartons, per lb.	0 40
1-lb. paper cartons, per lb.	0 38
½ lb. tins, per lb.	0 42
1-lb. tins, per lb.	0 40
25-lb. drums, per lb.	0 36
50-lb. and 100-lb. drums	0 34
250-lb. kegs, per lb.	0 32½
600-lb. barrels, per lb.	0 32

LINSEED OIL LOWER; FLAX SEED WEAKER

London, Ont.

Owing to the weakness apparent in the flax seed markets, which development was outlined in last week's report, the price of linseed oil has recorded a decline of five cents per gallon. This change brings the average current quotation to $1.10 for raw and $1.13 for boiled in one barrel and two barrel lots.

LINSEED OIL	Raw	Boiled
1 to 2 bbls., per gal.	1 10	1 13
3 to 5 bbls. per gal.	1 09	1 12
6 to 9 bbls., per gal.	1 07	1 10

Less barrels, add ten cents per gallon

MODERATE STEADY CALL EVIDENT FOR PUTTY

London, Ont.

A steady demand for putty is evident at present, with current prices on this line unchanged. With a wholesome degree of building activity noticeable in this vicinity, improvement in the movement of this, and similar construction materials is generally anticipated. Following are the prevailing prices:

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	6 30
Do., 25 lb. drums	6 55
Pure, 100 lb. drums	7 80
Do. ,25 lb. drums	8 05

Drab:—4, $3.60, 4½r $5.15.

GOOD MOVEMENT OF WHITE LEAD IN OIL

London, Ont.

A good steady sale of white lead in oil is reported at this season. There has been no change announced in the price of this product. Following are quotations:

WHITE LEAD IN OIL—

	Tons.	Less Tons.
Pure, Per 100 lbs.	13 30	13 65
Elephant, per 100 lbs.	13 80	14 15

LAWN MOWER SALES STILL FAIRLY NUMEROUS

London, Ont.

Both wholesale and retail circles report that the movement in lawn mowers has slackened slightly during the past few days, although sales in this seasonable line are still fairly numerous. Discount on the Taylor-Forbes make remains at 20 per cent., while Smart's are quoted at unchanged net list.

BRISK ACTIVITY IN SCREEN WIRE CLOTH

London, Ont.

Dealers generally report that there has been an exceptionally brisk movement of screen wire cloth during the past week. Quotations remain unchanged following levels still being in effect:

SCREEN WIRE CLOTH—
Painted Black $3.00 per 100 sq. feet.
Galvanized, $3.60 per 100 sq. ft.
Bronze $10.00 per 100 sq. ft.

BRISK CALL FOR LAWN HOSE DEPLETES STOCKS

London, Ont.

Rubber lawn hose has been among the list selling lines during the past few weeks, and corrugated half-inch size hose is now reported as scarce with factories very much behind in their orders. Quotations remain firm at the following levels:

RUBBER HOSE—

3 ply—½ in. 9½c per ft.; ⅝ in. 11 cents per ft.; ¾ in. 13 cents per ft.
4 ply—½ in. 10½c.; ⅝ in. 12c ft.; ¾ in. 14c per ft.
5 ply—½ in. 12c per ft.; ⅝ in. 13½c per foot.; ¾ in. 15½c per ft.
Corrugated—½ in. 13¼c ft.; ⅝ in. 15¼c per ft.; ¾ in. 18c per ft.
Less 5 per cent. for 500 ft. reels.

Hamilton Markets

HAMILTON, June 15.—The hardware trade in its various branches is putting the new budget regulations into effect with a minimum of friction, though some of the provisions are having considerable effect on prices. One result of the enforcing of the regulations has been to increase prices to the consumer on lines where formerly the merchant absorbed the tax. Investigations made among retailers indicate, in many cases, the retailer is being forced to pay the sales tax to the wholesalers for the first time, the latter having decided to collect it rather than absorb it themselves, and the retailer in turn is passing it on to the customer. This is evident y as the government intended it should be, but difficulty is still encountered on certain lines where resale prices are established.

The only man to suffer from a summer slump this year will be the man who thinks people spend all summer in a hammock. The foregoing truth will be worth bearing in mind by all business men during the next few months. If this is done the wheels of industry will not slow down during the mid-summer months but keep business active and prepare the ground for better business in the latter part of the year.

A great deal of preaching has been done by business experts that the return of active business on a profitable basis can be assisted a great deal by aggressive merchandising action on the part of retailers. No doubt every retailer has been putting forth more effort for business in the last year than for some months prior to that time, but in many cases there is considered to be a lack of appreciation of the amount of energy which is required to stimulate business.

Keen competition for current business is one of the primary elements in the window glass markets, which has resulted in the recent announcement of discounts on the box glass list in certain quarters. Eastern centres lead the way in this respect, it being pointed out that the re-opening of navigation thus tending to lower transportation costs on importations of glass, has played a prominent part in this development. While local distributors of window glass state that the domestic market is firm, with previous price levels unchanged, it is noted that quotations are generally inclined to more or less follow the direction of other competitive centres. The tendency is attributed to the heavier importations of Belgian glass.

Steel Prices Strong

The steel industry is reflecting improved conditions throughout and prices are showing considerable firmness with several increases, as forecast in recent issues of Hardware and Metal. Output is being well maintained and new buying, while not so active in some lines, is enough to maintain firm prices with some advances chiefly on early deliveries. Bar products, black sheets, blue annealed and galvanized sheets have recently undergone advances, and it is significant of conditions in this industry that earliest delivery on bar products is from three to four weeks while on sheets it is about six weeks.

The ten per cent. reduction in freight rates in the United States is said to have been a disappointment to some steel producers but the opinion is held that too much of a reduction would also be bad for the industry in so far as it would impair the buying power of the railways.

Pittsburg Markets

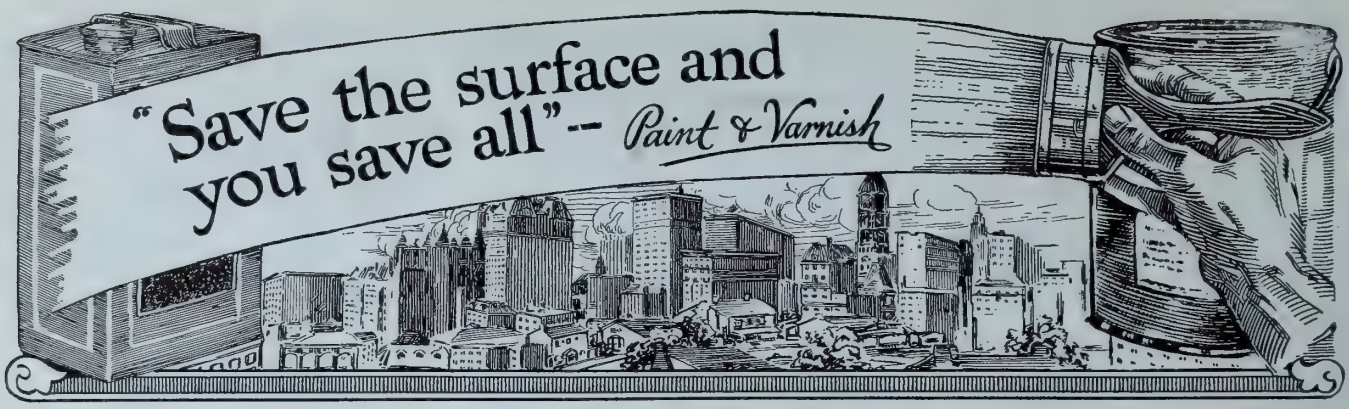
PITTSBURG, June 15.—The official report of steel production during 1921, issued in the past week, shows steel ingot production to have been 19,184,084 gross tons, or just a shade under the estimate given in this correspondence at the close of the year. The production was less than half the amount in 1916, 1917, 1918 and 1920, while with the exception of 1908, it was the smallest since 1904.

Production of finished rolled steel was 14,228,329 gross tons, or 74 per cent. of the ingot tonnage, the usual proportion being 75 or 76 per cent. The lower figure was presumably due to there being a smaller percentage than usual of heavy rolled products, which involve less scrap in their manufacture. The loss between ingot and finished rolled steel is chiefly in scale, which goes back to the blast furnace for reworking, and scrap, which goes to the open-hearth furnace.

The greatest set back in production was in structural shapes, the 1,272,624 tons being the smallest since 1908. The trade had been prepared for this by the reports during the year, showing that lettings of fabricated steel contracts represented only 35 per cent. of fabricating shop capacity. Black sheets, 13 gauge and lighter, did relatively well, the 1,367,688 tons produced being greater than in any year prior to 1910.

Production of steel castings in 1921 was 559,713 tons, against 1,551,407 tons in 1917, the record year, and 1,251,542 tons in 1920. Production of steel ingots in 1921 was 44 per cent. of the record production, made in 1917, while it was about 37 per cent. of capacity. There have been large additions to capacity since 1917, as even the production of that year did not represent capacity. There were plenty of orders, but there was physical disability, including shortage of transportation, and shortage of labor. In fact, the steel industry has been under a new alignment with industrial and general conditions in the country since November, 1916, for prior to that time, with the exception of the winter of 1902-3, when there was railroad congestion, the steel industry was always able to operate at capacity when it had the orders, while since then it has never operated at capacity, though at times it had plenty of orders, there being labor shortage, strikes, insufficiency of transportation, etc.

It is time to recognize this new alignment and consider the consequences. Seeing that in 1912 and 1913 the industry made about 30,000,000 tons of ingots, and in only one previous year as much as 25,000,000 tons, the industry of late, with a capacity about half way between 50,000,000 and 55,000,000 tons, has seemed altogether too big. It appeared that orders for such tonnage of steel would be difficult, if not impossible, to secure.



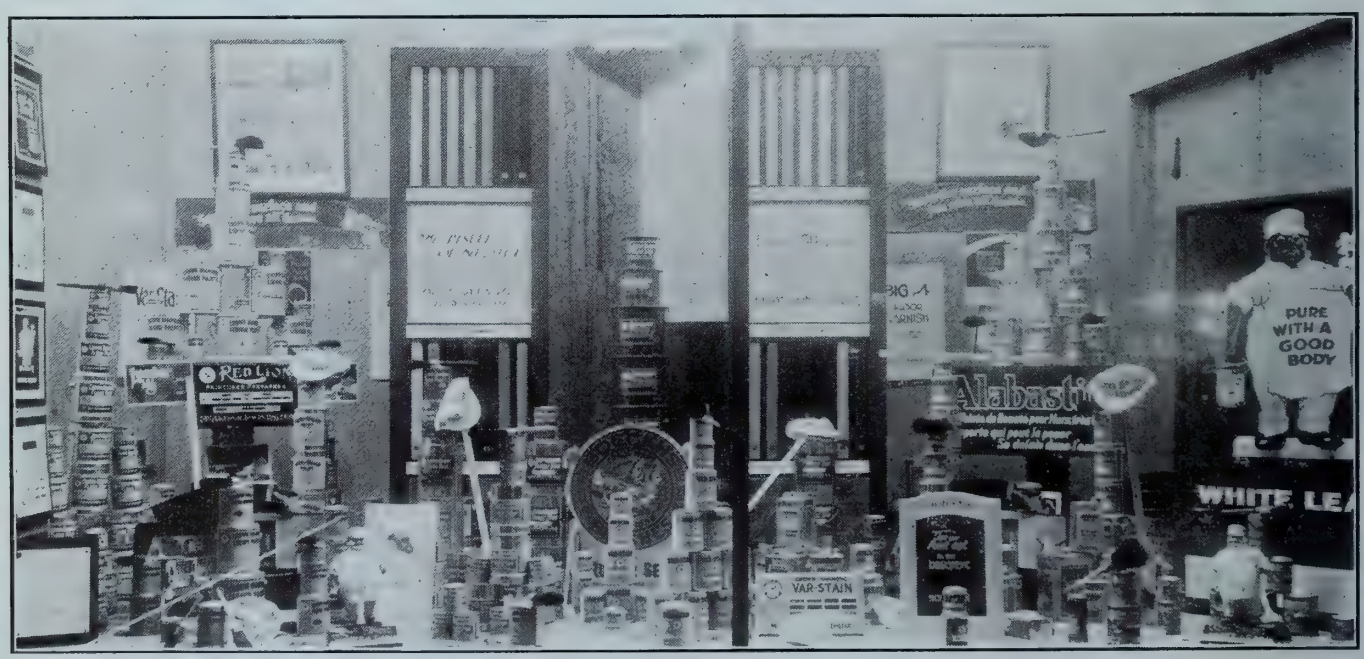
Shows Customers What Paint Will Do

Montreal Retailer Paints or Varnishes a Surface, and Displays Articles for Customers' Inspection—Placed on Tables Accompanied by Paint Required for Job—Principal Paint Stock Carried in Front of Shelving—Cheap Paint as a Bait

"NOTWITHSTANDING the buying public are becoming more and more educated to the use of paint, varnishes, and sundry lines, through efforts on the part of both manufacturers and dealers, we find them still very willing pupils. To maintain our record, that of increasing paint sales each succeeding year, we are convinced that ways and means of showing the public the actual accomplishments of the various lines are as necessary as they were a few years ago," said the manager of one of Montreal's retail stores.

Wherever convenient, either in the paint department or in the windows, this store features articles painted or varnished with the required number of coats, for the inspection of customers. At the present time a paint window is shown with two large boards extending almost from the floor to the ceiling. One is painted, while the other shows the wear and tear of wood when exposed to the weather. Each is placarded giving the details, so that the passersby can in an instant understand the message intended to be conveyed. On the floor of the paint department are tables, each with a line of paint, varnish, varnish stain, wax, etc., and on each table is an article painted to show just what painting or varnishing will do. On the varnish table is a strip of floor linoleum, the upper half of which is not coated, while the lower half has two coats of their linoleum or oilcloth varnish. The varnish stain tables have wooden panels with the undercoating and the finishing coat shown, and the floor wax stand has a highly waxed finish on a section of hardwood flooring. A customer when entering immediately becomes interested when it is actually demonstrated what can be accomplished, and it is then up to the salesman to explain how each coat is applied. In keeping these display stands well out on the floor in front of the paint shelving offers a better opportunity for the customers to inspect. "Realizing that sales are made through displaying in this way, the principal part

(Continued on page 68)



This recent paint display by a Montreal dealer shows what can be effectively accomplished to show the true value of paint to protect surfaces. In the centre a couple of boards are shown as taken from a building which was never painted. On the other side is shown some lumber fifty years old taken from a building that was regularly painted. An effective showing of paint and brushes is arranged to turn into sales the effect produced on the passer-by by the striking demonstration of the value of paint as a preservative which the arrangement exhibits.

SERVICE

CONFIDENCE

FAIR DEALING

"SO, LIVE I—SO, DIE I."

"We live in deeds, not years; in thoughts, not breaths;
In feelings, not in figures on a dial.
We should count time by heart throbs. He most lives
Who thinks most, feels the noblest, acts the best."

Philip James Bailey gives us in the above a bit of philosophy which it would do us no end of good to memorize.

It is not extraordinary that thought, feeling and deeds constitute the beginning and the end of any business career. For *men make business*, the success or failure of which is influenced, more than anything else, by the degree of those qualities applied to, and expressed through, their business.

We like to think, pridefully, that these qualities with which our Founder imbued our Organization were responsible for our present proportions. And, we like still more to think that the many kindly, complimentary remarks exchanged from day to day by our Trade as well as their customers is being increased by the observance of business as something involving far greater consideration than just "Business."

This is no boast but just the reason we attribute our success to—a success which we sincerely desire to maintain through any responsible, capable and conscientious hardware merchant in any town where we are not already represented.

Say Good Prospects For Future Paint Business

Enthusiastic Gathering of District Managers and Department Heads in Toronto, of The Lowe Bros. Co.—Present Business Satisfactory

The quarterly convention of District Sales Managers and Department Heads of The Lowe Brothers Company, Dayton Ohio, was held at the offices of Lowe Brothers, Limited, Sorauren Avenue, Toronto, during the week of June 5th to 10th. The purpose of the convention was to discuss subjects relative to the company's present sales problems; also to prepare advertising and sales plans for 1923.

On the arrival of the delegates an address of welcome was made by F. J. Penberthy, vice-president and general manager, Lowe Brothers, Limited, which was responded to by Messrs. John G. Lowe and D. A. Kohr, president and vice-president respectively, of The Lowe Brothers Company, Dayton. Reports of the various district managers and department heads indicate present business to be very satisfactory with even better prospects for the future. Those present were:

John G. Lowe, president, The Lowe Brothers Company, and Lowe Brothers, Limited, Dayton; D. A. Kohr, vice-president and general manager, Dayton; F. J. Penberthy, vice-president and general manager, Toronto; H. M. McCutcheon, general sales manager, Dayton; Jno. M. Graham, advertising manager, Dayton; R. S. Gabell, director industrial sales, Dayton; D. P. Haber, assistant treasurer, Dayton; R. E. Scott, director varnish sales, Dayton; E. K. Springer, district manager, Chicago; G. L. Paine, district manager, Boston; H. S. Wauters, district manager, Jersey City; A. F. Burdon, district manager Minneapolis; A. M. Bollman, district manager, Dayton; T. B. Boatright, district manager, Atlanta; R. K. Mason, district manager, Kansas City; A. M. Jamison, division manager, Alleghaney Div.; J. Mahoney, division manager, Lake Division; Geo. Davidson, division manager, Mountain Division; L. W. C. Tuthill, Tuthill advertising agency, New York City; A. G. Pinard, advertising manager, Toronto.

PAINT TRADE NOTES

R. Raymond, formerly of the Canadian Oil Co., has been appointed to the sales force of Paint & Varnish, Ltd., Eastern distributors for Imperial Varnish & Color Co., and will cover the territory in the vicinity of Montreal. J. R. Houle, who formerly travelled in this district, will now cover the city and outlying municipalities.

Wilfred Avard, formerly of the Canada Paint Co., will represent the above company below Quebec.

AUTHORITY SAYS HARDWAREMEN

(Continued from Page 45)

use a radio set, Mr. Walkover replied that if they could not make use of the ordinary aerial they would have to have a vacuum tube detector with adjustments to be used in conjunction with antenna about the size of an electric fan.

Enquiry being made by a merchant regarding the retail channel of distribution of radio supplies, Mr. Walkover stated that his firm and others had directed their campaign on the hardware and electrical trades. He disagreed with the manner in which the business had run rampant in the U.S. where drug stores, novelty shops, etc., had all entered upon its sale.

Asked as to the comparative adaptability of the hardware and electrical trade to sell radio supplies, Mr. Walkover stated "our electrical trade in this country is not as efficient as it might be." The suitability of the hardware store was vouched for in the statement "who would go into a music or other type of store to buy clothes line, screws, etc.? The same thing applies to radio equipment because so much of it is already counted among the regular stock of the hardware store."

In order to find out if the merchant has an opportunity to sell radio supplies F. R. Jackson suggested that a stock be put in consisting of 22, 24 and 26 gauge single cotton covered wire; a dozen packages of galena; some brass bolts and nuts 8-32, 6-32 from half inch up to 1½ inch in the quarter inch sizes. Hexagon nuts to fit these should also be stocked. As an indication of the success which he has had Mr. Jackson stated that while he had been unable to get more than a few people to stop to look at a demonstration in his window on Saturday, a considerable crowd gathered in front of a window display of radio equipment on Sunday. He finds it best to buy wire in quarter pound spools. Cable wire for aerials he has not found to be a good seller. Porcelain insulators should also be stocked. Mr. Jackson keeps one complete set on hand to show the general construction of a crystal set. Not much success has so far attended the use of cheap sets sold complete.

The fact that manual training schools and Boys Scouts have gone extensively into the details of radio set construction was said to have helped the sale of parts.

Replying to another question Mr. Walkover stated that the hardware merchant is buying much radio equipment that is of little use, but that in this he is at the mercy of the wave of enthusiasm which has swept the country. For protection he could only suggest that retailers use care in the firms they deal with as only experts are able to differentiate between useful and useless equipment. Unfortunately some large distributors had accumulated much "junk" before they were aware of it and are trying now to unload it.

Profit in Radio

Asked concerning the margin of profit on radio supplies F. R. Jackson replied that only 25 per cent was possible on wire and this would only cover overhead expenses, but that it was necessary to handle for the convenience of radio fans. On the whole an average profit of 30 to 35 per cent. was said to be possible.

Asked regarding the comparative value of the aluminum and bakelite ear phones, Mr. Walkover stated the aluminum cup was an advantage if properly constructed but a disadvantage if improperly made. Therefore in more expensive phones it would be all right but in cheap phones it would be questionable.

Bakelite is an insulating material procurable in either sheets or cut to size for various sets. Mr. Walkover stated the merchant can buy this material for 60 cents a pound cheaper in sheets than if it is cut, but to handle it in this way he would have to be equipped to smooth-cut it. A good margin of profit could be made in buying bakelite knobs, posts, etc., and constructing binding posts. An indication of the margin of profit on other lines was as follows: retailer buys phones for $4.50 and sells for $6.00. Buys vacuum tube for $5.00 and sells it for $6.50. On coils he can make 40 per cent. Another profit in handling radio supplies was that made on other hardware lines which would be sold by bringing radio prospects to the store.

Don't Touch Galena

Some other brief points made by Mr. Walkover were as follows: galena crystal should not be touched with the hand as moisture affects it. Celluloid dials on the condensor have yet to be proven efficient. So far they are only on the cheaper ones, bakelite being used on the more expensive ones. Glazed insulators were best because they were not subject to loss of power through soot and other carbon deposits, and those with corrugations were best because they aided the drainage of moisture from the insulator. Every set requires a lightning arrester according to new regulations, this applies whether a lightning switch is used or not. Most sets were advertised as complete without bulbs because bulbs were so difficult to get. Crystal sets were not much use in smaller places where radio equipment would be expected to be most popular because of short range. A complete set of parts "knocked-down" was being sold for $97.50 which would have a range conservatively estimated at 100 miles. Regarding height of aerials Mr. Walkover stated a hill, mineral deposit or obstruction of any kind interfered to some extent with the recording of the waves on the antenna and its height should be governed accordingly. Once obstructions are cleared greater height gives no advantage.

Trade Marks of Quality

The Best White Lead

When buying white lead the best painters everywhere look for the elephant on the label. Their familiarity with this mark of white lead merit has been crystallized into a buying desire that puts big money into the Elephant White Lead dealer's cash register.

You cannot stock a better white lead. There's a Government guarantee on every can.

May we tell you about our complete line of trade marked paint and varnish products? Our agency proposition will interest you.

The Best Paint

To the paint buying public the "C.P." trade mark is a guarantee of paint beyond reproach. To the paint dealer it's a guarantee of profit and prestige—the guide post on the road to a steadily increasing business in paints, varnishes, stains and enamels.

Weekly Paint Markets

Montreal

MONTREAL, June 15.—The feature of the paint markets is transferred this week from turpentine to linseed oil, the latter product being somewhat easier in tone with prices reduced six cents per gallon on the local market. This is the first change in a downward direction on oil for some weeks past, the market having continued steady to firm since the opening of the active season. During time the strength resulting from a bigger buying movement was assisted by statistical reports which have shown that a shortage of world seed supply was not unlikely if consumption continued in usual seasonal proportions. However with the most active season drawing to a close this month, there would now seem to be little fear in this direction, and reports of flax acreage for this fall's crop is now having its effect on the present situation. Turpentine, for the moment, remains in a fairly strong position with local stocks still comparatively light. Shipments have arrived from the South during the week and replenished local stocks to an extent, but available supply is still short owing to recent arrivals being used for manufacturing purposes. This condition is expected to improve from now on as Southern markets report that receipts are becoming heavier. There is a feeling locally that the peak of turpentine prices has been reached, and from now on the market will not assume its former marked strength. Paints, varnishes and allied products are still enjoying an active sale, and the movement is expected to continue seasonable until the close of the present month at least.

LOWER PRICES RECORDED ON LINSEED OIL

Montreal.

For the first time in many weeks linseed oil shows a reduction in price, quotations being six cents lower than last week. The easier trend of the flax seed market continued during the week, and lower oil prices at the present time are not surprising. It is noted, however, that although the softer tone in seed has been evident for the past two weeks, the loss from former price levels has been comparatively small. Local crushers in drawing attention to this, state that while the trend can hardly be termed a fluctuation, unless the recession continues a fairly satisfactory position is still held by the market. Fundamentally flax seed is little changed, and a certain amount of strength is still evident owing to the seed supply. On the other hand, with the most active demand for oil now over at the close of this month or early in July, it is felt that much of the strength gained through statistical reports of seed supply will be lost, and little or no effect from this condition will be felt in the future.

Reasons given for the present slump by local crushers and distributors differ to an extent, although increased flax acreage for this fall's crop and a general recession in demand usual in the following weeks are generally given as the chief factors in the present situation. In the U. S. markets the heavy importation of European oil is reported as having a demoralizing effect and the present downward trend is much more noticeable there than on domestic markets. Revised quotations are as follows:

LINSEED OIL—		
1 to 2 barrel lots, per gal.....	1 02	1 04
5 to 8 barrel lots, per gal.....	1 02	1 04

Less barrels, add 10 cents per gallon.

CURRENT TRADE IN PUTTY REPORTED SEASONABLE

Montreal.

Trade in putty at the present time is described as seasonable, and sales, while not quite as heavy as in previous weeks, are quite satisfactory. Building operatios throughout the country are demanding fair supplies and a moderate volume of business is expected to continue throughout the summer months for requirements in this direction. Quotations remain unchanged as follows:

PUTTY—			
Bulk barrels 800 lbs.	4 00	4 50	4 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
5 lb. tins	9 25	9 75	10 00
1-lb. tins	11 25	11 75	12 00

Standard, per 100 lbs. 5-ton lots 1-ton lots. Less

TREND OF TURPENTINE MAY NOW BE EASIER

Montreal.

Local turpentine stocks have been replenished to an extent during the week, but available supply is none too ample even yet, and certain distributors are anxiously waiting further shipments from the south. As stated last week, a large share of the arrivals was required for manufacturing purposes, but now that these needs have been filled, the situation is expected to become much better from now on. The condition of the market in the south has also shown recent changes, and the market is now reported as fluctuating, and a little easier. Receipts become greater with the improvement in weather conditions, and interest on the part of buyers is not as great as has recently been evident.

The opinion was expressed by one local importer that with a continued improvement in Southern conditions altogether likely, and domestic demand gradually becoming less with the closing of the more active painting season, the peak of turpentine prices has been reached and a gradual easing of prices in the near future would not be surprising. Quotations are unchanged this week as follows:

TURPENTINE—	Imp. Gal.
1 barrel lots	$1 38
2 to 4 barrel lots, per gal.	1 37
Broken lots	1 48

Toronto

TORONTO, June 15.—Linseed oil provides the centre of attraction in the paint markets this week, a further recession of five cents per gallon having been announced. This change reflects the weaker position of flax seed, coupled with a somewhat smaller demand for linseed. It was pointed out in last week's oil report that the current price levels were not being strictly adhered to in all cases, and thus a further reduction is more or less expected to remove any uncertainty of this nature.

In addition, turpentine also attracts marked attention, in view of this product retaining its strong position both on domestic and primary centres, which has been evident through recent weeks. Turpentine prices locally remain at the new high level recorded recently, with the general situation practically unchanged at present, although relief from the scarcity is expected to develop in the next few weeks owing to anticipated larger fresh receipts at southern distributing points. Paris green is described as in good demand with stocks low and new supplies harder to obtain. On the other hand, linseed oil has weakened in current trading, which in combination with lower flax seed prices, produced a recession in prevailing oil quotations. Ready-mixed paints are enjoying an exceptionally brisk trade, with practically all distributing points recording marked activity. Window glass, however, remains somewhat uncertain, and while no change has been announced locally in the net box list, there is evidence that this is not being strictly adhered to in all instances.

(Continued on page 68)

The best recommendation for Simms Paint and Varnish brushes is the increasing sale they enjoy. Years ago they made their appearance in hardware and department stores. Painters tried them once and almost invariably came back and asked for the same brand.

TRADE SIMMS SET IN RUBBER MARK

TORONTO PAINT MARKET

(Continued from page 66)

ANOTHER DECINE IN LINSEED OIL PRICES

Toronto.

Another recession of five cents per gallon has been announced this week in linseed oil prices, this change still further reflecting the weakness in flax seed markets combined with the quieter demand for oil. The easier tendency in linseed is described as being principally due to the present movement in seed, where an increased flax acreage combined with a moderate call for seed are the chief factors in this situation. The bulk of large oil commitments are stated to have materialized, thus leaving the present quotations at the following levels:

LINSEED OIL—	Per gallon Raw	Boiled
1 to 2 barrel lots	1 05	1 08
3 to 4 barrel lots	1 04	1 07
6 to 9 barrel lots	1 02	1 05

TURPENTINE MARKETS RETAIN FIRM POSITION

Toronto

Turpentine still retains its strong p sition, both on southern and domestic markets. While no price changes have been announced this week, the product itself is described as "just as scarce as ever" among local distributors, due to the absence of fresh arrivals from producing centres in sufficient volume to take care of current and pending demands. Consumers still cherish the hope that with the warmer weather, the new crop will move in greater volume, and therefore larger receipts will be available. Distributors point out, however, that any slight decline in prices at Savannah provokes heavier buying, with the natural result that the market is still very strong. Current requirements are undoubtedly larger than expected in most quarters, due to the fact that both consumers and distributors have practically no turpentine on hand. Following are local unchanged prices:

TURPENTINE—	Imp. gal.
1 barrel lots	1 45
2 to 4 barrel lots	1 44
5 gallon lots	1 60

Less than 1 barrel lots—15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

EASIER TONE EVIDENT IN GLASS MARKETS

Toronto.

The recent unsettlement in window glass markets resulting from the introduction of discounts off the box list in certain quarters, is still apparent. While certain local glass distributors claim to be strictly adhering to the net quotations, yet it is noted that others have introduced the practice of quoting a discount off the box list is attributed to attractive bookings. That eastern centres have announced a fifteen per cent. discount off the box list is attributed to larger importations of Belgian window glass, combined with a weakening in such foreign markets. In discussing this situation with a Toronto jobber, Hardware and Metal was informed that they had recently lost some glass business through maintaining unchanged price levels, thus showing that discounts were being introduced.

The bulk of seasonal glass buying however, is stated to have been booked, and while a steady demand is being experienced for glass, many buildings at present under construction have not reached the stage of completion. In the city, a brisk call for plate glass is evident, with commercial construction work, however, of a limited nature. No general announcement has been made locally in respect to glass quotations, the fact that some variation in price is apparent being looked upon as a surprise in some quarters. Earlier in the season, distributors outlined a firm market for the summer months, and but for the recent developments in eastern circles, it is suggested that strenuous efforts would have been maintained to secure uniform price levels.

BRISK ACTIVITY NOTED IN PAINT PRODUCTS

Toronto.

Paint manufacturers and distributors report brisk trade continuing in ready-mixed colors, with the current movement of these products as a whole being described as satisfactory. A marked hum of activity is noted in warehouses and shipping departments, and while this is caused by numerous small orders, yet the aggregate volume compares very well with last season. Prices remain unchanged at present, manufacturers pointing out the increases in some raw material prices reflecting a steady to firm tone during recent weeks.

SHOWS WHAT PAINT CAN DO

(Continued from page 62)

of our paint department is carried on tables and display stands in the busy season," said this merchant when the heavy stock was noticed on the floor.

Purchases of Cheap Paint Not Encouraged

The question of also carrying a cheaper line of ready mixed paint is solved by the store. A complete line of this grade is on the shelves and partial success is met with it because very often tenants are only anxious to give a temporary cheerful appearance to their flats and apartments. However, this line is not "pushed," being principally used as a bait. In the local papers paint is advertised at a low price. The customer comes in to purchase, but instead of supplying a quart of the low grade, as advertised, he or she is strongly advised to pay a little more and get the better quality. While this sort of advertising would not be encouraged by many dealers, it was pointed out that such a method could hardly be scored because there was always the opportunity of educating people to the use of the highest grade of paint when they came to make the purchase. They could buy the can at the price advertised, but not with the recommendation of the merchant.

"This is only another instance where we show our customers what paint will do. By telling them that the cheaper grade of paint will not give the required results, we are usually able to secure a good order of first quality material."

GET-TOGETHER CLUB PICNIC OF SHERWIN WILLIAMS

Montreal.—Members of the Get-Together Club of the Sherwin-Williams organization enjoyed a trip down the St. Lawrence to Lavaltrie aboard the steamer "Three Rivers." Weather conditions were ideal for the outing, the stop-over at the grounds, though very short, was the scene of some interesting athletic events which were run off in a spirited manner. Much of the afternoon was spent on the boat as the journey was quite a lengthy one. However, this proved an enjoyable part of the program, and dancing aboard was thoroughly enjoyed by all.

The real Get-Together spirit was evident throughout the day, everyone entering into the merriment and play with a zest that made this outing one to be remembered.

Confidence in Your Merchandise Makes the Sale

The salesman who "knows" that his merchandise is trustworthy—sells with a supreme confidence which carries conviction. The "sixth sense" of your customer instantly informs him whether you have faith in your product. That assurance which comes of handling supreme quality—is the real salesman, the deciding factor in closing the sale.

You can sell *Dominion Decorative Wall Burlaps*

with that pleasing confidence which only a dependable Burlap can give. You have the satisfaction of knowing that you have secured for your customers the best brand of Burlap manufactured.

The trade mark of the Dominion Oilcloth & Linoleum Company stands for "trustworthiness." Every yard is built for service. Manufactured to maintain a criterion of quality. Depend upon it that DOMINION DECORATIVE WALL BURLAPS must "measure up" to this standard.

A Valuable Impression

A pleasing impression upon customers is of value. You can create one and at the same time save your goods from damage by spreading sheets of TANGLEFOOT in your show windows, especially over Sunday.

TANGLEFOOT will then be at work for you and will not only catch the flies, but attract the attention of people who pass your store to your efforts to keep your stock clean and fresh. For 1922 TANGLEFOOT has been considerably reduced in price.

Remember TANGLEFOOT *catches the germ as well as the fly, and that poisons, traps or powders cannot do it.*

B B Co LTD

Prices Right

Recent price changes have made Brown Boggs Tools more attractive than ever to the Tinsmith. For while we have cut the price, we have maintained the same rugged quality in all our products that made our Tools the acknowledged leaders in this line.

The Right Roofing to Buy

The kind that sells quick—Owl quality products are tremendously popular. Repeat orders are flowing in and not one complaint as yet recorded by customer or dealer. Owl quality products are dependable because the factory behind the product is modernly equipped and supervised by experts in this particular line of manufacture. If you have not ordered Owl quality products—do so now when big business is easy to get.

—The Quality and Value in Owl Roofing is unsurpassed

Our Quality Roofings are waterproof and weatherproof. They are fire-resistant because no oils whatsoever are used to "thin out." The Asphalt Owl Roofing is made to suit Canadian climatic conditions and does not deteriorate in service. They give maximum service at minimum cost. Feature Owl quality products and you will be well repaid through increased business and assured satisfaction.

Write to-day for Samples and Prices.

W. WALKER & SON, LIMITED

10-16 Alcorn Ave. **TORONTO**

Owl Roofing made in 1, 2, 3, 4, 5 ply. 108 sq. ft. to each roll. 32 in. wide. The fastest selling roofing on the market to-day.

—Owl Brand Asphalt Slates

Red or Green, size 9″x12¾″. Make an artistic, permanent, fadeless, weathertight, fire-resisting roof. **"They will not curl or crack."**

—Owl Brand "4 in 1"

Particularly economical — they require but one-quarter of the labor and only five nails to every eight used in laying individual slates. **"They will not curl or crack."** Surfaced in natural colors—red or green. No painting or staining required.

—Owl Brand Slate Surfaced Roofing

Slate surfaced in rolls 32x18″ wide. 108 sq. ft., 85-ft. roll. Nails, cement and instructions with each roll.

TINKER TOM'S TALKS.

No. 363

FOR METHODISTS ONLY!

Clarence B. White gets off some good stories occasionally in his advertising space in the American Metal Market and this one appeared a few days back.

A former Methodist who had strayed from the fold was observed attending church again in his familiar place. One of his old friends greeted him kindly and said: "Why, how does it come, Bill, that you're back with us again? I thought you'd gone over to the Christian Scientists." "That's true," was the reply, "but do you know, I got so darned tired of being happy all the time that I thought I'd come back to the Methodists again."

Moral: I was going to say "This shows you can get too much of even a good thing," but look how everybody these days is crazy to get Premier Galvanized Sheets—Maybe there aint any moral!

TINKER TOM

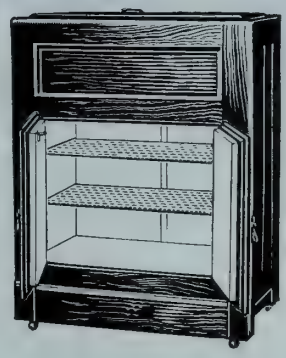
A Refrigerator For Every Purpose

REFRIGERATORS

Refrigerators Backed by Ashdown's 53 Years' Experience

Ashdown's are prepared to supply standard makes of refrigerators for every purpose, and in a wide variety of style and sizes, from the largest for commercial purposes in stores to the small, compact sizes for apartment houses.

These dependable lines are chosen with the usual Ashdown care in selection. They will be found conveniently arranged, well insulated, good ice-savers, and handsome in finish and appearance.



This seasonable item will shortly be in active demand. There isn't much time to spare if you are not well stocked now. This is one of a line of handsome, attractive refrigerators. Well displayed in your window, or on your floor, they will attract favorable attention at once. Their good selling points will arouse interest and convince your customers. They will close good sales for you.

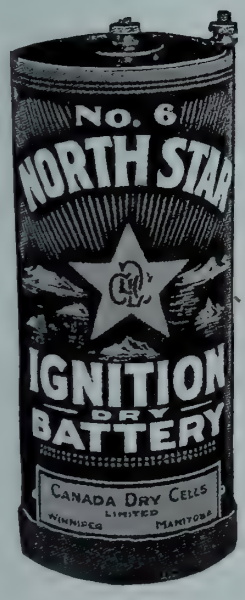
Ice Picks and Shavers - Ice Cream Freezers

Ashdown's 53 Years of Service Back You

The J. H. ASHDOWN HARDWARE CO., LTD.

Calgary WINNIPEG Saskatoon

To make the best battery that is possible— is our conscientious aim



How well we have succeeded is proven by our unqualified faith in our batteries to "deliver the current."

North Star Batteries must make good to the user—otherwise we do.

The dealer is authorized to replace any North Star battery that fails to satisfy—we stand the loss.

The margin of profit on the North Star line warrants your best sales efforts.

Ask your jobber or write to us

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

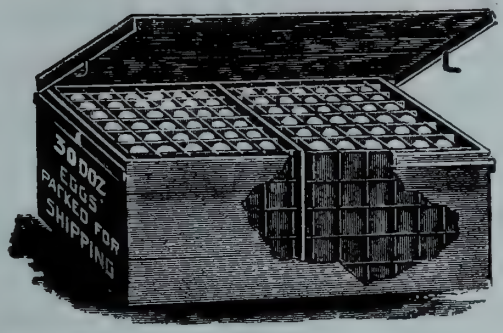
Egg Shells are Porous



And unless the fillers are fresh and clean the eggs will invariably become tainted before they reach the market.

Fillers absorb the odors from eggs and fresh fillers should be used.

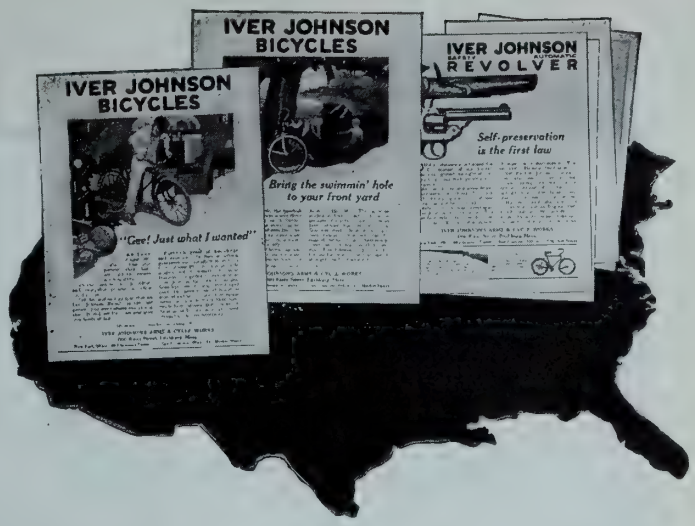
Recommend fresh fillers for each shipment—it will more than pay your customers.

The Miller Bros. Co., Limited
511 St. Catherine Street West,
Montreal

Hardware and Metal is the only paper in Canada giving a weekly market service on hardware, metals, paints, varnishes and other lines allied with the hardware trade.

Hardware and Metal is the only hardware publication in Canada with circulation audited by the Audit Bureau of Circulations.

Hardware and Metal is the only weekly hardware paper in Canada.



Iver Johnson advertising covers the country

Reproduced in miniature above are a few of our advertisements that will appear in a big list of national magazines during 1922.

Iver Johnson advertising reaches more than 16,000,000 people! Clerks, executives, laboring men, professional men, sportsmen, farmers, housewives—all are reached and influenced by Iver Johnson advertising in their favorite magazines.

Each month, Iver Johnson products become more accepted by the general public as being good, dependable merchandise at a fair price.

Stock the entire line of revolvers—22, 32, 32 special and 38 calibres. Hammer and Hammerless models with Regular, Perfect Rubber, and Western Walnut grips.

Why not stock Iver Johnson Champion Single and Hammerless Double Barrel shotguns? Accurate, dependable, moderately priced. There are none better. Then you will secure the benefit of the entire line of Iver Johnson firearms.

Round out your line with Iver Johnson Truss-Bridge Bicycles. Strong, speedy, easy-riding, durable. They sell at prices to suit everyone.

FREE! Three interesting booklets, also complete dealer information. Send at once for one or all of these booklets.

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

Everlastic Liquid Roofing Cement

Everjet Elastic Carbon Paint

Plastic Elastigum Patching Cement

ONE of the most popular of the Barrett Products is Creonoid (Fly Oil) Lice Destroyer and Cow Spray. Farmers throughout the entire Dominion use vast quantities of this product during the fly season. Our plans include an intensive advertising campaign directed to the farmers during the time when the fly pest is prevalent. Be ready to cash in on this demand we are creating for you.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

"I SAVE from $30 to $50 per month by the use of Creonoid," writes a farmer. "By its use night and morning, my cows have practically 24 hours of peace and comfort . . . I have used Creonoid for more than a year in my dairy, and I find it so superior to all other 'fly dope' that there is no comparison."

That is but one instance among thousands, where Creonoid has increased the milk yield. Experts say that cows give 25% more milk, when freed from the fly nuisance.

Creonoid is a very inexpensive and wonderfully effective fly-spray for horses and all live stock.

It is easy to apply. After its use cows will stand still at milking time, and should show an increase in weight and milk yield.

Creonoid will pay for itself many times over through increased farm profits.

Creonoid means more milk per cow, more eggs per hen, more pounds per hog.

Creonoid comes all ready for use. It requires no mixing or thinning.

Comes ready for use in 1- and 5-gallon cans, ½ barrels (about 20 gals.), barrels (about 40 gals.), and steel drums (43 gals.)

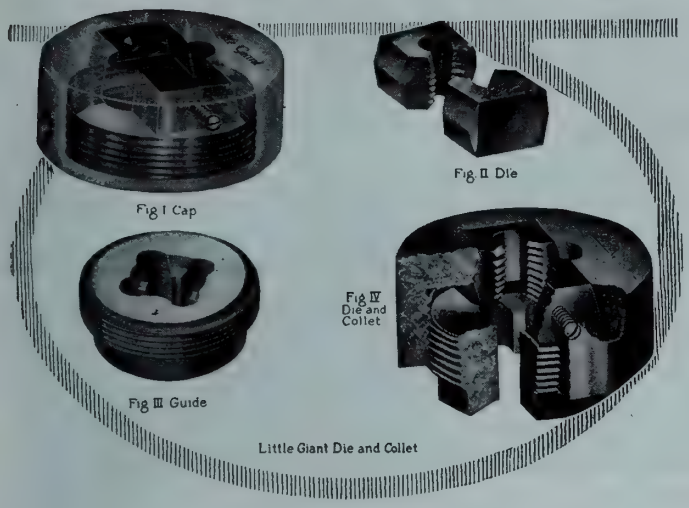
Little Giant

Screw Plates



REG. U.S. PAT. OFF. GTD

Clean, True Threads—Through the Guide or from the Face

Among the many products developed by the GTD organization *Little Giant* Screw Plates were early in the field, quickly became popular because of their manifest advantages and were soon adopted as standard by thousands of users in whose shops they have been used exclusively for many years.

We recommend the use of *Little Giant* Screw Plates wherever accuracy and economy in repair threading are required.

And remember, GTD reputation and experience are behind all GTD products.

Our complete catalog No. 46-A is ready. It's full of valuable threading tool information.

WHAT ARE YOU GOING TO SELL HIM?

"I want 100 feet of 7/8-inch hay rope."

You notice he said "feet"—not "pounds."

What are you going to sell him—100 feet or 24 pounds?

By selling him Plymouth Rope by the foot you can satisfy him and incidentally make a better profit for yourself.

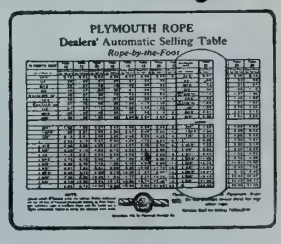
We'd be glad to tell you how.

Plymouth Cordage Company

NORTH PLYMOUTH, MASS. WELLAND, CANADA

Independent Cordage Co., Limited

TORONTO, CANADA Canadian Sales Agent



Since 1916 all Plymouth Rope 1/4" in diameter and larger has contained a twisted paper marker identifying it as Plymouth Rope.

PLYMOUTH *The Rope You Can Trust*

1500 GOOD TOOLS

TOOLS FOR MOTORISTS

Personal Contact Gets More Trade

The best way you can make your business grow steadily is to meet and talk to passing motorists, and sell them on the service you can give them with a Bowser Chief Sentry. Then you can increase sales in your other departments.

The Chief Sentry not only saves time for the customer, but it enables you to handle more trade per hour.

The automatic features of the Chief Sentry, liberally advertised in the Saturday Evening Post and Literary Digest, reassure your trade that they will get full measure for their money. The sight glass on the discharge arm shows the customer that the measure is full. The tally bell announces the completion of each gallon of gasoline delivered. The Bowser centrifugal water separator insures gasoline as dry and pure as when fresh from the refinery. The recording meter acts as a perpetual sales register.

The Bowser Chief Sentry is high enough and big enough to make an impressive appearance and attract trade; it is low enough to go under any filling station canopy. It is unusually attractive in design. Bowser service, combined with your personality, will attract more motorists **and bring them back.** Ask for booklet C-16, which describes the Chief Sentry money-making possibilities.

Bowser Equipment is MADE IN CANADA by
S. F. BOWSER & CO., LTD.,
Toronto - - Canada
Branch Offices and Service Departments throughout Canada and in principal cities abroad.

BOWSER
ESTABLISHED 1885
ACCURATE MEASURING PUMPS

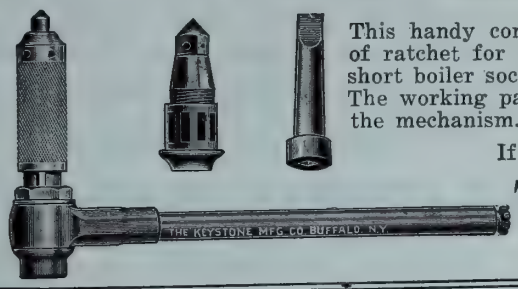
Keystone Reversible Ratchet

Combination No. 200
A Proven Record For Good Sales



This handy combination is well made of first-class materials. It consists of ratchet for taper shank, twist drills, sleeve for square shank drills, and short boiler socket for square shank drills. The sockets are interchangeable. The working parts are all enclosed, preventing dust and grit from clogging the mechanism.

If your jobber cannot supply the demand, write us.

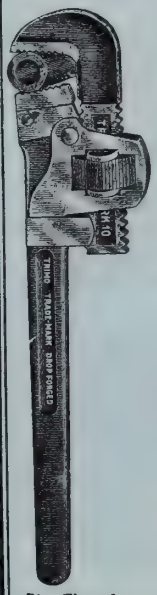
TRIMO

THE WORD TRIMO



Stands for good tools made by the Trimont Mfg. Co., which are the following:—

The Trimo Pipe Wrench
The Trimo Chain Pipe-Wrench
The Trimo Nut Wrench
The Trimo Pipe Cutter (Hand)

The four good points that make **Trimo Pipe Wrenches** superior are the **Spiral Spring** always in place—**Steel Frames** that will not break—**Nut Guards** that protect adjustment nut—and the **Inserted Jaw** in handle that can be replaced when worn.

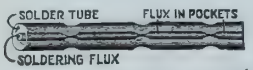
KESTER ACID CORE WIRE-SOLDER

FLUX IN POCKETS

— a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of genuine tin-and-lead solder. In great demand by all solder users because it saves two-thirds of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock soider.



Sectional view. Note flux in pockets.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

HERE'S THE MOST DURABLE SMOKE-STACK on the MARKET

It's welded copper steel with no lap seams for water, fumes or dirt to lodge in and rust it out. No lapped and riveted joints to give way under corrosion.

Each section is rolled so the two edges meet and then is welded or fused into one piece. The sections are similarly welded end to end, making a smooth, clean job from end to end inside and out.

Then the whole is given a thorough coating of a special oil to prevent corrosion. This oil film is water-proof, fume-proof, acid-proof, brine-proof and gas-proof. Toughens with age but always flexible.

This is the stack you want

The Everlasting Veneer Toilet Seats

This is the strongest and cleanest toilet seat made. There are no cracks—made of 7 and 9-ply, air-seasoned wood veneer, held together by our special wood cement.
These seats are proof against heat, cold or dampness—will never crack, warp or split. They cost no more than the so-called "cheaper" toilet seats, and always bring repeat business.
Have you written for our prices?

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

The Sterling Mark

THE "Cover The Earth" trade-mark is everywhere regarded as a guarantee of better paints and varnishes—as significant to the purchaser as the sterling mark on an article of silverware.

Paint users in every community know this. And the satisfaction they have obtained through the previous use of

SHERWIN-WILLIAMS
Paints and Varnishes

is an important influence in determining their choice when buying paint again.

The Sterling Mark "COVER THE EARTH" quality will mean more business for you. If its value appeals to you write for particulars of our agency proposition.

This is "*Buy-Time*" for Women Who Preserve

It's "Buy-time" for women who preserve. This very day thousands and thousands of Canadian women are checking over their kitchens, getting all ready for the annual preserving.

Some of these women will need a preserving kettle, a cullender, a ladle or a fruit jar filler. But the great majority need whole sets. And that's the way to sell. Sell your customers complete sets of preserving utensils instead of just odd articles. Make up several different sets in Diamond Ware or Pearl Ware and on each set put an attractive price.

93

SMP Diamond or Pearl WARE

"A Face of Porcelain and A Heart of Steel"

Use our striking window trims, price tags, giant ads and other helps to assist you in this. You'll find our special series of preserving advertisements a big help, too.

If you need any further help to make preserving season pay, look to us.

"Seafoam" Electric Washer

logic

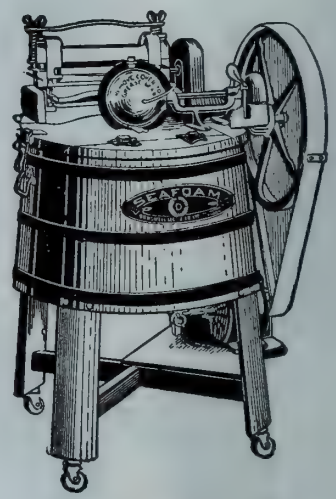
We are presenting the following facts, believing that when you are acquainted with them you will become as ardent a booster for SEAFOAM ELECTRIC Washing Machines as we are ourselves.

They are made to last, from materials that have been carefully selected, so that they will reflect nothing but credit to the dealer who sells them.

They are finished completely in every detail, their appearance bespeaks one of quiet dignity with plenty of reserve ruggedness.

A machine of this type will readily attract the type of attention that will result in sales for the dealer, they appeal both to the fastidious and the practical buyer.

Would it not be worth your while, in view of the foregoing to investigate these claims? There are other "DOWSWELL" lines that are made under the same rigid supervision, each one of them offers a sterling proposition.



Style "A" Dolly Type **Reversible Wringer. Washes and wrings at same time or separately—all by power.**

1-4 H. P. Splash Proof Motor. Style "B"—For Engine Drive.

MAKE HIM REMEMBER

It Will Please Him - - Be Profitable For You

You can get your full share of their oil business if you will keep the motorists who come to you for hardware and other things, reminded that you sell Gargoyle Mobiloil and can correctly fill their lubrication needs.

When a man who drives a car comes in to buy a hammer or a gallon of paint, he may be just on the point of buying Gargoyle Mobiloil. It will mean profit for you and it will please him if you remind him. If you don't, he will likely buy some place else.

A hint to your clerks on this point may not be out of place.

Then, too, you can remind all of your customers that you can *correctly* supply their oil needs by attractive counter and window displays.

Keep your stock of Gargoyle Mobiloil in plain sight. A window display will bring some customers into your store who would not call otherwise. Most motorists know that the red Gargoyle means good lubrication.

Hang the Chart of Recommendations in a conspicuous place on your wall. This shows your customers that you have Gargoyle Mobiloil for every make of automobile, truck, tractor and motor cycle.

The results from reminding motorists constantly that you have Gargoyle Mobiloil for sale, will be a pleasant surprise. Many dealers have increased their business, not only in oils but in everything they sell, in this simple way.

GARGOYLE

Mobiloil

Make the chart your guide

IMPERIAL OIL LIMITED

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargoyle Mobiloil.

Chart of Recommendations

(Abbreviated Edition)

THE correct grades of Gargoyle Mobiloil for engine lubrication of both passenger and commercial cars are specified in the Chart below.

How to Read the Chart:

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
BB means Gargoyle Mobiloil "BB"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

Where different grades are recommended for summer and winter use, the winter recommendation should be followed during the entire period when freezing temperatures may be experienced.

This Chart of Recommendations is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and represents our professional advice on correct automobile lubrication.

ENAMELEDWARE

The **CLEAN** *Ware*

"MARATHON"
Chocolate and White

"PREMIER"
Blue and White

"COLONIAL"
All Grey

THE Davidson "Seal of Durability" on any article of Enameledware is the equivalent of the sterling hallmark on silverware.

It denotes a quality and a workmanship which is recognized everywhere as the best.

The dealer who sells Davidson Enameledware has absolute confidence in it, because of his past experiences.

The housewife who has used it knows that for its wearing qualities alone, it is the most satisfactory Kitchen Ware she has ever used.

So it always pays to carry a full stock of these brands, because they create a steady demand and are, moreover, very profitable lines.

If you are not as yet on our books let us send you a sample order.

Westinghouse Type H Iron

Show Your Customers the Type H Electric Iron's Points of Leadership

Feature The Type H. Iron—It is every inch a leader from the tip of its shiny beveled point to its handy grip plug.

The beveled edge, an exclusive feature, permits the user to look directly down on the work; the broad ironing surface enables a greater volume of ironing to be handled more quickly; the ironing surface heats quickly and evenly; the plug and handle are specially designed for greatest convenience. You will find that these are features women are looking for in irons.

Point them out to-day and you will reap the benefits in an increasing volume of sales.

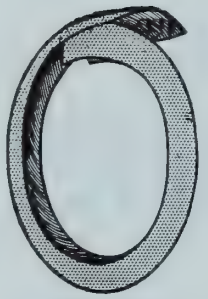
Gain Their Goodwill

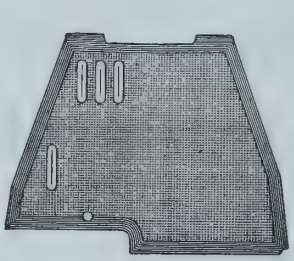
Through

"GUTTA PERCHA"

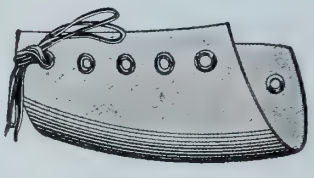
Accessories



Reliners



Windproof Mats (for Fords)



Lace-on Boots

Sealtite Patches

Reliners. Remember these reliners when your tire is young. Have them available for the day when your tire grows old, and the "soft spot" comes, and the days of your tire seem numbered. For these handy reliners applied in time will lengthen the days of your tire and postpone the evil hour of the "blow-out."

Windproof Mats. Sell them all the year 'round. In winter they keep out the icy blasts from below; in summer they prevent odors, heat and dust from coming through the openings for clutch and brake. They fit snugly. Made in suitable styles for Ford Touring Cars, Sedans and Coupes.

Lace-on Boots. Quick, effective first aid when a weak spot begins to cause the motorist anxiety. "Soft spots," "rim cuts," and "cracks" can be protected and prevented from growing worse until permanent repairs are available.

Sealtite and Vulkapatch are insurance against tedious delays on the road. They also help to relieve anxiety and worry by their mere presence in the car when touring. They heal a tube quickly so that it can be used immediately. No special tools are required—just the two hands of the motorist.

"Here is a Real Leader!"

EVERY hardware merchant has one particular tool which he is always glad to sell, because he knows it will not only give him a fair profit at the time of the sale, but it will also create confidence between the buyer and his store.

Disston dealers find that the Disston—"the saw most carpenters use"—is the best leader for a hardware line. When they sell a Disston Saw, they know that the customer will not only be pleased with his purchase, but he will prove it by more business.

Disston makes a great variety of saws, files, and tools, but they are all of one quality. When you sell the Disston line you are selling satisfaction, and satisfaction, as you know, means repeat business.

Sell Starrett Steel Rules

Every machinist knows what it means to try to measure small recesses with an ordinary rule. That's why we brought out this Starrett No. 423 Tempered Steel Rule with Holder. It makes it easy to take accurate measurements anywhere.

Tools that make the machinist's work easy are easiest to sell. More than 2,100 tools of this character are described and illustrated in the Starrett Catalog No. 22 "MA" and special Supplement of New Tools. Write for free copies.

"Gun" Taps

The *Original* Spiral Pointed Taps

GTD "*Gun*" Taps have been on the market 8 years—following a 40 years' search for means to reduce the high cost of tapping holes on "production" jobs. The solution is the shearing motion with which the tap cuts, causing the chips to *curl out ahead* of the tap instead of clogging the flutes. *The degree of efficiency depends on the angle to which the lands are ground, and "hook" of the cutting edge.*

REG. U.S. PAT. OFF. GTD

The flutes can be very shallow, as they are not required for chip passage. Hence the ruggedness of the "*Gun*" tap.

Eight years' experience in determining these small but important relationships for every kind of metal permits us to offer prospective users a tap that will perform almost perfectly—eliminating 90 per cent. of tap breakage and insuring clean, true threads.

GTD products are leaders in their fields—"*Gun*" Taps is one of an extensive line of small tools—send for the complete catalog No. 46A. Your copy is waiting for you.

Sell on Time for Cash

Realizing that the only factor that is limiting the dealer's sales of "BLUEBIRD" washing machines, and keeping him from developing this profitable line of business to the full extent of the market is the inability of the average housewife to pay cash for her machine.

The "Bluebird" Corporation Limited, Brantford, Ont.,

is now prepared to finance the time sales of "BLUEBIRD" Washing Machines for all dealers of good credit rating, without expense to the dealer, assuring him the full cash price of the machine when the sale is made.

The "Bluebird" Plan

Brings to every dealer the unlimited capital and resources to offer time payments freely and gladly to every woman in his community of good credit standing.

Gives the dealer's customers the full advantage of time payments while affording the dealer the full advantage of a cash transaction.

Write at once for details of this important "Bluebird" development

FOLDING FURNITURE

Your Customers Know About "GOLD MEDAL" FOLDING FURNITURE

TRADE MARK REG. U.S. PAT. OFF.

But do They Know Where to Get It?

Through effective advertisements in The Saturday Evening Post and various outdoor publications, the American public has been thoroughly familiarized with the utility, convenience and economy of Gold Medal Folding Furniture. Thousands of inquiries have been received from all parts of the country, as the result of this advertising, indicating a keen popular interest in this well-known line of folding furniture—and indicating, also, that **many people don't know that their local dealers sell this good line.**

Wherever this condition exists, dealers are losing **the advantage to them** of Gold Medal national advertising. Make this advertising work for you. Create the proper tie-up between our advertising and your store by displaying articles of Gold Medal Folding Furniture in your windows and on your floor. List Gold Medal folding cots, porch and lawn chairs, folding tables, etc., in your local advertisements. Let your customers **know** that they can buy from you the articles of folding furniture that they have seen advertised in The Saturday Evening Post and other publications. **It will pay!** Gold Medal advertising is working for you. Why not work **with it?**

No. 71 Fire Pot
List Price Each $27.20
Ask for Discount

RECOMMENDED ALWAYS AS THE BEST

The No. 71 Improved Double Needle Fire Pot produces the highest degree of heat and is smokeless, odorless and noiseless. Either gasoline or kerosene can be burned by changing the Jet Block. Orifice is cleaned by short Needle, long Needle regulates. Burner can not be ruined by forcing the Needle as in other makes, as both Needles are blunt. A pair of 12 lb. coppers can be heated and a pot of metal melted quickly. Practically wind proof. Jobbers supply at factory prices. Send for catalogue.

"I received your sample of Kester Acid Core Wire Solder and have tried it out and like it fine. Have bought a spool of it from my dealer and find that it saves a lot of trouble. All I have to do is to heat my soldering iron and the solder will do the rest.

"I am glad I found your advertisement and sure appreciate it very much."

—JOHN C. BUCK
Harrison, Neb.

APPLY the heat—and from the inside of the *hollow* Kester Acid Core Wire Solder, the acid will run on to the article you are soldering. After it—*always* after it—will come the solder, it's perfect flux formed. Remember, it's simply high grade flux and high grade solder—the same as you are using now, but far, far easier to apply. Fill out the coupon below and get a free sample to try for yourself.

In the illustration below the black spot indicates the flux that fills the inside of the hollow wire solder. Notice the crimps in the solder shown above. They keep the flux from running out except as you wish to use it, and keep the amounts of flux and solder always in proper proportion.

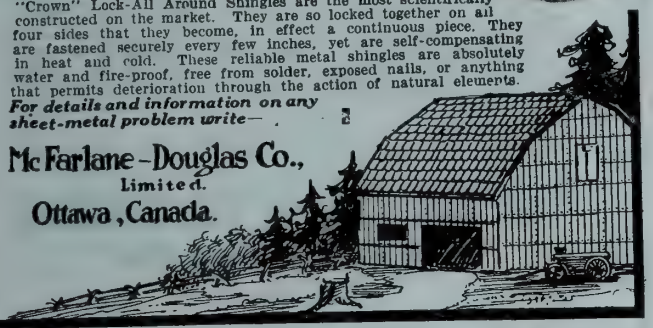
"CROWN" METAL SHINGLES

Securely Locked On All Four Sides

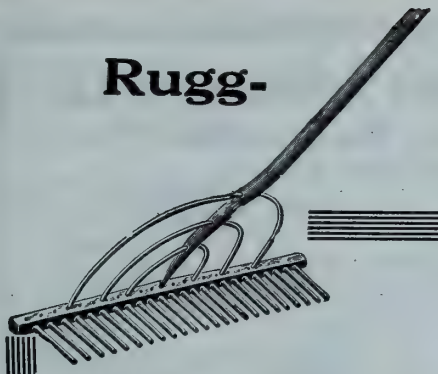
"Crown" Lock-All Around Shingles are the most scientifically constructed on the market. They are so locked together on all four sides that they become, in effect a continuous piece. They are fastened securely every few inches, yet are self-compensating in heat and cold. These reliable metal shingles are absolutely water and fire-proof, free from solder, exposed nails, or anything that permits deterioration through the action of natural elements.

For details and information on any sheet-metal problem write—



McFarlane-Douglas Co.,
Limited.
Ottawa, Canada.

Rugg-Ball



Hay and Lawn Rakes

These beautiful, well-made rakes are made of the best White Ash and Maple stock. The teeth have no shoulder; each tooth is pinned in place, which makes the lightest, strongest rake made.

STEEL TUBE BOW RAKES

are made with bows of light, cold rolled steel tubing ¼ inch in diameter, bent the same shape, and fastened in the same way, as the common wood bows, the weight also being practically the same. They are varnished to prevent rusting and are warranted never to break. Especially desirable for export, as they can be easily set up without breaking the bows.

You Should Increase

Your Egg Filler Business

Always recommend fresh fillers be used for every shipment — it's the only way your customers can be sure the eggs will reach the market in proper condition.

Used fillers absorb the odor given off by new-laid eggs—and egg shells are porous, susceptible to surrounding odors. Eggs shipped in used fillers become tainted—can't help but be.

You owe it to your customers—and the public—to see that they use fresh fillers in every shipment.

Extension Brood Coop **Wrico** Safeguards the Chicks Admits Light & Air

Pulled Out

A profitable investment for poultry breeders. No lost, stolen, strayed or sick chicks to figure up against the profits.

The extension is made of heavy ½-inch mesh wire cloth, re-galvanized, so the wires will not spread apart.

In fine weather the cage portion is pulled out, giving the hen and chicks double area to roam—untrammelled s ratching privileges—and all the advantages of a natural open air life—yet isolated from the flock. and protected from depredating animals—such as rats, cats, dogs and WEASELS.

In bad weather, or during cold nights, the closed coop offers a safe, snug, warm harbor for the hen and her family.

The total length of the extended coop is 46 inches, and the sliding edge of extension being set in a groove, it can be closed without the least trouble, or danger to the occupants, by simply pushing it in.

The sanitary advantages of this simple and convenient arrangement will be immediately obvious to all modern poultry breeders. The extension locks at any range you wish.

WRICO Extension Brood Coops are shipped nested 3 in a crate. It is only a matter of a few seconds to set them up.

Height	Length Extended	Length Closed	Width	Weight of 3 Crated
18½ inches	46 inches	24 inches	20 inches	70 lbs.

Are Your Salesmen Sold on Advertising?

If your advertising opens doors and paves the way for economic selling, if it's the type that also digs up unknown prospects and influences repeat orders—then certainly your salesmen will be enthusiastic about it.

That's why so many salesmen stand behind Business Paper Advertising. They know that it goes direct to the men they have to reach, they appreciate that its value far exceeds its cost, they realize that its appeal is not a mere flamboyant call for public recognition but a concentrated business message to actual buyers.

Business Paper Advertising travels the same route as the businesslike salesmen. There are publications for every type of business, reaching the most productive fields. Hardware and Metal reaches the hardware trade of Canada.

Experienced travelling salesmen will invariably recommend the use of Hardware and Metal to reach the Canadian hardware trade.

Broad Fluctuation in Hardware Prices

Hardware Buyers Faced With Market Which Reflects Changes in Most Unexpected Directions and Shows Prices Continuing to Move in Both Directions—Careful Study of Market Conditions Is Imperative

DURING RECENT weeks the general trend of hardware prices has registered a distinct upward tendency, with several important advances having been announced. Additional increases on bar iron and steel, galvanized, and blue annealed sheets, offer a direct example of the prevailing movement which is expected to be reflected in many other channels. This development also constitutes a halt in the easier market tendency that has been more or less pronounced on hardware commodities in general throughout the past fifteen to eighteen months, and indicates that further price variations are likely to be experienced before pre-war quotations can again govern the hardware field. Although the prevailing firmness in price is in many instances considered to be of a temporary nature, yet such a movement at the same time is generally in keeping with the more conservative predictions expressed regarding the future trend of hardware quotations, showing a gradual decline spread over a period of years, interposed here and there with upward market movements.

Throughout the year 1921, and also for the first few months of the present year, announcements of recessions and declines in hardware prices followed one another in rapid succession. As pointed out in a previous issue, the extent of these reductions were pointedly marked in a number of lines, while on some commodities several changes of this nature were recorded until hardware markets generally have been substantially liquidated and the confidence of the buyer in trade conditions had been once again restored to a more normal basis. The result of these more or less gradual changes has been a steady improvement in the volume of business recorded in both manufacturing and wholesale, as well as retail circles, which in combination with a revival in the quantity and number of current purchases, has culminated in the general establishment of brisk activity throughout the hardware trade with many apparent indications of a moderately successful season.

Keen competition for prevailing business has introduced some degree of unsettlement in the market for certain lines, but on the other hand, the improved demand for basic materials such as steel, has brought about a much stronger tone in many directions, particularly manufactured steel products.

Factors in the Situation

Several causes are pointed out as contributing toward this slight upward turn in the average price of hardware, among them being the seasonal trade improvement usually experienced at this time of the year; the fact that the many previous reductions in hardware have been more forcibly brought to the attention of the buying public with a consequent enlarged purchasing movement on their part; the indirect reflection of the coal strike in prices on steel and iron which constitute the raw material for an extensive number of hardware lines, and also the recently announced budget revisions with the increased sales tax and its component developments.

While price reductions on several specific lines continue to become apparent week by week, the number of such changes is noticeably smaller than heretofore, with such revisions being principally of a minor character. On the other hand, increased quotations are recently evident in such important fields as ingot metals, scrap materials, bar iron products, galvanized and black sheets, as well as many kindred items which form the basic elements in hardware markets and are reflected in the future tendency on a much wider range of finished goods. Gasoline, fuel oil, turpentine, wrapping twines, spades, shovels and scoops, iron rivets and burrs, paris green, cotton cordage, brass and copper tubing, brass sheets, copper rods, and blue annealed sheets, are other lines included in the budget of higher prices, while ranged alongside are the numerous price changes being put into effect by manufacturers and wholesalers who are going over their stocks and readjusting prices on same to take care of the advance in sales tax. It is stated that this movement will most likely continue for several weeks, but neither advances nor declines are expected to be of an extensive nature. The chief cause of this latter movement is attributed to instances where the sales tax was previously being absorbed by the wholesalers in an effort to maintain uniform resale price levels, a policy which cannot now be retained in view of the extent to which this burden has been increased.

Minor Reductions on Some Lines

Reductions in price on specific hardware lines, however, are expected to be evident from time to time, as illustrated by the recent declines on galvanized and aluminum wares, certain makes of metallics and paper shot shells, auto casings and tubes, wool packings, game traps, boiler tubes, cold blast lanterns, asbestos paper, lantern globes, electric bulbs, linseed oil, wood handles, and many lines of imported hardware. One wholesaler stated to Hardware and Metal, that in revising prices on some of their goods owing to the tariff and sales tax changes, they had found that minor reductions could be effected which had been previously overlooked, while passing on the sales tax in other instances, showed similar instances where upward revisions were in order.

The opinion has frequently been expressed to Hardware and Metal, by both manufacturers and wholesalers, but particularly the latter, that market uncertainty is a thing to be strictly avoided, if possible. Experience during the past two ...rs has illustrated the fact that price uncertainty on any product absorbs the confidence of the buyer to an alarming

British Mills Winning Back Canadian Tin Plate Business

Recent Imports of Tin Plate From Britain Indicate Big Increase in Volume While Imports From U.S. Decline—British Mills More Favored in World's Export Trade in Tin Plate

THE IMPORTANT Canadian tin-plate market, long considered a natural monopoly of the United States producers, has been favoring Great Britain recently by taking a substantial tonnage from the mother country. At the same time, the U. S. shipments to Canada are falling off noticeably. In the first four months of 1922 British tin-plate exports to Canada have surpassed even pre-war rates, totalling 18,399 tons, or about 4,500 tons monthly, as compared with 9,889 tons in the entire calendar year 1913. The American shipments to Canada, however, were less than 2,000 tons in each of the first two months this year, 2,196 tons in March, and only 1,285 tons in April, as against an average of 4,800 tons monthly in January-April, 1913.

Speaking of this situation and the general tin-plate trade revival in Great Britain, an official of a prominent Welsh tin-plate firm said: "By lowering costs in all directions British manufacturers have been able to get down to a strongly competitive basis. For the last six months the tin-plate works of South Wales have been turning out from 60 to 70 per cent. of their capacity, and there is every prospect that this will be maintained. Taking into consideration the depression in some other industries, this is quite satisfactory. With the exception of Central Europe, which is not buying at all, the industry has been able to retain all its old customers, and trade is especially active with the Far East. Until Central Europe starts to buy again, however, we can hardly hope to get up to our full capacity. A most reassuring feature is that we are getting back the Canadian market which we had lost to the Americans previous to the war."

This situation is well authenticated by a reference to recent trade statistics showing comparison between British and American trade with Canada in tin-plate. Imports from Britain in the four months January to April of this year total 18,399 tons compared with 694 tons in the same period last year. This is compared with a falling off in imports of U. S. tinplate of from 20,742 tons in 1920 and 10,450 tons in 1921 to 6,929 tons in this period 1922. The estimated imports for 1922 from present indications is 55,000 tons from Britain compared with 3,126 last year, and 21,000 tons from the United States compared with 24,045 last year and 63,000 tons in 1920. These quantities are expressed in tons of 2,240 pounds.

That British tin plate is being well received throughout the world's markets is indicated by the fact that total exports from that country total 143,000 tons for the first four months of 1922 compared with 85,000 tons last year in the same period whereas exports of U. S. tinplate have fallen off in that period from 70,058 tons in 1921 to 30,741 in the first four months of 1922. Estimates for the present year show an increase in British exports from 226,000 tons to 430,000 tons while total U. S. exports fall from 107,000 tons in four months of 1921 to 90,000 in the same period this year.

INTRODUCE NEW SERVICE

Kitchener, Ont.—Wm. Knell and Co., hardware merchants and plumbers, have introduced a novel service in connection with their business. They have had equipped a motor truck that proves helpful in service. The truck is covered and in the rear of the drivers seat is a fully equipped repair outfit. The interior resembles a minature wareroom small boxes or pigeon holes being arranged along each side. When any of the workmen are called out to a job they carry with them everything that would be required to complete a job no matter how small or how big. There are nipples, elbows, unions, tees, piping, wrenches, pie cutters, threaders in fact everything that is used on the most exacting job.

Handy Computation Table For Sales Tax

MANY of the salesmen in the retail stores are finding that it takes a good amount of time to figure the two and a quarter per cent. sales tax, and, as well as taking up the salesmen's time, it delays the customer, who if in a hurry soon shows signs of impatience. W. H. Thorne & Co., Ltd., hardware merchants of St. John, N.B., have now in use a handy ready reckoner for the use of their clerks. C. O. Morris, the traffic manager for this firm, spent some time in compiling this ready reckoner, which has been found to be most useful. Every clerk has a copy, and a copy is in the possession of the office staff who require it. The table is as follows, and can be used in many ways, for any amounts. It would be a good plan for all hardware merchants to cut out this copy, and paste it on a sheet of heavy cardboard. It will be found to be a great time saver, both for customers and merchants.

How Amended Tariff Regulations Affect Hardware Lines Imported From Europe

Minister of Finance Says, "We Have Approached Subject of Unfair Competition of Imported Lines in Different Way and Perhaps Shall Reach the Same Purpose"—Trading With European Hardware Producers Is Still Somewhat Speculative

IN THE modification of the original budget proposals the Minister of Finance has a plan of preventing certain European goods coming into Canada in unfair competition with domestic manufacturers with the present deflated state of their currency. The new proposal, while entirely different from last year, is aimed in the same direction, and the practicability of the new scheme of checking the flow of goods from Germany of any other country with depreciated currency will be watched with interest. To quote Mr. Fielding: "We have approached the subject in a different way and perhaps we shall reach the same purpose."

It is proposed to make the value for duty not 50 per cent. of the par value of the mark, but the value of similar goods produced and sold in Great Britain. The value is to be the English value. The German is not to be permitted to sell his goods in Canada, so far as the customs is concerned, at a lower price than the Britisher.

Effect on Hardware

Discussing these provisions, and the report that certain lines, especially cutlery, were entering the Canadian market from this source at ridiculously low prices, a selling agent in Montreal stated that while in the past they had been able to purchase at price levels which were extremely low, the condition of the German market was somewhat different to-day. Trading with Germany at present is on a purely speculative basis, and the relation between currency depreciation and price appreciation is manifest on acknowledgment of orders now being received. It has become increasingly difficult during the past few months for Germany to guarantee prices for future delivery, or to observe contracts if promised. For this reason orders are held up, and acknowledgements, while quoting existing price levels at time order was placed, state that goods will be shipped at quotations ruling when delivery can be made. On many items the price paid is doubled and even tripled when shipment is made.

It is said to be realized by importers that the system of shifting prices is inevitable in Germany as long as the violent fluctuations and the consistent depreciation of the mark continue. It is also remembered that no system of selling in high exchange currencies can relieve manufacturers of the virtual necessity of changing prices, and that there will continue to be a speculative element in purchases for future deliveries.

Price Trend on German Iron And Steel

Pig Iron-Marks Per Ton

Items—	Pre-War	Jan. 1, 1919	May 1, 1920	May 1, 1921	Nov. 1, 1921	Dec. 1, 1921	Mar. 1, 1922	Apr. 1, 1922
Hematite. .	79.50	314.50	2,350.50	1,816.00	2,700.00	3,891.00	4,744.00	6,264.00
Pig iron I .	75.50	250.00	1,790.50	1,560.00	2,200.00	3,326.00	4,212.00	5,549.00
Pig Iron II .	70.50	249.00	1,789.50	1,484.00	2,124.00	3,250.00	4,130.00	5,437.00

IRON AND STEEL

As in the case of pig iron, the German prices for iron and steel have shown a steady increase during the past few months. This increase is shown in the following table:

(Marks per ton)

Items—	Pre-War	Oct. 20 1921	Dec. 1, 1921	Mar. 1, 1922	Apr. 1, 1922
Ingots	82.50	2,435.00	3,830.00	5,320.00	7,170.00
Blooms	87.50	2,655.00	4,130.00	5,770.00	7,775.00
Sheet bars	97.50	2,725.00	4,330.00	6,085.00	8,200.00
Billets	95.00	2,725.00	4,230.00	5,945.00	8,010.00
Shapes	110.00	3,150.00	4,930.00	6,920.00	9,325.00
Merchant bars	97.99	3,200.00	5,030.00	7,050.00	9,500.00
Hoop iron	105.00	3,585.00	5,530.00	7,750.00	10,580.00
Wire rods	117.50	3,500.00	5,430.00	7,515.00	10,265.00
Thin sheets	125.00	4,400.00	6,680.00	9,375.00	12,770.00
Medium sheets	110.00	4,300.00	6,030.00	8,910.00	12,140.00
Heavy sheets	105.00	3,500.00	5,630.00	7,805.00	10,650.00

Productive Costs on the Increase

The cost of producing goods in Germany is on the increase. Continual wage advances and the increase in the cost of coal and other domestic raw materials is reflected on the prices of finished products from time to time. As an example of this; since May, 1921, the German price of pig iron has shown a steady increase. The table on this page shows the price of this commodity in 1921 and 1922, as compared with prewar levels; also the price trend on German iron and steel.

SPENDS 1 PER CENT. GROSS TURNOVER ON ADVERTISING

With further reference to the subject of advertising appropriation, as outlined fully in last week's issue of Hardware and Metal, a Maritime hardware firm advises as follows:

"We do not set aside any set amount for advertising, but regulate the expenditure as we think the occasion demands. We might say that last year we spent on newspaper, magazine and program advertising together with an advertising service (for cuts, etc.) something over 1 per cent. of our gross retail turnover. In this we are not including an automobile accessory catalog which we issued, but is not an annual expense nor have we included donations or gifts to charity under this head, although we know that a great many do. Our show window expenses have never been included either. However, it is somewhat hard for us to compute this on a percentage basis as no doubt some of the above goes to our wholesale department. We do not consider this percentage high, in fact, doubt if double the amount would be. Although business last year was probably not up to some preceding years we did not attempt to cut down on this item, on the other hand we gave more thought to it than ever before. No salary is included in above."

COLLECTIONS IMPROVING

A point of more than ordinary significance is the fact that reports covering collections show an improvement in this direction. While numerous rural districts record collections as just fair, and a few still show them as slow, several districts are now listed as good in this respect.

Hardware Lines Necessary Accessories for the Dominion Day Outing Trade

Many Lines of Hardware Can Be Sold to the Sport Enthusiast, Motorist and Others in Connection With Plans for the First Mid-Summer Holiday on July 1—Linking Up With Current Events Gives a "Punch" to the Display and Increases the Cash Receipts

MANY opportunities for additional business are presented to the hardware store at this season of the year, and especially at holiday periods such as Dominion Day. In addition to the ordinary indulgence in summer pastimes with its demand for sporting equipment, the facility of the automobile has introduced the summer custom of 'outings,' or short travels over the week-end, a practice which is now being planned for and indulged in during National summer holidays or a more extensive scale than was previously thought possible. The movement is spreading among all classes, however, and while these fishing trips and camping parties are particularly popular in cities and towns—no doubt due to the scarcity of suitable opportunities for indulging in such pastimes—yet they also form a common and universal method of enjoyable holiday participation.

Equipment for Holiday Seekers

Here is another channel of trade for the hardware merchant. A notable collection of goods carried in stock offer themselves as useful units in the equipment of the seeker after holiday pleasures. First in mind comes the luncheon kit, with thermos flask and other useful containers. Built along similar lines and with a uniform purpose, is the universal picnic basket with specialized crockery and cooking utensils. Air cushions and air matresses, which can be inflated at will with the tire pump from the car, also arrest attention, while tents, folding camp furniture, flashlights, sweater and numerous miscellaneous articles can be numbered in this list. The range of

—ON THE WAY

"opportunity" also includes many sporting goods, an assortment of fishing tackle containing a direct appeal to both the true sportsman and the enthusiastic novice. Do not neglect golf requisites in this category of holiday equipment, and baseball has a following all its own. Bats and balls for youngsters and picnickers of practically all ages must also be included, while auto accessories for the motorist contain a wide variety of possibilities from the tire patch outfit and extra tools, to the spare tire with rim and a spotlight for facilitating driving on dark country roads. Hunting or outing jackets and costumes can be applicably grouped, together with numerous minor accessories such as hatchet, jackknife, "corkscrew," iron grill, fire ligher and so forth. For the vacationist, rifles, shotguns and ammunition can be displayed to advantage, while road-maps are frequently in demand.

Foster "Outing" Idea

With suitable methods of display and advertising, the attention of the public is secured and not only is the "outing" idea fostered in many minds through seeing a tastefully decorated window at this season, but these suggestions frequently open up a new and previously unacknowledged channel of holiday diversion. Backing up an attractive window display based on the holiday outing, with showcards and local ads of a specific nature has achieved worthy success in trade of this class for many merchants.

The following are some suggestions for either showcards or local advertising which has proven their worth as business getters:

"Dominion Day Holiday—Revel in the youthful pastime of a combined auto camping & fishing trip. Dominion Day affords you this opportunity. All necessary supplies, from the bait for your fishing tackle to the lighter for your camp-fire."

Having foreseen the extra possibilities for business through a summer holiday such as Dominion Day being calendared on a Saturday, thus making more extended trips possible, a retail hardware man might appeal to his customers as follows:

For the Motorist

"Mr. Car Owner, perhaps YOU have been caught on a lonely road, after dark, with a carburetor that refused to recognize your desire to hurry home. When there was nothing else to do but make a night of it where you were, with the help of a fire, some rugs from the car and such food as remained in the picnic basket. How comfortable it would have been IF you had possessed a little equipment—a light tent, folding bed, some cooking utensils. Then it would be great fun. You would have felt like a boy again. Repeat the Stunt this Holiday. Visit the country with the family, but first call at JONES Hardware, and secure the lunch kits, an air mattress, camp table, a tent, and other things which ensure a Real Good Time."

Appeal to Tired Business Man

Again, a city retailer no doubt recognizes the inherent desire of the tired business man for an exhiliarating breath of country air, often through personal experience, so he could frame the following appeal:

"The Call of the Outdoors: The Longing for Green Grass and Blue Skies:

BE PATRIOTIC ON DOMINION DAY

Fly your country's flag and help spread that spirit of patriotism which is typical of the Canadian.

THEN take an outing where nature beckons and enjoy that scenic beauty which you are denied, most of the year.

Let us fill your requirements in flags, camping and automobile equipment, sport goods, etc.

JONES HARDWARE

OUTDOORS CALLS YOU ON DOMINION DAY

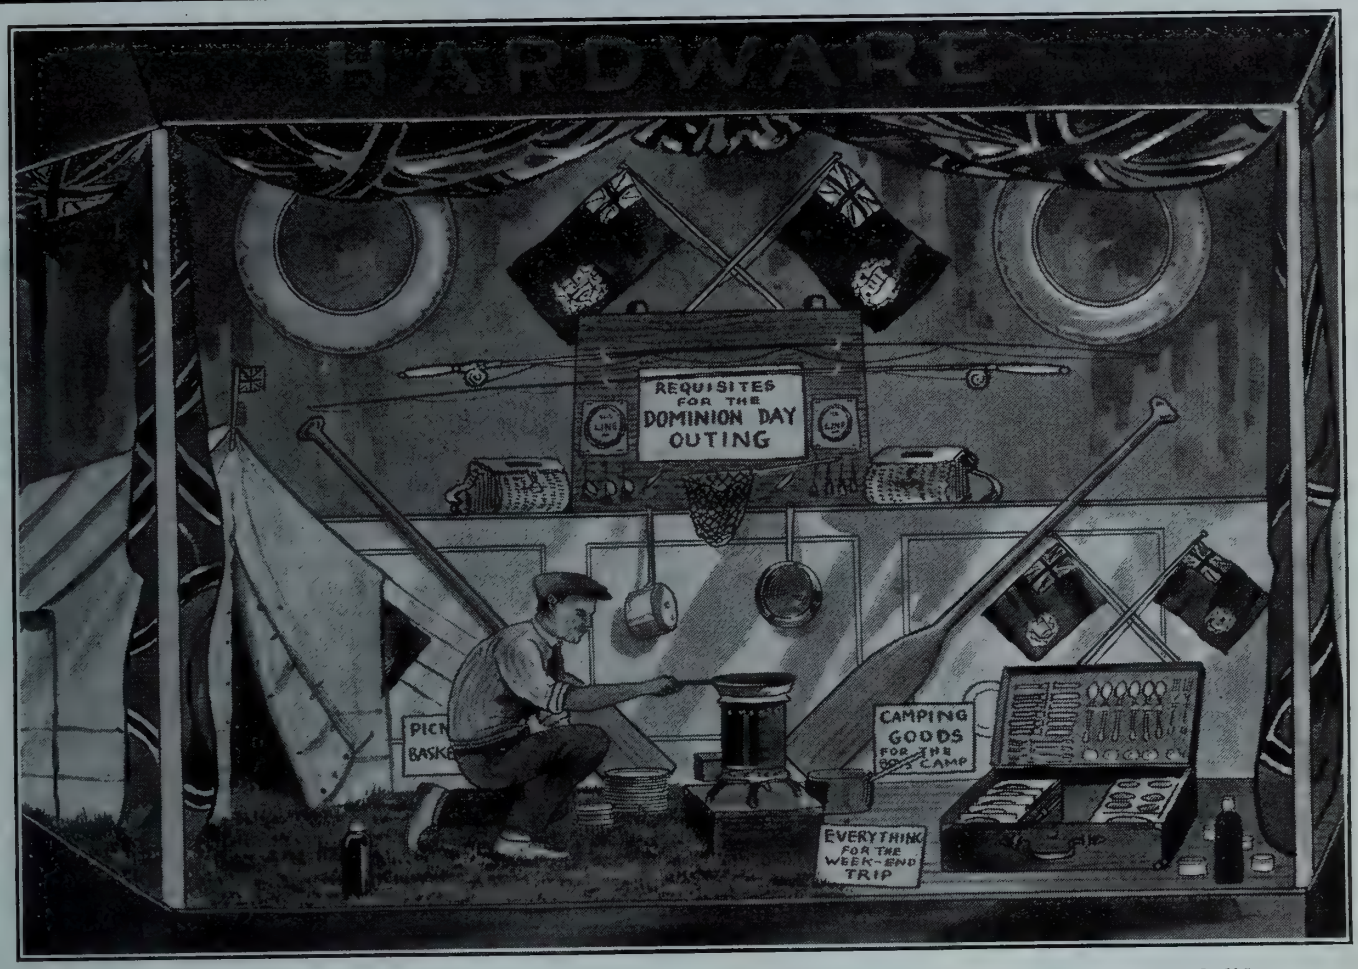
Your longing for green grass and blue skies, the quiet backwoods with its dark streams, may be satisfied over Dominion Day week-end.

Take advantage of the best mid-summer holiday for an invigorating outing.

We can supply your requirements for sporting goods, automobile or camping supplies.

JONES HARDWARE

For Your Dominion Day Hardware Display



Suggestive display of suitable lines of hardware to appeal to those who will take advantage of the holiday on July 1 to go away on motor tours, fishing or camping trips, or for those who are enthusiastic "sports" who await complete indulgence in their favorite sports on the first mid-summer holiday. Certain fish are at their best at this season, the boating season is just then getting under way, and for these and other reasons now is the time to plan on a display which will stimulate buying of seasonable lines. Above scene depicts something of a natural setting to attract attention and interest, and the liberal use of flags and bunting sounds a patriotic note applicable to Dominion Day. The display is designed so that it can be arranged with a minimum of difficulty and expense. The lines to be shown will naturally vary according to local requirements

That overpowering instinct to land a 'whopper' with rod or troll.—Satisfy these desires by indulging in auto camping. Have you tried it? Come to JONES Hardware, we can supply all requirements."

Or another attention arrester might be framed after the following:

"Beautiful scenery: Invigorating air: Nature's refreshing sweetness:—All easily obtainable by 'Getting Out-of-doors this Holiday.' Our camp kits and luncheon outfits, especially designed for family parties, enhance the pleasure of 'outing' life. Our 'travelogue' department fully equipped in anticipation of your wants."

B.C. Board R.M.A. Will Meet in July

Vancouver, June 20.—The annual convention of the B. C. Board Retail Merchants' Association of Canada will be held in Victoria on the 12th and 13th of July next. Speakers at this convention will include Dr. W. J. Hindley, the educational director of the Washington State Retailers' Association and Johnston Stewart, secretary of the Seattle Retail Merchants' Association. Many subjects of vital interest to retailers generally will be discussed at this convention.

Speaking to the retail merchants at their weekly luncheon the other day, Daryl Kent, treasurer of the B. C. Board took occasion to comment on an assertion that he stated had been made, to the effect that the work of the association in the past few years had been too negative.

"In some measure the statement that our work has been negative, is true," he said. "We have passed, however, through some unusual times. It would have ill behooved us to rally round and devote all our time and effort to stimulate buying, and speed up business when over-buying and too high speed business was the basis of our troubles.

Patterns for Forge Hood

By O. W. KOTHE, Principal, St. Louis Technical Institute, St. Louis, Missouri

RESPONDING to inquiry for a forge hood according to sketch; the enclosed layout will give the proper solution.

The first step is to design the elevation giving it the height from base to collar a, and then to set in the hood line a-b to the angle desired for giving the proper projection.

Next sketch in the curve b-c-e-f-6″. This is largely done at pleasure, or what you feel the curvature should be.

After this, describe the section A and divide in equal parts and drop lines to the collar line a.

Then describe the section B, to a radius to suit the radius at the back of the forge. In this case, we use center x, but in practice we establish this form from what the forge would measure to.

By continuing the hood line a-b to the base line as in point 14, we first consider this problem as a transition piece.

Now, since the majority of the base is cut away, we can use the same radius and set it in 14-y, and describe that quarter circle.

Observe this insures the hood having a full opening, and this method saves developing a plan and much other geometrical construction which will not give any better results.

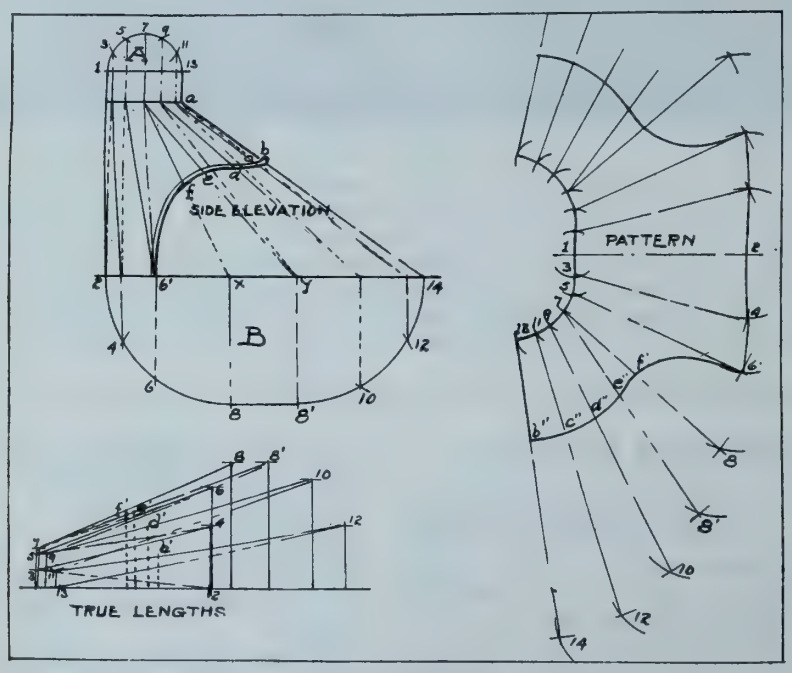
After section B is established and the points are set in, and lines are drawn in the triangular fashion in elevation, we are ready to develop the true lengths.

This is done by drawing a base line, and picking the elevation lines and setting them horizontally on this line always working from one point to another. Then at their ends we erect sectional lines equal to those in A-B. This enables drawing the slant lines in diagram and gives us the true lengths. The pattern for the entire transom piece can then be laid out using the girth spaces from A and B as numbered points show. This pattern is developed the same as any taper joint off center, or oblong to round off center.

Then when the outlines 1-2; 13-14 are established the connecting lines are drawn as shown. Now to cut in the curved shape for the hood you can pick these elevation lines as a-b from elevator and set them as 13-b″ in pattern. Next pick lines 12-c, 10-d, 8′-e; 8-f from elevation and set them on the horizontal line in diagram using base points 12-10-8′ and 8, which enables drawing the dotted lines as shown. Observe these dotted lines cut off the full lines 11-12; 9-10; 7-8′; 7-8 as in points c′-d′-e′-f′. Next the distances as 11-c′ +9-d″; 7 e″; 7-f″ and set the min pattern as 11-c″; 9-d″; 7-e″; 7 f″.

This gives these points in pattern where the lower transition is to be cut away.

After this the curve is sketched in as shown. When the workman has made several of these hoods he can easily pick a-b from elevation and set in patterns as b″ and then sketch in free handed the remaining curve to point 6. Any curve would be suitable just as both sides are uniform. Edges for riveting and wiring must be allowed extra.



Patterns for Forge Hood

BROAD FLUCTUATION IN HARDWARE PRICES

(Continued from page 29)

degree, this being generally applicable to the consumer element as well as the retail purchaser. And while the future trend of many hardware prices remains more or less indefinite, yet the immediate seasonal quotation has recently been carefully established and adhered to in a large number of instances. The spreading of this policy has encouraged the merchant to stock seasonal lines with confidence, instead of buying for immediate requirements only and chiefly relying on rush orders. The lessons of the past few seasons, however, have generally resulted in a cautious attitude being adopted by the large majority of retail purchasers, which was described by one wholesaler as a creditable factor, for it enabled the retailer to survive the storms and successfully navigate his craft through the tempestuous seas of modern merchandising, whereas unrestricted buying in large quantities while bringing temporary trade to the manufacturer and distributor, in the end generally meant disaster in a business sense.

Lower Freights May Help

The movement to lower production costs has steadily progressed in manufacturing circles, although it is more or less freely stated that lower freight rates would constitute a big step in this direction. The recent announcement by the American Interstate Commerce Commission of a ten per cent. reduction in transportation costs, effective July 1, covering U. S. railroads, is taken in some quarters as indicative of what may eventually materialize on Canadian lines, as suggested in the present Canadian railway proposal to lower rates on pig iron, billets, blooms, wire rods, scrap iron, and ores by 16½ per cent. and twenty per cent., west and east of the Great Lakes respectively. On the other hand, some time must necessarily elapse before any easing of costs in this direction would be apparent in the finished manufactured article, and its extent and effect on individual products would naturally be of an extremely small character.

Wholesalers point out that distributing costs remain necessarily high, due to the prevalence of small and rush orders on the part of retailers generally, this custom serving to develop a false hum of activity in warehouses and shipping departments in many instances. During recent weeks, however, commitments are stated to be in larger volume, which has balanced this condition on a normal plane, as well as being indicative of the improved trade in retail circles and the restoration of confidencee throughout the trade in general.

Would Restrict Stocking Explosives

New Bill Introduced at Ottawa Would Locate All Factories Or Magazines for Storing Explosives At Least Two Miles From Any Other Building—Would Affect New Merchants or Retailers Stocking Explosives For First Time

By Ottawa Representative of Hardware and Metal

WERE it not for the fact that it is likely to die a natural death, the hardware trade might be called upon to take some action in connection with a bill which has been introduced in the Senate at Ottawa, to amend the Explosive Act. This bill, which has received its first reading, provides that in future all magazines must be located at least two miles away from any other building, structure or premises. This would not affect those magazines already established, but it would hit the new merchant or the man already in business who decided to carry explosives. The proposed amendment reads as follows:—

1. Section seven of The Explosives Act, chapter thirty-one of the statutes of 1914 is hereby amended by adding thereto the following as subsection (3) thereof:—

"(3) Notwithstanding any other provision contained in this Act, no regulation made by the Governor in Council under this Act shall authorize the issue of, and the Minister shall not issue any license for, the establishment, location or maintenance of a factory or magazine within two miles of any other building, structure, or premises, except licenses for continuing the maintenance of such factories or magazines as have been established, located and maintained under licenses issued before the date of the coming into force of this subsection."

The chances of the bill being withdrawn or going over to next session are good, as will be gleaned from the following discussion which took place in the Senate last Friday:—

Hon. Sir James Lougheed: Honourable gentlemen, I pointed out to my honourable friend (Hon. Mr. Dandurand) a few days ago the desirability of the Government taking control of a Bill of this kind. It is a public Bill. It has to do with security of life and property on a very large scale.

Hon. Mr. Belcourt: What does the Bill provide for?

Hon. Mr. Dandurand. It provides for the limitation of the area within which a magazine may be located.

Hon. Sir James Lougheed: It provides for licensing. The marginal note reads:

Factories and magazines licensed after this subsection comes into force not to be within two miles of any other buildings.

Hon. Mr. Belcourt: Does that restrict or enlarge the area?

Hon. Mr. Dandurand: It enlarges the forbidden area.

Hon. Sir James Lougheed: It apparrently places a restriction upon the issuance of licenses. Still it involves such very important considerations that I think the Government should take charge of it.

Hon. Mr. Dandurand: I took up the matter with the chief of the branch of the Interior Department concerned, and they suggest that this Bill if given second reading, should be sent to a Standing Committee or a Special Committee, so that they might have the privilege of giving their views. I have had a lengthy interview with them, and it was my intention to suggest that the Bill be sent to the Private Bills Committee if it passed the second reading. The honourable Senator for Rigaud (Hon. Mr. Boyer) has realized that the Bill cannot go on the statute book this session, and I think he is hesitating about moving the second reading. That is why I suggest that the Order be deferred to Thursday next. The Bill may then be dropped for this Session.

Hardware Trade With Argentine Is Growing

Considerable Trade in Binder Twine, Pneumatic Tires and General Hardware Being Developed With South American Republic

A LOT has been said lately about need for finding new markets for Canadian products and developing the old ones more extensively. The possibilities offered by the Argentine Republic, insofar as establishing a market for Canadian hardware in that country is concerned, are dealt with herein.

One has a tendency to think that the Argentine market is so far from Canada, and so keenly competed for, that the Dominion would have no chance. "This is not the case however," states Mr. Pease, vice-president Royal Bank of Canada, who has been there and investigated the matter for himself. "Canadian agricultural implements are sold in quantity, and have been for some time. Binder twine is one of our important exports to Argentine. Canadian automobiles and automobile tires are bought in some quantity. It is extremely interesting to note that certain of our steel products, are to-day sold to the Argentine republic at lower prices than those quoted by the United States and Europe."

In terms of Canadian dollars, the total foreign trade of the Argentine republic was valued at over $1,250,000,000 in 1921. Canada has established a considerable market for binder twine in the Argentine since the close of the war. From 1914 to 1918 not a pound of this commodity was sold in that country, but in the fiscal year ending March, 1919 we sold $552,681 worth of binder twine there. The following year saw an amazing increase, viz.: $1,261,364 worth.

In the last two years the Argentine has purchased large quantities of agricultural implements in the Dominion.

We have not since the beginning of the war sold the Argentine any bolts and nuts, nor any nails, brads, spikes or tacks. Under the heading hardware n. o. p., purchases in Canada since 1914 have not amounted to a great deal except in 1919 when the total amounted to $44,000. This fell in 1920 to $254 in 1921 to $4,487 and in 1922 to $318.

Canada has been making a fairly respectable showing in regard to the sale of pneumatic tires to the Argentine. The trade in this regard during the war years was nil, but in 1920 it amounted to $329,842 and in 1921 to $392,855. There was slight falling off in the last fiscal year, the total being $28,877.

Lower Freights on Basic Steel Markets

A CONSIDERABLE decline is noted in Canadian production of pig iron in May, figures indicating a decline to the lowest level reached in several years with a tonnage of but 23,363 tons. Of this about 73 per cent. was foundry and malleable iron intended for direct sale while 17 per cent. was chiefly basic iron used by producing companies. Production until June 1 this year shows a 36 per cent. reduction compared with last year. It is significant that pig iron production in the U. S. in the same period shows considerable increase. The enforced use of high-priced coal due to the coal strike has caused a strengthening of prices. Some uncertainty is now hovering over the market in Canada until the effect of reductions in freight rates on ore, pig iron, billets, blooms, wire rods and scrap iron is known. This reduction amounts to 16.66 per cent. west of the Great Lakes and 20 per cent. east of the lakes. For a long time freight rates have been pointed to as the one barrier to lower iron and steel prices so the effect of the present reductions will be watched with interest.

Difficult Time for Buyers

HARDWARE PRICES continue this week to undergo wide fluctuation thus rendering very necessary a close study of the market items in each issue of Hardware and Metal. Following upon the prolonged period of hand to mouth buying, with restricted stocks in the hands of distributors and many industries working at greatly reduced output, has come another stage in the period of readjustment which is a decidedly difficult one for retailers. Prices to-day are moving in both directions. This week this tendency is continued with advances on small iron rivets, burrs and very firm prices on bolts and nuts with distributors placing orders in anticipation of an advance. Some distributors also anticipate another advance on bar iron and steel if present activity in trade is maintained. On the other hand there is a considerable reduction in tires, lantern globes, rim locks. At the same time there are frequent fluctuations from week to week in other lines such, for instance, as linsed oil which declined last week and advanced back to its former level this week. The decline on tires as noted might be taken as noteworthy in view of the fact that cotton has advanced and cotton cordage is advancing.

It is difficult sometimes for the layman to understand why such movements are taking place in prices. No one is able to give an absolutely authoritative prediction on such movements because, as in the case of cotton cordage and tires, prices on the finished product have moved in two opposite directions while both would ordinarily be influenced by the same advance in the raw material entering into each, all other things being equal. It serves to emphasize the necessity of keeping in close touch with the comment on probable price movements as outlined each week in this paper. As mentioned it is a difficult time for buyers of hardware who do not study the market. There does not seem to be any definite tendency either upward or downward such as was the case during the boom years and the depression which followed, and to-day there are big factors such as tax and tariff changes, freight rate revisions, etc., which have an influence on the situation.

Interesting Developments in Plate Trade

IT LOOKS as though some interesting developments were going on "under the surface" in connection with the world's tin plate trade. Canada is an important buyer of tin plate and for years this trade has been monopolised by United States producers. The placing of an order for 750,000 boxes of British tin plate by British Columbia interests early this year, in competition with the U. S. product resulted in a belated cutting of prices on the latter. Such action does not seem to have had much favorable effect, however, because figures secured by Hardware and Metal indicate that Canada's trade in tin plate in recent months has greatly favored British mills, and British tin plate is being exported on a greatly increasing scale while exports to all parts of the world of U.S. tin plate shows considerable decline.

No Postage Stamps on Cheques

WHATEVER the final decision of the Minister of Finance on the details of the stamp tax on cheques, it is essential that a regulation be incorporated in the Act prohibiting the use of ordinary postage stamps on cheques, as has been the custom since the tax of two cents was originated. Up to the present there has been no means of determining how much this special tax brought in. It is a safe guess that the majority of stamps used are ordinary postage stamps and that the revenue from their sale has gone into the receipts of the Post Office Department.

Now when there is a widespread protest sincerely raised by financial and other organizations that the new tax as proposed is unjust in its accumulative volume, there are no records to determine what the returns of the previous stamp tax of two cents has been, that might serve as a comparison for the Minister in determining what volume of revenue this new tax might fairly be called on to contribute. Whatever way it is settled the subject will continue to be controversial, and in the interests of those called on to bear the heaviest part of this burden it is only fair that a special stamp be used that will make the proceeds of the tax definitely known.

Briefs

THE DECISION to amend the Budget so that imported goods will bear a valuation not less than that prevailing on the same line in Britain will assist in overcoming the difficulties which a discriminatory enactment such as the removal of the depreciated currency restrictions would have brought about. From the standpoint of importers of German and other European hardware, very little change will be made in the valuations under which these goods will come as under the depreciated currency regulations such merchandise was being imported from Germany and other countries through Holland or Britain.

News of Western Canada

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Galvanized Ware Reduced in British Columbia

Galvanized Ware Now Quoted 17½ Per Cent. Off List—Easylock Stove Pipe and Elbows Decline—To Stage "Buyer's Week" in Vancouver

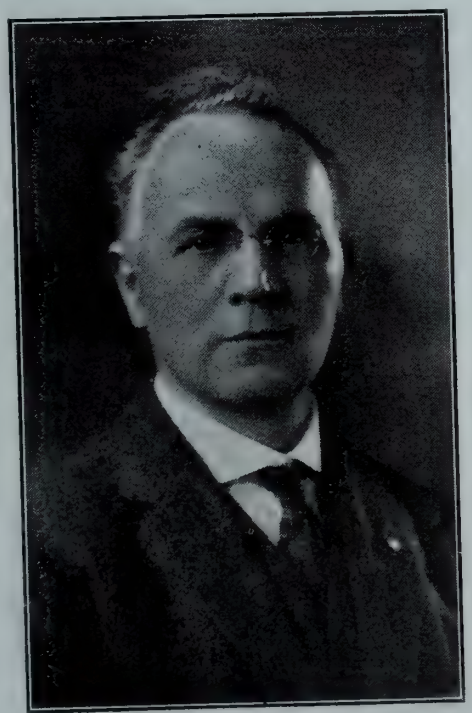
VANCOUVER, B. C.—A continued steady improvement in hardware both city and country is the substance of opinion expressed by the trade upon whom Hardware and Metal called this week. There has been no special business of account since the departure of the Hudson's Bay shipments and the first orders for the Yukon this season, and no trade of outstanding importance has developed, although the general volume of ordinary trade is quite satisfactory. It is becoming the general view that the lowest point in the hardware trade has been safely passed and that with stocks at normal for the time, the experiences learned in the last four or five years will place the trade on a firm footing for the future. It is worthy of notice that the percentage of hardware firms forced to the wall in this province, has probably been lower than any other line of trade.

On Vancouver Island, business is said to be picking up slowly with the exception of the Nanaimo district, where the mines are still working only part time. Along the Grand Trunk there is a feeling of semi-depression which dealers are trying hard to throw off. Activity continues in the Cariboo gold field from whence orders continue in satisfactory volume. These is a good improvement in the Okanagan where good prospects for fruit are reported. It is stated that apples will be seventy-five per cent. of the record yield of last year. Dealers in the Kootenay are buying warily at present due to the threatened strike which, it is said, may develop at any moment. Collections are coming in fairly well.

Price changes this week include galvanized ware which sold formerly at "net list." It is now 17½% off, f. o. b. factory. Easy lock stove pipe is five per cent. off list as against net list before. Five and six inch black elbows have been reduced from $2.19 a dozen at factory to $1.97, and seven inch have been dropped 25 cents from $2.45.

Last Saturday was the semi-annual "Dollar Day" of the Retail Merchants Association and while hardwaremen are not directly affiliated with that body, many members of the trade took advantage of the day and its advertising to stimulate business by making a display of "specials" which were offered for a dollar.

Plans were instituted this week by the wholesale bureau of the Board of Trade to stage a "Buyers' Week" during the week of the Vancouver Exhibition, August 19 to 26, and a committee appointed to report on the feasibility at a meeting two weeks hence. It is proposed to bring into the city, during that week, buyers from all portions of the province, not only to sell goods but to adjust any differences or misunderstandings which might have arisen during the summer.



R. THOMPSON

Proprietor of the Lynn Valley Store, British Columbia, and president of the North Vancouver Retail Merchants.

WESTERN CANADA NOTES

The business of the Koksilah Merchants Ltd., of Koksilah, will be carried on in future under the name of the Cowichan Bay Stores, Ltd.

T. J. Trapp of T. J. Trapp & Co., Ltd., New Westminster, B. C., is receiving congratulations on the showing of his daughter, Miss Ethlyn, a first year student in medicine, who was awarded first-class honors in biology at McGill, of which she is an arts graduate.

J. A. Cunnigham was re-elected president of the B. C. Manufacturers' Association at the annual meeting held in Vancouver this week. Other officers are: B. C. vice-president, F. T. King; Vancouver vice-president, Ben Steele; New Westminster vice-president W. I. Reid; Victoria vice-president, T. Wood; treasurer, G. D. Moir; executive, M. J. Bolduc, J. E. Thompson, J. W. Gherke, Innes Hopkins, R. R. Payne, L. C. de Merrill, Geo. Murray, J. W. Curran, J G. Anderson, J. H. Hamilton, and H. F. Smith.

After several years' residence in Vancouver, C. L. Lightfoot, western superintendent of the Gurney Foundry and a director for the last four years, has been moved to Toronto from where he will still supervise the western territory. Before his departure, he was tendered a complimentary luncheon by the directors of the Canadian Credit Men's Association, of which Mr. Lightfoot was first president. President E. Munton in making a presentation of a silver mounted fountain pen spoke of the regret of the business community in Mr. Lightfoot's departure and voiced the appreciation of the credit men for his valuable counsel.

At the annual meeting of the Vancouver Electric Club Henry Pim of the Canadian General Electric Co., was elected president in succession to E. E. Walker of the B. C. Electric. Other officers are W. W. Fraser, vice-president F. E. Carew, treasurer and F. MacNeill, secretary. The directors are E. E. Walker, W. C. Mainwaring, J. R. Read, S. E. Jarvis, A. C. W. Gage, E. Brettell, J. A. Fletcher, J. F. Little and R. E. Harfield. A short address was delivered by Henry Bostwick of the Pasific Gas and Electric Co. of San Francisco. Several delegates to the meeting of the Pacific Coast Gas Association were present.

Letters to the Editor

The Editor welcomes letters on any subject of interest to the hardware trade.

SIMPLE METHOD OF CALCULATING SALES TAX

Following the outline of a simplified method of figuring sales tax as appearing in the June 3rd issue of Hardware and Metal, the following letter has been received from a subscriber outlining in detail another method for simplifying this. He states the advantage of this system is that there is no subtraction before the total amount is arrived at and there is no necessity for a person to figure out the tax on a separate slip of paper or any place except right under the amount on which tax is being calculated:

After being in the habit of adding 1½% Sales Tax or a straight 3% Sales Tax, the odd figuring occasioned by the 50% increase giving 2¼% and 4½% respectively is at first sight somewhat confusing and bothersome.

We believe, however, that by following the simple method outlined here, there is very little more work than in the former case .

Take for instance; it is desired to invoice for $328.60, adding 2¼% sales tax.

Now 2% is twice 1% or twice the net amount of $328.60 with the decimal point moved two places to the left, i.e $6.57(20)

Now in placing this amount under the price and in performing the arithmetic operation of twice 1% all at the same time, it is only necessary to **multiply the top line by two and place the result two decimal places to the right, as—**

328.60
6.5720
2% i.e. 2 times 1% Begin here

Now to get the quarter per cent., this is one-quarter of 1% or one-quarter of the top line with the decimal point moved two places to the left and in securing this result and putting it in the right place, it is only necessary to **divide the top line by four putting the result two places to the right as in the previous line.**

This works out pictorially with the two lines placed as below, (the nought is inserted in the third line to avoid error in placing the result of the first operation of dividing four into three.

328.60
6.57(20)
0.82(15)

Begin here this time
because result of third line is obtained by division.

Now it is merely a matter of straight addition of three lines giving the result $335.99 (neglecting the .0035 as it indicates an amount less than ½c.)

By this method all subtraction is eliminated; the tax is readily determined by adding the last two lines together if the tax alone is required. The total is conveniently arrived at and the net cost, the tax, or total charge may each be conveniently arrived at.

Here is another example; 2¼ per cent. Sales Tax to be added to $687.00:

	687.00
2%	13.74(00)
¼%	1.71(75)
	702.45(75)

Continuing .0075 as being more than ½c and adding a whole cent it gives the total tax as $15.46 and the total price as $702.46.

The operation for 4½% is exactly the same as for 2¼%. The first line will be four times 1% that is **four times the top line put two places over to the right** and the second line one half of 1% or **one-half of the top line moved two places to the right.**

Now there is another way of figuring 4½% which is even easier still and we are therefore giving it as an alternative.

4½% is made up of 3% and 1½%. First take 3% of the top line which is **3 times the top line moved over two places to the right and then take half this 3% line and put it underneath.**

As for example:

4½% of	$29.40
	29.40
3 %	.88(20)
1½%	.44(10)
	30.72(30)

Examples could be multiplied ad lib. but the above examples are sufficient to show the method suggested.

I believe these operations are rather harder to explain than to put into practice but once they are understood it is straight figuring from beginning to end.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

WOODEN HOSE REELS

The Mills Hardware Company, Hamilton, Ont.—Could you give us the name of a Canadian manufacturer of wooden garden hose reels?

Answer.—The John Watson Manufacturing Company, Limited, Ayr, Ont.

ADJUSTABLE PIPE REAMER

J. W. Harvey, Manufacturers' Agent, Port Williams, N.S.—Could you inform me who can supply adjustable pipe reamer?

Answer.—The Pratt and Whitney Co., Dundas, Ont.; and also the Butterfield Company, Rock Island, Que.

BATTERY CHARGER

J. W. Richardson, Hardware Merchant, North Bay, Ont.—Kindly inform us who makes battery chargers for automobile batteries.

Answer.—The Canadian Fairbanks-Morse Company, Limited, Montreal, and the Canadian General Electric Company, Limited, Toronto, Ont.

SCHOOL DESKS

Lacroix Brothers & Company, Limited, Prince Albert, Sask.—Would you kindly advise us the names of makers of school desks?

Answer.—The Canadian Office & School Furniture Company, Ltd., Preston, Ont.; C. P. Sabien, Montreal, Que.; The Globe Furniture Company, Limited, Waterloo, Ont.; Paquet & Godbout, St. Hyacinthe, Que.; St. Lawrence Furniture Co. Ltd., Fraserville, Que.; Spencer Bros. & Turner Co., Ltd., Truro, N.S.; W. F. Vilas, Cowansville, Que.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

"WHITE CAP" BOOKLET

Beatty Bros., Ltd., of Fergus Falls, Ont., have issued a new washer booklet containing specific illustrations and detailed information concerning their White Cap washing machine. The different illustrations in the booklet are designed to follow the various procedures of the customary household wash. It has been artistically prepared, while the reading matter contains a direct appeal to the housewife, as well as a message for the casual observer regarding the operating methods of an electric combined washer and wringer. Details as to construction of the White Cap and useful information for both the dealer and consumer completes an interesting and attractive booklet.

HEATING THE HOME

An interesting book depicting various methods of "Heating the Home" has been compiled by the Dominion Radiator Co., Ltd., of Toronto, Ont. The introduction to the book deals with the early methods of heating, and introduces step by step the open fireplace of olden days, the coal-stove and the hot air furnace.

Hot water heating, as achieved by the Safford Mogul Boilers and Safford Radiators, is then fully enlarged upon in this interesting catalog. The various attributes of this style of heating are described in detail. A number of illustrations of radiators and heating apparatus in practical installation completes the booklet.

Twenty Years Ago.

Following items are reproduced from Hardware and Metal of May 31, and June 7, 1902:

"Wm. Vallance, of Wood, Vallance & Co., Hamilton, is in Vancouver inspecting the branch business which his firm is opening there. Wood, Vallance & Co. are taking over the wholesale and retail hardware business of Thos. Dunn & Co., the firm name of which will become Wood, Vallance & Legget." (This branch of the Wood, Vallance & Co. business was recently purchased by Marshall Wells & Co.).

"The combination which was being formed by the leading wholesale houses of the United States has collapsed. This was quite unexpected as it was understood that the undertaking would be successful. E. C. Simmons of the Simmons Hardware Co., was designed for presidency of the organization."

"A prominent hardwareman passed away at Carleton Place in the person of W. R. Gardner, former well-known resident of Brockville. He established the Gardner Tool Works at Brockville, since merged into the business of the James Smart Mfg. Company."

"The Toronto Branch of the Ontario Hardware Merchants' Assn. held a special meeting in the rooms of the R. M. Assn., Bay Street, to discuss the proposal to amalgamate with the R.M.A."

"Herbert A. Couse has severed his connection as manager of E. M. Marshall Hardware, Sarnia, Ont., to enter business for himself in that city."

"John J. Barry has been appointed manager in the Maritime Provinces for the Crucible Steel Co. of America, headquarters in St. John."

"W. Montgomery has bought out the premises and hardware stock of J. W. Fulbrook, Stonewall, Man.

"J. H. Still, president J. H. Still Mfg. Co., Ltd., St. Thomas, Ont., is dead."

Events in the Trade

BUSINESS CHANGES

Springfield, Ont.—J. A. Chambers has sold his hardware business here to R. Willis & Son of Lambeth, Ont.

Wellington, Ont.—Lawrence and Walter Coxall, brothers, who have been in the hardware business together in Wellington, have dissolved partnership. Walter Coxall is going to Kingston and Lawrence will continue here in another retail business.

PERSONAL

E. W. Scott, representing Andrews Wire Works, Watford, Ont., The Wire Goods Co., and Cassidy Fairbanks, Mfg., Co., Chicago, was in Montreal this week on his way to the Maritime Provinces.

C. E. Adcock of Adcock & Co., left this week for a two weeks' trip through the Maritime Provinces.

W. F. Duffield of the Reading Hdwe., Co., Reading, Pa., and Jas. Hossack of the Lufkin Rule Co., called on the Montreal jobbers this week.

ONTARIO INCORPORATIONS

London Metal Products Ltd., capital $60,000 head office London, Ont., to manufacture articles of copper, brass, iron, steel, zinc, wood, etc.

Donald F. Johnston Radio Ltd. head office Toronto, capital, $40,000 to manufacture and deal in radio and other electrical apparatus.

K-T Foundry, Ltd. has been incorporated to take over the K.-T. Foundry at Galt and carry on business there with $100,000 capital.

Engineering and Radio Supplies Ltd., head office Toronto, capital $100,000 to manufacture radio and electrical apparatus.

BUILD ADDITIONS TO FACTORY

Tweed, Ont.—The Steel Trough and Machine Co. are building two additions to their factory. They have also opened a Montreal office to take care of Quebec and Eastern Trade, they are also represented in Toronto, Winnipeg and Vancouver.

BOGUS CHEQUES TAKEN BY KINGSTON HARDWARE MERCHANT

Bogus cheque artists have been at work in Kingston again. Three local merchants, including a hardware dealer being victimized. A young man, whose whereabouts is unknown, is the guilty party. In each case he made a purchase and tendered a cheque, but when the cheques were presented at a local bank, it was found that there were no funds. The police have been informed about the matter and an endeavor is being made to locate the guilty party.

PAINT TRADE NOTES

Among the passengers listed on the new White Star Liner "Majestic" as it left New York June 17, were James H. McNulty, President Pratt & Lambert-Inc., Mrs. McNulty and their three daughters, who will spend the summer in Europe.

A. D. Graves, general manager, Pratt & Lambert-Inc., has recovered from a recent operation for appendicitis and has returned to assume added responsibilities in the absence of J. H. McNulty, president.

TORONTO PAINT CLUB ELECTS NEW OFFICERS

At the regular meeting of the Toronto Paint, Oil & Varnish Club, held in the Carls-Rite Hotel on Thursday afternoon of this week, the following officers were elected for the ensuing year: F. J. Penberthy, Lowe Bros., president; W. M. Burden, E. Harris Co., vice-president; W. W. Schoales, treasurer; H. E. Mihell, Imperial Varnish & Color Co., secretary; A Pinard, Lowe Bros., assist-secretary. Executive committee: A. W. Poole, Stewart & Wood; J. M. Ransom, Canada Linseed Oil; R. F. Eaton, International Varnish Co., and F. M. Farringer, The Boeckh Co., Ltd.

In addition to regular business of the club being transacted, some discussion of the season's trade naturally developed, and optimistic reports were received from the Paint-up & Clean-up committee. Determination to extend the work of the club in making each successive season the "greatest paint and varnish year," was expressed.

CANADA LINSEED OIL MILLS, LTD., HOLD PICNIC

Montreal.—Employees of the Canada Linseed Oil Mills, Ltd., about 85 in number including mill hands and office staff, held their annual picnic on Monday. At 9 a. m. a special car awaited the picnickers and they proceeded to Vaute de Lille for the day's outing. Adding to the enjoyment of those present was the arrangement for a special dinner at the hotel on the grounds, after which a varied program of sports was carried out in the afternoon E. Liersche general manager presented the prizes to the winners, and followed by expressing his appreciation of the spirit of co-operation and goodfellowship which always existed among them. This was ably responded to by the superintendent of the mill. Before leaving for home all who wished enjoyed a motor boat trip on the St. Lawrence, making a happy ending for the joyous outing.

APPOINT NEW SELLING REPRESENTATIVE

Smart's Brockville Furnaces, Limited, have appointed Ben Windsor of Truro as their selling agent for line of furnaces in the Maritime provinces.

NEW GLASS COMPANY

A new glass company, under the name of The Hamilton Glass Company, has taken over the premises at 77 Park St., Hamilton, Ont. The company will supply plate, window, fancy, factory, mirror and art-leaded glass and all other glass used in the building trade, together with automobile and other glass specialties. Donald M. Campbell has been appointed manager. The production will be under the supervision of James W. Ross. The selling representative will be Frank Byrne.

INTRODUCE NEW MERCHANDISING POLICY

The development of a somewhat new and novel merchandising plan by the Blue Bird Corporation, Ltd., Brantford, Ont., will be watched by hardware merchants with some interest. Using figures for Ontario the cash price of this machine is $155. This will be $172.20 as sold on twelve month terms. The dealer receives a cash payment of $10.20 which he retains. He forwards the firm the lien contract providing for twelve monthly payments of $13.50 upon receipt of which the firm remits to him $128.60 and sends him a deferred payment certificate for $16.20 payable on receipt by the firm of all monthly instalments. By this plan the dealer receives the full cash price of the machine while giving his customer the advantage of time payments. One claim for it is that the more the dealer sells the more capital he will have to conduct his business. The firm makes the collections and the dealer merely endorses the note as a guarantee of the purchaser's credit standing and bona fides.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

THE importance of closely following market tendencies at all times is again emphasized this week when another lengthy list of price developments, including both advances and declines, appears on hardware goods. The fact that quotations are apparently moving in both directions, makes the current trend a difficult one to ascertain with certainty, but it is noticeable that price increases are again more numerous than the reductions. Lower levels are now in effect on galvanized wares, certain makes of aluminum ware, also stove pipe and elbows. Auto tires, both casings and tubes, record a downward revision, while tin lanterns, certain grades of cast and steel rim locks, and glass jar churns are additional items having easier quotations. Heading the list of increased prices is all classes of cotton cordage, with turpentine, Paris green, linseed oil, dry arsenate of lead, wood-boring drills, bit stock, straight shank and half-inch shank drills, small iron rivets and burrs, hoe handles, rake, hay fork, shovel and manure fork handles, and radiators and boilers all registering a similar upward change. The development in cotton cordage goods was outlined in last week's Hardware and Metal, the lines now affected including sash cord, cotton rope, braided awning cord, seine twine, cotton clothes lines, candle wick and line cord. The recent sudden rise in turpentine prices comes as a surprise to practically all phases of the trade and is generally attributed to the demand being in excess of current production and offerings. Carriage and machine bolts and nuts are considered liable to a revision in the near future, prices being very firm with higher levels recently announced on southern market centres. It is also noted that domestic consumers have been making somewhat extensive commitments in anticipation of this development. The strength of the steel industry is being reflected in advancing prices on various finished steel lines. The question of delivery still dominates the sheet markets, the demand for galvanized being strong, but the call for black sheets is quieter with base prices varying. Canada plate prices are considerably easier, this gradual trend being attributed to competition from Welsh plate mills. Simultaneously, the bar product trade is reported coming in flurries, every few days being a period to be judged by itself. Prices continue firm, however, with some warehouses looking for further advances in the near future if the present volume of trade is maintained. July and August, however, are usually dull periods in this industry. Trade in scrap materials is less promising this week, but recent higher quotations remain in effect. The tone in ingot metals has shown no appreciable change, the general attitude being somewhat quieter as recorded last week. Bright reports continue to come to hand from wholesale houses, while current trade in retail circles is generally described as of a satisfactory nature.

Montreal Markets

MONTREAL, June 22.—An important list of price changes are announced on the hardware markets, various lines being revised, some upward and others in a downward direction. Galvanized iron ware, with a few exceptions, is reduced in price, also stove pipe and elbows, both black and galvanized. One-coated enamelled ware prices are also adjusted, many lines being reduced while others are slightly higher. This line is now quoted at net prices rather than former list prices with discounts. Automobile tires and tubes are lower in price, a varying reduction being announced on both lines. Cold blast tin lanterns are now quoted three dollars per dozen less than formerly. Higher prices are given on hoe, rake, shovel, hay fork and manure fork handles, and cotton rope, sash cord, cotton clothes lines and braided lines are now higher in price. Small iron rivets and burrs show an increase in price of approximately ten per cent through a revision in the discount.

AUTO TIRES AND TUBES REDUCED IN PRICE

Montreal.

A reduction of varying extent is now recorded on automobile casings and tubes. Cord tires are reduced approximately five per cent., while fabric tires and all tubes show a price decline of approximately ten per cent. During the season there has been keen competition in these lines, and prevailing prices in the United States are at a very low level in comparison with replacement costs. Manufacturers point out that the undertone in the rubber market does not warrant existing levels on either tires or tubes, but outside competition should not be allowed to enter domestic markets.

COTTON ROPE PRICES ADVANCED THREE CENTS

Montreal.

Following the firmer trend in various lines of cotton goods last week, cotton rope is now higher in price, an advance of three cents a lb. being recorded. 3/16 is now quoted at 42c., ¼ in. and up, 41c. per lb.

HIGHER PRICES RECORDED IN SASH CORD

Montreal.

Sash cord is advanced in price, quotations being increased four cents per lb. on the various sizes. Following are revised prices: No. 6, 57 cts; No. 7, 56 cts.; Nos. 8 to 12, 55 cts. per lb.

NEW HIGHER PRICES ON BRAIDED LINES

Montreal.

Higher prices are also announced on the various sizes of braided lines, and following are new quotations: No. 3½, $2.55; No. 4, $3.40; No. 4½, $4.75 per doz. hanks.

RANGE BOILER PRICES REMAIN UNCHANGED

Montreal.

Notwithstanding a price reduction is announced on many lines of galvanized ware ths week, range boilers remain unchanged, quotations being fifty per cent. off standard list prices. Manufacturers of these products state that owing to labor absorbing the greater amount of costs in producing boilers, the market is little affected by the cost of raw materials. Current trade shows little change, building construction in the larger centres demanding a fair amount of supplies.

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 60
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.: Extra heavy, 40 per cent.

ACTIVE TONE STILL EVIDENT IN SCRAP

Montreal.

A few minor revisions are given on the current market for waste materials, but nominally prices remain at former levels. Copper, which showed some gain both on primary metal markets and in scrap circles during recent weeks is now a little easier, consumers apparently not willing to purchase at the advance levels. The undertone of this metal, however, is fairly firm, and it remains the most active metal on the non-ferrous list. A slight improvement is noted in melting steel, the increase in buying being more apparent on this line than other iron and steel scrap during the week. However, the recent improvement in ferrous metals generally is well maintained. Average quotations are as follows:

WASTE MATERIALS—

Automobile tires		0 50
Rubber shoes		0 02¾
Yellow brass		0 06
Red brass		0 08¾
Light brass		0 04
Scrap zinc		0 03½
Lead, heavy		0 04¼
Lead, tea		3 00
Light copper		0 09
Heavy copper		0 11
Wrought iron, R. rd., No. 1, per gr. ton.		10 00
Malleable scrap (ton)	9 00	10 00
Pipe scrap (ton)		7 00
Heavy melting steel	9 00 to	9 50
No. 2 busheling		3 00
Boiler plate	8 00	9 00
No. 1 machinery cast		21 00

ADVANCED QUOTATIONS ON COTTON CLOTHES LINES

Montreal.

Accompanying other lines of cotton goods, cotton clothes lines have new higher prices. Following are increased quotations:

COTTON CLOTHES LINES—

	Per doz.
30 ft. hanks	$2 20
40 ft. hanks	2 75
48 ft. hanks	3 30
60 ft. hanks	4 10

SLIGHT SLACKENING NOTED IN STEEL DEMAND

Montreal.

While the undertone of the iron and steel industry is again described as firm, only a moderate degree of activity is evident locally. It is pointed out that steel buying usually slackens at this time of the year, particularly in those lines which are used in outdoor construction. At the same time, domestic trade has not shown the improvement as has been apparent in markets to the south, and one distributor stated that a reflection of this may even yet be noticed during the summer months. Reports from U. S. steel centres also indicate a slight falling off in buying, and give as one of the chief reasons that heavy buying of the past few months was partially caused by the fear of a steel shortage on account of the coal strike, which fears are now largely subsided. Although higher pig iron quotations are recorded on certain Western markets, locally this material remains unchanged, the appearance of overseas iron undoubtedly stabilizing this market for the present at least.

IRON AND STEEL—

Common bar iron, 100 lbs.	2 95
Refined iron	4 45
Irish finish machinery steel	3 00
Mild steel	2 95
Single reeled machinery steel	5 05
Band steel	3 30
Spring steel	4 55
Sleighshoe steel	2 95
Tire steel	3 15
Harrow tooth steel, per lb.	3 10
Mining tool steel, per lb.	0 20½
Toe caulk steel	3 85
Black Diamond tool and cast steel, per lb.	0 20½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

COLD BLAST LANTERNS $9.00 PER DOZEN

Montreal.

A substantial reduction is announced in quotations on tin cold blast lanterns. These are now quoted at $9.00 per dozen, former price being $12.00.

HANDLES NOW QUOTED AT HIGHER PRICES

Montreal.

A price advance of quite extensive proportions is now given on hoe, rake, shovel, hay fork and manure fork handles. These are now quoted at 15 per cent. off the standard list. Formerly most jobbing houses were using net quotations which were considerably lower ,while others were quoting 30 off the standard list.

REVISED DISCOUNTS ON RIVETS AND BURRS

Montreal.

Through a revision in discounts, small iron rivets and burrs are advanced in price. Iron rivets, 7/16 and smaller, black and tinned, and iron burrs are now quoted less 47½ per cent. off list prices. Net extras remain unchanged.

REDUCED PRICES ON GALVANIZED IRON WARE

Montreal.

Galvanized iron ware, with a few exceptions, is reduced 17½ per cent. Quotations were formerly net list, and the above discount is now quoted. This revision covers a wide range of goods including galvanized tubs, pails, oil tanks, sinks, wash boilers, fire pails, garbage cans, sap buckets, etc. A revision is also made in one-coated enameled ware, and net prices are now quoted where formerly a discount was given off list prices. This change covers a reduction on some articles, while other goods show a price adjustment.

Other ware remains unchanged, and in discussing the reduction made by a Toronto manufacturer on aluminum ware, local manufacturers and distributors of other lines state that up to the present no change has been made, but action may be taken in the near future as it is now under consideration.

Revised ware discounts will be found elsewhere in this section.

STOVE PIPES AND ELBOWS HAVE LOWER PRICES

Montreal.

Accompanying the reduction in galvanized iron ware are reduced prices announced on stove pipe and elbows. Following are present quotations:

Stove pipe elbows	10%
Stove pipes	5%
Light black elbows 5" and 6"......doz.	1 47
Light black elbows 7"......doz.	1 70

STEADY TONE RECORDED IN PIPE FITTINGS

Montreal.

Current trade in pipe fittings has expanded somewhat during recent weeks, although orders are still confined to sorting requirements. While the usual active season for fittings is now at hand dealers are apparently willing to take care of immediate needs only. Quotations are unchanged as follows:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Niples, black and galvd. ⅛ to 4 in., close and short	60%
Do., 4½ in. and larger	50%
Do, long, ⅛ in. to 4 in.	65%
Do., 4½ inch and larger	55%
Do., running thread	40%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

Price list effective June 1st, 1922. Discount 70-5 per cent.

BRISK DEMAND REMAINS FOR GALVANIZED SHEETS

Montreal.

Galvanized sheets remain the most active factor in the iron and steel trade, and distributors state that the buying movement is so far being well maintained although the usual brisk period of spring is now over. Prices remain firm, with stocks receiving only temporary replenishment from overseas. Sheet markets to the south are still reported strong, higher production costs maintaining this attitude, and although this condition has only an indirect bearing on the local market because of continued arrivals of English sheets at more favorable prices, it nevertheless has its strengthening effect. The tin plate market is reported in a steady position, but demand is not as brisk in these products as in other sheets at the present time. Following are prevailing price levels:

BLACK SHEETS—

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 36 in. wide, 10 cents per 100 lbs. extra.

GALVANIZED SHEETS—

English Standard—	Queen's Head	Fleur de-lis
28 gauge	6 75 to 7 25	6 50 to 7 00
26 gauge	6 50 to 7 00	6 25 to 6 75
24 gauge	5 90 to 6 40	5 85 to 6 35
22 gauge	5 55 to 6 05	5 40 to 5 90
18-20 gauge	5 35 to 5 85	5 25 to 5 75

NOTE.—These prices are full bundles, an extra charge of 25c. to 35c. per 100 lbs. is made for broken lots. Extra for sheets 4 ft. wide, 50 cents per 100 pounds. Extra for sheets 3 ft. wide, 28 ga. and 10¾ oz. 25 cents per 100 lbs.

TIN PLATE, Coke—

20 x 28 x 100 lbs. basis	13 00
20 x 28 I.C. 112s	13 50
20 x 28 IX 112s	15 00
20 x 28 IX⅝, 56s	9 00
20 x 28 IXXX. 56s	9 75

TERNE PLATES—

20 x 28 IC. 112s	14 50

CANADA PLATES—Half Bright

18 x 24 x 52s	5 40 box
18 x 24 x 60s	5 50 box
18 x 24 x 75s	5 65 box

WELSH CANADA PLATES—Polished—

12 x 24 60s	7 25 box
18 x 24 x 52s	7 00 box

FIRM TONE REMAINS IN WROUGHT PIPE

Montreal.

The wrought pipe market is again reported firm with list No. 54 still being quoted. Manufacturers point out that a strong tendency remains on U. S. markets owing to higher production costs and a brisk demand. For this reason it is still maintained that a lower tariff will have little effect at the present time. Demand locally is fairly good, especially on the smaller sizes which are being extensively used in home construction work.

HAYING SEASON NEEDING SUPPLIES OF ROPE

Montreal.

Manufacturers and distributors of rope and cordage describe the present buying movement as fair, the haying season in many sections of the country demanding supplies. It is stated, however, that this movement is for the present mostly confined to western sections, the season not yet advanced far enough in Eastern Canada. The same might be said of binder twine insofar as shipping is concerned. Shipments have already been made to some districts but the bulk for this territory is still being withheld. Quotations on manila and hemp rope are unchanged at prices quoted on current market pages.

ACTIVE PERIOD FOR TROUGH AND PIPE

Montreal

Eavestrough, conductor pipe, elbows and sundry lines continue to sell well, and although sales records for May were considered quite satisfactory, a continuation of the present buying movement for the remainder of the month will show higher returns for June. The undertone of the market is described as steady to firm at following list prices and discounts:

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$16 90	$18 70	$22 20	$29 80	$37 80

O. G. Square bead, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$15 90	$17 70	$21 20	28 80	$36 80

CONDUCTOR PIPE:—round, plain and corrugated, per 100 ft.

2 inch	3 inch	4 inch	5 inch	6 inch
$18 40	$22 30	$29 60	$40 00	$49 00

Discount 70/10 per cent.

CONDUCTOR ELBOWS—

3 inch	6 00
4 inch	10 50

Plain or corrugated. dozen

2 inch	$ 5 25
5 inch	24 00
6 inch	29 00

Discount 60 per cent.

Toronto Markets

TORONTO, June 22.—Another lengthy budget of important developments has been tabulated on the current hardware markets, thus again emphasizing the necessity for closely following price tendencies at all times. Changes include both upward and downward revisions, the reductions affecting such lines as automobile tires, tin lanterns and easier priced grades of cast and steel rim locks. Increases, however, are more numerous, including radiators and boilers, small iron rivets and burrs, galvanized wares, stove pipe and elbows, and wood-boring drills, straight shank, half-inch shank and bit stock drills. As outlined in last week's issue of Hardware and Metal, practically all cotton cordage goods record higher prices, advanced levels having been announced on sash cord, cotton rope, seine twine, line cord, cotton clothes lines, and candle wick.

Galvanized sheets continue in a firm position, but the market for black sheets is less active, a slight range in prices being recorded. The activity in bar iron and steel is again of a spasmodic nature, but with the recent higher prices being generally maintained. Additional advances are looked for in certain quarters, but this development is contingent upon the ratio of future business, it being pointed out that July and August are usually dull periods in the steel industry. Corrugated sheets are also in a firm position, brisk activity in these products being noted, with flat sheet prices at recent higher levels. The rise in raw cotton prices is reflected through the firm market in cotton wastes, although no variation in quotations is evident. A slight re-action is appearing in scrap materials as the call for certain grades has subsided somewhat. Prices are, however, holding at recent upward revisions.

REDUCED PRICE ON LOWER GRADE RIM LOCKS

Toronto.

The easier-priced class of rim locks now register a reduction in price, the cast grade being quoted at $3.00 per dozen; with the steel rim locks at $3.75 doz.

MARKED ADVANCE IN QUOTATIONS ON DRILLS

Toronto.

Local wholesale houses announce an increase in drill quotations this week, through a revision of discounts. The new price level on bit stock drills, straight shank, half-inch shank, and wood boring drills is now given as fifty per cent. off list, compared with the recent discount of sixty off. This change amounts to an approximate advance of twenty per cent.

RIVETS AND BURRS NOW TEN PER CENT. HIGHER

Toronto.

Iron rivets and burrs, 7/16 inch and smaller, record an advance in price of approximately ten per cent. The new discount on these products, both black and tinned, is list less 47½ per cent. The former quotation was 52½ per cent. off. This change is attributed to the firmer tone in practically all steel products, a development which has become more pronounced during recent weeks.

CANDLE WICK PRICES ALSO SHOW INCREASE

Toronto.

In conjunction with other classes of cotton goods, candle wick packing records an advance in price this week, the new level being 55 cents per lb.

COTTON CORDAGE LINES RECORD HIGHER PRICES

Toronto.

As outlined in last week's Hardware and Metal market report, all lines of cotton cordage now have advanced prices, due to the recent rise in raw cotton market. The higher quotations on wrapping twines were announced last week. Other lines now registering a similar change are sash cord, cotton rope, seine twine, line cord both white and drab, and cotton clothes lines. Following are the new increased levels on these products:

SASH CORD—

Per lb.

No. 6, $0.57; No. 7, 0.56; Nos. 8, 9, 10 and 12, 0.55. per lb.

COTTON ROPE—

Size, ½ inch 0.52; 5|32 in., 0.50½; 3|16 in., 0.47; ¼ in. and up 0.45½ per lb.

SEINE TWINE—

Medium, No. 12, 0.70 per lb. Medium, 18 and up $0.69 per lb.

LINE CORD—

	Per doz.
White, No. 3¼	2 55
White, No. 4	3 40
White No. 4½	4 65
Drab, No. 4	4 00
Drab, No. 4½	5 75

COTTON CLOTHES LINES—

In 40 ft. hanks	2 90 doz.
In 48 ft. hanks	3 50 doz.
In 60 ft. hanks	4 40 doz.

SUBSTANTIAL REDUCTION IN LANTERN PRICES

Toronto.

Contrary to the general upward trend now noticeable in the hardware market comes the announcement of a twenty-five per cent. reduction in price on lanterns. The plain cold blast, with long or short globe, are now selling at $9.00 per dozen, compared with the previous quotations of $12.00 doz. The usual extras follow:

Packed 1 doz in case, 25 cents per doz. extra.

Packed 3 dox. in case, 20 cents per doz. extra.

Packed 6 doz. in case, 15 cents per doz. extra.

BOLT AND NUT PRICES LIABLE TO REVISION

Toronto.

As pointed out in Hardware and Metal market pages some few weeks ago, a much stronger tone is now apparent in machine and carriage bolts and nuts. Some price advances on these products have recently been announced in American markets, with domestic distributors expressing the opinion that producers will most likely follow this lead in the near future, owing to the general firming up in practically all steel products. Higher prices on certain steel goods have already gone into effect. Extensive local commitments are noted on bolts and nuts, the impression that advances are pending apparently being general. In one quarter, it was stated that higher quotations had been decided upon but the exact extent of the rise was not yet settled.

CORRUGATED SHEETS IN STRONG POSITION

Toronto.

The recent high price on flat galvanized sheets has continued to add further strength to the corrugated market, and distributors now report that some revision in corrugated sheet quotations in the near future would not be surprising. One dealer expressed the opinion that the removal of the present ten per cent. discount would reflect the upward tendency in these products, which are experiencing a brisk call at present, especially for lighter gauges, due to the apparent activity in building circles. Present stocks are in fairly good shape although the increased demand coupled with the slow deliveries from the mills, are factors which may tend to tax available supplies during the ensuing weeks. Following are present unchanged quotations:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No., 26 U. S., gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75 cents per sq. extra.

NEW DISCOUNTS BRING HIGHER RADIATOR COSTS

Toronto.

As outlined in recent issues of Hardware and Metal, a further revision has been announced in the discount levels on radiators and boilers. Quotations on these products are increased respectively 7½ and 10 per cent., through the decision to withdraw the additional discounts which were recently being quoted, and prices now revert to the previous levels which were in effect during the spring months. Manufacturers and distributors of boilers and radiators state that so much business was booked up at the lower prices, that the outlook has distinctly improved, with the rising trend in the steel industry generally being reflected in practically all steel products. The market in these products is described as firm at the following revised quotations:

RADIATORS—

Revised radiator list prices are for 1, 2, 3, 4 and 5column radiators per square foot.

38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $136; 18 in, $140; 16 in, $150 14 in., 155; 13 in. $1.60.

Discount on 2, 3, and 5-column standard sizes, 59 per cent. for water and 60 per cent. for steam.

Galvanized Ware Prices Substantially Reduced

Discount of 17½ Per Cent. Now Quoted on Galvanized Wares, While Aluminum Ware Also Considerably Lower in Price—Reducing Production Costs Assists in This Direction, Although Competition Also a Factor in Market Development

AS OUTLINED in a recent market report contained in Hardware and Metal, prices on galvanized wares have now been reduced. The extent of the revision is approximately 17½ per cent. on galvanized ware, since these products were previously quoted at net prices, and under the new levels this discount is given on these goods. Aluminum ware of certain makes has also suffered a similar downward price change, the decline in this case being practically 26½ per cent. The factors contributing toward this development are briefly stated as the lowering of production costs by manufacturers, although as pointed out in last week's issue of Hardware and Metal, keen competition has also been an element in this direction. It is noted that galvanized sheets have recently been advanced in price, and that a very firm trend is evident in practically all steel items. Raw material of this class, however, is usually purchased several months in advance by large ware manufacturers, while numerous other factors enter into the production phase of these goods. Kitchen utensils, such as galvanized and aluminum, and the groups mentioned below, are recently reported to have registered an improved movement, the volume of trade generally being up to expectations for this season of the year.

WARES—

Britannic, list plus 5 per cent.
Scotch Grey Ware. Prices on application.
Colonial, 40 per cent.
Imperial Ware, 40 per cent.

Copper tea kettles, 10 per cent.
Copper tea and coffee pots, net list.
Stove and other pipe, 5 per cent.
Stove pipe elbows, black and galvanized 10%

DELIVERY DOMINATES THE SHEET MARKETS

Toronto.

The recent higher price levels on sheet products continue in effect, but while the brisk demand for galvanized sheets is still evident, it is noticeable that this is not generally the case with black sheets, and prices show a range on these products. The new higher quotation of $5.00 base, is described as nominal, and $4.80, as reported in last week's issue of Hardware and Metal, has been recorded in several quarters. The question of delivery continues to dominate the steel market. While there is no doubt that buyers have replenished their stocks to some extent in the past three months there are no indications that buyers are over-stocked or will produce a soft market in the near future by liquidation. In many cases stocks merely represent provision for filling orders adreay in hand.

Some recession in prices on Canada plates has recently developed, but distributors of these goods look for a brisk volume of Fall trade, with substantial bookings. Current local quotations follow:

BLUE ANNEALED—

10 gauge, base	4 00
12 gauge	4 05
13 gauge	4 10
16 gauge	4 15

BLACK—

RISE IN COTTON PRICE REFLECTED IN WASTES

Toronto.

While current price levels on cotton wastes at present remain unchanged, yet these markets reflect the recent rise in raw cotton prices. As a result of raw cotton advancing more or less suddenly in southern quarters, local manufacturers and distributors of waste report a much stronger tone now prevails. However, the present demand for waste is not considered of sufficient volume to carry higher prices, and prevailing unchanged prices are included in the current market quotation pages.

Keen Competition Factor in Lower Tire Prices

Auto Casings and Tubes Reduced Between Five and Ten Per Cent.—Manufacturers State Brisk Demand Lowers Production Cost—Claim Raw Material Markets Do Not Warrant Change—Keen Competition by Outside Producers

ANOTHER reduction in automobile tires to the extent of approximately five per cent. on cord tires, and ten per cent. on fabric casings and tubes, reflects the keen competition that has developed in these markets, rather than the trend of raw material or production costs. Manufacturers of these products state that while the rubber and cotton markets do not warrant this further lowering in tire prices at this time, yet the seasonal call that has been experienced for tires during the past few months has enabled the producers to operate full time on an extended ratio of output with the natural result that overhead costs have been considerably pruned thereby. Distributing expenses have also been reduced by the manufacturers, wherever possible, thus enabling them to announce the present change.

In discussing this situation with Hardware and Metal, one tire manufacturer pointed out that the industry had more or less expected the next move might contain an upward revision in prices, due to the recent developments in the rubber and cotton markets, thus enhancing the prices of these two primary raw materials. Such movements, however, have not been of such marked extent to affect tire production costs, as yet, due to the fact that large stocks of these materials are carried on hand, and buying of same is done in extensive quantities. It was also admitted that while the improvement in the tire business had reflected a big increase in consumption of these products, producers were anxious to keep domestic price levels below the quotations of their American competitors, if possible. An active trade in casings and tubes is usually evident at this season, while the demand for these products also reflects the expansion in the automobile industry. Following are revised tire quotations:

CORD TIRES—

Size	Casings, all-weather tread
30 x 3½, 4 ply	$18 50
30 x 3½, 6 ply	21 30
32 x 3½	29 30
31 x 4	33 85
32 x 4	37 30
33 x 4	38 50
34 x 4	39 50
32 x 4½	48 15
33 x 4½	49 30
34 x 4½	50 50
35 x 4*	52 00
36 x 4½	53 10
33 x 5	60 00
34 x 5	61 70
35 x 5	63 00
37 x 5	66 25

Less 20 per cent.

FABRIC TIRES—

Size	CASINGS Smooth Tread	All-weather Tread
30 x 3	$10 75	$12 40
30 x 3½	12 00	15 00

35 x 5	....	5 85
37 x 5	....	6 20

MODERATE ACTIVITY IN PIPE FITTINGS

Toronto.

Trade in pipe fittings is described as better than expected in some quarters, while other distributors state that the total volume is fair, although current orders are of a small nature. A moderate degree of activity is generally recorded, however, with quotations on these products holding unchanged at the recently revised levels. The outlook is stated to be more optimistic, in view of the enlarged program of home buildings now being generally entertained. This has naturally resulted in a better demand for fittings of all kinds. Following are the current unchanged quotations:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do. solid	30%
Do., countersink	30%
Bushings, mall.	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	60%
Do., 4½ in. and larger	50%
Do., long, ⅛ in. to 4 in.	65%
Do., 4½ inch and larger	55%
Do., running thread	40%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

New piece list, adopted June 1, 1922. Discounts 70 and 5 per cent.

BAR PRODUCT TRADE COMING IN FLURRIES

Toronto.

Deliveries of iron and steel continue difficult to secure, this condition serving to retain the strength in the steel markets in spite of keen competition. Distributors state that current trade apparently comes in flurries, demand being brisk for a few days and then falling off again. This week opened in fair volume, however. The base price of $3.00 generally holds good for average purchases on the local market, and while some indication of still higher price levels is expressed in some quarters, yet it is stated that this quotation will likely hold for the next few weeks, although prices may go up another ten or fifteen cents in July or August, if business retains its present indications. It is pointed out, however, that July and August are usually quiet months in this industry, and a recession from the brisk activity in southern primary quarters, is already being recorded. This season, such a tendency is more or less offset by the influence of the coal strike, which is now practically two and one-half months old, with no apparent indication as to when the finish will materialize.

IRON AND STEEL—

Mild steel bars, base	$ 3 00
Mild steel bands, 3-16 in. base	3 50
Bar iron, base	3 00
Angle iron, base	3 10
Horseshoe iron	3 75
Tire steel	3 25
Spring steel	8 00
Sleigh shoe steel	3 00
Hoop steel	4 00
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

RANGE BOILER TRADE MORE SATISFACTORY

Toronto.

Current trade in range boilers is more or less of a spotty character, according to the recent reports from manufacturers and distributors of these products. Business in some quarters is still described as spasmodic, a condition which was generally apparent during the earlier months. Other dealers state that trade is of a fairly moderate nature, which can be looked upon as more satisfactory, especially in view of the quiet session previously experienced in range boilers. Quotations remain unchanged, manufacturers pointing out that recent higher costs of raw materials such as sheets, have served to steady prices.

REACTION APPEARING IN SCRAP MATERIALS

Toronto

Trade in scrap materials is now described as spasmodic, the current demand recording some variation, dealers stating that every few days is a period unto itself from a trading viewpoint. Little change in prices has been apparent, for while the recently revised levels continue in effect, the undertone is perhaps not quite so firm as during recent weeks. Iron and steel scrap remains firm but with no further development in quotations. The railroads are offering large quantities and until this material is taken off the market, there is little likelihood of any advance. There is considerably more heavy melting steel on the market than has been the case for some little time and this also has a tendency to depress prices. Steel turnings and cast iron borings have been fairly active during the past week. Following are the usual averages of dealers' local buying prices:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	$13 00	$14 00
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	18 00	19 00

SASH CORD PRICES ADVANCED FOUR CENTS

London, Ont.

Due to the higher prices on raw cotton, all cotton cordage now has advanced prices. Quotations on sash cord are increased to the extent of four cents per lb. Following are the revised levels:

SASH CORD—

No. 6, 57c. lb. No. 7, 56c. lb. No. 8 to No. 12 55c. lb.

HIGHER PRICE LEVELS ON COTTON ROPE

London, Ont.

Prices on cotton rope have also been advanced, the new levels on 3-16 in., being 46 cents per lb., and ¼ inch and larger, 45 cents per lb.

REVISED DISCOUNTS LOWER AMERICAN AMMUNITION

London, Ont.

New lower prices have recently been made effective locally on American ammunition. The revised discount quotations on these lines follow:

AMMUNITION, AMERICAN—

B. B. Caps and Rim Fire Cartridges, list less 2½ per cent.

Centre Fire Military Sporting and Pistol Cartridges, list less 10 per cent.

Primers, list plus 10 per cent.

BRAIDED AWNING CORD AT INCREASED PRICES

London, Ont.

In conjunction with other cotton cordage lines, braided awning cord now has new higher prices. The revised quotations follow:

BRAIDED AWNING CORD—

No. 3, $2.20 doz. hanks.; No. 3½ $2.60 doz. hanks.; No. 4, $3.50 doz. hanks; No. 4* $4.75 doz.

TURPENTINE REGISTERS FIFTEEN CENT INCREASE

London, Ont.

As we go to press, we are informed that an additional advance has been made in turpentine prices, thus bringing the total increase since the last issue to fifteen cents per gallon. The strength of southern producing centres, caused by scarcity of the product, is cited as the reason for this further increase. Revised prices are now as follows:

TURPENTINE—	Imp. Gal.
1 bbl. lots	$ 1 60
2 to 4 bbl. lots	1 59
5 gal. lots	1 75

London Markets

LONDON, June 22.—As announced in last week's issue of Hardware and Metal, practically all classes of cotton cordage register advanced prices. This change has developed on sash cord, cotton rope, braided awning cord, cotton bed cords, seine twine and wrapping twines. Turpentine also advanced twice during the week, present levels being ten cents per gallon higher than formerly. Glass jar churns, linseed oil and American ammunition, are among items showing reduced quotations.

LINSEED RECOVERS PREVIOUS PRICE LEVEL

London, Ont.

After recording a recession of five cents per gallon last week, linseed oil has now been advanced, the previous levels thus being in effect. While this change is equivalent to an increase, yet the variation is attributed to the fluctuating flax seed markets. These are again firming up, and local oil quotations prevail as follows:

LINSEED OIL—	Raw	Boiled
1 to 2 bbls., per gal.	$ 1 10	$ 1 13
3 to 5 bbls., per gal.	1 09	1 12
6 to 9 bbls., per gal.	1 07	1 10

Less barrels, add 15 cents gal.

GLASS JAR CHURNS NOW SLIGHTLY REDUCED

London, Ont.

Among the price developments this week, is noted the reduction in quotations on glass jar churns. Slightly lower levels follow:

GLASS JAR CHURNS—

No. 30 Dazey, $22.00 doz. No. Dazey $26.75 dozen .

SHOVEL AND SCOOP HANDLE PRICES REVISED

London, Ont.

Recent lower prices now in effect on "D" handle, spade, shovel and scoop handles, are $5.25 per dozen.

SEINE TWINE PRICES ALSO MOVE UPWARD

London, Ont.

Following are the new higher prices on seine twines, which have been announced in conjunction with higher levels on other cotton cordage:

SEINE TWINE—

No. 18 and larger in 1 lbs. 71c. lb. No. 18 and larger in ¼ lbs., 72c. lb.; No. 15 and larger in 1 lbs., 72c. lb; No. 15 and larger in ¼ lbs., 73c. lb.

ADVANCED QUOTATIONS ON COTTON BED CORDS

London, Ont.

Higher quotations on cotton bed cords are also announced this week, this change being a reflection of the recent sudden advance in raw cotton prices. New levels follow:

COTTON BED CORDS—

30 ft., $2.25 doz.; 48 ft., $3.35 doz.; 60 ft., $4.15 doz.

COTTON WRAPPING TWINES AT REVISED LEVELS

London, Ont.

In conjunction with higher prices on other cotton cordage lines, wrapping twines now have advaced quotations. Following are the new levels:

WRAPPING TWINES—

3 ply balls, 51c. lb. 4 ply balls, 53c. lb.; 3 ply cones, 48c. lb.; 4 ply cones, 50c. lb.

HAY FORK PULLEYS IN POPULAR MOVEMENT

London, Ont.

Both wholesalers and retailers record a good sale for hay fork pulleys, also rafter brackets and hangers. Following are prevailing price levels on these products:

HAY FORK PULLEYS—

6" Wood Knot Passing Malleable Frame 87 ea.
6" Iron Knot Passing malleable frame 99 ea.
Rafter brackets, $1.08 doz.

TRACK HANGERS—

½ x 10" 90c. doz. ½ x 12" 95c. doz.

BRISK SALE RECORDED FOR HARVEST TOOLS

London, Ont.

Both retailers and wholesalers report a big sale at present for harvest tools of all kinds. Quotations on these products remain unchanged, the prevailing discount being 60 per cent.

GOOD TRADE IN GRASS HOOKS AND SCYTHES

London, Ont.

Good sales of grass hooks and scythes are generally being experienced, the season for these products being in full swing. Prices remain firm at the following lists:

GRASS HOOKS—

Canadian	Per Doz.
No. 2	3 90
No. 3	4 00
No. 4	4 10
No. 5	4 30
Little Giant	6 50
Fox (English)	
No. 2	5 75
No. 3	6 00
No. 4	6 50
SCYTHES—	
Cast Steel	15 00
Clipper	16 00
Cutlery Steel	17 00
Brush	16 00

PRICES REDUCED ON MANILA CLOTHES LINES

London, Ont.

Prices on manila clothes lines now register a slight reduction, these products being quoted at $3.00 per dozen, in fifty foot lengths.

SALES OF BUILDERS' HARDWARE INCREASING

London, Ont.

As the season advances, an increasing volume of sales in builders' hardware is generally evident. Supplies of this nature are moving more readily this year than has been the case for several seasons. Prices on most lines are very firm.

BASEBALL AND GOLF GOODS NOW POPULAR

London, Ont.

Merchants state that baseball goods continue to sell well, with distributors reporting exceptionally brisk demands for balls and bats. Other sports requisites, especially tennis and golf outfits, are recording a popular season.

FAIR TRADING IN AUTO TIRES AND ACCESSORIES

London, Ont.

Dealers report very good sales at present in auto tires and tubes, while automobile accessories are also experiencing a brisk demand.

Winnipeg Markets

WINNIPEG, June 22.—Developments on the current hardware markets include increased quotations on putty, a decline in Canada plate prices, and a see-saw movement in both linseed oil and turpentine markets. An upward tendency is reported in soil pipe and fittings, with a firm trend in nails and wire fencing products. Business is described as improving, with a brisk demand being experienced for all classes of materials used in building, such as glass, builders' hardware, paint, and similar lines. Prospects for this season's crop are more promising, with a good Fall trade being anticipated.

UPWARD TENDENCY IN SOIL PIPE AND FITTINGS

Winnipeg.

Owing to the increasing demand for soil and pipe fittings, which is, of course, a direct reflection of the general building activity, an advance in the quotations on these products is reported as being contemplated and distributors of soil pipe state that any such move would not occasion any surprise. Prevailing levels follow:

SOIL PIPE—	
2 and 3 in.	27½%
4 in.	37½%
5 and 6 in.	32½%
8 in.	10% adv.
SOIL PIPE FITTINGS—	
2 and 3 in.	47½%
4, 5 and 6 in.	50%
8 in.	10% adv.

STRENGTH RE-GAINED IN LINSEED OIL

Winnipeg.

After a reaction on the flax seed markets which caused the local quotation on linseed oil to recede several cents per gallon, prices have now been advanced again to the former levels, those prevailing as follows:

Boiled, $1.23 per Imperial gallon in barrel lots; Raw oil, $1.20.

SEE SAW MOVEMENTS IN TURPENTINE PRICE

Winnipeg.

Turpentine has also recorded some signs of fluctuating during the past few days. The strong tendency exhibited in these markets over recent weeks was accentuated with an advance of five cents per gallon, owing to the scarcity of the product, both locally and on southern producing centres. Now, however, a recession has developed in the tone of turpentine, and prices have been reduced to the former level of $1.45 per gallon.

DECLINE IN PRICES ON CANADA PLATES

Winnipeg.

A decline of fifty cents per box has been announced in quotations on Canada plate. The current demand is described as moderate, with bookings for Fall stated to be heavy. The revised quotations are contained on the current market page.

FIRM TONE EVIDENT IN NAIL MARKET

Winnipeg.

The nail market is undoubtedly firm, and owing to the recent revision in sales tax regulations, it is reported that a slight advance may be made in the near future on the base nail prices. Trade in these goods is described as very fair, with an active building program accentuating a brisk demand.

INCREASE ANNOUNCED IN PUTTY QUOTATIONS

Winnipeg.

An advance has been recorded in the local quotations on putty, the revised levels being as follows:

In 100 lb. iron, $5.50 per cwt. in 25-lb. irons, $6.25 per cwt.; in 1½ lb. tins, 13 cents each.

Distributors state that these prices are firm, with the possibility of further advances in the future now under consideration.

NUMEROUS ORDERS FOR WIRE FENCING

Winnipeg.

The current demand for wire fencing both barbed and woven varieties, is described by distributors of these products as very strong, with orders having been exceptionally brisk during the last two or three weeks. Prices are naturally firm.

Hamilton Markets

HAMILTON, June 22.—A noticeable increase in the volume of active business is the outstanding condition of the local hardware trade. Wholesale firms report better sales, in practically every line, than they enjoyed a year ago. The seasonal weather that has been experienced is described as more helpful to the retailer, and according to general reports, sales are now larger than they have been for several months past. Of course, a large amount of such business is usually expected at this season of the year, and one merchant pointed out that if it had failed to materialize, things would be poor indeed. However, as a result, the confidence of the dealers has recently become more manifest with the corresponding result that collections are also recording an improvement in this section of the country.

Seasonable items of all kinds are enjoying a brisk movement. Wire products and steel goods are reported to be very active items at the present time. Much of this is attributed to the incentive of increased interest in consumer channels for practically all manufactured steel products, a condition hingeing partially in turn upon the coal strike. The upward trend in quotations on steel goods continues, and while production by the mills is admittedly ahead of the rate of actual consumption, buying for stock is stated to be a factor in the situation.

Steel deliveries are steadily extending and the brisk demand shows no appreciable signs of receding, as yet. The duration of the coal strike is generally considered to be a decisive factor in prevailing developments. Reports from the mills indicate that the receipt of new tonnage is still in excess of shipments and steel prices to the south continue to gain strength as producers are forced to utilize larger quantities of higher priced coal. Altogether, the steel industry as a whole is now in a favorable condition with the business in hand described as generally in excess of expectations for this time of the year. Domestic distributors report trade as brisk and with the upward trend in prices has developed a noticeable increase in activity all along the line.

Paint manufacturers and distributors report brisk trade continuing in ready-mixed colors, with the current movement of these products as a whole being described as satisfactory. A marked hum of activity is noted in warehouses and shipping departments, and while this is caused by numerous small orders, yet the aggregate volume compares very well with last season. Prices remain unchanged at present, manufacturers pointing out the increases in some raw material prices reflecting a steady to firm tone during recent weeks.

There is apparent a movement among many retail hardware merchants to improve the general appearance of their stores through the introduction of new counters, wall displays, and general rearrangement of store interior layout. The merchants are apparently bent on keeping up-to-date, and in this respect are also maintaining their natural positions as leading figures in the community.

Pittsburg Markets

PITTSBURG, June 22.—Iron and steel trade conditions have shown no important change in the past week, there being simply a continuance of the trends previously established. Production is growing a trifle, buying for late deliveries is decreasing, pressure for early deliveries is increasing, and prices are stiffening.

Production of steel ingots is now at a rate of about 39,000,000 gross tons a year, against a rate of about 35,000,000 tons of April 1, when the coal strike started, and a production of some 19,000,000 in 1921, that being also approximately the rate of production at the close of the year.

The present production rate of 39,000,000 tons a year represents barely 75 per cent. of the productive capacity, but the trade is showing less and less respect for "capacity" as developments furnish a new and more logical viewpoint. It is seen that the country is rather busy, industrially, at the present time, with nearly everybody at work, yet it is doubted whether all the steel being made is being consumed currently, and it is noted that 1912 and 1913, by far the two biggest tonnage years before the war, showed only 30,000,000 tons production each, although industry was well engaged, so that production now is 30 per cent. greater.

Just after the war, when everything was more or less in chaos, men had not gotten their bearings and simply assumed that since the steel making capacity was there it ought to operate, or business conditions would not be right. Of course there were some men with broader vision, but the attitude of 90 per cent. or more of the people was simply that there was the steel industry, called "the barometer of trade" and it had to operate or trade would be poor.

If there are any cases of consumers being unable to operate and fill their orders because they do not receive enough steel, the cases have not come to general knowledge. There is much pressure upon mills by steel buyers for better deliveries, and this pressure upon mills by steel buyers for better deliveries seems to have increased somewhat up to date but it looks as if buyers simply want to be on the safe side, fearing a curtailment in production later on account of the coal strike. The coal strike has lasted for two and a half months, and meanwhile steel production has increased by over 10 per cent.

Technically, the coal strike is two and one-half months nearer its end than it was when it began, but one cannot see any direct evidence of its being any farther along. The union operators and the United Mine Workers each occupy the same position as at the start and neither side shows any signs of weakening. Even the non-union strikes, which were not expected to last nearly as long as the regular union strike, since the non-union men have had scarcely any practice at striking, while the union miners have kept themselves in constant practice for a generation past, are almost as strong as two months ago.

In the Connellsville region there is a little more production, but hardly enough to count for anything. The strike may end next week or it may continue for months. At the beginning the predictions as to its duration ranged from two to six months, and to-day no one has a basis for changing this except to say that the strike will not last less than two and a half months, because the two and a half months are gone.

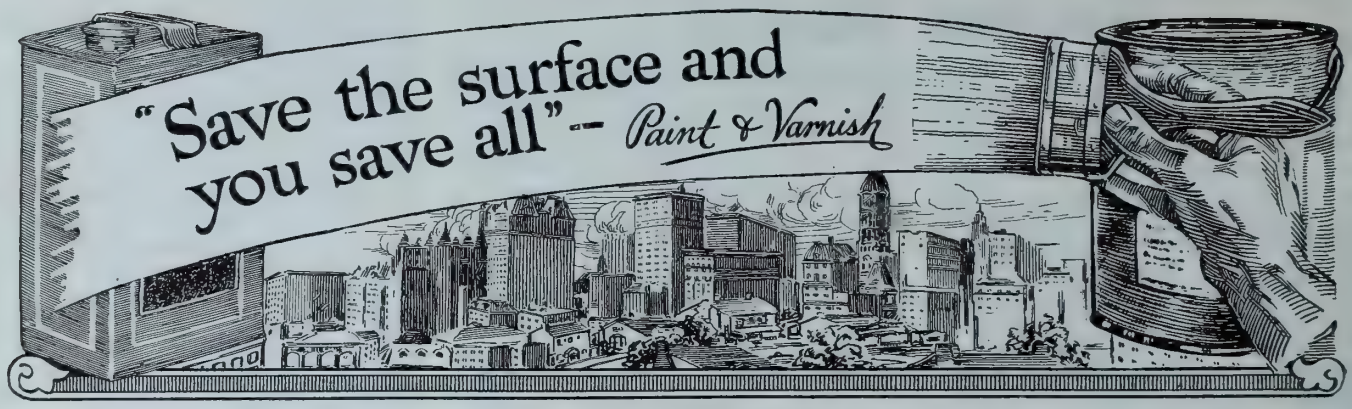
As to the total turnover in steel products, the market continues to grow less active, and this is the natural trend at this time of year, as July and August are almost invariably very dull months.

Buying for early deliveries, at the premiums that have to be paid in most cases for early delivery, is increasing somewhat, as new wants develop and cannot be met by purchases in the ordinary way. The regular manufacturing consumers who bought ahead are not placing additional tonnages to any extent.

The finished steel market is quotable as follows: Bars, shapes and plates, 1.60c to 1.80c; hoops and bands, 2.25c to 2.40c; blue annealed sheets, 2.40c to 2.50c; black sheets, 3.15c to 3.30c; galvanized sheets, 4.15c to 4.30c; automobile sheets 4.50c to 4.75c; wire nails, $2.40 to $2.50; standard steel pipe, 71 per cent. basing discount; tin plate, $4.75.

Mills having regular sheet mill customers in sheet bars have been covering the customers at $35, it being claimed that the sales are made for July only. Whether sheet mills that do not make their sheet bars themselves have been able to sell much tonnage beyond July is a question. There has been much talk of there being a heavy demand for sheets but it is not very clear that the demand is particularly heavy except in the case of automobile sheets, and the automobile trade of course wants its sheets for very early deliveries.

There are reports that sheets have been sold for August and September delivery with a price guarantee, either written in the contract or implied, but sellers are indisposed to admit this. A new departure in the sheet market is the disposal of sheets by consignment to jobbers in New Orleans and Birmingham, and whether this practice will grow and become common is being discussed.



Unique Display Pulled Paint Business

Number of Cutouts in Window Showing Various Surfaces in Process of Being "Saved" By Application of Paint or Varnish Creates Much Interest—Visualizing Local Possibilities for Business—Every City Block Represents Big Chances For Paint Business

A RECENT paint and varnish display used by a hardware merchant to good advantage is described herewith. The display was designed mainly to show the many uses of paint and varnish products, and that their purpose was not confined to a floor or two but occupied every surface of any kind of building, indoors and out. The display in fact was half inside and half outside, so far as the idea was concerned.

A large can of paint about thirty inches high made from card board was placed on top of the background. On the left side of this can of paint was a card reading "Clean Up and Paint Up, Keep It Up." A smaller cardboard disc next to this had pasted exteriors of houses in color placed on it. A still smaller disc was used with the word "outdoors." On the left side of the can of paint was a cardboard disc with the wording "For Wealth, Health and Economy," the smaller disc next to this had pictures of interiors in colors and the next smaller disc had the word "Indoors."

On the left hand of the background was Miss Clean Up, cut out of cardboard about three feet high, pointing to the center sign. Mr. Paint Up is on the right hand of the background and is also pointing to the center sign. The background was made of beaver board about fifteen feet long and was painted in poster effect with blue sky and white clouds so as to make an effective background for the buildings.

The choice by the designer as symbols of his idea of the "Up Twins," Miss Clean-up and Master Paint-up, was especially effective. These modernized versions of the ancient English Punch and Judy appear in much of the advertising matter used to-day. A Red Cross house, on the left, was painted in an appropriate and quietly effective monotone.

A man on a ladder was painting the front of this house and another man was staining the roof.

On the right of the window was a garage stained and painted as is customary. Right in front of the garage was a small toy automobile and the man was making this new and attractive with the use of paint.

In the center of the window was a show window. This window had oak floor and mahogany background. A man was painting it an attractive green on the outside.

An office building was also used to the left of the show window. This building was about eight or nine stories high and a man was working on a swing, painting the sash. On the right of the show window was the factory building already alluded to, showing that paint is just as good for factory as it is for home, as a matter of preservation and economy.

On the floor of the window where the various painters were shown painting stove pipe, flower box, window screen, porch swing and porch floor, a good many of the articles were only half painted, showing a contrast betwen the old worn paint and newly painted liquid. There were about twelve of these cut-outs all doing a different job of painting.

The entire floor of the window was covered with imitation grass.

The merchant will not have to go very far to see house after house in need of paint. And if paint is needed on the outside for protection, how much more of it is needed for that even more appealing necessity—decoration! There's an inside to each of these houses, with vastly larger paintable and varnishable expanses than outside. Such paint displays as these will help secure this trade.

There's paint department opportunities written all through them, in every room. There in one block you see enough buildings to keep your salesmanship busy for a week. That big church on the corner is crying desperately for paint and varnish, inside and out, from basement to steeple top. It awaits your salesmanship for its relief!

Just see them! Three out of five of these houses absolutely should not be permitted to go another sixty days without complete repainting. Every storm attacks their very vitals. The other two could stand repainting and the work wouldn't be an extravagance either. Their surfaces perhaps are still well protected, but they are so stained and faded that they look as disreputable as an old hat. Their appearance reflects upon their owners and makes them one with their even more shiftless neighbors, when perhaps one paint coat would make them the examples of the axiom that "one newly painted house soon paints the whole block."

One look tells you that all of this is so, and your more careful scrutiny only serves to emphasize it. As a matter of fair play—to yourself and to your fellow citizens—isn't it your plain duty and your profit opportunity as well, to get to the owners of these homes, personally and through your advertising, and awaken them to the situation? To sell them paint, varnish and allied material, and a lot of it; and to help them secure good painters, your own good customers and friends, to ensure a dependable job.

Perhaps you may be surprised to find that a goodly number of these property owners know their paint needs, just as they know the advantages of insurance or a savings account; but being only human they have procrastinated from day to day and are easily made paint customers when you go after them.

Yes, there's ample opportunity for business in this block; the corner house there needs three coats of good paint all around, and the garage and fences need attention, too. This one house requires house paint, roof paint, porch paint, varnish

(Continued on page 50.)

Sold Out!

With the shortage of Paris Green we call attention to "Sprayide" which we consider in many respects superior to Paris Green. It is a combination of Arsenate of Lime and Bordeaux. It not only kills the bug but protects the plant against blight and assures a much healthier growth, a larger potato and a larger yield than can be secured by spraying with Paris Green.

This combination is being used and recommended by some of the largest growers in Canada.

Selling Brushes As Sanitary Accessories

Sanitary Appeal Is Strong In the Sale of Practically Every Line of Brushes—Keeping the Brush Stock in Sanitary Condition Does Much to Convince Customers

IN THE sale of brushes the Bond hardware Company of Guelph, Ont., make good use of the sanitary appeal. Few housewives will not respond to the suggestion that better sanitary conditions will follow the employment of certain brushes in the household. For instance the use of a closet bowl brush will result in a much more sanitary condition in this receptable. Banister and radiator brushes are specially designed to get into the usually inaccessible corners where dust accumulates. So it is with all the range of brushes.

In order to convey the sanitary idea, the brush stock in this store is given the best of attention. All brushes are kept in glass cases, sorted according to sizes and qualities, each in its own compartment. The paper covers are taken off one or two samples but left on the others to protect them against dust and moths. It is incompatible to try to sell brushes on the basis of their importance as sanitary accessories while at the same time keeping the brush stock in an unsanitary manner.

Much is being said these days about sanitary conditions in the home. Plumbers have found that they can secure more respect and appreciation of their industry by being classed as "sanitary engineers" and emphasizing to people the fact that sanitary plumbing will prevent much disease and unhealthy conditions in the home. This propaganda can be "cashed in" on by the hardware merchant by carrying out the sanitary idea in all brush selling and keeping the stock in such a manner as to reflect the fact that he himself appreciates that they are the tools of sanitation.

UNIQUE DISPLAY PULLED PAINT BUSINESS

(Continued from page 48)

and screen paint. Incidentally, this also means the sale of brushes, putty, sandpaper, linseed oil, turpentine, and what not else to the home owner or your friend, the master painter.

The house next door is in much the same condition. It requires a good bill of material, too, but these folks aren't driving a new car like the family in the corner house. They are still getting along with their 1920 model. It's at the curb now; dingy looking, but its lines are good and it is in good mechanical condition, though the youngsters "want a new car." Have you ever suggested to the owner that auto finish would "make it do and new" for a few dollars? In fact, do you even know him personally? Let's jar you even more: Is it just possible that if you were to walk up to him pretending to be a stranger in town, asked him to direct you to your store, he would have to think twice to remember you and that you had a store?

And would he know that you sold paint and varnish? Would his "ignorance" about you and your store and your paint department be his fault or yours? Multiplied by all the others of his kind in your vicinity, will the fact that he does not really know you, mean hard work, long hours and small profits to him, or to you?

You could go on up the street, every street, in this fashion, taking house after house, but the story would be just about the same.

The other blocks are much like this one; modest cottages, the newer and more popular bungalows; here and there flats and apartment houses, public buildings and some pretentious homes.

Group of District Sales Managers and Department Heads of the Lowe Brothers Co. in convention at the offices of Lowe Bros., Ltd., Toronto. The details of this convention were outlined in last week's issue of Hardware and Metal. Reading from left to right: Back Row—Geo. L. Paine, Boston; J. Mahoney, Lake Division; R. K. Mason, Kansas City; D. P. Haber, Asst. Treasurer, Dayton; R. E. Scott, Director Varnish Sales, Dayton; A. M. Jamison, Alleghaney District; H. S. Wauters, Jersey City; A. F. Burdoin, Minneapolis; A. BOECKH'S BRUSH NEWS

As the Doctor —So the Merchant

If the doctor gave his patient just what the *patient* thought he should have—what would be the result? A disgruntled, disappointed patient, who immediately goes to another doctor.

When the merchant sells just the brush his *customer* thinks he should have without troubling to find out its intended use, and advising the proper kind, the result is the same. And some other merchant gains a customer.

To gain the most from your Boeckh's Brush Department, you must act as an adviser to your customer. You must study his requirements. Sell him the brushes he really *needs*.

For instance, Mr. H. wants to paint his verandah. If you let him buy just the one medium width of brush of inferior quality he *thinks* he needs, he won't be satisfied. He won't get the nice-looking job he expected. He'll blame you for not selling him the right kind of brush. Explain that he needs one brush for the large surfaces, and a different kind for the cornices, mouldings and other narrow places. Point out his correct requirements. Explain the difference in the quality of work obtained by using brushes of the right type and good quality. The chances are you'll sell him two Boeckh's Brushes instead of *one* of an inferior grade.

He'll get a real good job, and next time he needs anything in your line, he'll call on you. You've made a steady customer, one who will rely on your judgment—and who will recommend you to others.

It will be to your advantage to give the same careful attention to your customer's brush requirements that the doctor gives to the selection of medicine for his patients.

Sell your customers Boeckh's Brushes. There is one for every kind of job. And they give satisfaction to the consumer. This means steady customers for you—and increased opportunities for profit.

Be sure to keep your Boeckh stock complete.

Weekly Paint Markets

Montreal

MONTREAL, June 22.—Price advances of an extensive nature on both turpentine and linseed oil attract attention in the paint markets this week. Turpentine records a ten cent increase, bringing quotations to a new high level for the season. The strength of this market became apparent in the south during the week, the local situation with regards stocks available being improved during the week by further shipments from primary centres. The sudden change at producing points came as more or less of a surprise to many local distributors, who state than an easier tendency is usual at this season. However, unfavorable weather for the new crop and an active demand both on domestic and foreign markets continue to hold the market in a strong position. The recent easier tendency in the linseed oil market proved to be of only temporary duration and following the slight reduction in prices of the past two weeks, the market is again very firm with quotations advanced eleven cents on the local market. This reaction did not come as a surprise to some well-informed, although the extent of the price change was hardly expected. It has been pointed out by certain crushers during the season that the market would retain a firm attitude owing to a world-wide shortage of seed. Reports now show that only a limited amount of flax seed is available for the remainder of the season on the Canadian market, which factor should, according to local crushers, be sufficient to maintain a firm tone in linseed oil during the remainder of the season. A strong tendency has developed in the market for Paris green and insecticides with a shortage of supply reported both among manufacturers and distributors.

WEATHER CONDITIONS AND PRESENT SHORTAGE BOOST TURPENTINE PRICES

Montreal.

Contrary to expectations of different importers, the turpentine market has recorded a further sharp advance of ten cents per gallon, bringing a new high record quotation of $1.48 per gallon in one barrel lots. It is stated that an improvement in shipments from the south has been evident, and recent arrivals have replenished local stocks to an appreciable extent, but the market in southern centres has displayed a marked degree of strength. Toward the latter end of last week a gain of eight cents per wine measure gallon was made and this increase is now followed by a proportionate advance in domestic quotations. Distributors point out that the present development is entirely due to the disappointing progress the new crop is making. Unfavorable weather is still the drawback, and although an easier tendency is usually expected at this season, the market is now held in a firm position owing to light receipts. A heavy consumer demand is in evidence on domestic and southern markets, with inquiries from foreign quarters particularly brisk. Advance prices are as follows:

TURPENTINE—	Imp. Gal.
1 barrel lots	1 48
2 to 4 barrel lots, per gal.	1 47
Broken lots	1 58

HOUSE PAINT PRICES TO BE HIGHER IN U.S.

At the time of going to press, Hardware and Metal is informed that American paint manufacturers have arranged to increase quotations on house paints, porch and deck paints, to the extent of ten cents per gallon. These higher levels will become effective in the United States on June 26. It is not yet known whether this upward movement will be reflected in similar domestic paint prices, but no consideration of higher paint quotations for the fall trade has been made, according to a Toronto manufacturer, it being further stated that the American prices were generally thought to be too low in comparison with present production costs and the revision on the other side was not considered surprising from this viewpoint.

SHARP ADVANCE IN LINSEED OIL PRICES

Montreal.

The strength in the undertone of linseed oil, due to limited seed supply, features the market this week when a strong reaction is noted and prices show a sharp advance of eleven cents per gallon. This sudden reverse in the trend of the market did not come as a surprise to some well-informed, although the marked nature of the change was hardly expected. Towards the middle of last week oil prices receded to the dollar mark but from then on the gain has been anything but gradual, an advance of eight cents being recorded in one day. The gain in the seed market is general, July seed having advanced approximately 20 points during the past week while spot seed is from 10 to 15 points over July quotations.

"Reports have shown all season that a shortage of seed was probable if demand was well maintained during the usual active season. Figures now show that only a quarter million bushels of seed are available on the Canadian market for the balance of the season, which condition should be quite sufficient to hold the market in a strong position until the new crop, notwithstanding the usual falling off in demand during the following months," said one local crusher to Hardware and Metal. It was also pointed out that the softer tone evident in the past two weeks, while undoubtedly due to prospects for next season's crop and the temporary slump in demand, was soon overcome when it was realized that the present, and not the future, question of seed supply is to be taken into consideration. Following are revised qutations:

LINSEED OIL—		
1 to 2 barrel lots, per gal.	1 13	1 15
5 to 8 barrel lots, per gal.	1 11	1 13

Less barrels, add 10 cents per gallon.

PARIS GREEN MARKET FIRM STOCKS ARE LIMITED

Montreal.

The present season has been a particularly active one for Paris green and other insecticides and stocks of the former are now reported as almost depleted. Supplies in the hands of manufacturers are almost totally gone, and distributors state their stocks are at a very low level. With a heavy call altogether probable in the coming weeks, the market for these products is very firm and the question of new supplies is receiving much attention at the present time.

Toronto

TORONTO, June 22.—Of outstanding importance in the paint markets this week is the sharp advance in turpentine prices, a total increase of fifteen cents per gallon having been recorded, which brings local quotations to the highest level since the Fall of 1920. Paris green, linseed oil and dry arsenate of lead, also furnish developments worthy of close attention, each of these three products registering higher price levels. Linseed oil recovers some of the ground lost during recent weeks, a five cent advance making up for the decrease to the same amount noted in

TORONTO MARKETS

(Continued from page 52)

last week's report. This movement is primarily due to the recovery in flax seed markets, the price trend in this direction naturally re-acting upon oil. The call for seed has again improved, and attention is being called in certain quarters to the possibilty of seed shortage. As pointed out in a recent market report in these pages, Paris green has been experiencing a very brisk call, stocks are extremely low and fresh supplies difficult to secure. This position has become accentuated during the past few days, and many distributors state that stocks are absolutely exhausted. Those who have some supply available have advanced prices another two cents. Dry arsenate of lead has been in greater demand during the past few days, and some distributors have increased prices on this product three cents per lb. While the higher levels were not generally adopted at the time of going to press, it was stated that this advance was expected to become uniform in the near future. The sudden rise in turpentine quotations has been a surprise to local distributors, and also a more or less unexpected development in producing circles.

Arrivals of fresh turpentine in greater volume have been keenly awaited, in order to relieve the present local situation, and it was generally expected before this time, that prices would be considerably easier owing to the season's crop increasing the available supplies in the south. Such, however, is not yet the case, reports from producing centres indicating that the consuming demand continues in excess of the volume of receipts. Therefore, in spite of the fact that the season has advanced far enough to admit of the crop moving with freedom, the demand has been so broad the stocks are held down to very small proportions.

NEW HIGH SEASON'S PRICE ON TURPENTINE

Toronto.

Turpentine prices have been the surprise of the trade for several weeks past, but the high levels reached this week supply the premier feature in a market which has been replete with new developments throughout the present season. During the week, prices at southern producing centers registered increases totalling more than ten cents per wine-measure gallon, wtih local distributors tabulating a similar rise. The continuance of this strength, coupled with the depletion of local stocks and the small arrivals from the south, resulted in another five cent advance locally, thus making a total rise of fifteen cents per Imperial gallon from the levels announced in last week's issue of Hardware and Metal. With these higher quotations in effect, prices are generaly higher now than at any time since the Fall of 1920. This applies to the Savannah primary markets as well as local centres. The present position of turpentine and the prevailing high prices, come as a surprise to both distributors and brokers, as well as southern producers. The scarcity of the product, which has been outlined in recent reports, is still very much in evidence; and coupled with this element is the strong European demand, also an increased ratio of domestic consumption. Thus a strong uniform call is experienced for current supplies, a condition which undoubtedly serves to maintain high prices at producing centres. The scarcity is accentuated by the universally reduced stocks, to which has been added the effect of inclement weather in producing territories, thus handicapping to some extent the new crop.

TURPENTINE—	Imp. gal.
1 barrel lots	1 60
2 to 4 barrel lots	1 59
5 gallon lots	1 75

Less than 1 barrel lots—15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

TURPENTINE PRICE REACHES NEW MARK OF $1.65 GALLON

Just as Hardware and Metal goes to press another advance is recorded locally in turpentine prices. This further change brings the average quotation to $1.65 per gallon in single barrel lots, a level five cents higher than that given in the weekly market report, and twenty cents higher than the price quoted last week.

THREE CENT ADVANCE IN DRY ARSENATE OF LEAD

Toronto

Owing to the shortage of Paris green, an increased demand for dry arsenate of lead has been experienced, with the result that some distributors have taken advantage of this situation and increased their quotations three cents per lb. all through the list. These higher prices were expected to become generally adopted within the next few days, but at the time of going to press, arsenate of lead could still be secured in certain quarters at the previous opening season's prices. The following list, however, includes the advance of three cents per lb.:

DRY ARSENATE OF LEAD—	Per lb.
In ½ lb. packages	0 40
In 1-lb. packages	0 38
In 5-lb. tins	0 35
In 10-lb. tins	0 34
In 25-lb. drums	0 30
In 50-lb. drums	0 28
In 100-lb. kegs	0 26

STOCKS OF PARIS GREEN ARE PRACTICALLY DEPLETED

Toronto.

Stocks of Paris green are practically exhausted locally, and prices have been advanced another two cents all through the list. This development, however, merely reflects the current situation, some distributors reporting that supplies are absolutely depleted, and therefore prices do not interest them at this time as they have nothing for sale. On the other hand, holders of Paris green are in the position where practically any price could be asked, until fresh supplies are available.

It was pointed out in these columns last week, that Paris green was experiencing a very brisk demand, with stocks at a very low ebb and new supplies difficult to obtain. This condition has become accentuated during the past few days, with the result that the following quotations govern the current market:

PARIS GREEN—	100-lb. lots
½-lb. paper cartons, per lb.	0 42
1-lb. paper cartons, per lb.	0 40
½-lb. tins, per lb.	0 44
1-lb. tins, per lb.	0 42
25-lb. tins, per lb.	0 38
50 and 100-lb. drums, per lb.	0 36
250-lb. kegs, per lb.	0 34½
600-lb. barrels, per lb.	0 34

LINSEED OIL PRICE REGAINS LOST GROUND

Toronto.

The recent easier tone in linseed oil proved to be only of a temporary nature, and with the reaction in flax seed markets, prices have again firmed up, an advance of five cents per gallon being recorded this week. Such development places linseed quotations at the local level of two weeks ago, but the general tone of the market has registered much improvement, owing to the limitations in seed supply now being a factor daily becoming more prominent.

A pending shortage of flax seed was the dominent feature in these markets a short while ago, but with the recession in the current call for linseed oil, and the recent easier prices on seed, this element came near to being overlooked. Whether the present gain will be maintained is stated as dependent upon the prevailing demand, but with seed markets recovering some of the lost ground, oil will naturally reflect this sentiment.

LINSEED OIL—	Per Gallon Raw	Boiled
1 to 2 barrel lots	1 0	1 13
3 to 4 barrel lots	1 09	1 12
6 to 9 barrel lots	1 07	1 10

MAY FORM OSHAWA PAINT AND VARNISH WORKS, LTD.

Walter Stacey of Oshawa, Ont., has recently been reported on business trips in an endeavour to have located in Oshawa a large wholesale jobbing house of paints, varnishes, oils, etc. This concern is to have exclusive selling rights of all the province of Ontario, in handling the entire output of four large factories. It is understood that options have been taken on at least two buildings by Mr. Stacey, both with railway sidings, suitable to start business. If located here the firm will carry on as The Oshawa Paint and Varnish Works, Ltd.

Retail merchants in Peterborough, Ont., have proposed to have at least one store in each line of business remain open on the scheduled half-holiday. It has been found in other years that the closing of all the business places on the same day, has been a distinct hardship on many people from a distance.

Barrett Roofings, Cements Industrial Paints etc.

The Wise Dealer Looks Ahead

HE wants to make profits, of course, but he must make friends of his customers—he must win and hold their confidence by selling them reliable goods at fair prices.

That's why wise dealers like to sell Barrett products. Our sixty years' successful manufacturing experience insures the absolute reliability of every article bearing the Barrett label.

The Popular Fly Oil

Lice Destroyer, Cow Spray

Creonoid is wonderfully effective in eliminating flies, lice and other vermin, and a fast seller in every farm community.

When the worry caused by flies and other insects is removed by Creonoid, horses do more work, hogs fatten more quickly, cows give more milk, and hens lay more eggs. That means bigger farm profits.

The farm where Creonoid is used is healthier, too. For Creonoid kills the malarial mosquito and other germ carrying insects. It also kills the dangerous, blood-sucking flies.

We Help You Sell It

Our advertising plans include many farm paper and newspaper advertisements featuring this remarkable Barrett product. We are making customers for Creonoid right in your territory. If you order now you will be prepared to make the profit on this demand.

Comes ready for use in 1- and 5-gallon cans, ½ barrels (about 20 gals.), barrels (about 40 gals.), and steel drums (43 gals.).

Spraying hen house with Creonoid

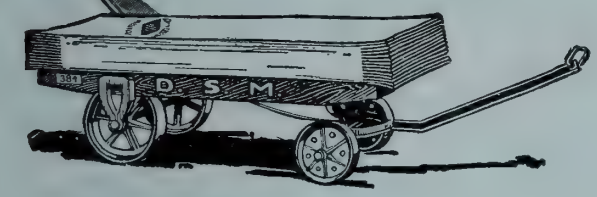
TINKER TOM'S TALKS.

No. 364

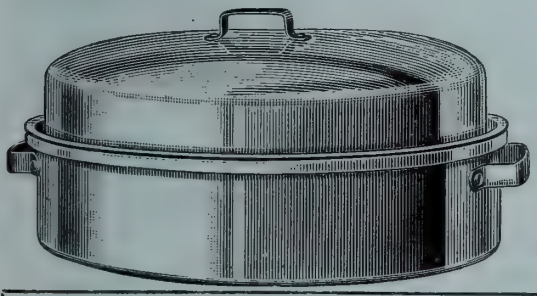
A YEAR OF WEEKS

In our whole page ad. next week we'll celebrate the fact that these talks have appeared regularly in Hardware and Metal for 365 consecutive weeks. Only about half of them ever asked you to buy "Premier" Galvanized Steel Sheets—that seemed to be a plenty! During the balance of the time we covered a vast range of facts and fancy mainly intended to make us feel better acquainted all around. Next week's talk will contain an offer of interest to you. Don't overlook it whatever else you may neglect on account of golf or fishing.

TINKER TOM



MADE IN PREMIER CANADA



The Story is Short The Sale is Sweet

VIKO Roasters do not need hours of explaining to familiarize customers with them. Simply do this:

Display the VIKO Roasters in prominent fashion—on the counter and in your store windows. Its bright, attractive finish invites inspection. The customers look it over and the sale is more than half made. VIKO products practically sell themselves. Better write us.

DAZEY CHURNS

Clean, Sanitary, Time-Saving

The Dazey Churn is the only one that produces butter in its natural condition. In place of breaking the tissues in which the butterfat or oil is contained and bringing this into a mass, the Dazey dasher drives the cream across the slanting wings and rolls up the globules in their natural condition into grains about the size of rice. During this building-up process, the casein and other butter-making properties in cream, usually lost with other churns, stick to and roll up with the butter globules, which is the reason the Dazey makes more butter.

With the Dazey it is possible to churn in 2 to 5 minutes.

Sanitary—Because there is nothing to absorb the cream and become rancid as with wooden churns.

"Champion" Cream Separators

A High Quality Machine That Gives Service

The "Champion" Patented Centrifugal Cream Separator represents just what it implies, simplicity, perfection in action, with mechanical construction of the highest. The materials and every portion connected with it are the very best that experience, mechanical skill and money can apply. The "Champion" Separator in its inventions, design and entire construction, is the product of the trained mind of a mechanical engineer, with over one-quarter of a century practical experience in inventing, designing and manufacturing cream separators. The "Champion" Cream Separator has many other improvements that are well worth dwelling upon.

Write to-day for interesting literature.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Why Hardware Mailing Lists Are Not Complete

WE ARE frequently asked why many of the so-called complete hardware mailing lists are incomplete and miss many hundreds of the best hardware stores in Canada. There is a reason.

If you take a complete list of the hardware firms rated in Dun's and Bradstreet's as hardware firms, you will be short upwards of 900 of the best hardware firms in Canada. This is due to the fact that upwards of 900 of the leading hardware stores in Canada, are the hardware sections of department or general stores. There is nothing in the commercial rating books to indicate which of the many thousands of department or general stores have hardware sections. For instance, in one Western Canada town there are four general stores and one exclusive hardware store. One of the general stores has a strictly modern hardware section. The only way in which you can find out which one of the four stores has this department, is to visit the town and call on all stores. The same condition exists in hundreds of other places in Canada. The cost of doing this for one mailing list or one publication would be absolutely prohibitive. The MacLean Publishing Company, however, have fifteen publications, and send crews of salaried circulation men into every city, town and hamlet in the Dominion from Coast to Coast. Representing fifteen publications these men call on practically every business man in a town or city. The MacLean Publishing Company have been working on this plan for upwards of 30 years. The result is that to-day HARDWARE AND METAL has as paid subscribers, in addition to exclusive hardware stores, upwards of 900 of these strictly modern, up-to-date hardware sections and very few of these names are on mailing lists, with the exception of the list used to mail out our paper.

Another important point is that on our mailing list several hundred copies go addressed personally to the men in charge of the buying. Circulars sent from the average mailing lists merely go to a firm name along with a large quantity of other circular matter and is somewhat of a hit or miss proposition. With HARDWARE AND METAL there are hundreds of cases where the name of the buyer also appears along with the company address.

Subscribers to HARDWARE AND METAL buy our paper because they need it in their business and because they study it each week for news

of the trade, new goods, market information and for additional information regarding goods which the merchants are carrying in stock. Several hundred merchants prepare their advertising in their local papers, from information which they take out of the advertisements in HARDWARE AND METAL. Window trimmers in hardware stores study HARDWARE AND METAL for ideas on seasonable goods which they can display in the show windows. The men behind the counter are among the closest readers of HARDWARE AND METAL because in it they find a vast amount of information regarding goods which they are called upon to sell each day. Dozens of leading jobbers' salesmen carry copies of the current issue of HARDWARE AND METAL along with their catalogs and go through these issues with their customers. One of the leading wholesale buyers, (name on request), stated that he "much preferred to buy lines advertised in HARDWARE AND METAL because he found that these lines were the quickest sellers and were the lines in which the travellers took the greatest interest."

It is therefore of the utmost importance that any advertising matter you wish to place before the trade, should reach as many of these hardware men as possible. It is an easy matter to claim that you cover the whole hardware trade but HARDWARE AND METAL knows from thirty-three years' experience that it takes many years of honest, intelligent effort to get a complete list of the hardware buyers in Canada. A large staff is also required to keep lists up to date, record business changes, new firms, etc. We offer you the most complete list through the advertising pages of HARDWARE AND METAL.

The hardware trade is undergoing rapid changes. With each succeeding year come new developments. It is our business to keep in close touch with the trade. We have a vast amount of information on almost every imaginable phase of the hardware trade. You may think your line is one that cannot be advertised. We may think differently. It will cost you nothing to secure our views. Drop us a line and our representative will call, or if you prefer it, we will, after making an investigation of the possibilities of advertising your lines, submit our proposition in writing.

THE MECHANIC'S CHOICE—
THEREFORE THE DEALER'S CHOICE

CARBORUNDUM NIAGARA GRINDERS

THE mechanic's choice because the Carborundum Niagara Grinders are mechanically right.

They have the balance, the power, the speed. Every part is accurately made, carefully fitted.

And each machine is equipped with a genuine Carborundum Wheel—the peer of all wheels for general grinding.

The Niagara Grinder is the dealer's choice because there isn't any other made that is so easy to sell. It always makes a hit and its no trick at all to put one in the tool kit of every mechanic who comes to your store.

Carpenters, Garage Men, General Handy Men and Householders—they all can use a Niagara Grinder.

Stock them in all sizes—Display them in your windows.

Glad to give you complete information regarding the complete line including the cheaper machines known as "The Black Knight Grinders."

ASK ABOUT THE GRINDER DISPLAY STANDS—THEY SELL GRINDERS

DAYTON

HARDWARE SCALE

It Weighs--It Counts--It Computes

This is the one modern automatic scale built specially for the Hardware trade by their request. It is designed to get the Hardware Merchant every cent that is coming to him on everything he sells by weight. It is designed for quick service. It is made so simple in operation that any clerk can use it.

It is designed to please the customer too because it guarantees the square deal wherever it is used.

Successful Merchants use the Dayton

A recent endorsement of the value of the Dayton Hardware Scale is the purchase made by Messrs. Sutherland & Thompson, with branches throughout the Maritime Provinces. Their searching investigations showed them that for quick, accurate weighing and price computations the Dayton Hardware Scale is the scale they want.

The Dayton weighs automatically. A visible indicator tells you when you are nearing the desired weight and when you get there you know the correct selling price as well. No dipping back and forth while the customer looks on and fidgets. No mental calculations of the price. The scale weighs and calculates at the same time.

The Dayton Counting Scoop computes for you the number of articles in a given bulk. No need to count bolts, nuts, screws, etc., by hand. Invaluable at stock-taking time. Wire or rope, too, can be weighed and valued in pounds. A special platform rack is provided for bulky products. Here is the way to stop the little leaks in overweight or errors in price calculations that will mean a big addition to your net profits.

The Dayton pays for itself. We sell it on attractive monthly payments without interest. Discount for cash. Write to-day for descriptive circular.

BADEN

THIS is the name of an ideal. In 1864 the founder of this organization conceived this ideal. Conceived the idea of making a linseed oil so perfect that it would become a synonym for excellence in oil. He set out, before the days of the Confederation to make this perfect oil that would be the standard of comparison for oils.

Now, today, the idea has been perfected. Buyers say, "Baden," knowing that they are perfectly understood as wanting this incomparable brand of Linseed Oil.

When you want the best—say Baden.

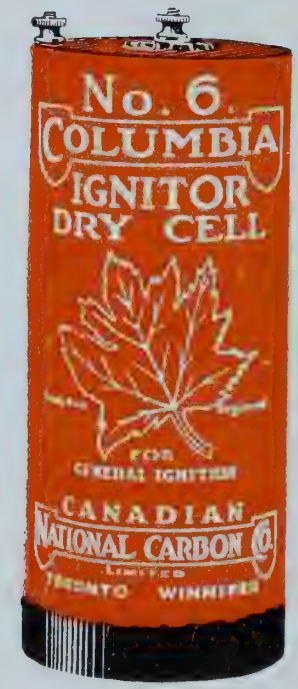
Columbias—the fast-selling Dry Batteries

Known the world over as the best dry battery made, it is an easy job to sell Columbias. Millions of Columbia Dry Batteries have been used wherever ignition for operating gas engines, tractors, small automobiles, motor boats, burglar alarms, doorbells, thermostats, telephones, buzzers, has been required. Columbias are used with portable lighting outfits in cottages, tents, outbuildings, and closets.



There is a Columbia Dry Battery of the single cell ignitor type, or of the "Hot Shot" or "Multiple" which are made up of a group of cells for every ignition use.

Order from your Jobber. There is a big advertising campaign behind Columbia Dry Cells. They sell fast and give you a good profit.

New, Sales Producing SMP Window Trims Now Ready

Mr. SMP

Copyright in Canada 1922
by the SMP Co. of Canada Ltd.

The window trim featured above is a sure enough sales producer! Passers-by, in need of kitchen ware, simply cannot resist it. As a peppy salesman, Mr. SMP can't be beaten—he just pulls customers into the store.

Diamond or Pearl Ware Trims

This window trim is procurable in either Diamond Ware or Pearl Ware. Two other trims are ready, one in Diamond Ware and one in Pearl—just as peppy and just as big business-getters as this one. They are reproduced in brilliant colors and are from the brushes of some of Canada's best artists.

For Every SMP Dealer

We want every SMP dealer to make use of these wonderful trims. Don't be backward about writing for them, or asking our traveler to have them forwarded to you. We had them prepared especially for your use. All travelers have photographs of these trims—two Pearl Ware and two Diamond Ware in all. Ask to see them or write direct to us.

The "SUPERIOR" Parlor Door Hanger

The "Superior" works on the simplest adjustment principle known. The adjustment screw is absolutely reliable—it never fails to operate.

This effective hanger is fitted with fibre wheels operating on case-hardened roller bearings. The bumpers are specially manufactured, they are bound with rubber of extra heavy thickness.

They are packed complete with screw, stops, and guides; 14 feet of track with double sets; 8 feet of track with single sets.

If you are not already enjoying the excellent sales of this hanger—investigate now!

Screen Doors and Barn Doors Hang 'Em!

WHERE there is the smell of good things cooking there are flies and where the grain is, there are birds. Screen doors are indispensable on the home and 19-line farm doors are essential on the barn. Screen doors and bird-proof barn doors are going to be in demand this season, and hinges and hangers asked for. Get in line for the call you will have for Slater goods.

Demonstrate the 19-line hangers and tracks at every opportunity you get. Show them to the farmers' wives. They know what the screen door did to the flies, and will appreciate what the 19-line barn-door hangers will do to the birds.

Write us for any sales assistance you need.

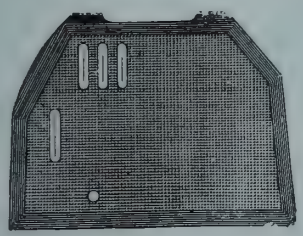
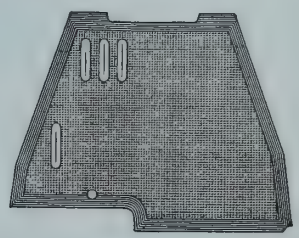
"GUTTA PERCHA"



Coupe Mat

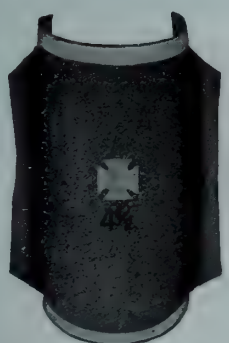
"GUTTA PERCHA"

Wind and Heatproof Mat For Ford Coupe, Sedan and Touring Car



Sedan Mat

Display these wind and heat-proof mats well in your windows or inside the store. They make an instant appeal to auto owners. Showing them conspicuously lets the "wise" motorist know you have them and arouses the interest of the man who doesn't know about them. Both things lead to still more sales for you. They cover the slots for clutch and brake and keep out wind, heat, dust and odors.



Blowout Patch

Blowout Patches.—Better design accounts for the extraordinary sales hardwaremen have had with these excellent patches. A smooth lining and feather-edged ends that prevent chafing and pinching the tube are only two of the selling points that make these "boosters" in accessory departments.

Sealtite Patches. — When punctures occur, the motorist wants to get them fixed as quickly and easily as possible. That's the easiest thing for you to sell him on. Show him that "Sealtite Patches" require no tools but the hands, and save him much time and trouble.

The A B C of Good Selling

Concentrate Your Efforts!

Why not confine your sales efforts on washers and ironers to the famous *complete* A B C Line and thereby increase your discounts and profits, reduce overhead and sales expense and simplify correspondence, bookkeeping, ordering and service?

There are ten models of A B C washers, in the three popular types (dolly, cylinder, oscillating), ranging in price at retail from $72 to $200—and there are A B C Electric Ironers, too.

An A B C is thus provided to sell practically *every type of prospect.* And each A B C bears the guarantee of the big pioneer firm of Altorfer Bros. Company—a company known and everywhere respected for its reliability and integrity.

To attract prospects into your store, you can feature the low-priced A B C Alco's (dolly-type washers), or the new $135 A B C Oscillator—the greatest value in an electric oscillating washer ever offered by a standard maker.

Many people, so attracted, can be easily interested in the $155 or $170 A B C Super-Electric; if you choose.

The A B C Line therefore offers you a great selling combination—one that you can get behind with all your enthusiasm and make money on.

You will also find the A B C organization always willing and anxious to work with you and help you succeed.

Today! Get full particulars concerning the A B C proposition, whether interested in the whole line or in any of its components. Liberal discounts! Real co-operation!

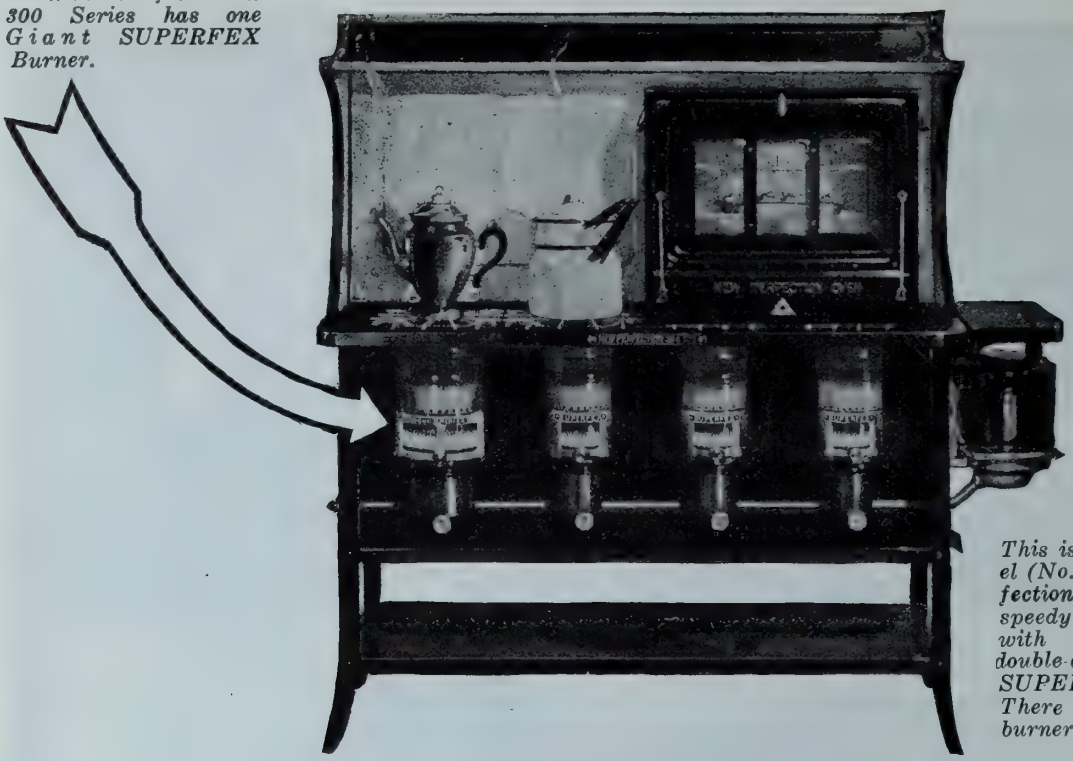
Each model of the new 300 Series has one Giant SUPERFEX Burner.



This is the 4-burner model (No. 304 with New Perfection Oven) of the new speedy oil stove equipped with the double-walled, double-draft, rapid-cooking SUPERFEX Burners. There are also 2 and 3-burner sizes.

And Now—

with SUPERFEX *Burners*

——a super New Perfection with super sales features which represent the greatest single development in oil-burning household products during the present generation.

The new "300 line" New Perfection with SUPERFEX Burners *equals the cooking speed of gas*, summer and winter, on the farm or in town. And the wonderful efficiency of SUPERFEX Burners, due to perfectly-balanced air drafts and the new and positively automatic wick stop, makes it even *more reliable* than gas.

The PERFECTION Line

New Perfection Cookstoves
New Perfection Cabinets
New Perfection Ovens
New Perfection Water Heaters
Perfection Oil Heaters
Sani-Can
Electrical Appliances

This new model is a notable business-building addition to the popular series "30" which already has a staunch following of over 4,000,000 satisfied users. Together with the famous "Blue Chimney" New Perfection, (still the best oil cook stove at its price), this super stove opens up vastly broader sales markets; gives you a new and greater opportunity for more sales and more profits—gives you *a complete line of New Perfection Oil Cook Stoves and Ranges fitted to every purpose and every purse.*

The Perfection line, offering as it does convenience, economy and comfort in the kitchen, is always a favorite with the thrifty housewife. Dealers everywhere have found the Perfection line a consistent money-maker. See that you have our full dealer proposition and that you carry the complete line. We will gladly send you full details by mail and have one of our salesmen make a personal call.

Millers Falls Jacks

Laugh at MILLERS FALLS TOOLS the Load

1868

Jack up your Jack sales

MILLERS FALLS Jacks lift more than automobiles and motor trucks—they lift a heavy load of inventory worry off your mind.

The illustration shows Millers Falls Auto Jack No. 145—adjustable base, long handle and all. Roller-bearing and worm-driven. Few parts. Easy to operate. The extension handle folds up and the jack tucks snugly away in any tool-box.

If you want to do a bigger jack business, put Millers Falls Jacks in your stock and in your 1922 catalog. It's a good way to jack up your jack sales.

Look Carefully— It's a New Tool

This One Tool Measures Large and Small Pistons 2″ to 6″ in Diameter

Micrometer Caliper No. 55

is one of many Brown & Sharpe Tools in demand for motor service work. Motor Mechanics and Garage Owners know the superiority of Brown & Sharpe Tools—the high quality of their design and workmanship, and their world-known accuracy. They want these superior tools.

Show your customers.

FOR MOTOR SERVICE WORK

Rex 1″ Micrometer Caliper. This tool finds favor for general use (measuring wrist pins, etc.)

Tubular Inside Micrometers No. 270. This improved type of Inside Micrometer is constantly used for measuring cylinder bores, etc. Many prefer it to the rod type No. 260.

Caliper Rules No. 388. This rule takes inside and outside measurements (for bolts, nuts, etc.). Flexible Rules No. 306 in the 4″ and 6″ lengths furnished with leather pocket cases are also popular.

Brown & Sharpe Thickness Gauges. Used for fitting valve tappets, distributor head contact points, etc. No. 644 is especially well adapted for this work with its long blades.

Brown & Sharpe Screw Pitch Gauges. This complete line answers the many requirements of motor service work.

Brown & Sharpe Calipers and Dividers. The firm joint type finds much favor for motor service work.

These are a few tools the motor mechanic requires. A complete line is shown in our No. 28 Small Tool Catalog.

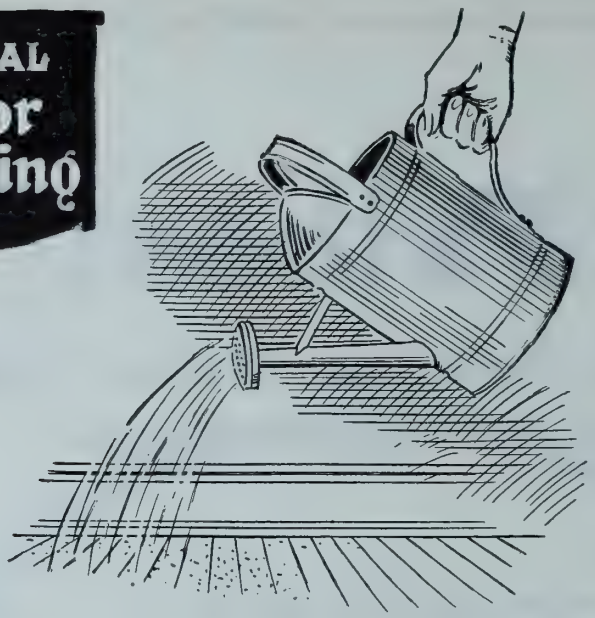
IMPERIAL Floor Dressing

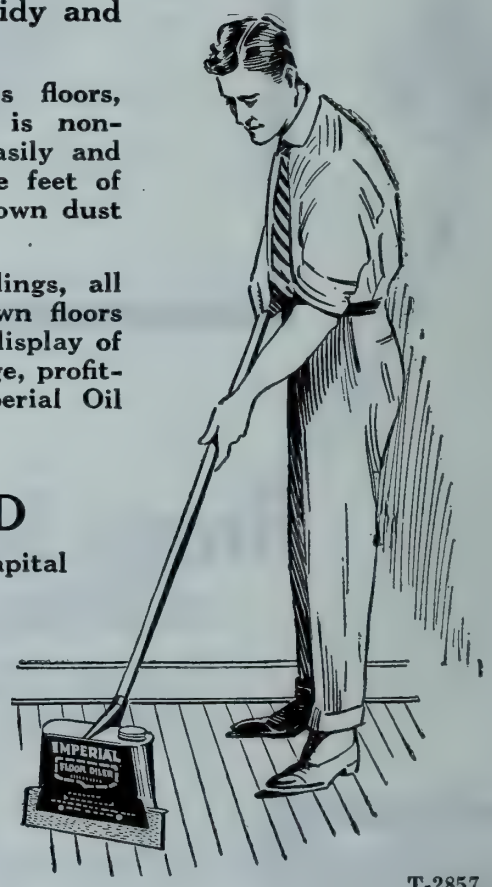


There's a Better Way-

At best the sprinkling can only lays dust *temporarily*. If you would get rid of at least 90% of it *permanently*, use Imperial Floor Dressing. It catches and holds the dust on the floor, and regular sweeping with a stiff broom removes practically all of it, leaving your store clean, tidy and dust-free.

Imperial Floor Dressing cleans and preserves floors, whether of wood, linoleum or oil-cloth. It is non-evaporating and non-gumming, and spreads easily and evenly. One gallon will treat 500 to 700 square feet of floor surface, and one application will keep down dust for weeks.

Churches, schools, hospitals and public buildings, all require Imperial Floor Dressing. With your own floors as a silent salesman backing up a prominent display of the attractive containers, you can develop a large, profitable business in your territory. Let the Imperial Oil Salesman tell you more about it.



IMPERIAL OIL LIMITED

Canadian Company Canadian Capital
Canadian Workmen

To insure even distribution of Imperial Floor Dressing, use the Imperial Floor Oiler. It does the work quickly, easily and most economically.

Asbestonos

BRAKE LINING

ASBESTONOS
Brake Lining is Made in Canada from Canadian materials by Canadians —an all Canadian Product.

FREE Display Stand supplied to Dealers—Ask your jobber about it.

Is made right in the centre of the world's supply of asbestos, and only the finest asbestos fibres are used in its production. These selected asbestos fibres are woven with double strands of brass wire, to give added strength, and after weaving is thoroughly impregnated with a special compound which renders it impermeable to greases and oils. The result is that asbestonos is a perfect brake lining—a brake lining that will give long service and be dependable in an emergency. The moderate cost will be a revelation to you.

Ask your Jobber for Asbestonos.

No "Save the Surface" Department is Complete Without a Stock of

DECORATIVE WALL BURLAPS

JUST as every home needs paint and varnish, so does it need Decorative Wall Burlaps. Burlaps make homes comfortable and sanitary—make walls attractive—are easy to apply—moderate in cost—there is a size to meet every need.

Many hardware merchants are finding it profitable to handle Decorative Wall Burlaps for the following reasons:

(1) Burlap prices have declined materially. They sell more readily.
(2) Easy to handle—they do not take up large space.
(3) A big stock is not necessary—they come in three shades only.
(4) With the decrease in cost of building materials, building has increased and Burlaps, consequently, are in great demand.
(5) Burlaps allow the merchant a good margin of profit.
(6) They help round out the "Builder's Supply" stock.

Write us for selling helps, complete information as to prices, etc.

These WONDERFUL LIGHTS —are FAST Sellers!

Merchants everywhere, are greatly increasing their profits by selling

Coleman Quick-Lite Lamps and Lanterns

Made in Canada

You, too, will increase your profits by selling these "wonderful lights" of 300 candle power brilliance. The market is unlimited—sales are easy and profits are assured.

To place a lighted Quick-Lite in your window or on your counter is to sell it. Its wonderful pure-white brilliance attracts immediate attention and admiration.

Quick-Lite Lamps and Lanterns Sell Because—

—They give 300 Candle Power pure-white light—more light than 20 old-style oil lamps.
—They make and burn their own gas from common motor gasoline.
—They light with common matches —no torch needed.
—They are built of durable, triple nickeled brass—will last a life-time.
—They have no wicks to trim—no globes to wash, no soot, no smoke, no odor.
—They are safe—can't spill fuel or explode, even if tipped over.
—They are economical—cost only about 2 cents a night to operate.

Order from your Jobber To-day!

Or, write us for latest catalogue, price list and selling helps. Address Dept. T-4.

"Save Our Surfaces"

The Property Owners S. O. S. for Paint and Varnish

THE PRESSING need of paint and varnish for surface protection of property is well exemplified in the above trite phrase as used by a hardware merchant to indicate the importance which some property owners attach to the use of these products. This call is being heard in many parts of Canada as result of the great campaign of educational effort which has been carried on through retail hardware stores and other agencies, and the call is gathering strength daily as its cumulative effect adds momentum.

The past year has seen a much wider acceptance of the importance of the campaign among hardware merchants and many of them are responding by the adoption of "Save the Surface" departments, by educational effort through the medium of advertising, sales talks, etc., to impress on customers the need for a much deeper regard for the value of paint and varnish than they have heretofore held.

The hardware store represents a collection of many and varied articles each with a particular purpose. There are many necessaries and few luxuries. Among this collection of articles it is doubtful if any fill, to the same extent as paint and varnish, the great economic needs of the country for protection. There is no loftier or more stable basis for big business than that the article being sold fills an important need in the community and is within everyone's means. All this and more is applicable to paint and varnish, and it requires this vision of the real value of these products before the merchant is in the right frame of mind to push on to the larger sphere of business which offers.

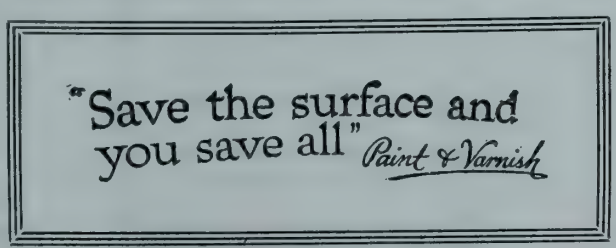
There are many splendid arguments available in basing paint and varnish trade on the value of protection and also their use for beautifying. The loss by fire in Canada last year was greater than at any time in the past despite the fact that steady progress has been made in fire fighting equipment. The loss in that year was over forty-five million dollars, or at the rate of $5.22 per head. Much of this loss could be avoided by a periodic cleaning and painting of property. A well painted building discourages the accumulation of the rubbish which is so frequently the cause of fire. The loss by depreciation of property due to inadequate painting has been figured at approximately two per cent. per annum, or a much larger amount than the fire loss, but every hardware merchant knows that not even $5.22 per capita is being spent annually in Canada on paint.

Investigation has proved that not one-tenth of the property in Canada is properly protected by paint and varnish. The figures of the resultant depreciation are increasing rapidly due to the amount of new construction constantly being proceeded with. It requires little thought therefore to realize what a terrific annual wastage will be experienced in years to come unless property owners are educated to the necessity of spending a fair amount on paint and varnish annually. The timber resources of Canada are diminishing rapidly due, not only, to the great forest fires but to the lack of protection from the elements which is provided the wood after it has been employed for the use of man. Realizing that a disastrous situation faces Canada through the continuation of this practice, governmental departments sanction the "Save the Surface" movement as a step in the right direction.

With such support and such a basis of real economic usefulness, a rich field for business awaits merchants who lend a hand in educating customers to the new appreciation of the value of these products. The possibilities are almost unlimited, but, like everything worth while, it requires the utmost co-operation and support on the part of all who form the chain of producer, distributor and consumer. In this the retailer is an important link and the whole chain is no stronger than its weakest link.

That an increasing number of retail hardware merchants are linking up actively with the campaign is indicated by the numerous articles appearing in the following pages. The "Save the Surface" departments of a number of hardware stores are dealt with and many advertisements featuring the protective element of paint and varnish are shown.

These articles give an insight into the problems which hardware merchants face in their endeavors to spread the "Save the Surface" propaganda, and how they are meeting them. It is interesting to find customers talking over their paint requirements with a view to the preservation and protection of property rather than from the single idea of beautification. Examples of how hardware merchants are dressing window and store displays, preparing ads., directing selling talk, is impressing upon customers the fact that painting as a means of preservation of valuable property is just as necessary as life insurance, fire protection, etc., appear in these pages and justify close attention.



This is the co-operation which helped put the campaign "across" bigger than ever during the past year and with the army of retail hardware supporters constantly increasing, the campaign is guaranteed such representative endorsation as will justify the utmost pride on the part of each participant.

"The Harvest is Ready for the Reaper"

A. J. WEBB

Seeds of Educational Work Along Lines of "Save the Surface" Have Been Sown for Three Years and Harvest Now Awaits Personal Effort of Retail Merchants—Big Annual Harvest in Future Years Will Follow Upon Standards to Which People Are Now Educated

Written for Hardware and Metal by A. J. WEBB

IT IS a fundamental law of nature that before we can reap we must sow. From time immemorial man has planted seeds in the earth and in due course, aided by beneficent nature and HIS OWN EFFORTS ALSO, has reaped abundantly of what he has sown. Please note those capital letters, "his own efforts also," as they have a very great bearing upon the matter in hand.

For three years now, the "Save the Surface" Committee has been steadily sowing the seeds of the "Save the Surface" Campaign, and now is the time when the dealer should begin to reap to the full, the benefits that are to be had from the consistent and steady work that has been so assiduously carried on. We can have campaigns and propaganda "ad infinitum," but unless the whole chain of effort is complete—unless there is a continuous chain of energetic thought—of co-operative effort, then it is impossible to reap the wonderful benefits that are to be had and in which the dealer particularly shares, or can share, if he will but interest himself in this wonderful work.

Long Way To Go Yet

Starting three years ago and adopting the very pertinent slogan, "Save the Surface and you Save All," the committee in charge of this work, have been steadily working towards the attainment of their object, which is the spreading broadcast of the values, as preservative agents, contained in paint and varnish. That they have had considerable success is admitted, but we have a long way to go yet. There are weaknesses in the chain. We acknowledge them freely, and it cannot be denied that the dealer has not cashed in on this propaganda work, as fully as is possible, and to the extent he really is entitled.

If the dealer will only think for a moment, he must see, that the more the value of paint and varnish is spread abroad as the true preserver of property, the more will the public of Canada be induced to paint up and varnish up regularly.

The campaign itself is based upon the solid foundation of truth. It is no mere chimera dangled before the eyes of the public of Canada from a selfish point of view, but is based upon the acknowledged fact that unless you do save the surface you cannot save the property underneath, whereas if you save the surface (by paint and varnish) then you do actually save it all.

For long years the values of paint have been more or less dimmed by the impression, prevailing in general, that paint and varnish were beautifying agents, and thus the necessity of painting and varnishing regularly, did not strike home so fully, as it does at the present time, when it is understood and being understood more fully each day that paint and varnish are the great preservers of property.

The advertising features spread broadcast by the Save the Surface Campaign, show most clearly just what value paint and varnish is when properly applied to property, and the dealer by interesting himself to the full in it will reap the very great benefits that are contained therein. Let him preach "Save the Surface" to all his customers—let him believe "Save the Surface"—let him practice "Save the Surface" by painting his own store, his own buildings and his own home, and he will assuredly find that in this wonderful campaign he is going to benefit enormously.

Not in Right Position

The Paint Trade of Canada to-day is not in its rightful position—it is not nearly in its rightful position, but we are determined that it shall be, and the Save the Surface Campaign is gradually putting it there.

Now that the painting season is at hand let us all get together and boost the work that has been accomplished by the "Save the Surface" committee, and which is being accomplished by them. Let us, each one, who is interested in the paint and varnish trade, work with enthusiasm towards the greater knowledge of the benefits derived by the use of paint and varnish. Let us link up our own efforts with the Dominion-wide efforts of the "Save the Surface" committee. Let the dealer remember that he is at the end of the chain, and in as much as no chain is stronger than it's weakest link, let him take counsel unto himself and determine that he, at any rate, shall not be the weak link.

Many examples have been shown in the "Save the Surface" literature, of just what benefits are derived from the adequate use of paint and varnish, and it is but a short step for the dealer to take his stand in line with the work that is being accomplished and to pull with it, with unquestioned benefits to himself. No man can stand alone—no campaign can stand alone.

If we all work together towards the development of the "Save the Surface" idea, then rest assured that the sales of paints and varnish in Canada will go up by leaps and bounds, nor will this be a temporary measure, in as much as the more we can drive home to the people of Canada the wonderful values that exist in good paint and varnish, more and more painting will be done—more often will it be done and before long it will be an accepted axiom that unless the property owner or occupier, does paint regularly and thus "Save the Surface" then he, or she, is bound to lose, and to no inconsiderable degree.

The Harvest is ripe, it is ready for cutting, what are you going to do about it?

Vivid Contrast in Display Emphasizes The Real Value of "Save The Surface"

Drastic Measures Needed to Convince Some People of the Real Value of Adequately Painting Property—Two Sections of House, One Painted and the Other Unpainted, Received Much Attention

A typical "Save the Surface" window as used by J. H. Ashdown (Retail) Hardware Co., Winnipeg, to emphasize the great appreciation of value of property from the use of paint and varnish, and the great depreciation which soon takes place from neglect. This window attracted much attention and set many people thinking along the lines of paint and varnish.

THE ILLUSTRATION which appears on this page indicates just exactly what the salesmen of the Ashdown retail hardware store in Winnipeg think of the importance of "Save the Surface," and it shows the steps they are taking to get this idea across to the public. This window presents a striking contrast showing on the one hand the beauty and the preservation of the painted home compared with the shabby one which reflects ruin, decay and negligence. It is noteworthy that the latter is the one for sale while the one with the pleasant surroundings and appearance is a home.

The salesmen of this store are linking up in every possible way with the "Save the Surface" campaign and are using numerous window and store displays of paints and varnishes at this season, each driving home some argument for the preservation of property. Every salesman has had special instruction in connection with paint selling and is qualified to talk methods of application, color schemes, etc., to customers. Their big endeavor is to get as much information as possible from the customer as to paint requirements, both immediate and future. These men are constantly giving helpful hints and have built up a large clientele for this reason. A salesman has been known to spend an hour or more with a customer whose immediate purchase was no larger than a fifty cent can of paint, but the underlying idea has been to give service, and the time spent on that and other customers has amply repaid the attention.

With their color charts the salesmen give out price lists on paint so that when a customer gets home and looks over the requirements, they have price information before them to estimate the cost of attending to the work necessary. It is attention to such details as this which has encouraged business until now it is quite a common thing to serve over five hundred customers a day in the paint department. The windows have been found to be very important in drawing this attention, especially when dressed with some striking display which indicates in a forceful manner the true value of the product.

Also in the local advertisements is the "Save the Surface" idea given prominence. The plan has recently been followed of varying the daily advertisements so as to specialize for two or three days on floor paints, the next two or three days on wall paints, etc. It has been found that customers respond well to the efforts to emphasize the value of protecting property and many of them are startled to hear the evidence which is given showing the loss from depreciation due to inadequate painting.

Paint Turnover Increased 30%

DISCUSSING with Hardware and Metal various features of his paint trade, Mr. Bridgman of Bridgman's Hardware, Portage Avenue, Winnipeg, emphasized the importance of linking up special effort in the sale of paint with some current development. In his opinion people are inclined too much to take paint as a matter of course and something is needed to bring their appreciation to a new perspective. A great many good arguments are available in connection with the advertising of paint, varnish, etc., and in Mr. Bridgman's opinion merely some striking way of drawing special attention to these points is all that is needed to secure favorable attention.

"During the 'Made in Winnipeg' Exhibition week last spring we specialized in preparing an attractive display of paints and varnishes with a series of printed cards strongly emphasizing the products of the line we handle, and with ribbons of various colors which served as streamers from the cards to the packages, thus describing in an easy way the purpose for which each article was intended," said Mr. Bridgman. "We were able to show one of the most attractive displays in the whole of Winnipeg during that particular week. The official judges of the exhibition invited us to enter the 'Made in Winnipeg' window dressing contest that was on, and we are glad we did, for out of the many good windows that entered the contest, our own was selected to take highest honors and with it a cash prize.

Novelty Plus Permanent Interest

"It has been our experience that the value of utilizing carefully made up windows is of the utmost importance in creating new customers. Novelty plus permanent interest in good displays keeps customers all the time coming into the store, and if the display is coupled with timely selling messages it usually serves the double purpose of not only bringing in a constant stream of business, which otherwise would be lost, but the public is being educated along well defined lines as to the proper use of paints and varnishes. The same end is being accomplished with most other lines of merchandise if satisfactorily displayed.

"In the protection and beautifying of homes of property owners, in the pleasure of obtaining harmonious color effects for either interior or exterior work, most people evince the greatest interest, and in our display windows as well as in our selling talks with customers, we cultivate the wise distribution of color folders and booklets issued by the manufacturers themselves which contain a wealth of interesting and helpful information on how certain goods may be used, or how a particular piece of work can be done successfully. It is surprising how people will become enthusiastic about getting exactly the right result concerning some finish they want to see in some part of their home, and if they do the work themselves they are all the more satisfied and these sales are an advertisement for us.

Simple Demonstrations

"Sometimes a simple demonstration of stains, or the explanation of some finish on a panel, has opened up for us many a new channel for business. In addition, there is the decorative department of the manufacturers products we carry, who prepare color schemes, wall sketches, and even to the extent of writing a personal letter by one of their decorative experts, for the prospect's personal benefit, which places him absolutely under no obligation whatever. We secure, if possible, a plan of the interior or exterior of the house, with as much information as possible as to the actual work to be done, not forgetting to find out the nature of the surroundings, and many other details, and upon receipt of the suggestions by the property owner, who invariably has the choice of three and perhaps four color schemes attractively appealing to his artistic sense, we find such real pleasure exhibited that it results in a complete order for the painting material required for the work. These orders, generally speaking, are well worth getting.

1921 Turnover 30 Per Cent. Greater

"It is to these things we attribute our success in our paint and varnish department. It must be remembered, however, we are very enthusiastic about our paint department. It appeals to us because we believe in co-operation, that is, taking full advantage of the many selling helps offered to us, because of the facilities and the experience of the manufacturers of the well known brand we handle, because we believe in sticking to one line alone and pushing that line, realizing that one line avoids duplication of stocks, makes for more active turnover, and lastly, because we believe in our judgment there is no better proposition we can offer to the buying public. We have adopted this basis for years and have proved it profitable. A more profitable investment we do not consider we have in any department of our store. Last year while trade was falling off in practically all other lines, our turnover in paints, varnishes, etc., increased over 1920 sales more than thirty per cent.

"Let us emphasize our experience that we believe it is in individual effort and keen interest, associated with the great national scheme of advertising being carried on in this country, that is wielding a powerful influence in stimulating an intelligent and wider use of the products of the paint and varnish industry. The "Save the Surface" idea being directly associated with it has been developed so successfully that the slogan "Save the Surface and You Save All" is to-day a household word. "Save our Surfaces" is the S. O. S. call for paints and varnishes, and retail merchants should all do their part in leaving no stone unturned to

Aided by "Save The Surface"

grow in knowledge in this work to tell just how surfaces can be saved and how to beautify them for the benefit of the towns and cities in which we live."

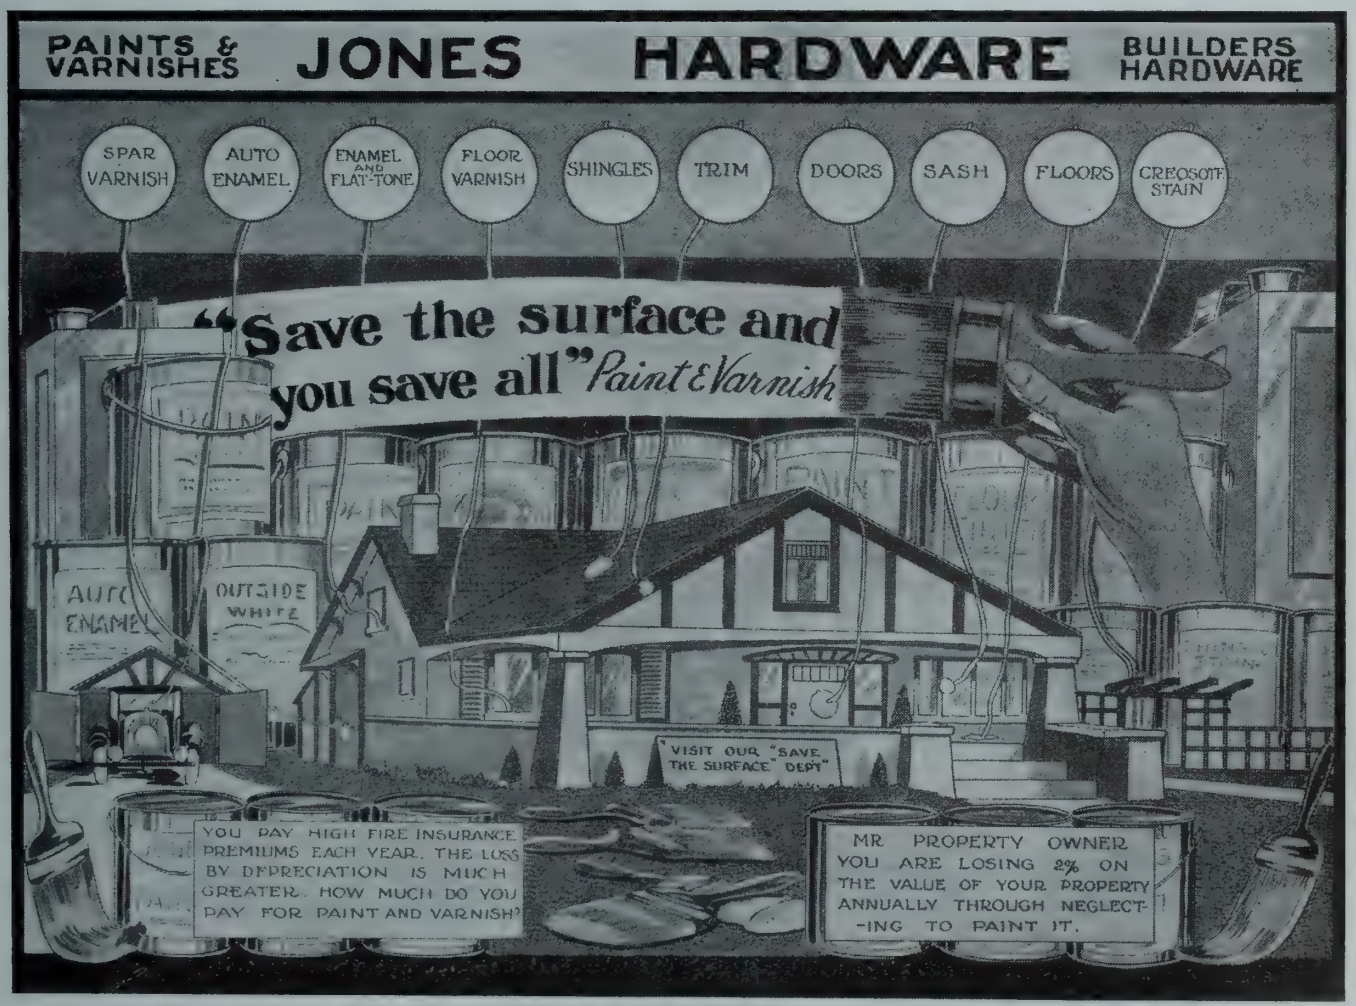
* * * *

NOTE THE WANT ADVERTISEMENTS

It is certainly encouraging to scan the newspapers day after day and find the "Situations Wanted" almost devoid of reference to journeymen painters, while, on the other hand, the "Help Wanted" columns are jammed full of advertisements for first-class painters. This not only is an indication that people are waking up to the economical necessity of paint and varnish, but also that they are demanding first-class work, and, of course, it naturally follows, first-class products. Seems that the objective of the industry, "Make 1922 the Greatest Paint and Varnish Year," is only a question of keeping up the good work in order to make its fulfilment complete.

At a recent Hardware Show, a hardware dealer got the inspiration of making better use of his windows so that they would sell paint and varnish for him. He communicated with "Save the Surface" Campaign Headquarters and plans for the use of his windows were given, together with reprints of the national advertising and window strips. This hardware dealer reports that he followed instructions and as a result his paint and varnish sales have increased fifty per cent. in the past few months. This dealer reports that he has been obliged to fill in his stock with an additional $650 order, which is a condition he had never had before at this time of the year. Within four days after he had dressed up his window with a display of paint and varnish products, he said, five other dealers in the town immediately followed his example.

The action of this dealer is in line with the policy of the campaign to get paint and hardware dealers to "use all of their windows part of the time, and part of their windows all of the time for displaying paint and varnish products."



Suggested display of paints, varnishes and kindred lines showing plainly the purpose for which each is intended and how the "Save the Surface" idea can be linked directly with the use of each one from house paint to stain for the barn, trellis work, etc. Some pointed messages can be conveyed by window cards indicating the dangers of neglecting to preserve property, implements, etc., with an adequate coat of paint.

Hardwaremen Emphasize "Save

SOME indication of the manner in which hardware merchants throughout Canada are endeavoring to educate their customers to the value of the "Save the Surface" idea, is shown in the extensive use of this slogan in connection with the ads. herewith. These advertisements are taken from local newspapers and have been selected from a large number making use of the slogan. This selection indicates that hardware merchants in all parts of Canada are making use of the effect of the campaign in connection with their local advertising.

In the Mills Hardware Co., Hamilton, Ont., advertisement appears a little explanation of "Save the Surface" under the familiar mark. This reads, "The chief purpose of all paint and varnish is to save the surface. Neglect to use paint and varnish at the right time causes heavy loss through expensive repairs which can be avoided. Proper use of paint and varnish will save money for you and prevent deterioriation of your property. It deals in turn with floor stain, graining outfits, varnish, enamel, house paint, porch paint, screen paint, paint and varnish remover, wall finishes, etc., giving a brief description of the composition and usefulness of each one and quoting prices. At the heading of the ad. is an appeal to automobile owners to repaint their cars at this season. This reads "Don't let your car get dull and dingy. Keep it up to date; keep up your pride in it. You can keep it looking like a new model if you'll give it a coat of auto enamel every six months. Do it yourself. It's great fun. All it will cost is three or four dollars and you'll enjoy doing it. There isn't any trick to it at all. Roll it out of the garage the second day and neighbors will think you have bought a new car. If you want to change the present color you have your choice of eight colors. Come in and see our samples and learn how easy it is to keep your old car looking new.

A Need Every Month For Paint

Under the familiar Save the Surface slogan, the ad. by Emerson & Fisher Ltd., St. John, N. B., says "Every month brings a need for paint. The spring and early summer months bring with them the need of painting—of brightening up the home and outbuildings, the farm wagons and equipment after the rigors of the long winter and making them presentable and attractive for the summer months."

Pressing home some strong arguments for the preservative value of paint, the ad. by J. G. Steele Hardware, London, Ont., under the Save the Surface slogan states "Why not have the best. When you paint your buildings you do so for two reasons, 1st protection, second beauty. Try —— paints for both and be convinced that this paint is a leader." It continues by dealing with various paints, varnishes, etc., and devotes space to brushes in connection with paint advertising.

Make Your Home Beautiful

Another firm which makes frequent use of the Save the Surface slogan is McKelvey & Birch Ltd., Kingston, Ont., whose ad. herewith reads "Make your home beautiful. Homes, garages, barns, stairways, floors, ceilings, walls, furniture and many other things need brightening up—need protection—need good paint, enamel, stain or varnish. Nothing is more certain to improve the appearace of your home interior than well

Linking up with local Clean Up Paint Up campaigns and making appeals to pride in appearance, need for protecting valuable property, etc., are points which hardware merchants deal with in some of their paint ads linked up with the Save the Surface campaign.

The Surface" In Local Ads.

The prevalence of the "Save the Surface" slogan in hardware merchants' paint ads is indicated by the ones shown in these layouts. Numerous others also follow this plan, but these represent what is being done by merchants in various parts of the country.

painted rooms with well papered walls and white ceiling."

An interesting and impressive sentiment is expressed in the paint ad. by W. H. Thorne & Co., Ltd., St. John, N. B., as shown herewith. It is entitled "The Well Painted House commands the higher price," and continues: "Your prospective purchaser will be willing to pay a higher price and will be more than likely to buy quicker if your house is well and attractively covered with paint—and the best is invariably cheapest in the long run."

Under the heading, "The Right Paint to Paint Right," F. W. Karn, Woodstock, Ont., devotes a good sized ad. to paints, illustrating house paint, barn paint, enamel, etc., with each line described and priced.

Prominent among Western hardware firms making use of the Save the Surface slogan is the Ashdown store in Calgary, whose ad. is entitled "Good paint and varnish will Save the Surface, inside or out." Under this heading it deals with various lines. Concerning varnish it says, "When you use varnish make it a good job because the labor is the same." It then deals with the use of varnish for floors, linoleum, furniture, etc.

Combine With Clean Up Paint Up

Combining the appeal of Save the Surface in conjunction with local Paint Up and Clean Up campaigns, Marshall-Bevers Hardware Ltd., Calgary, Alta., says, "High standard paint covers more, looks better and wears longer than other paints. Sold on an absolute guarantee; 1 gallon covers 450 square feet, two coats."

Explaining the meaning of surface protection the ad. by Roleau Hardware Co., Rouleau, Sask., under the familiar slogan states: "Follow nature's example—paint to the house is as bark to the tree. Nature is mankind's greatest teacher—not only does she give free instruction in the art of decoration in color, line and form, but she is also the greatest living exponent of protection against decay and destruction."

Under the heading Paint to Save, the ad. by Weatherbee & Fletcher, New Waterford, N. S., says, "Let us prove to you the surface saving quality of paint. A beautiful display of the different shades always on hand."

Other hardware firms who make use of the Save the Surface slogan in their ads., some of which are illustrated herewith, include Fyffe & Park, Swift Current, Sask.; Saskatoon Hardware Co., Ltd., Saskatoon, Sask.; H. B. May, Indian Head, Sask.; J. L. McCullough, Assiniboia, Sask; H. Hunter, Hartney, Alta.; Heaman's Hardware, Exeter, Ont.; Roblin Hardware Co., Roblin, Man.; D. D. Taylor Co., Brantford, Ont.

Don't Wait for Hot Weather

Under the heading Clean-Up time again, an ad. by Manitoba Hardware and Lumber Co., Virden, Man., says, "You don't have to wait for hot weather to commence painting indoors. You can paint now just as well as later on. For plastered walls you will like the soft effect of our —— paint. It is most sani-

(Continued on page 44)

Displays Deal With Surfaces

"If Salesmen Have a Thorough Knowledge of Paint, and Can Gain the Confidence of Their Customers, the Paint Department is Bound to Grow," Says Montreal Merchant—Quarter-Pint Tins Pave the Way for Gallons—Putting the "Save the Surface" Idea Across

"BY KEEPING both myself and our salesmen well posted with the various kinds of paint, varnishes and sundry lines, the different uses for each, and by being in a position to place ourselves before customers in a convincing manner, that immediately 'takes,' we have had the satisfaction of seeing our paint sales increase from year to year. Confidence which we have been able to instil into our trade in this section, is, I am convinced, the biggest asset we have in this department. Our customers depend on us to furnish them with paint and varnish requirements that will enable them to do jobs which they will be proud of, and if we can continue to serve in this way, I am sure that our paint business will continue to grow," said A. H. Bedard, 392 Victoria Avenue, Westmount, to Hardware and Metal.

There was always a percentage of customers entering the store who were in doubt of their actual requirements, while others were almost entirely ignorant of what was required for the desired job. It was up to the merchant and his salesmen to be able to deal with this custom in a manner satisfactory both to customer and themselves. Mr. Bedard stated that he had on more than one occasion told his salesmen that if they could not conscientiously recommend a specified line because of lack of knowing the requirement, to either enquire of fellow salesmen or himself, or else be willing to lose the sale. "Losing a sale is bad enough, particularly so if through ignorance on our part, but it is better to lose a sale than a customer, and there is no surer way of losing the latter than to have him or her dissatisfied," continued Mr. Bedard.

Losing and Making Sales

To uphold this kind of salesmanship to its proper standing there were times when sales were lost, temporarily at least, and not long ago an automobile owner had called at the store and asked for enough enamel and a brush for his car. He was going to give it a coat before taking it out in the spring. Mr. Bedard waited on this man himself, and realizing that the weather still had its winter coldness and dampness, asked if the customer had a heated garage. No, he had not. After explaining the necessity of giving the car a thorough washing, and the difficulty that would be experienced in getting the enamel to dry at that season, the advice was given to delay the painting for a few weeks. The man appreciated the advice and went out without purchasing. A sale of perhaps four or five dollars had been there for the asking, but would it have meant a satisfied customer? Not in Mr. Bedard's opinion, and he was willing to lose the sale.

Finishing Furniture

Another instance was recalled where a lady had asked if it would be possible for her to obtain a first class finish on her bedroom suite. The finish she desired was a high glossed ivory. She had apparently entered the store feeling that the chances of her doing this work satisfactorily were slight. Previously she had enquired the cost of doing this work from a contracting house, experienced in this line of work. The price was too high and she felt that she neither could afford it, nor was the suite hardly worth it. The salesman who was attending her asked if there was not a small bedroom chair in the suite, and would she not be willing to experiment on this. Being willing, the required coatings were sold to her in the smallest sized cans. After being assured that time and experience were only required if she would follow the instructions given, she went out well pleased that she had made the enquiries. She returned a few days later and purchased enough material for the whole suite and did not forget to tell the salesman how well pleased she was with the job, and how much she appreciated the attention he had given her. This was a sale made and a satisfied customer. It was in such cases as these that quarter-pint tins of paint or varnish usually paved the way for larger tins, and it is in this way that Mr. Bedard believes that much of his increased business is accomplished.

Taking Care of Dissatisfied Customers

In the years of this store's experience there were only two cases of importance where the customer was dissatisfied with his paint purchase. In both instances the buyer had returned after doing the job and stated that the paint was absolutely no good. Tact is usually required in dealing with cases of this kind, and an agreement should be reached satisfactory to both parties. The main thing here, in Mr. Bedard's opinion, is to have the paint house behind the merchant. Both jobs were on outside work and the paint had peeled before many months had passed. The procedure taken was to give each complainant enough paint for another coat. After the work had been completed the question of where the fault lay was

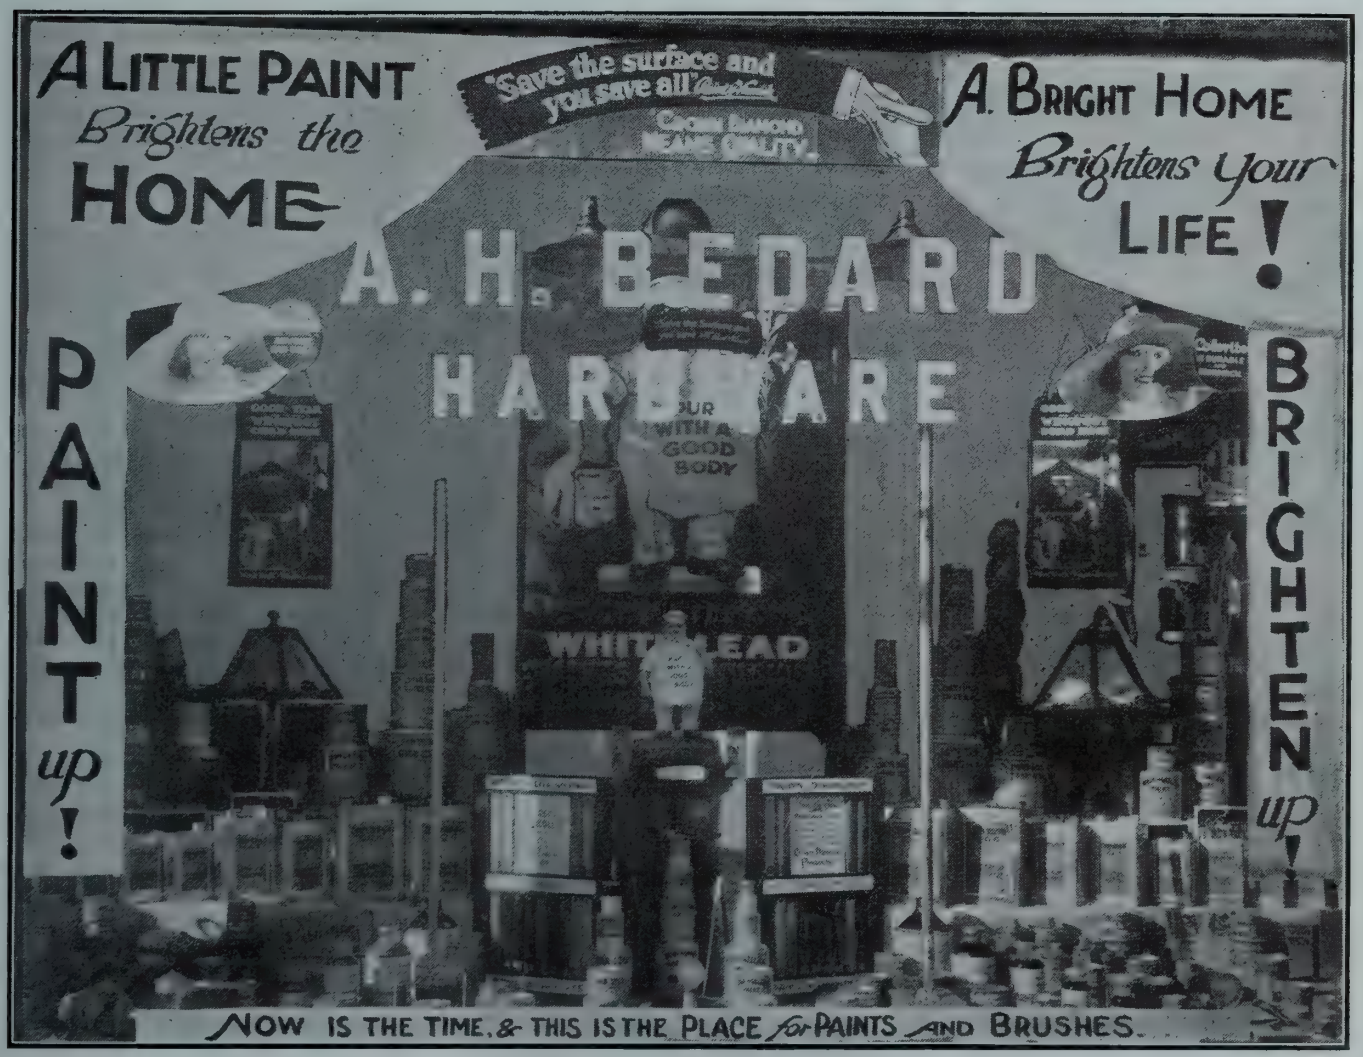
Which Need To Be Preserved

discussed, and both parties had been convinced that the fault was in the wood and not the paint. One was so thoroughly satisfied that he had been in the wrong that he paid for the material. Not being pressed for payment the other did not pay, but he was to-day a regular customer. The store had lost this money but had not lost the custom, and this one occasion could be taken as a loss, considering it only one in a number of years.

"Save the Surface"

"In a recent window trim we displayed our line of mixed paints and sundry lines, using the 'Save the Surface' transparencies and window trim. Another poster showed the effects of preserving the surface of a piece of wood after the wear and tear of exposure to the weather. Two chairs were also used in the display, the one not varnished was placarded 'I am waiting for a coat of —— varnish.' A card on the other, which had been varnished, read 'I have received my coat of —— varnish.' The window was dressed to bring home to the public the idea of touching up their furniture and other inside wood surfaces after the winter period when families spent most of their time in their homes, causing much more wear to furniture, walls, woodwork, etc. Results were good and even yet we believe we are selling paint and varnish through the medium of this window."

"Next week we are again putting in a paint window, but this time we will feature outside paint more extensively. People are now commencing to look after their property, and if by forcing the idea that painting will save them money, we feel that this season's record will be further increased. People are becoming more and more acquainted with the 'Save the Surface' movement, and while the results from extending the movement may seem gradual, it is certainly a good argument for the retailer to use."



Such window displays of paint, varnish, etc., as this, are important in the recent development of the paint business in the A. H. Bedard hardware, Montreal. Backing up the interest aroused by such displays, all the salesmen are competent to give advice to customers, and every advantage is taken of opportunities to drive home some important "Save the Surface" arguments.

Steady Growth in Paint and Varnish Industry

Foundation of Trade Now Being Laid Through Co-operative Effort Linked Up With the Save the Surface Campaign Will Guarantee Active Business in Years to Come

Written for May 6 issue of Hardware and Metal by W. S. FALLIS, Vice-President and Managing Director The Sherwin-Williams Co. of Canada, Ltd.

EVERY retail paint store in Canada should be linked up with the "Save the Surface" campaign.

Three or four years ago that statement embodied the feeling of those behind the campaign, who have since been constant in their endeavor to prove this truth to the man most concerned—the retail dealer in paints and varnishes.

Some have been convinced, and others have not. It is significant that those dealers who early realized the value of the campaign have been amongst the most progressive merchants in the hardware trade, and have seen in the campaign another big opportunity for increased business.

Do you suppose for a moment that sponsors of the campaign in Canada and the United States, people who are well able from a wide experience in advertising, to gauge the value of an idea would, year after year, spend thousands of dollars in spreading the doctrine of "Save the Surface" if they did not know that they would have a return on their investment? That return can only come from increased sales volume—and sales volume in turn can only come from you, friend Retailer. Your sales to the consumer must keep pace, dollar for dollar, with the manufacturers' sales to you. Will that increase be faster or slower if we pull together, or each alone, or one not at all?

How Dealer Co-Operates

How can the dealer co-operate and benefit accordingly? First of all he should adopt the suggestion already followed by many dealers, and rename his paint department, calling it the "Save the Surface Department," where expert advice can be had on all the painting problems of his customers. He can stress the campaign slogan by using it as often as possible on letter-heads, invoices, delivery trucks, and store signs. Remember your customer sees this slogan in almost every magazine he reads. When he sees it, it should make him think of your store.

Having a good show window, the dealer will do well to give prominence at seasonal periods, to an original and attractive paint and varnish display—tie up with the "Save the Surface" idea by using campaign advertisements, posters and display features.

Every store which advertises locally has another opportunity of benefiting directly by tying up the local newspaper publicity with the "Save the Surface" advertisements in the large national magazines. These two methods of co-operation—through window displays and local newspapers—have been thought to be of so much importance that the campaign committee offer six prizes to retail paint and varnish men for the three best window displays and newspaper advertisements submitted before July 1st.

W. S. FALLIS
Vice-President and Managing Director The Sherwin-Williams Co. of Canada, Montreal

The promise of spring activity is encouraging, and from practically all sections of the country we hear that business in our line is good and steadily getting better.

Personally, I believe that the paint and varnish business, through the educative value of the "Save the Surface" campaign and the spirit of common interest and co-operation it inspires in the trade will, in the years immediately ahead of us show a growth greater than any we have experienced before. I believe our industry is a vital and important one, and I want to see the fortunes of all connected with it advance through service and co-operation to prosperity and success.

Lindsey & Moore, hardware merchants of Delburne, Alberta, have dissolved partnership. T. E. Moore has sold his interest to R. B. Lindsey who will carry on the business under his own name.

HARDWAREMEN EMPHASIZE "SAVE THE SURFACE"

(Continued from page 41)

tary and can be washed at any time. About the old floors. One of the hardest things a housekeeper has to contend with is an old floor. Perhaps the linoleum is so badly worn it cannot be painted—well don't worry over this. Take it up and put a couple of coats of floor enamel right on the floor." Under the heading Get Your Car Ready, the ad. says, "Get a can of our auto enamel and give your car a new coat; you will be surprised how easy it is to put on. It covers up everything without showing brush marks. A few dollars will make you car look like a new one."

Dealing with the protective value of paint an ad. by J. Grierson & Son, Whitewood, Sask., says, "Your house and barns will look 100 per cent. better after a couple of good coats of good paint—and it will pay you in dollars and cents to paint now. Our paints seal up the surface of the wood against the damaging effect of the sun, rain and wind—they actually preserve your home and yet they cost but a trifle."

Need Personal Touch of Hardwaremen

Much Effort Expended to Further the "Save the Surface" Campaign But Many People, Half Convinced, Need the Final Urge of Personal Contact With its Exponents—Has Helped Business in Difficult Times and is Yet in its Infancy

Written for May 6 issue of Hardware and Metal by GEORGE HENDERSON, President Brandram-Henderson, Ltd., Montreal

Editor Hardware and Metal:—

"It is with distinct pleasure that I have learned of your intention to again publish a special "Save the Surface" number of Hardware and Metal.

I have, since its inception, been convinced that the Save the Surface campaign is one which merits all the praise and support that can be given it. While those back of the campaign are not likely to be accused of entirely philanthropic motives, I am certain that nobody can question the truth of the contentions we have been spreading throughout the country, nor the fact that preservation of property through the use of paint and varnish creates a national asset of an infinitely great value.

That so influential and widely read a trade publication as Hardware and Metal should voluntarily subscribe to the committee's views is sufficient, in my opinion, to stamp the campaign as one in which the desire on the part of paint and varnish manufacturers to increase sales is subordinated to the importance of the national saving this increased use of their products accomplishes.

Through the publicity methods adopted by the committee during the three years of its existence, there is hardly an individual in Canada who has not heard or read about the Save the Surface campaign. Many citizens have taken advantage of the knowledge gained through this educational work because they are of the temperament which calls for immediate action once convinced of the wisdom of any course suggested. On the other hand there are a great many who, in an abstract way are aware of the fact that it is cheaper to paint than to repair, but who have not as yet put this knowledge to practical use. These are the individuals who can finally be convinced by the retail dealer and induced to put their thoughts into action. This should not present any great difficulty as, beyond a shadow of doubt, these individuals are now predisposed to do so, and, if a dealer adopts the policy of closely linking up his store with the Save the Surface campaign, and makes use of the campaign's sound, economic arguments which are simple in the extreme and yet of great value and strength, he cannot fail to finally bring them into line and incidentally secure a new customer in each individual thus dealt with.

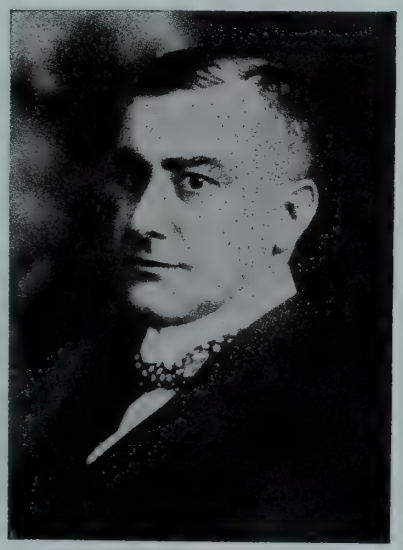
Needs Final Personal Touch

No dealer objects to using every persuasive method in his power to induce an individual to buy his wares. How much easier is it, then, to attain the object when the individual has been subjected to almost all the persuasion necessary, so that all that is required on the part of the dealer is the final personal touch.

I would not wish it to be construed from anything I have said that the great mass of dealers are not alive to the opportunities the campaign is affording them. Indeed such a construction would be far from correct. Most dealers by now are very much alive to them, and at every turn are taking advantage of the effect produced by the campaign with, I feel confident, excellent results.

Those who are not embracing these opportunities are making a grave error in judgment, as they can easily prove to themselves if they will but co-operate along the lines suggested by the committee and then, after a reasonable period of time, compare their sales of paints and varnishes with what they totalled for a similar period prior to their adoption of this policy. A few words to these dealers, and I think they will be convinced that if the Canadian Paint, Oil and Varnish Association had faith enough three years ago to launch such a campaign feeling sure of its cumulative value and consequent, though not instantaneous, success, surely now, when this effect can be promptly felt, they should not hesitate to give their hearty support.

The campaign was commenced during a period of great prosperity in the paint and varnish business, in the hope that when the inevitable depression should occur it would assist in the maintenance of sales. The looked-for depression struck the paint and varnish industry in the last quarter of 1920, two years after the inauguration of the campaign. In a very few weeks many industrial plants were no longer operating, building came to a standstill, and consequently this large outlet for our products was practically cut off. What was responsible for the continued relatively good demand for paints and varnishes? Surely it can be attributed to the fact that the general public had come to the belief that from the standpoint of economy, if for no other reason, it could not afford to neglect the preservation of property by failure to go to the small expense necessary to protect it by the judicious application of paint and varnish.



GEORGE HENDERSON
President Brandram-Henderson, Ltd., Montreal

Has Helped Business in Difficult Time

I believe in giving credit where credit is due, and when the above facts are considered, and the educational nature of the Save the Surface campaign work is reviewed, but one logical view can be taken, which is that all those associated in the marketing of paint products should thank the Save the Surface campaign to a degree which is difficult to over-estimate, for that measure of success which has attended business during the difficult period covered by the past eighteen months.

The campaign has not yet reached its full power, as its effects are essentially cumulative, but every day brings to the members of the committee further evidence of the increased effect and driving power of this propaganda. Let me urge all dealers who have not yet fallen into line, to do so at the earliest possible moment. They will never regret it. To those who will doubt the value of such action, let me say, at least give it a fair trial and judge for yourselves the results obtained. I feel absolutely confident these results will convince you.

The Save the Surface Campaign Committee will welcome suggestions anyone may wish to make to improve the work being done.

I cannot close without again thanking Hardware and Metal for the splendid support it has been giving this campaign —a support which I feel sure it would not extend if it were not satisfied that the objects of the campaign were well warranted in the interest, not only of its many readers, but of the country at large.

Welcomes Paint Problems In

UNDER the stimulus of sentiment aroused by effort along the lines of "Save the Surface" the Mathewson Hardware, Danforth Ave., Toronto, has made substantial and rapid progress in connection with the sale of paint and varnish. The "Save the Surface" department of this store is located toward the front of the store where the display invites close examination, and a table is provided near the door on which customers find color cards and other literature. The table is also used in connection with discussing customers' paint requirements.

The display windows are used frequently at this season of the year for paint and varnish displays, use being made of boards half painted to indicate the value of adequately protecting the surface. After a careful search, Mr. Mathewson found a board from an old building of which one half was in a good state of preservation due to being painted, while the unpainted portion is in a state of rot. This board is frequently shown in the window and has done much to convince many prospects as to the value of paint.

Expert Advice on Problems

Also in the window are a number of cards inviting passers-by to consult the "Save the Surface" department of the store for advice on color schemes, methods of application, etc. The department is being built up around the idea of expert advice on the important problem of protecting property and it is working wonders according to Mr. Mathewson.

Largely as result of such educational effort many customers wanting paint or varnish now refer to the campaign, asking how it is going and in some cases they have declared that as result of a loss on certain property they have owned, due to insufficient paint, they are now going to paint fences, outbuildings and every part of the property which is paintable, and thus save heavy repair bills.

A bulletin is used by Mathewson Hardware in conjunction

Prospects Seek Counsel on Paint Problems

The Save the Surface department of the Mathewson Hardware, Danforth Ave., Toronto, is being built around the idea of expert advice on the subject of protection of property, implements, etc. Each salesman is competent to give advice on application of paint, color schemes, etc., and every opportunity is taken to encourage prospects to take advantage of this free service. Cards to this effect are shown in this display.

Save the Surface Department

with certain merchants in other lines of trade, as an advertising medium for the district. This bulletin has constantly featured the "Save the Surface" idea in conjunction with the brand of paint carried and advertises the free advice given in connection with painting problems. As an indication of how this bulletin has helped the sale of paint, a woman customer came in to the store a few days ago with a clipping of the paint ad. from a January issue of the bulletin, and wanted some varnish stain for floors to protect the surface of the floor against dampness tracked in during the wet weather of spring.

Group Selling Idea

Mr. Mathewson has had a successful drive on house paints, varnishes, etc., during the early spring, and part of this has been due to following out the "group" selling idea. Thus if a customer asks for nails it is taken as an indication that some repair or construction work is to be undertaken and an endeavor is made to sell paint or varnish to this customer. It has been found necessary to give much advice to paint customers to educate them to the folly of economizing to the extent that they stint on the work in hand or use "something just as good." To this end Mr. Mathewson frequently switches a customer from buying certain interior paints to enamels, pointing out that one pint of enamel will go the same distance as one and a half pints of paint, and this makes both approximately equal in value.

An endeavor is made to sell a brush with every can of paint, it being pointed out that many jobs are spoiled by the use of cheap grade or old brushes.

An important argument for overcoming the tendency to use cheap grade paint has been to point out that it is cheaper to buy a good quality brand and paint once a year than to buy low grade paint and be forced to apply it every three months to keep up a good appearance. Good use is made of color cards and other literature, this being shown prominently in the store and enclosed in parcels sent out at this time of year.

Two Extensions Recently Made in Paint Dep't.

The paint department of Ravary, Ltd., Montreal, has been extended twice recently and has doubled its volume of trade in each successive season for the past five years. This firm links up closely with the Save the Surface movement and employs every educational effort to show customers the real need for protection of property by the use of paint and varnish. The recent big increase in the trade of this store is a recommendation for this display.

"Save The Surface" Doubles Paint Sale

Montreal Merchant Links Up With Campaign and Doubles His Sales—Advertising Must be Assisted by Effort Behind Counter

WHAT "Save the Surface and You Save All" really means was clearly outlined recently by a Montreal merchant, who last year joined the campaign in a whole-hearted way, and is this season further extending the "movement." (For it was a movement in more ways than one, and it had certainly been the means of causing a faster movement of his paint sales.) What is the campaign? What does it mean? Why should the merchant take a hold of it? Where is the gain? The last two questions could best be answered by his experience, when, since adopting a "Save the Surface" department just one year ago, his paint sales had increased more than 100 per cent. The record of sales in 1921 had more than doubled that of 1920. A record to be sure, and needless to say this same merchant is proud of his achievement.

As a literal translation he said the words meant "a whole lot in a very few words." Many merchants knew this because they knew the value of paint as a surface protector. They also knew their line of paint and varnishes, and their different uses. Up to the present, however, there were many who had not conveyed their knowledge to the consumer. Had not forced home to the property owner, or other paint user, the necessity of paint and varnish. Selling paint on its merits still meant selling it for beautifying purposes to them. The first question, what is the campaign? Most dealers were well aware that it is a campaign to increase paint sales for the manufacturer and retailer alike. By educating the buying public in a true light, the value of paint as a surface saver, and a money saver, the yearly paint turnover in both large and small stores should undoubtedly increase. That it is worthy of more than passing thought has been proven by him, and doubtless other retail stores.

Required Whole-Hearted Effort

To enter the campaign, and to gain by the results means more than a half-hearted effort. It did not mean to this store the mere placing of transparencies on the door and windows at the front, and the use of a window trim in the paint window. Although this means of advertising was used, and undoubtedly helped, real promotion work was necessary from behind the counter and the office. Again, a sign over the paint department is often suggested reading "Save the Surface Department." While perhaps this is one of the best methods of acquainting people with the campaign and the establishment of the new department, it is by no means essential, and in this case would not permit the placing of such a sign. What was really done was an extra effort on the part of store proprietor and salesmen, by fully acquainting themselves with the movement, and studying the real value behind it, they set out to convey the idea to customers. Paint prospects were approached with the argument that delay would ultimately cost them more, that each year's wear and tear from weather conditions meant money out of their pockets.

This selling point worked only to an extent at first, and sales did not show such a marked increase after it was adopted. Customers required more thought on the subject and would leave the store apparently little concerned. Many weeks did not pass, however, before results began to show, and many customers in the community were persuaded to paint last year, particularly in the fall months.

Will Be a By-Word for Generations

"Save the Surface" is Logical Advice That is Fast Becoming Imbedded in Minds of Canadians—How the Merchant May Co-operate With Best Results

Written for May 6 issue of Hardware and Metal by ROYAL CLUXTON, Manager Canada Paint Co., Montreal

"SAVE the Surface and You Save All" is a logical piece of advice that will be taught to our children and passed along for generations to come, along with "a stitch in time saves nine," "an ounce of prevention is worth a pound of cure," etc.

The great "Save the Surface Campaign" has stirred our country to the appreciation of the economy and necessity of protecting property investments with paint insurance. The editors of trade papers, farm papers, and magazines, deserve great credit for their unselfish and splendid support of this great cause.

What are you doing, Mr. Dealer, to cash in on this popular movement? What are you doing to help drive it home? The manufacturers are putting thousands of dollars of cold cash and devoting time and energy in order to improve conditions in Canada; editors of magazines and papers are devoting time and space to help make it a success as illustrated by this splendid issue of "Hardware and Metal."

ROYAL CLUXTON
Manager Canada Paint Co., Montreal

How Merchant Can Co-operate

As you are the one who will benefit the most in a financial way, it is your opportunity to put the final and necessary push behind this popular movement. Here are a few suggestions as to how you can do your bit: —

1. Paint up your own store front and interior.
2. Make several attractive window displays of paint featuring "Save the Surface."
3. Advertise your paint and varnish department in your local newspaper using the "Save the Surface" slogan as part of the ad.
4. Place the "Save the Surface and You Save All" poster, supplied by the manufacturers, over your paint department and in the window.
5. Paint the "Save the Surface" slogan on your delivery trucks and wagons.

Do it now! Make 1922 the greatest Paint and Varnish year. Do your bit with enthusiasm.

Robert P. Laurence, director of the largest steel corporation in Belgium at Brussels has been in Vancouver this week in the course of a trip across Canada in the hope of discovering some means by which his country's industrial life can be accentuated. He intimated that Belguim was very anxious to make a closer trade alliance with Canada.

Gets Inquisitive with Paint Buyers

"Save the Surface" Department of National Hardware, Ottawa, Ont., Radiates Importance of Surface Protection—Paint Stock on Special Shelves Where Close Examination by Customers is Encouraged—Inquisitive Attitude Pays by Frequently Enlarging Size of Order

THE "Save the Surface" movement is "catching on" admirably in Ottawa, due in part to the extensive national advertising, and also in part to the educational propaganda being carried on by a number of hardware dealers. One of the real enthusiasts and champions of this movement who, although only in business for himself a comparatively short time, has contributed to the spread of the "Save the Surface" gospel, is L. LeBlanc, proprietor of the National Hardware, 1109 Wellington street. Mr. LeBlanc has had wide experience, having for many years been in charge of the paint department of the Mulhall Hardware Limited, Bank Street, Ottawa.

"Save the Surface" fairly speaks out to the visitor in the National Hardware establishment. Only a blind man could enter the premises without observing the timely advice. It is painted in bold relief on the wall over the paint shelves, and beckons to the customer from every part of the store, from bright colored display cards. Every delivery parcel leaving the store carries with it the advertising matter of a well known national paint concern, with the name of the National Hardware, the address, and the telephone number, printed in a prominent place. Occasionally this matter is also placed in the hands of customers who come in to make purchases in other departments of the store.

Keep Close Tab on Contractors

"Up to the present moment our efforts have met with very fair success," said Mr. LeBlanc, to the Ottawa representative of Hardware and Metal. We took advantage of the dull season to work up a good clientele for the spring and we have succeeded in getting a line on all the contractors in this section of the city with whom we have already communicated. A certain amount of building is being done in this district at present, and I have succeeded in securing a fairly satisfactory amount of the trade. I do this by keeping tab of the amount of paint purchased by each contractor, and when I think he will be requiring a fresh supply, I communicate with him. Then too, I endeavor as far as possible to find out how many of my customers own their own homes, and with this information at hand, await an opportune moment to preach the 'save the surface' gospel at them."

Mr. LeBlanc's paint display shelves are the very acme of neatness. They occupy almost one entire side of the store, and are built low so that the stock is within easy reach of all customers. "A large assortment of the best brands well displayed, is my idea of silent salesmanship," said Mr. LeBlanc. "I sell only the paints that are good and

(Continued on page 50)

A novel arrangement of paint shelves is that used by the National Hardware, Ottawa, the idea being to place the whole stock within the easy reach of all customers. Linking up with the idea of "Save the Surface," the department goes under that name and by the distribution of literature, sales talks etc., every effort is extended to educate customers to the preservative value of paint and varnish.

Make 1922 Your Greatest Paint and Varnish Year by Adopting and Preaching the Slogan "Save the Surface and You Save All"

Written for May 6 issue of Hardware and Metal by J. J. RILEY, General Manager Flint Varnish & Color Works, Ltd., Toronto

WHAT GREAT ambition should be created in us by the two slogans taken for the title of this article —an ambition to attain a certain end which has as its basic principle not only our own welfare, but the welfare of the community as a whole.

How many of us are really linking our business up with these two slogans, and how many of us engaged in the sale of paint and varnish really are sold on the soundness of the propaganda.

No one can think us selfish when we aim to attain the end above mentioned, for in spreading the slogan "Save the Surface and You Save All" you are doing your community a favor. It is true that you are increasing your own business by arousing in the public mind the thought that they should give their property attention to arrest its depreciation from the wear and tear of age, but this is not selfish, as you are giving them value received, and are saving them money in the long run.

Must Create Business

We are living in an age of creation and are on a buyer's market. The manufacturer or merchant who is to succeed to-day must create business. He cannot satisfy himself with the thought that he is getting his fair proportion of the business available in any particular locality, as there is no means of really telling what business is available. It is true we have statistics to go by, but these statistics in many instances are taken from the past and do not take into consideration the terrific amount of business that can be created by instilling in the minds of the public the necessity for preserving their prosperity by the liberal use of paint and varnish.

You will hear many say that they cannot afford to paint, and that painting is a luxury. Such is not the case, and the old saying "A stitch in time saves nine" is very applicable in this case. A survey of the property in any locality will show a notable number of instances where painting is an absolute necessity, and the proper argument put up to the owners of property based on good sound facts such as are expounded in the literature of the "Save the Surface" campaign, will bring many property owners to the realization that their property has been burning up, due to progressive oxidization, and that they have stood by and watched this happen without giving it a thought.

Many Articles Decay

Let us turn to our own affairs first and find how many articles we are allowing to decay due to the lack of paint and varnish application. It will surprise us; and in order to convince others, we must first convince ourselves that the campaign now being conducted from coast to coast has the public's interests at heart as well as the desires of those engaged in marketing paints and varnishes to increase their business.

Preach this doctrine to your employees; tell them your aims. Likewise, enlist the aid of your friends to spread the propaganda—"Save the Surface, and You Save All."

The hardware dealer should familiarize himself very thoroughly with the uses of different paints and varnishes; the specifications needed for the repainting of property, and should pass this information down to his clerks so that each might know what to recommend for particular surfaces, taking their present condition into consideration.

If we all get behind this propaganda our books will show at the end of the year 1922 that it has been our largest year in the sale of paint and varnish, and in accomplishing this end we will have given employment to a number of men who otherwise might be unemployed during the coming months.

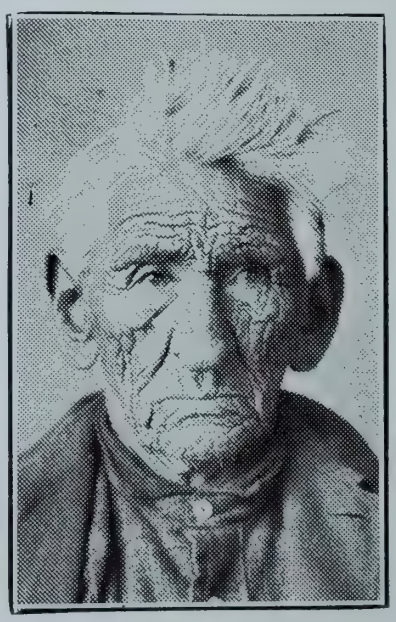
GETS INQUISITIVE WITH PAINT BUYERS

(Continued from Page 49)

therefore have no hesitation in recommending them to my customers."

Asked for further information as to his selling methods, Mr. LeBlanc first of all explained that he was located in a section of the city where the most of the people did their own painting, where there was a steady demand for ready mixed paints. "Many of my customers are women," he said, "who usually seek information as to the proper method of handling. I usually find out first of all, what they are going to use the paint on, and then ask them how they intend using it. As a rule I find that they are ignorant as to the right manner of handling, and then I proceed to explain what they should do. This, I figure inspires confidence, and thus makes permanent customers. I point out to most of my customers that one of the most important things to remember in using prepared paint is that it should be thoroughly stirred. Very often this saves trouble, for it has been my experience in dealing with people unaccustomed to using paint that often they bring a can back and insist that it is no good, whereas had they stirred it properly they would not have had any complaint to make."

Mr. LeBlanc is busy at this time carrying out plans for pushing his paint trade as much as possible this spring. One outside wall of the building lends itself admirably to publicity matter, and he has taken advantage of this by having a large "Save the Surface" sign erected there. In addition he is having a large number of post cards printed with his name and address and an outline of the goods he has for sale. These he will endeavor to get into the homes of as many people in the community as possible. The National Hardware is particularly fortunate in its display windows. There is twenty feet of window space in the front and five feet on the side. Mr. LeBlanc plans to put in attractive paint displays throughout the busy season.



KA-BE-NA-GWA-WES

When he was born 127 years ago on an Indian reservation in Minnesota, the slogan "Save the Surface and You Save All" was not known. So he neglected his face—and now look at it.

HARDWARE MERCHANTS BENEFIT BY BIRD HOUSE CONTEST

Sarnia, Ont.—The bird house contest, being conducted by the chamber of commerce for the Dominion Parks Board through the school children of Sarnia, is meeting with spontaneous interest on the part of the children and already the school principals report entries in excess of 100 houses. One of the special features of the bird house contest this year is a request on the part of J. B. Harkin, Chief Commissioner of Parks, that the bird houses be offered for sale to the public.

The Sarnia contest differs from the bird house contests conducted in the past in that provision is made for prizes for several kinds of houses, as well as for bird shelters and bird baths. The hardware dealers in the city report a heavy demand on the part of the school children for nails, tacks, screws and paint. The entries are all in, and on display in the window of the Sarnia Hardware Company.

What is Definition of a "Price Cutter?"

"One Who Gets on the Average Less Than it Costs Him to Replace His Goods and Makes a Profit," is One Way of Defining the "Price Cutter"—Read This Article—It Will Help You

By HENRY JOHNSON, Jr.

THE EDITOR of Hardware and Metal writes me thus:

What is your definition of price cutting? Would you consider a merchant a price cutter if he humped around and picked up a certain article at a lower price than the regular and sold it below regular retail price, and at the same time made his regular percentage of profit? Or would you consider this good merchandising? Is a price cutter a merchant who advertises certain branded popular lines at cost or below to attract trade to his store and loses money on that particular transaction? I have had several complaints from merchants in a certain city on the subject of price cutting. They ask for assistance in trying to abate the evil, so I would be glad to have your opinion on the subject.

If you stop to give it serious, careful, sober consideration, unbiassed by some condition of occurrence which may hurt you personally at the time, maybe you will find it difficult to define price cutting.

Certainly, I should not say the merchant first asked about was a cutter. If by "humping around" you can buy anything on such a basis as to enable you to sell it below regular figures and yet make your normal margin, surely that proves that others might do likewise. That probably means that the "regular" retail price is too high and should be reduced. I should say this is good merchandising from both the standpoint of the retailer who thereby attracts trade and the public which thereby gets better service and a more equitable deal.

As to the man who advertises popular brands at cost or below to attract trade—that depends. Suppose that man figures that he can spend 2½ per cent. of his sales for advertising. On $100,000 sales, that is $2,500 a year, $208.33 per month. Suppose he has the habit, so long continued as to be known by the people of his town, of using a single column, five inch space every Monday night in the local paper, and that said space costs him $25 each week. That space, then, consumes approximately $100 each month and he has over $100 surplus.

Advertising Includes All Mediums

Now what is advertising? Is it not any paid-for means to attract business? If so, then any medium used to bring people to your store is advertising, and so long as it is legitimate, on the level, fair and not against public policy, any merchant has a right to use it. Further if this means is open to all, nobody can find fault with its use.

So let us suppose that this man decides to consume his extra $100 per month in specially reduced prices, thereby giving his customers $100 in price concessions instead of giving that sum to the newspapers, who shall say this is not legitimate?

Go further. Assume that this policy results in an increase of business so that our merchant sells $125,000 with only the added expense of an extra boy, other expenses remaining constant so that expense ratio is reduced by a sixth—say from 18 to 15 per cent.—why cannot that man divide this advantage with his customers, or give it all to them? Such increase would yield him $625 a year more advertising money, plus savings of $675 on expenses. He might very easily, therefore, turn back to his customers through special prices, an additional aggregate of anywhere between $650 and $1,300—and proceed to build

THE LITTLE RED ROOSTER

Said the
little
red rooster
"Gosh all hem-
lock! Things are tough.
Seems that worms are get-
ting scarcer and I cannot
find enough. What's
become of all those fat
ones is a mystery to me;
there were thousands thru
that rainy spell—but now
where can they be?" The old oo
black hen who heard him didn't ooooo
grumble or complain, she had gone ooooooo
through lots of dry spells, she had lived oooooooo
through floods of rain. She flew upon the grindstone and gave her claws a whet, as she said "I've never seen the time there weren't worms to get." She picked a new and undug spot; the earth was hard and firm. The little rooster jeered: "New ground; That's no place for a worm." The old black hen just spread her feet, she dug both fast and free. I must go to the worms," she said, "the worms won't come to me." The rooster vainly spent his day, through habit by the way, where fat round worms had passed in squads, back in the rainy days. When night-fall found him supperless, he growled in accents rough: "I'm hungry as a fowl can be, conditions sure are tough." He turned then to the old black hen and said "it's worse for you, for you're not only hungry but you must be tired too. I rested while I watched for worms, so I feel fairly perk; but how are you without worms too, and after all that work." The old black hen hopped to her perch and drooped her eyes in sleep, and murmured in a drowsy tone: "Young man, hear this and weep.
oooo
oooo
oooo
oooo

"I'm full of worms and happy too, for I've dined both long and well,
The worms are there as always—but I had to dig like....."

Oh, here and there red roosters are still holding sales positions,
They cannot do much business now, because of poor conditions,
But soon as things get right again, they'll sell a hundred firms;
Meanwhile the old black hens are agobbling up the worms.

his business further by geometrical progression.

So what shall we say? Can we think of any way in which this freedom of action shall be curtailed? Can we honestly say that its curtailment would be for the public good? And let us remember that, however we may feel about it, the public good must set the limits everywhere.

Let us ask ourselves further: Are we ourselves ever guilty of doing just such things as we object to in others? Have we never sold anything below "regular?" O, yes—maybe sometimes when we got stuck on too much. Well, did it occur to you at that time that perhaps your neighbor did not have too much of that article and that maybe your cut prices hurt him and made him sore?

Depends on Whose Ox is Gored

Once a salesman offered me some merchandise 10 cent size for 30 cents the dozen. It was all of one kind of excellent quality, but it had not moved and this was a clean-up. I bought some and offered it special for 5 cents the can. It sold. The sale built trade for me. It was unquestionably below "regular." Would you call that price cutting?

Let us have in mind that the play of individual initiative must not be circumscribed, that the liberty of each to serve for less or serve better must not be curtailed, for from these, springs the true life of trade through wholesome competition. Thus the law of supply and demand works unhampered. What we should not want to give up ourselves we must not seek to take from others.

So, what is price cutting?

One kind is where a concern having many branches and large distribution depresses prices below the point where the business is self-sustaining to squeeze out competition. Such cutting has been subject to injunction in more than one instance. That is true piracy, illegitimate and should be stamped out everywhere.

Another kind is where goods are sold at a general level that does not admit of earnings sufficient to carry the business. That kind is very common. It provides its own ultimate remedy through the bankruptcy courts. Trouble is, it is slow. Its process upsets merchants who know what it costs them to operate. There are several ways to remedy this. And, after all, what you want is a remedy—that is really what you are interested in. All right: here goes.

The remedy I give has been used, so it is not mere theory. It is for each merchant to meet the cut prices of any merchant who makes a practice of attracting trade through prices so low as to impress you as "cut."

Let every one of you, or as many as may be interested together, watch every advertisement of the man you are after and meet his prices on the specials he uses. Note that I say meet. I do not say beat. Just set out in your store, prominently, but not too prominently, every item he advertises and mark it with exactly his advertised price. Never mind how close his figure is—whether it pays or not is immaterial. Just meet his figures.

If you make no great fuss about this, just marking at his figures, and naming those special prices quietly when your customers ask, immediately people will get the impression that there is, after all, nothing particularly "special" about his offerings and his "cuts" will fall flat. Such action should be preceded by a determined attempt to get that man into your association if you have one. If you have not one, get it at once. But make no threats—just be friendly.

The effect of such action as I suggest is not only prompt, but the cost to anyone is trifling. You put the cutter into the position of fighting all the rest of you. And what happens?

Either you kill him off, because he is operating on a basis that does not pay, or you fail, probably because he teaches you that your prices have been too high. Then you all prosper additionally through the added business that always follows vigorous merchandising along right lines. That will be good for all.

But this is the only way—to test things and fight 'em out. Nobody can help you except yourselves. You have got to fight your own battles. Help invariably comes from within, for it cannot come from without.

And come to think of it, probably this is the only definition of a price-cutter: the one who gets on the average less than it costs him to replace his goods and makes a profit!

Margins Protected by Manufacturer

This entire question brings up that of prices protected by the manufacturer. That is a thing of which I have been an advocate for many years. I feel that any manufacturer who so elects should be at liberty to name the resale price

(Continued on page 76)

Direct Relations Best in Export Trade

Loss Has Sometimes Been Sustained Where Done Through Export Houses—European Conditions as They Affect the Canadian Exporter

C. G. McGHIE of Welland Vale Manufacturing Company in a recent address to the Toronto Export Club, speaking of export trade in general, said that during his long experience he had found that permanent business could be built up only through direct relations with the foreign customers. His firm had never lost money when dealing directly, but they had lost on occasions when they had done business through export houses.

Mr. McGhie returned a few weeks ago from a business trip to England, France, Belgium and Germany, where he was able to make a careful study of conditions as they affect the Canadian exporter. In Germany he found that the depreciated currency was working out to the advantage of the country. This was because within the boundaries of Germany the mark was being kept at a purchasing value of about four cents, while its gold value outside fluctuated around .39 cent. This meant that the workman who got 100 marks a day could buy goods to the value of $4 in Germany, while the labor cost of his product when exported was only 39 cents. This was encouraging buying at home, giving the Germans a great advantage in competing for export trade and making it practically impossible for the foreign exporter to do business there.

In other countries with depreciated exchange the situation was not so bad, as the purchasing value of their currency had declined with exchange value. In general, however, he had found that the countries with depreciated currency were the ones that were busy, and they are manufacturing goods which they had previously imported. In general all European countries were keeping trade within their own boundaries, and would import goods only when they could see definite advantages in doing so. The trade of Germany, in his opinion, was limited only by the ability to supply, and English manufacturers were doubtful of the permanency of what trade they were getting, as in many cases orders were going to them only because of the uncertainty of German supply.

An address on marine insurance was given by C. B. Pakenham of the Western Assurance Company, in which the speaker urged the necessity of patronizing reliable companies. A number of inexperienced brokers and insurance companies had begun underwriting marine risks during the war when the high profits from war risk premiums made the business particularly attractive. Now that the war was over, their inexperience was causing difficulties to themselves and their clients.

The speaker explained the conditions and clauses of the marine insurance policy, showing how rates were fixed according to the vessels, the management of the line, the class of goods, etc.

Referring to the heavy losses from theft and pilferage which had been sustained during the past few years, Mr. Pakenham said that exporters could assist in reducing these by using strong containers and by keeping goods moving. If a package is left on the docks four or five days before being loaded there is a chance of theft, but if it reaches the docks just in time to catch the steamer it is generally safe. Some improvement in the matter of theft was being seen in the case of goods sent to England, but other ports were still unsafe.

Re-Modelling Store Interior Increases Hardware Sales 25%

Cost of Serving Per Customer is Much Reduced by Use of Modern Equipment—Stock Kept in Better Condition and More Accessible—Ads. Deal With One Line at a Time

ROBERTSON, Foster & Smith, Ltd., like all up-to-date hardware merchants, have considered it to be worth while to re-model the interior of their retail store. Some time ago, a splendid set of modern fixtures were installed, including wall show cases, silent salesmen and a cash carrier system. The manager of the retail department, W. P. Carlton, is of the opinion that the retail sales have increased at least twenty-five per cent. owing to these improvements. Mr. Carlton says that customers can now be served much quicker, the stock kept in better condition, and it is also much easier to keep up the stock. The loss caused by selling out before goods are re-ordered is practically eliminated. This is a most important matter for the hardware man, as a sale lost through being out of stock is never regained, the customer in almost every instance goes to another store where the article he requires can be secured right away. Very few wait until the merchant's stock arrives.

Seven Display Windows

Roberston, Foster & Smith, Ltd., have no less than seven windows facing Dock Street, St. John, and these are kept well trimmed. Four of the windows are devoted to the showing of heavy hardware, such as grind-stones, forges, shovels, spades, contractors supplies, building material, etc., although it is difficult to make very artistic displays of this class of material. Some hardware men carry this class of goods in warehouses where they cannot be seen by the public. The remaining three windows are devoted to staple lines of hardware, and great care is shown in the trimming of these windows. These are constantly changed, and as the same people are passing the Robertson, Foster & Smith store each day, going to and from business, there is always something new on view. Mr. Carlton believes that it is a great mistake to leave goods too long in the windows, as passers-by soon tire of seeing the same goods each day, and lose interest in the displays.

Cash Carrier is Valuable

The cash carrier system has proved to be a big time saver, both for customers and salesmen. Fewer mistakes are made, and it is possible to serve one customer while another is waiting for his change. The rope department is well equipped with spools, each carrying a different size of rope. It has been found that this method of handling rope is far ahead of the old system of keeping it in bins. It is possible to tell at a glance how much rope is in stock but with the old method it was usually the last piece that showed the stock had all been sold.

In an interview with F. A. Foster, director and general manager of the com-

Present appearance of the re-modelled store interior of Robertson, Foster & Smith, Ltd., St. John, N.B., is depicted herewith. That the improvement in display fixtures and layout could result in such a substantial increase in business is ample testimony of their importance. Modern showcases catch the eye of the customer entering the store, and these display the goods to splendid advantage. Samples of tools and other shelf lines are affixed to the doors of cabinets, drawers, etc., along the walls and customers may examine these lines with ease.

pany, Hardware and Metal, was told that during the past year they had been watching declines in price very closely, and that it was their policy to put new prices in effect at once, and not wait until old stock was sold. He considered it to be a big mistake to hold on to old prices, as the merchant who is the first to reduce his prices always gains prestige with his customers, and a customer always remembers paying more for an article than he would have done had he bought it at another store. Messrs. Robertson, Foster & Smith, Ltd., have a large and well equipped office, containing all the modern machinery necessary to efficiently handle their large business. A fair amount of advertising is done in the local newspapers, and each advertisement is usually devoted to one line of goods, as it has been found that it is better to specialize in the sale of certain lines rather than to attempt advertising on general goods in a broad way.

Opportunity For Export Trade

Guelph, Ont.—Impetus was given to the Made-in-Guelph show which is to be held in Guelph during the week of May 8 at a largely attended Members' Forum meeting in the Chamber of Commerce. Enthusiasm in connection with the coming exhibition was in evidence on all sides, and in attendance at the gathering was a large representation from the local manufacturers who intend to exhibit their goods during the Made-in-Guelph Show. Those present also heard a splendid address by H. R. Pousette, director of the Intelligence Service of the Department of Trade and Commerce, Ottawa, who gave some interesting details regarding Canada's export trade, and the opportunities that are now presenting themselves to the manufacturers of this country in the markets of the world.

Mr. Pousette gave some interesting figures showing how Canada's export trade has grown since 1890. In that year the total export trade amounted to $85,000,000 of which amount manufactured goods totalled 6.7 per cent. In 1900 it had jumped to $171,000,000, with manufactured goods amounting to 8.3 per cent. The figures in 1910 were $279,000,000 and 11.2 per cent.; 1914, $432,000,000 and 13.3 per cent.; and in 1921, $1,189,000,000 and 39.2 per cent. For the 12 months ending December last the manufactured goods for export trade amounted to 428,000,000 or double that in the same period in 1914, while for the month of January this year it had reached a total of $47,000,000, or $27,000,000 more than in January, 1914.

He also pointed out that the export trade of the United States had increased 1,500 per cent. since 1890, and declared that Canada had just as great an opportunity to grow as had the country to the south of us.

Questions and Answers

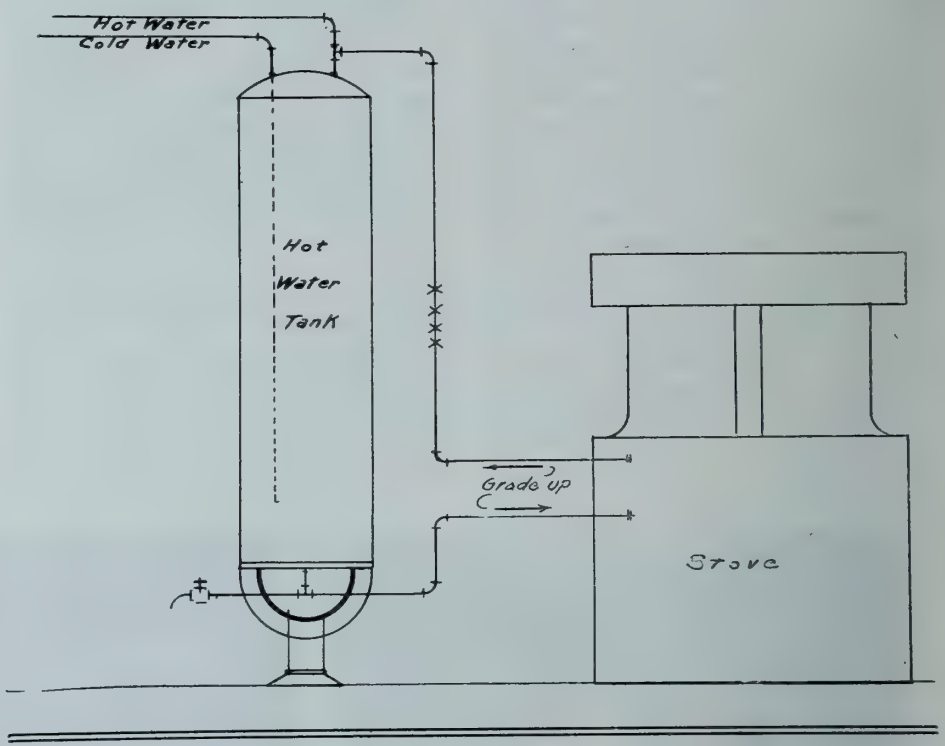
Question:—With a fire in stove below when electric heater is placed what will be the result?

With such a lay-out as this will the heater work or not?

Answer:—There is no apparent reason why such a system as this will fail to work properly.

The arrangement of the piping is good and, in our opinion, is about as efficient as any that could be devised.

You will note that we have made a note of "grade up" at the water-back connections. We have done this because it is in poorly graded connections here that much of circulation troubles arises.



Percy J. Southerland of Southerland Bros., hardware brokers, Winnipeg, has returned from Port Arthur and Fort William and reports that business is showing up fairly well in the Twin Cities.

Novel Plan for Selling Electric Appliances

In the hardware department of the Hudson's Bay Store in Victoria, B. C., a new scheme is being tried out in the selling of electric washing machines. Mr. Mowry has, through the store's advertising, started a club, which is composed of those who can be induced to pay a deposit down and the regular weekly instalments on a washing machine. The plan is progressing favorably at the present time, Mr. A. S. Woolard, the advertising manager, reporting to Hardware and Metal that the new angle on the instalment sale plan is effective in getting the machines into the homes that probably would not take kindly to buying a machine on "the instalment plan."

To join the club the householder pays the initiation fee of $5 and pays "dues" of $3.50 per week, and the washing machine is put into the home at once. Prospective club members are invited, through newspaper advertising to visit the basement of the Hudson's Bay Store and see the machine after which the club is named. A factory demonstration is conducted and the good Victorian housewives are, without the formality of a goat ride, taken into full membership on payment of the membership fee.

The plan is working well.

Hardware Clubs of Two Coast Cities Join

Vancouver and Victoria Organizations of Hardwaremen Join as a Provincial Organization—Shipments of Tinplate, Glass and Steel Arrive

VANCOUVER, B. C.—Several distributing concerns are busily engaged in getting out the Siberian order. There is a steady demand for all lines of building hardware due to the construction programme which continues active. There have been minor price adjustments this week. Collections have been slow.

Canadian Stillson wrenches are down about ten per cent. Five per cent. cuts have been made in emery cloth and sandpaper. Copper wire coat and hat hooks are down to the extent of ten per cent., the new list price being $1.35 a gross for the three inch size. Horse shoes are a cent per pound easier and single and double bit axes have been lowered ten per cent.

There is a good demand for garden and harvest tools and poultry netting and wire are meeting with a good sale not only from local retailers but from the upper country and Vancouver Island districts as well. Paint is moving out steadily and dealers are making no complaints as to the lack of business.

While trade is being conducted on very conservative lines, it is interesting to note that failures in the hardware trade are practically nil while in other trades they are unusually few compared with other distributing centres of Canada.

An interesting announcement this week is the amalgamation of the Vancouver and Victoria Hardware Clubs. In future the former will function along the lines of a provincial organization, largely for social purposes. The addition of the Victoria Club which embraces only retail storekeepers gives considerable strength to the larger body and it is predicted by officials that the mainland organization will now be enabled to render even greater service to its members. The business end of the club is in the capable hands of R. A. Ogilvie. The amalgamation became effective on May 1. The Island body was organized about four years ago and at present is being directed by R. R. Taylor as president. A delegation from the mainland will accept the invitation of the Victoria hardwaremen to attend their picnic which is to be held across the Gulf on June 14.

One of the most interesting vessel arrivals this week was the Holland-America liner Kinderdijk with a large shipment of tinplate from Wales which is to be used in the making of cans for the fishing interests. The same boat brought a sizable consignment of plate glass and steel from Antwerp and German toys for the local market, shipped from Hamburg.

In the Supreme Court this week the solicitor for the firm of Wood, Vallance & Leggat secured an amendment to the charter powers of that company permitting it to distribute its surplus capital over and above its registered capital of $156,000. It was stated in court that the company has assets of more than a million dollars to distribute. When the sale of the company's stock was made to the Marshall Wells interests several weeks ago, neither buyer or seller would name the purchase price and this is the first time that anything like a consideration was stated. The purchasers took over the assets on replacement terms. John Dunsmuir, director of Wood, Vallance & Leggat is acting in the settlement for that firm.

WESTERN CANADA NOTES

Vancouver.— The Collingwood Hardware Co. on Joyce Road has been registered with Albert E. Ducklow as the principal owner.

Prince Rupert.—The business of the Skeena River Co-Operative Association, Limited is being offered for sale by George Rorie, trustee. The stock which includes hardware, is valued at $1,188. The firm has been doing business at Terrace on the line of the Grand Trunk Pacific.

About the middle of next month, the new B. C. Manufacturers Building at 929 Granville Street, Vancouver, will be opened as an industrial and community centre. The entire five floors have been taken over by the Association and products of the coast province will be given ample space for display purposes. The hardware trade, at least that section which manufactures in British Columbia is taking an active interest in the new venture and will have permanent exhibits. Secretary Jas. Hart reports an active demand for space. The third floor will be devoted to furniture and household requirements, one half of which must be manufactured in the province. Arrangements have been made whereby the spacious ground floor windows will be utilized by various firms a week at a time.

WESTERN CANADA NOTES

The retail hardware and business of W. C. McIntyre at Alberine, B. C., has been sold to Carter & Murray.

C. C. Craig of the C. C. Craig Co., manufacturers' agents, is on a business trip as far West as the coast calling on the wholesale trade.

W. M. McCoig, formerly of the Edmonton branch of Wood-Vallance Co., is now on the road as salesman replacing A. F. McDermid.

The staff of Whyte and Orr's hardware store, Daysland, have beautified the interior appearance of the store considerably by painting and varnishing the shelves, etc.

Dave Miller who has been assistant in the catalogue department of Wood, Vallance Co., is now on the road as salesman for this firm covering the territory north of Brandon.

The Sturdy hardware store at Revelstoke, B. C., was damaged by smoke and water in a fire which broke out this week in an adjoining store. Partial insurance was carried.

The Main Hardware, Vancouver, B. C. is opening up here with a retail store on Main street, at the corner of Seventeenth avenue. Le Roy H. West is the principal.

The retail hardware firm of Share Bros. which several years ago acquired the retail end of Wood, Vallance & Leggat's business here on Cordova street has purchased the entire stock of the London Grocery at 627 Hastings west, including the meat department and the lease. As soon as the produce is disposed of, Share Bros. will open up another up-to-date hardware store. It is an unusually desirable location.

In an interview with Hardware and Metal, N. E. Horton, Winnipeg, manager of the Glidden Company, Limited, who has recently returned from a business trip, reports a marked improvement in feeling among the retail trade all throughout the West, and with prospects of more than an average amount of moisture to start seeding, dealers are optimistically expecting the 1922 crop will get away to a good start.

Mr. Horton found paint stocks on the dealers' shelves in most cases low, but by linking up with the "Save The Surface" advertising, they confidently expect and are working energetically to make 1922 the greatest paint and varnish year.

Good Time to Put "Save the Surface" Idea Across

DURING THE year which has passed considerable progress has been made in spreading the gospel of "Save the Surface and You Save All" throughout Canada. A greater measure of co-operation on the part of retail hardware merchants has been evident, and it is with some pride that Hardware and Metal is able to present in this issue a great deal of editorial evidence of the active manner in which many hardware merchants in all parts of the country are linking up with the campaign. Such evidence could be further continued and enlarged upon for there are scores of merchants who are known to be actively linking up with this campaign whose methods have not been outlined editorially as yet. Those appearing in this issue have been carefully selected with the idea of presenting as many helpful selling ideas as possible and also to represent all parts of the country.

Last year at this time Hardware and Metal presented a "Save the Surface" issue outlining suggestions as to how hardware merchants could link up with the campaign. Throughout the year this has been followed up by dozens of articles showing what retailers have been doing. These suggestions have been followed out in many cases and the articles and illustrations appearing in this issue are but a small indication of how hardware merchants have made use of the suggestions provided them.

This is the season for Clean-Up and Paint-Up movements in various localities and no better opportunity is offered for the merchant to put the "Save the Surface" idea across while people are thinking of paint. Educational effort is needed to change the consumer's viewpoint to one of appreciation of the value of paint as a preservative as well as a beautifier. When this result has been achieved the tendency will be to look upon paint and varnish as a necessity, to receive first consideration periodically. Appropriations will be made to cover the cost as they are now made to meet life insurance, taxation, etc. There are few movements which will confer greater ultimate benefit upon the community than the adequate use of paint and varnish. There is nothing so uneconomical as the sparing of expenditure on necessary surface preservation. With this idea in mind many hardware merchants are swinging aggressively into a bigger stride in respect to paint and varnish business and are working successfully in the knowledge that their efforts are not altogether mercenary but in the interests of a national movement which has as its basis the encouraging of economy, the beautifying of properties and the protection of certain of our chief natural resources against the depreciation incident to exposure to the elements.

* * * *

An Outcrop of the Depression

A VANCOUVER hardware merchant is of the opinion that retailers engaged in this trade will have to look more closely to their business in future in view of the fact that many of the lines which the hardware merchant has considered to belong primarily to his trade are being usurped by other stores. He cites the fact that paint manufacturers are opening direct agencies handling paint exclusively, seed stores sell lawn mowers, drug stores sell razors, cutlery, vacuum bottles, furniture stores sell screen doors, etc.

Truly the hardware trade must give some thought to means of maintaining the dominant place in the selling of such lines, but the real solution rests with the individual hardware merchant, who must see to it that his store is always regarded as the logical place to purchase such requirements. In this he already has a big advantage, for the hardware store has been looked upon for years as the logical channel of distribution of paint, lawn mowers, cutlery, screen doors, etc. It is merely up to the hardware merchant to see that he keeps abreast of the times and makes the best use of this advantage. The other stores now trying to get a share of such business are the ones who are handicapped. Throughout retail business, the conditions incident to the depression have encouraged the broadening of the distribution of many lines of merchandise. Retailers in certain lines have renewed their endeavors to secure exclusive distribution of certain lines, as electrical dealers are now doing, while retailers in other lines of trade are showing an increasing disposition to take on the sale of lines as indicated in this article. The problem will not be solved by restrictive measures such as seeking means to confine distribution to certain trades or to put the onus on the manufacturers or wholesale distributors to confine their distributing facilities. Such measures are not in keeping with the times. The present condition is an outcrop of keen competition and it will be a case of the survival of the fittest. The hardware merchant ranks high as a merchandiser and as an executive but only aggressive action on his part will hold for him the envied position he is in.

* * * *

Heavy Burden on all Industries

EARLY indications from Ottawa are to the effect that by July there will be considerable reduction in freight rates, notably in Western Canada where a return to the Crow's Nest Pass agreement is expected. This agreement gave a heavy subsidy to the C. P. R. on condition that that line grant reductions in rates if the government helped largely in building a line through the Crow's Nest Pass. During the war this was held off and if parliament does not renew it rates will decline considerably it is said. This would affect hardware, agricultural implements, household furniture, etc.

This possible action brings up the whole question of freight rates and it is possible that some progress will be made before long in the revision of rates so as to encourage trade as much as possible. Just how this will be done with the railways already a heavy financial burden on the country is not now evident but the governmental body which is making a study of the railway situation may before long make some concrete recommendations. Certainly some steps are needed to help lift the burden of the agricultural industry of Western Canada due to heavy transportation costs. British Columbia wants freight rates on the mountain section that will make it possible for that province to compete with the eastern provinces in the supplying of the needs of the prairie provinces.

"Tout Passe"

(Everything Changes)

THE FRENCH have a proverb which begins "*Tout passe*" (Everything changes). This contains the germ of an idea which should be good medicine for the business man who is inclined at the present time when trade is quiet to rest on his oars and delay making preparations for the busy period until that period actually arrives.

Everything in this world is continually changing. Some philosophers even tell us that there is no present; there is only the past and the future; the past is gone and to-morrow, even the next hour, the next minute, are in the future. And in the future only one thing is certain, that is, change.

So conservative is human nature that the great majority instinctively assume that whatever conditions exist at the moment must continue to exist for some time to come. The direct contrary is, of course, the case. The philosopher knows that whatever else may happen one thing is certain, viz., whatever is, is not going to continue.

Why is it that only the few can make money in stock exchange speculation? Because the ordinary man waits until prosperous times appear to him to have become established and to have become a permanent institution before he buys. And in most cases he then finds he has bought at the top of the market. On the other hand, when things are at their lowest and he could buy with a prospect or almost a certainty of profit, everything appears to him black and he cannot see any likelihood of change. The shrewd operator, however, knows that when things look at their worst it is time for them to mend. This is the time he chooses for buying and when everything is booming is the time he picks for selling.

We may not be on the eve of a big boom, but one thing is certain, things are not going to remain as they are for long.

Now is the time when shrewd and far-seeing men are preparing for prosperous times. They are making preparations so that opportunity may not take them unawares. They see that now is the time to cultivate trade and make their products known so that when the tide of prosperity is on the flow they may be in a position to take advantage of it and reap the benefit of their foresight.

If anyone tells you we are in for several years of business depression, take heart and be assured that this is a sign we must be nearing better times.

In the spring of 1918 many well-informed men predicted three further years of war. The war ended that autumn.

In 1920 many business men spoke of three or four more years of prosperity. The prosperity wave was even then on its ebb.

These men like the great majority did not realize that everything changes. Are you going to place yourselves among their number, or are you going to rank among the minority and bear in mind the proverb—*Tout passe?*

Events in the Trade

BUSINESS CHANGES

Penetanguishine, Ont.—D. W. Kennedy has sold his hardware business to A. R. MacDonald.

* * * *

Mt. Forest, Ont.—F. E. Henderson has sold his hardware business to Messrs. John and Jabez Barnard, of New Liskeard, who get possession on the 15th of June next. Mr. Henderson came to Mount Forest from Winnipeg, Man., eleven and a half years ago, without any previous hardware experience and has built up a successful business. The new owners are former residents of this neighborhood, and left here for the north country seventeen years ago, where they have been successfully engaged in the lumber manufacturing business during that time.

Mr. and Mrs. Henderson and family expect to move about July 1st. to Pasadena, California, where Mr. Henderson expects to go into the hardware business again in a larger city store, negotiations for which were begun during his recent visit to California.

OBITUARY

Joseph P. Rogers, director of the Queen City Oil Company, Limited, manager of the lubricating department of that company, and a director of the Imperial Oil Company died in Toronto. The late Mr. Rogers came to Toronto in 1876, and shortly afterward entered into business with his father, the late Samuel Rogers, and his brother, A. S. Roger, under the firm name of Samuel Rogers and Company and later under the name of the Queen City Oil Company. Ltd.

H. E. Rice, general superintendent of the Dominion Iron and Steel Company, Sydney, N. S., died at St. Vincent's hospital, New York, following a sudden attack of pneumonia.

IN HARDWARE BUSINESS FOR FIFTY YEARS

By the sudden death of John Harland, Clinton loses one of its most highly respected citizens and business men. Mr. Harland had been in the hardware business for over fifty years. He was in his seventy-fifth year. He leaves one son, Leonard, and two daughters.

PERSONAL

David Brewer of A. MacFarlane & Co., Montreal, is leaving this week for an extended trip through the Western provinces to the coast, and will be away from his Montreal office for about seven weeks.

TORONTO HARDWARE CLUB MEETING

The regular monthly meeting of the Toronto Retail Hardware and Paint Club will be held on Monday, May 8, at Hunts Tea Rooms, Yonge St. One of the features of the evening will be the address on the manufacture and sale of brushes by John Billinghurst, sales representative, The Boeckh Co., Toronto.

DEATH OF BISSELL CARPET SWEEPER OFFICIAL

The death is announced of Robert E. Shanahan, secretary and general manager of the Bissell Carpet Sweeper company and for 40 years associated with that firm. From a farm boy Mr. Shanahan rose to a prominent position in the company. He came to Grand Rapids, Mich. and became associated with

LATE ROBERT E. SHANAHAN

his brother Maurice who had been in with M. R. Bissell in the crockery business and who in 1874 assisted in founding the Bissell Carpet Sweeper company. Mr. Shanahan rose steadily from one position to another holding positions as advertising manager, sales manager, assistant secretary, secretary and general manager, which latter position he held at his death.

MONCRIEF COMPANY LEAVING GUELPH

Guelph, Ont.—The local branch factory of the Moncrief Furnace and Manufacturing Co. of Cleveland, which has been in operation for the past three years, is closing down this week, and the machinery and equipment at the Guelph works will be shipped back to Cleveland at once. A. D.Greig, who has been managing the Guelph branch for the past six months will return to Cleveland to take over a position at the head office of the company.

BIG ELECTRICAL SHOW OPENS AT KITCHENER

Kitchener, Ont.— A big electric exhibition was opened here this week and one of the largest and most unique displays of electrical equipment ever shown on this continent is being shown in the Auditorium.

The large building is filled with the most modern inventions, some of the foremost firms in England, the United States and Canada being represented. A complete radio phone equipment was installed and nightly programs given in Toronto and Pittsburg were features at the exhibition. The city was brilliantly illuminated during the week.

Sir Adam Beck and other men prominent in the electrical world were present during the week.

SUCCESSFUL SPRING OPENING IN HARDWARE STORE

St. Thomas, Ont.—The fourteenth annual spring opening of Ingram & Davey Limited, was a huge success. The anniversary took the form of a well-prepared sale of all classes of hardware, paints and varnishes. Huge crowds poured in and out of the store from 8 o'clock in the morning until closing time.

The feature of the day was the bargains available in aluminum. By 8.30 Saturday morning virtually this entire department had been cleaned out. Over sixteen demonstrators of the various lines of merchandise were present and greatly accelerated business activities throughout the day.

Discussing the outcome of the sale with one of the members of the firm, Hardware and Metal was informed that it exceeded former years by a considerable margin. In fact, this member of the firm remarked he had never witnessed such extensive buying as took place.

Special decorations had been installed, adding a springtime effect to the entire establishment. G. Lawrence Davey, manager of the upstairs department, which includes toys, perambulators, hammocks, porch swings and electrical supplies, reported business exceptionally brisk. Cook books were given away with each purchase.

CONSIGNOR PROTECTED ON FREIGHT CHARGES

The U. S. Interstate Commerce Commission has issued a new form of bill of lading, in which there is a clause awaiting the signature of the consignor that relieves him of any responsibility in connection with the freight charges. It is sometimes found that the railways have claims against a bankrupt firm for unpaid freight. Not being able to collect from the bankrupt consignee, the consignor has occasionally been pressed for payment. The clause in the new series of bills of lading frees the consignor from any recourse from the railway in connection with unpaid freight. It is understood that the change came into effect on March 15, but Canadian shippers of products to the United States have been receiving notifications only within the last week.

LARGE HARDWARE PURCHASES

Isaac Taylor, managing director of the Taylor & Drury mercantile firm at Whitehorse and other northern points and who has been "out" for the past eight months, recently left for the north on the C. P. R. boat, Princess Mary. During his trip which has been one of combined business and pleasure, he visited England and the battlefields of France in company with Mrs. Drury and members of his family. He purchased a considerable amount of cutlery in England. His purchases will aggregate four hundred tons consisting of building materials, hardware, etc.

WESTERN ONTARIO NEWS

Mrs. W. J. Heaman of Exeter and her son Fred, were recent visitors with friends in Toronto.

* * * *

Every hardware merchant at London Ont. is now a member of the Ontario Hardware Association as a result of a recent visit from Secretary MacPherson.

* * * *

The Shillington Hardware Co., Blenheim, Ont., has been awarded contracts for heating and plumbing work for new residences being built at Chatham for Dr. Bryce Kendrick.

* * * *

Rapid progress is being made at London Ont. on the work of clearing away the ruins of the old Cowan Hardware store and construction of the splendid new store will be commenced in a few days.

* * * *

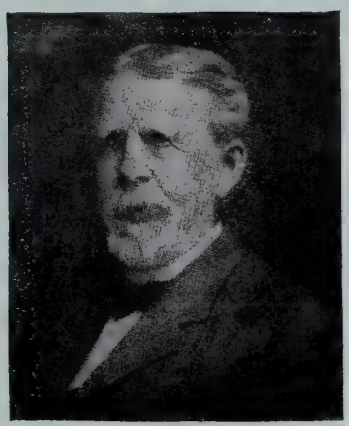
The Pure Gasoline Co. of Toronto is purchasing sites in 30 cities and towns in Western Ontario and will expend more than $1,000,000 in erecting new service stations this summer. Work has commenced at London, Ont., in removing buildings on Dundas St. for a down town station and work will be started shortly on a second station. Sites for new stations were selected this week in Ingersoll, Brantford and St. Thomas.

DEATH OF L. S. STARRETT, INVENTOR.

Leroy S. Starrett, philanthropist, inventor and founder and President of the L. S. Starrett Company, manufacturers of Starrett Tools at Athol, Mass., died at St. Petersburg, Florida, where he had been spending the winter months, as had been his custom for a number of years. Had Mr. Starrett lived two days longer he would have been 86 years old. In addition to his connection with the L. S. Starrett Co., Mr. Starrett was treasurer and practically the owner of the Athol Machine Company, and was interested financially in the Union Twist Drill Company.

Born in China, Me., April 25, 1836, he was of Scotch descent and one of 12 children of Daniel D. and Anna Starrett. When only 17 he operated a farm of 600 acres in Newburyport. At that time his inventive genius was developing rapidly, and in 1864 he was granted a number of patents, and opened a machine shop in Newburyport.

In 1868 he came to Athol, where he combined business with the Athol Machine Company in order to manufacture



THE LATE LEROY S. STARRETT

his own inventions. Prominent among them was a meat chopper. For 10 years he was general agent and superintendent of the concern, then resigned to begin manufacturing mechanical tools. Starrett tools were first made in 1880, when Mr. Starrett hired a single room in the shop of Bennet & Van Balkenburg, where the big Starrett plant now stands. In politics Mr. Starrett was a staunch Republican, and for many years was a heavy contributor to national campaign funds. He never aspired to public office, attending strictly to his growing business. In Athol he was a leader in the town's philanthropic work.

In 1861 he married Lydia W. Bartlett of Newburyport. She died in 1878. Three daughters survive. They are the wives of Frank A. Ball, Williard G. Nims and Marshall B. Waterman, all connected with the Starrett Company.

W. Beverley Robinson, president B. & S. H. Thompson & Co., Montreal, has returned from a three months' trip through South America.

ABOLISH THE SPOTLIGHT IN TORONTO

A bill was introduced in the Ontario Legislature by Hon. Howard Ferguson to amend the Motor Vehicles Act to abolish the use of the "spot-light," which is permitted at present under certain conditions. The bill declares:

"It shall be unlawful to carry on any motor vehicle on any highway any lamp known to the trade as a spotlight or searchlight, or any lamp which revolves upon a pivot or other device so that the rays of such light may be projected in different directions by an occupant of the vehicle, but shall not prevent a motor vehicle of a municipality Fire Department from carrying such a lamp for use only at the actual scene of the fire."

NATIONAL CONVENTION OF WINCHESTER DEALERS IN JUNE

The Second Annual Convention of the National Association of Winchester Clubs will take place in New Haven; Conn., June 26, 27, 28, and 29. There are more than 4,000 Winchester Dealers in the United States and it is expected that at least 2,500 of these dealers and their families will be in attendance.

An extensive program is being arranged by the Convention Committee which will provide for business sessions, tours of the Winchester plant and a series of attractive entertainment features for both men and women.

ONTARIO FISHING AND HUNTING REGULATIONS CHANGED

The Ontario Government's proposed changes in the fish and game laws are based on recommendations of the fish and game committee. The important change affecting deer is the advancement of the shooting season north of the Transcontinental. At present it runs from the first of October to the thirtieth of November, but under the bill introduced it will extend from September 15 to November 15.

The partridge shooting season is to be from the fifth to the twentieth of November, except in the district north and west of the French and Mattawa Rivers, where it will be from the 15th of October to the 20th of November. The bag is limited to not more than ten partridges.

The daily bag for wild duck is to be limited to 25, with 200 as the maximum for the year.

Another change prohibits the use of traps, snares, nets, etc., for capturing deer, moose, game birds, etc.

The fishing amendments prohibit the use of seine nets except in international and interprovincial waters, and pound nets, except in those waters of Georgian Bay.

Provision is made under which the Minister will be able to remit license fees for fishermen in cases where the fisherman has lost his license under the Act for a technical offence.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

NEW FRAIM PADLOCKS

The E. T. Fraim Lock Co., Lancaster, Pa., announce the addition of two new padlocks numbered 848 and 445.

These locks are examples of the improvements being made in this line of padlocks, their program including the revamping of the entire line, the gradual addition of several medium and higher grade locks and discarding many obsolete numbers.

The No. 848 Lock measures two inches across its face, has a solid cast brass case and shackle with all interior parts of brass or bronze. The shackle is secured at both heel and toe, both controlled by a protecting device, thereby making the lock immune from being "rapped" open.

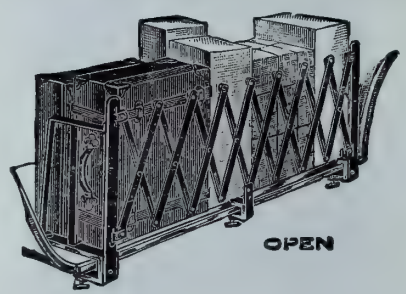
The No. 445 Lock has a cast iron, black case, two inches wide, four pin tumbler mechanism, with drop forged cast bronze shackle, thus making it unusually hard and resistable to ordinary attack.

"DURO" BRIDAL SET

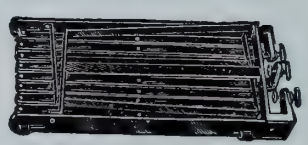
A specially selected bridal assortment of aluminum kitchen utensils is now being featured by the Duro Aluminum Ltd., Hamilton. The set contains five useful articles, and two handy kitchen accessories, as follows: 5-qt. tea kettle, 2-qt. boiler, 6-cup coffee percolator, 3-qt. double-lipped sauce pan, 12-in. round roaster, a cake turner and a scoop. These products are arranged in an attractive gift box, and the manufacturers expect the Duro bridal set to experience marked popularity as a wedding gift, bridal shower or birthday present, as well as appealing to the regular trade.

STANDLEY LUGGAGE CARRIER

It is reported that the Adamson Mfg. Co., Hamilton, have made arrangements to manufacture and market in Canada the Standley luggage carriers, for automobiles. Their plant at 771 Cannon



STANDLEY



Street East, Hamilton, is at present reported operating at full capacity in order to cope with the demand for these products.

BENTLEY COASTER WAGON

The Walter Bentley Co. at Niagara Falls, Ontario, are manufacturing a coaster wagon that embodies many time-saving features in re-assembling by the busy hardware dealer.

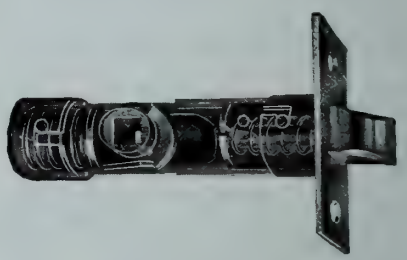
The hub is a patented self-contained roller bearing type, eliminating time lost in installing ball bearing, the wheels are all metal and reported indestructible.

The Walter Bentley Co. state that these wagons can be assembled quickly, owing to the design which only calls for the placing of two bolts on the part of the dealer.

DEXTER DOOR LOCKS

According to a recent announcement, the Dexter door lock, manufactured by the National Brass Co., of Grand Rapids, Mich., will now be made in Canada by the Dexter Lock Co., Hamilton, who have acquired manufacturing rights for the British Empire.

It is claimed that this lock, complete with trim, can be installed in a very short time. The manufacturers furnish a template or boring marker with every lock set and by measuring with this



device, installation is rendered easier and mortising is partially eliminated. These locks have 15 key changes, simple spring latch and screw spindle.

The Canadian manufacturers state they are making plans for quantity production.

PERFECTION CURTAIN LIGHTS

The Adamson Mfg. Co., Hamilton, have announced that they are now manufacturing and marketing the Perfection brand rear glass curtain lights for Ford cars. The manufacturers claim that these products add materially to

the appearance of the rear curtain as well as being equally effective in the matter of comfort.

IMPROVED FIRE POT

Various improvements in the No. 1 double needle fire pot, both as regards construction and utility purposes, are claimed by the Clayton-Lambert Mfg. Co. of Detroit, Mich. The manufacturers state that this fire pot has the double needle burner, and a number of other improvements in manufacture. Catalogs and further details may be secured through the above company.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

ANOTHER extensive budget of price developments attracts particular attention to the current hardware markets, lower quotations having been recorded on a number of various lines. These include the Coleman make of lamps and lanterns, lower list prices as well as new discounts on platform and household scales, the Fry make of glass ovenware, asbestos paper, Broad's socket firmer chisels, the Acme line of shears and scissors, Desolvo pipe cleaner, blind and bed staples, wire lawn rakes, and the Joseph Rodgers & Son pocket and table cutlery. Eastern markets also record easier price levels on boiler tubes due to the nominal list having experienced continual shading. Tire tape quotations are again lower, while brass steam cocks show a further revision in discounts, sizes a quarter inch to two inches being quoted at less fifty per cent, and sizes two and a half to three inches listed at forty-three per cent. Western centres report a decline in quotations on such products as rope, coach screws, plow bolts, tire bolts, metallic siding and shingles, and corrugated sheets. The announcement of snow shovel prices for next season contains little variation in actual costs but list prices and discounts are now quoted whereas net quotations formerly prevailed. Furnace scoops are affected in a similar manner. A further increase in linseed oil appears in some quarters, this change bringing quotations nearer to a uniform level as well as closely following the trend of the flax seed markets. A sudden firmness in turpentine centres results in an upward tendency in prices, where an easier level was more or less anticipated due to the pending new crop. Delay in the arrival of fresh receipts, coupled with a shortage in present supplies at both production and domestic centres, causes a temporary strength in practically all phases of the industry. Shellac prices are also slightly higher, but the future tone shows signs of relaxing, shellac gum now being offered more freely. Garden tools record an exceptionally brisk demand, while the improved tone continues in certain scrap materials; copper scrap having shown a little more activity, with increased interest being evident in steel scrap in view of certain producers experimenting in this direction because of the restricted pig iron output in southern circles due to the coal strike. There is no abatement in the firm trend of the steel industry, domestic conditions being recorded as satisfactory for this season of the year. Some revisions in galvanized sheet prices are considered as more or less imminent, this now being strictly a sellers' market.

Montreal Markets

MONTREAL, May 4.—The list of price revisions attracts attention this week, the general trend being still in a downward direction. Reduced prices are announced on household and platform scales, list prices being lowered with a new discount of ten per cent. Formerly these were quoted net at the higher list. Another important announcement is the new season's quotations on steel snow shovels. In former years these were quoted at net figures, but are now shown at list prices and discount. There is very little change, however, in quotations from last year. Furnace scoops are also quoted in the same manner. A reduction is made on the Coleman line of lamps and lanterns, and Desolvo pipe cleaner has new lower prices. A new list of prices on the various sizes of boiler tubes is given, a reduction of varying extent being recorded. Tire tape in all sized packages is again reduced in price, and the manufacturers of Fry oven glass name a new discount on their products.

EASIER PRICES RECORDED ON BOILER TUBES

Montreal

Current quotations on the various sizes of boiler tubes are revised, a reduction in prices being announced. Price levels on these products for some time past have been nominal, and an average list representing approximate levels could only be given. While the present reduction is contrary to expectations on the market for steel products generally, it has been pointed out that tube prices have remained on a higher basis than other allied lines in the industry and it was thought questionable whether the firmer tone would reflect on tube quotations. Distributors state that an easier tone has recently developed at primary sources, attributable to the size of present stocks with only a moderate demand, and this movement, assisted by outside competition, is responsible for easier prices at this time. Demand locally has somewhat improved recently with the opening of navigation, but the movement now is not quite so brisk, with activities in this direction practically closed for another season. Following are average prices at the revision:

BOILER TUBES—	Seamless	Lapweld
1 inch	18 50	.....
1¼ inch	20 25	.....
1½ inch	20 50	.....
1¾ inch	24 00	23 50
2 inch	22 00	19 00
2¼ inch	24 00	21 75
2½ inch	27 00	22 75
3 inch	32 00	28 50
3½ inch	39 00	33 25
4 inch	50 00	42 00

GALVANIZED SHEET PRICES REVISED IN SOME QUARTERS

Montreal

Higher prices on galvanized sheets are now recorded in some quarters on the local market. While the advance is not generally quoted up to the present, there are indications that further revisions will be announced in the near

future. Distributors who have now increased their prices are those who we formerly quoting lower than others, and this advance is covered by the range given below.

There is little material change in the general situation, the market continuing in its firm tone. Warehouses are becoming more and more anxious to get under cover fearing the possibility of further delays in deliveries with the continuation of the coal strike. While sheet mills are reported as being more fortunate in their coal stocks, most dealers are convinced that each week will bring added difficulty in obtaining fresh supplies, and the natural result of higher prices.

GARDEN TOOLS IN ACTIVE DEMAND

Montreal

A brisker demand is now noted for garden tools; spades, hoes, rakes, trowels, and other articles used by the gardener being active sellers throughout the jobbing trade. The season for gardening is just opening in this section, and with a continuance of more open weather, an active season is anticipated in these lines.

IMPROVED TONE REMAINS IN MOST SCRAP METALS

Montreal.

Waste material markets show little change this week, although the improved tone in many metals is evident. Dealers are still looking to the coal strike, and the effect on the steel industry, with interest, and while there is no direct reflection on these markets up to the present, there is stated to be some possibility of a firmer tendency in certain lines of scrap from this situation. Quotations remain nominally unchanged, notwithstanding slightly higher levels have been reached on markets in the South, particularly on copper and brass waste. Following are average nominal quotations:

WASTE MATERIALS—

Automobile tires	0 50
Rubber shoes	0 02¾
Yellow brass	0 05
Red brass	0 08¼
Light brass	0 03½
Scrap zinc	0 03
Lead, heavy	0 04
Lead, tea	0 02
Light copper	0 08
Heavy copper	0 10
Wrought iron, R. Rd., No. 1 per gr. ton	9 00
Malleable scrap (ton)	8 00
Pipe scrap (ton)	6 50
Heavy melting steel	6 50 7 00
No. 2 busheling	3 00
Boiler plate	7 00
No. 1 machinery cast	20 00

SLIGHT PRICE REDUCTION IN OVEN GLASS WARE

Montreal

Manufacturers of Fry oven glass ware announce a slight reduction in quotations on their line, discounts being revised from 30 per cent. to 33-1/3 per cent. off list prices.

DESOLVO PIPE CLEANER REDUCED IN PRICE

Montreal

A reduction is made in the price of Desolvo pipe cleaner, present quotation being $10.00 per case of two dozen. Former price was $12.00 per case.

LOWER PRICES ON PLATFORM AND HOUSEHOLD SCALES

Montreal

Through a change in both list prices and discounts, household and platform scales show a reduction in prices. List prices have been revised to lower levels, while the discount is changed from net list to 10 per cent. Following are new quotations:

SCALES—

4 lb.	$ 5 30
10 lb.	6 60
240 lb.	11 15
600 lb.	30 00
1200 lb.	35 60
2000 lb.	51 60
2000 lb., drop lever	55 70

Less 10 per cent.

EASIER PRICES RECORDED ON COLEMAN LAMPS

Montreal

A reduction of 10 per cent. is announced on the various styles of Coleman lamps and lanterns. No change is made in quotations on parts.

ELECTRIC AND OIL STOVES NOW IN ACTIVE DEMAND

Montreal.

Manufacturers and distributors of electric stoves, gas stoves and oil stoves report an active business at present in these lines. With the approach of earlier summer a brisker demand for these is usually felt, and sales this year are expected to compare favorably with other seasons. Gas stoves are having good demand locally. Tenants occupying new homes, in many cases require to purchase a stove for their new premises. There is no change in quotations on any of the above lines, the market stated to be fairly steady at present.

STRENGTH IN STEEL MARKETS STILL EVIDENT

Montreal

There seems to be no abatement in the general strength of the steel industry, factors contributing to the firm situation being still prominent. An added feature in the market, applicable to all lines, is the advanced prices on pig iron, and it is thought by some that this will have a more direct bearing on the situation locally than any other factor except the coal strike. The latter is still under much discussion among local distributors, and there is still a difference of opinion as to the effect on future production. In discussing increased demand and the better feeling now general in the industry one local distributor stated that consumption of steel up to the present had only shown a moderate improvement, buying continuing mostly for warehouses, and distributors are also following this principle because of the probability of increased difficulty in obtaining deliveries. There is still no change in local quotations, and following are present levels:

IRON AND STEEL—

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

SEASON'S SNOW SHOVEL QUOTATIONS ANNOUNCED

Montreal

Quotations for next season on steel snow shovels are now announced. These are now with list prices and discount rather than net prices as in former years. Following are new list prices and discount:

SNOW SHOVELS—

Prince	$ 9 00
Prince, "D" handle	11 00
King	12 00
Queen	10 00
Moose	15 00

Less 37½ per cent.

NEW QUOTATION GIVEN ON FURNACE SCOOPS

Montreal

The new season's price on steel furnace scoops is now announced, these being quoted at $9.00 list, with a discount of 37½ per cent.

LITTLE MORE ACTIVITY IN RANGE BOILERS

Montreal

Range boilers are still selling at unchanged quotations, with little change

recorded in the market situation. List prices and discounts, as given below, are quoted in most quarters while a few firms are still maintaining net prices. Trade shows a gradual improvement, and buyers are now ordering in somewhat better quantities than during the past quiet months. The reason stated for this is that building construction is advancing and more buildings are now requiring these products. The market is slightly firmer at the following list prices and discounts.

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent. Extra heavy, 40 per cent.

EASIER UNDERTONE IN BRASS AND COPPER GOODS

Montreal.

Notwithstanding copper on the primary markets has been somewhat steadier in recent weeks, and was reported firmer only last week, brass and copper goods, such as rods, sheets and tubing, are again easier in tone, and a slight reduction has been announced on certain southern markets. Whether this movement will reach the local market is hard to tell, but a revision in the near future would not be surprising to local dealers. Following are present quotations:

	Base.
BRASS—	
Sheets, base	0 24
Rods, base ½ to 1 in., round	0 22
Tubing, seamless, base	0 30
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 29
Soft sheets, plain, 16 oz., and heavier	0 32
Plain tinned, 16 oz. and heavier	z0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are full sheets and bars. Cut sheets and bars are 5c. per lb. higher.

REDUCED PRICES AGAIN ANNOUNCED ON TIRE TAPE

Montreal

Quotations on tire tape are again revised, a reduction of from five to seven cents a pound now being given. Following are new lower prices: In 25 lb. lots 1 oz., 47 cts., 2 oz., 47 cts., 8 oz., 45 cts., Less quantities, add 3 cents per lb.

ADDED STRENGTH NOTED IN GASOLINE MARKET

Montreal.

The firmer tone in gasoline during recent weeks continues, with an advance now recorded in quotations on southern markets. Increased consumption of this product at this season of the year has tended to strengthen the market, this factor being assisted by a better demand for crude oil. Whether this movement will affect the local market is considered problematical by local refiners, but it is pointed out that a revision in outside markets is usually followed by a corresponding change on domestic markets. Coal oil is little changed, the movement of this product being restricted to seasonal proportions, while lubricating and other oils are reported as fairly steady.

METALS ARE STEADY AFTER RECENT ADVANCES

Montreal

The metal markets have been generally steady during the past week, with few changes in prices and certain metals showing a slight pause after recent advances. All things considered the markets are described as fairly satisfactory.

TIN.—Statistics for April are generally satisfactory for this metal, and it is stated that were it not for fairly heavy consumption in the United States, prices would probably be lower than they are to-day. London hovers around the £150 mark, and the efforts to raise this figure have evidently not been successful. Quotations locally remain at 35 cents.

COPPER.—London has shown a little improvement and New York is also slightly higher. There is stated to be no particular features of interest, demand is fairly well maintained and there is still no pressure to sell. Local quotations are unchanged at 17 cents for electro, and 16½ cents for casting.

SPELTER.—Demand in the southern fields has fallen off slightly, but the London market remains fairly firm, and is higher than has been quoted in several months. It is thought possible that exports from the U. S. A. to Europe will again be seen, if the present trend of the markets continues. Local price 7¾ cents.

LEAD.—The buying demand seems to be fairly well satisfied for the present, and the market is quiet. It is stated that the higher level of prices will probably bring an increase in production which may result in a slight easing in prices. London has declined £1, from the high figure and apparently the position is slightly easier there. Local market continues at 7 cents.

ANTIMONY.—Antimony is somewhat firmer in New York owing to disturbed conditions in China, which may possibly affect deliveries from there. There is little or no change in the local market, and Chinese is quoted at 6½ cents, high grade English at 7½ cents.

ALUMINUM.—Although a slightly more active market is reported in the south, locally the situation is practically unchanged with quotation unchanged at 24 cents.

Toronto Markets

TORONTO, March 4.—Current price reductions include such hardware lines as the Coleman make of lanterns and lamps, the Acme line of shears and scissors, Broads' socket firmer chisels, bed staples and blind staples, asbestos paper, and wire lawn rakes. Cut laces are now on slightly higher price levels. The announcement of snow shovel prices for next season attracts attention, these showing no variation from previous levels, although list prices and discounts are now quoted whereas net quotations were formerly in effect. Brass steam cocks also have another revision in discounts, sizes a quarter inch to two inches being quoted at less fifty per cent., while sizes two and a half to three inches are listed at forty-three per cent. There has been no abatement in the firm trend in the steel industry, domestic activity being recorded as fairly satisfactory for this season of the year, while the coal strike is generally looked upon as a blessing in disguise. A sellers' market remains in galvanized sheets, with higher quotations regarded as more or less imminent. Seasonal activity is noted in corrugated sheets. Some slight improvement is recorded in certain scrap materials, increased interest being evident in scrap steel in view of certain producers experimenting along this line because of the restriction in pig iron output due to the coal strike. Ingot metals also reflect improved developments, lead, spelter and antimony, maintaining a firmer undertone, with prices slightly advanced on lead and spelter. Aluminum shows a reaction, with local prices several cents lower.

CUT LACES NOW ON HIGHER PRICE LEVEL

Toronto.

Prices on cut laces are slightly advanced this week, revised quotations being $1.80 per lb compared with the previous level of $1.65.

NO ABATEMENT IN FIRM STEEL TREND

Toronto.

There has been no abatement in the strength of both primary and domestic steel markets, the firm tendency previously recorded still being evident locally, as quotations are decidedly well maintained. The industry has now had over a month to adjust itself to the effects of the coal strike, and a turn in this condition has now developed. The early depression and anxiety recorded in primary quarters, has now given way to returning optimism and increased confidence. Steel mills report they have adjusted their sources of fuel supplies,

many of them procuring fuel from channels other than their regular ones. Some plants have turned to fuel oil in the place of coal; others are taking advantage of natural gas resources. Blast furnaces which at first were the hardest hit, have managed to worry along and more furnaces are now going in blast than are going out. Therefore, the general situation is described as encouraging, with current business of fair proportions. Unchanged prices follow:

IRON AND STEEL—

Mild steel bars, base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	**2 85**
Horseshoe iron	3 60
Tire steel	3 00
Spring steel	6 00
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

SNOW SHOVEL PRICES FOR COMING SEASON

Toronto.

Prices on snow shovels for the coming season show no appreciable variation, although list prices and discounts are now quoted, whereas last season, net prices were given. However, the final cost is approximately unchanged. Following are the new list prices with discount:

SNOW SHOVELS—

Prince	$ 9 00
Prince, "D" handle	11 00
King	12 00
Queen,	10 00
Moose,	15 00

Less 37½ per cent.

PRICE DECLINE ON BED AND BLIND STAPLES

Toronto.

A slight reduction has been announced on both blind and bed staples, the revised quotations on these products being as follows:

BLIND STAPLES—

In 10-lb. boxes.

½ inch, 23 cents per lb.; ⅝ inch 22½ cents; ¾ inch 22 cents per lb.

BED STAPLES.

In 10-lb. boxes.

⅝ inch 20 cents per lb.; ¾ inch 18 cents; ⅞ inch 16½ cents; 1 inch 16½ cents per lb.

PRICE SLIGHTLY LOWER ON ASBESTOS PAPER

Toronto

A slight reduction has been announced this week on asbestos paper. The revised level is $7.70 per roll, compared with the previous quotation of $8.00.

REVISED QUOTATIONS ON SOCKET FIRMER CHISELS

Toronto.

A reduction has also been made in quotations on Broads' socket firmer chisels, this line now being quoted with leather tip handles at list less 40 per cent., for plain, with the usual extras for bevelled.

BRASS STEAM COCKS SHOW ANOTHER CHANGE

Toronto

Another revision has been made with regard to the discounts on brass steam cocks, these products now being quoted as follows: ¼ to 2 inch sizes, less fifty per cent.: 2½ to 3 inch, less forty-three per cent. The current movement of brass compression goods is generally described as fair, with plenty of room for improvement. The feeling is evident that more activity should be noted during the ensuing months, as these lines are expected to reflect to a certain extent the general increase in building. Following are prevailing discounts:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in.	50%
Do., 2½ in. to 3 in.	43%
Globe angle and check valves, standard	25%
J. M. T.	20-10%
J. M. T. C.	25-10%
J. M. T. Gate Valves	25-10%
Jenkins gate or straightway	25-10%
Jenkins Globe	19-10%
Radiator valves, standard	58%
do., removable disc	58%
Emco check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco swing check, ⅜ in. and ½ in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%
Basin Cocks:	
No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3663	50%
No. 3623, plain or index handle	34%

REVISED QUOTATIONS ON WIRE LAWN RAKES

Toronto

New prices on wire lawn rakes have been announced by the manufacturers, the following being revised prices on the Welland Vale Co.'s line:

WIRE LAWN RAKES—

20 tooth, per doz.	$ 4 60
24 tooth per doz.	5 30

F. O. B. Toronto.

REDUCTIONS ON COLEMAN LAMPS AND LANTERNS

Toronto.

Varying reductions have been announced on the Coleman line of lamps and lanterns. The change on lamps is approximately $1.00 each or in the neighborhood of eight per cent., while the revision in lantern prices is recorded as twelve per cent.

REGAL AND SOVERIGN BRANDS OF SHOT SHELLS TO BE DISCONTINUED

Toronto.

It is announced that the Dominion Cartridge Co., contemplate discontinuing manufacture and distribution of the Regal and Soverign brands of shot shells after this season. Other popular lines, such as Imperial and Canuck, however, will not be changed.

SELLERS MARKET IN GALVANIZED SHEETS

Toronto

One of the chief factors in the current sheet market is supplied by the producers being less prompt in filling orders. Formerly, buying for immediate requirements only, generally prevailed, as prompt delivery was almost assured. Since the recent gain in strength, distributors have had to carry heavier stocks, as the increased mill business introduced a sellers', instead of as formerly, a buyers' market. While sheet prices have registered some slight advances in certain quarters, these are not generally adopted, no announcement having been made locally. It is admitted, however, that quotations are much firmer, the upward trend in the steel industry having practically eliminated price shading from the market. This almost amounts to a nominal increase. One distributor stated that it was undoubtedly cheaper to buy from stocks at present, than purchase direct, and when jobbers again turn to replenishing supplies, the higher costs are most likely to be reflected in the average quotation. Following are prevailing levels:

BLUE ANNEALED—		
10 gauge, base	3 50	4 25
12 gauge	3 55	4 30
13 gauge	3 60	4 35
16 gauge	3 65	4 40
BLACK—		
18-20 gauge	4 05	4 80
22-24 gauge	4 10	4 85
26 gauge	4 15	4 90
28 gauge	**4 25**	**5 00**

Charge of from 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis.
28 gauge	7 50	7 00
26 gauge	7 25	6 75
24 gauge	6 85	6 35
22 gauge	6 40	5 90
18 and 20 gauge	6 25	5 75
	Premier and	Apollo
10¾ oz.	5 75	6 50
U. S. 28 base	5 35	6 10
U. S., 26 gauge	5 05	5 80
22 and 24	4 90	5 65
18 and 20	4 75	5 50
16	4 60	5 35
12 and 14	4 45	5 20

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c. per 100 pounds.

PLATES, CANADA—	
Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25
PLATES, COKE TIN—	
IC, 20 x 28, 112 sheets	12 50
IX, 20 x 28, 112 sheets	16 00
IX, 20 x 28, 56 sheets	8 50
PLATES, CHARCOAL TIN—	
IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00
PLATES, TERNE—	
IC, 14 x 20, 112 sheets	11 50

LOWER PRICES ON ACME SHEARS AND SCISSORS

Toronto

A considerable reduction in prices on their various lines of scissors and shears is announced by the Acme Shear Co., the change being effective May 1. The revision, while of a substantial nature is stated to vary slightly on the different products.

CONDITIONS MODERATELY QUIET IN CORDAGE

Toronto.

Current sales of rope and cordage are described as moderately quiet, the improvement in this direction not having been as marked as was generally hoped for. However, there is reported a steady and gradual expansion, with an improvement over the corresponding records of last year. This is looked upon as more or less satisfactory. The primary hemp markets are considered firm, with quotations remaining steady both

TORONTO MARKETS

(Continued from page 64)

on southern and domestic centres. Buyers are making more inquiries, but no important developments have been recorded. Binder twine commitments are not yet in evidence, prices remaining unchanged at the levels recently announced.

SEASONAL ACTIVITY IN CORRUGATED SHEETS

Toronto.

The corrugated sheet market is described as much firmer, in keeping with the improvements in the flat sheet market. Some increase in activity has also been recorded, the movement of these products usually becoming brisker at this season of the year. The improvement in recent weather conditions has contributed to this result, coupled with the demand from building circles and the lighter gauges are described as registering a fair volume of activity. Following is the nominal unchanged list and discount.

CORRUGATED SHEETS—	Per 100 Sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 26 U. S. gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins. 75 cents per sq. extra.

LEAD FIRMER WITH PRODUCTS MORE ACTIVE

Toronto.

Lead and zinc products are remaining at the recently revised price levels, with seasonal activity noted as regards the current movement of these lines. It is also noticeable that lead on the primary metal markets is the strongest of the group, some improvement in demand and increased consumer interest having added considerable strength to the undertone. Solder quotations are unchanged, with copper having been slightly steadier during recent weeks. Following are prevailing price levels on the local market:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12
Lead waste pipe, list, per lb.	0 13
Do., over 8 in., list, per lb.	0 14
Lead pipe is subjected to a discount of	10%
Lead traps and bends	0 17½%
Lead sheets 4 to 6 lbs. sq. ft in rolls, lb.	0 09
Cut sheets, ½c. to ¾c. lb. extra and cut sheets to size 1c. lb. extra.	
Solder, wire, per lb.	0 30
Do., strictly, lb.	0 22½
Do., wiping, lb.	0 21
Do., guaranteed, lb.	0 24
Do., commercial, lb.	0 21
Zinc sheets, per lb. 0 09	0 10
sheets to size 1c lb. extra.	

ACTIVITY RECORDED IN PREPARED ROOFING

Toronto

With the advent of seasonable weather conditions, more consuming interest is reported in prepared roofings and building papers, manufacturers and distributors of these products recording a more active movement during the recent weeks. During the early months of the year, inquiries were considered few, and commitments were not large, but improvement in this direction has been noted. The extensive building programs outlined in many sections of the country, are looked upon as an incentive to the future increased sale of roofings generally, and brisk trade is expected to continue throughout the ensuing months. Prices have remained steady, the raw material markets being firm, and the primary situation unchanged since the revisions in quotations which were announced at the commencement of the season.

LEAD AND SPELTER NOW SLIGHTLY HIGHER

Toronto.

Some price developments have been recorded on the domestic ingot metal markets, these changes particularly affecting lead, spelter and aluminum. Lead and spelter, are slightly increased in price, thus reflecting the firmer trend noted in these metals during recent weeks. Aluminum, however, has reached new lower price levels on the local centre, recent transactions being recorded at several cents below the former averages. Antimony is also appearing with a firmer tone, this being attributed to unsettled conditions in China. Copper and tin remain practically stationary.

COPPER.—Copper prices on southern markets continue to receive considerable attention, but the actual strength of this metal is little altered, scrap copper remaining conspicuous, while prices still hover in the neighbourhood of thirteen cents at New York. Locally, the quotation of 16½ cents continues to cover the domestic level.

TIN.—Fluctuations in tin prices have been extremely narrow, the variance in exchange practically covering any difference. On the whole, this market is generally described as quiet, but firm. Local prices are unchanged, the level of 34 cents being general.

LEAD.—Lead continues firm on both foreign and domestic markets, and local prices have advanced to the level of $6.75, an increase of 25 cents. Interest in this metal remains fairly strong, and the improved tone is being reflected in lead products generally.

SPELTER.—Quotations on spelter are locally advanced to $6.85, an increase of ten cents from the previous level. This reflects the general improvement in this metal, which was pointed out in last week's report. More inquiries and a resumption of consumer interest are the factors attributed to this development.

ANTIMONY.—This market remains steady with the firmer tendency being maintained. A little uncertainty is expressed in some quarters owing to the unsettlement in China restricting future supplies from that direction. Up to the present, however, no material change has been recorded in domestic prices, the range generally being between 6 and 7 cents.

ALUMINUM.—While some increase in the average run of business in aluminum was reported, this proved to be only a temporary spurt and the tone has faded away. Prices have also reacted locally, recent transactions having been made at prices several cents below the previous levels. The average domestic quotation now hovers between 20 and 21 cents.

London Markets

LONDON, May 4.—Hardware price changes are light again this week in point of numbers, a reduction in the Joseph Rodgers & Sons' line of pocket and table cutlery, together with an increase of five cents in linseed oil quotations, being the feature current revisions. Other products such as turpentine, nails, and auto tires record a firm market trend. Trade in this district is reported as good with seasonal lines in better demand. Paints and varnishes are enjoying a brisk movement at present, and under the added stimulation of warmer weather, business is generally expected to reach favorable proportions throughout the ensuing weeks.

FIVE CENT ADVANCE ON LINSEED OIL

London, Ont.

An increase of five cents per gallon in the price of linseed oil has developed on the local markets, this change being attributed to the firmer position of flax seed combined with an improved demand for oil. Following are revised prices:

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal	1 10	1 13
3 to 5 bbls., per gal.	1 09	1 12
6 to 9 bbls., per gal.	1 07	1 10

Less barrels, add 15 cents gal.

LAWN MOWERS RECORD SEASONAL MOVEMENT

London, Ont.

The brighter weather recently experienced, coupled with the Spring clean-up campaigns being instituted in various sections of the country, has stimulated seasonal sales of lawn mowers. Dealers record that these products are now registering a popular movement. Quotations on the Taylor-Forbes line remain at list less 20 per cent.

SUDDEN STIFFENING NOTED IN TURPENTINE PRICES

London

While local turpentine prices are as yet unchanged, quotations have firmed up considerably in the last few days, due to the stiffening in southern primary markets. The future trend of turpentine is faced on the one hand with the arrival of the new crop with consequent increased supplies available, while

current improvement in demand coupled with larger domestic and foreign consumption is expected to become apparent. In the meantime, producing centres have shown a somewhat sudden rise in prices, but local levels record the following:

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 30
2 to 4 bbl. lots	1 29
5 gal. lots	1 45

REDUCED PRICES ON RODGERS' TABLE CUTLERY

London

A reduction of approximately ten per cent. has been announced on the Joseph Rodgers & Sons line of table and pocket cutlery. Following are some of the new prices on certain popular lines:

POCKET CUTLERY—

Pen, No. 17749 I, $11.15 doz. Pen, No. 17749B, $11.15 doz. Pen, No. 17751P, $23.05 doz. No. 32341x3", $6.65 doz. 3¼, $6.09 doz. 1 blade, pocket, 3½ $7.70 doz. 3¾, $8.85 doz.

2 Blade Pocket—		doz.
No. 32345x2¾"	8.45	doz.
Do., x3"	9.20	
Do., x3¼"	10.35	
Do., x3½"	11.55	
Do., x3¾"	12.70	
Do., x4"	16.15	
2 Blade Boys—		
No. 32352	5.20	

TABLE CUTLERY—		
Dessert Knives No. 3744	8.45	doz.
Do., No. 3749,	7.80	doz.
Table Knives, No. 3744	10.75	doz.
Do., No. 37.49	10.10	doz.

FAIR ACTIVITY IN SPADES AND SHOVELS

London, Ont.

Spades and shovels continue to record a fair degree of activity, these products usually being popular at this season. Quotations remain at the level of list less 55 per cent.

IMPROVED SALES FOR SCREEN WIRE CLOTH

London, Ont.

Business in screen wire cloth is still improving, due probably to the warmer weather. This is usually a good item in season, and jobbers in this district seem to feel that sales will be good this year. Prices are unchanged at the following levels:

SCREEN WIRE CLOTH—

Painted Black $3.00 per 100 sq. feet.
Galvanized, $3.60 per 100 sq. ft.
Bronze $10.00 per 100 sq. ft.

WASHING MACHINES AND WRINGERS NOW ACTIVE

London, Ont.

There is now reported to be a fair Spring sale for washing machines and wringers. These are included by many dealers in their displays of household products to good advantage. Quotations remain unchanged, the discount being thirty per cent.

GARDEN TOOLS NOW IN POPULAR DEMAND

London

Garden tools are also experiencing an unusually brisk demand, and many dealers report that the movement of these lines has been in excess of current expectations. Prices are unchanged, garden tools still being quoted at list less 60 per cent.

Winnipeg Markets

WINNIPEG, May 4.—More price developments are recorded this week than have been noted for some time past. Among other changes on the current hardware markets are lower prices on many styles of drills, revised discounts on stove, tire and plow bolts, lower quotations on wire in spools, easier price levels on set and cap screws, while a similar reduction has been recorded on coach screws. Rope prices have declined one cent per lb., and a downward revision appears on metallic siding and shingles, and also on corrugated sheets. Linseed oil quotations have advanced five cents per gallon, this being the only upward development.

NEW DISCOUNTS LOWER WIRE PRICES ON SPOOLS

Winnipeg.

Through a revision in discounts, prices on wire on spools have been reduced. Following are the revised discounts.

WIRE ON SPOOLS—

Hair wire, plain or silvered, 33 1-3%.
Brass Wire, ¼ lb., 20%.
Brass Wire, ½ lb., 7½%.
Copper Wire, ¼ lb. 33 1-3%.
Copper Wire, ½ lb., 15%.

IMPROVED TRADE EXPECTED IN WROUGHT PIPING

Winnipeg

Current business in pipe is described as comparing very favorably with the volume of trade last year, while increased sales have been generally reported during the past few weeks. With an improvement in basic market conditions, it is naturally expected that brisker trade will be recorded through the ensuing month

NEW PRICE LEVELS ON STOVE AND TIRE BOLTS

Winnipeg.

Through a revision in discounts, prices are reduced on stove bolts, plow bolts, tire bolts, and coach screws. Following are the new discounts.

Stove Bolts, 70 and 5%, Plow Bolts, 25 and 5%, Tire Bolts, 45 and 5%. Coach screws, 45 and 5%.

LINSEED OIL PRICES ADVANCE FIVE CENTS

Winnipeg.

An advance of five cents per gallon has been announced on linseed oil, and raw oil is now quoted at $1.15 per gallon, with boiled at $1.18 per gallon in barrel lots.

REDUCED PRICES ON SET AND CAP SCREWS

Winnipeg.

A reduction has been recorded in prices on set screws and cap screws. Following are the revised discounts:

Set screws	50%
Cap Screws	45%

LOWER PRICES ON METALLIC SIDING AND SHINGLES

Winnipeg.

Prices are quoted lower this week on metallic siding and shingles. Following are the revised levels:

METALLIC SIDING—Galvanized.
Medium, $7.20 per 100 sq. ft.
Painted—
Medium, $5.40 per 100 sq. ft.
METALLIC SHINGLES—
Galvanized—
Medium, $8.55 per 100 sq. ft.
Painted, $6.75 per 100 sq. ft.

PRICES SLIGHTLY LOWER ON CORRUGATED SHEETS

Winnipeg.

A slight reduction has appeared on corrugated sheets, while the market is recorded as being more active. A gradual improvement is noted with the advancing season, and dealers are expecting a fair business in this line in the coming months. The building program promised next month should reflect on the movement of these products. Following are the latest quotations:

CORRUGATED IRON—Galvanized.

28 Ga. $6.30 per 100 sq. ft.
26 Ga., $6.98 per 100 sq. ft.
Painted 28 Ga., $5.27 per 100 sq. ft.
Painted 26 Ga., $6.00 per 100 sq. ft.

ROPE PRICES DECLINE ONE CENT PER POUND

Winnipeg

Rope prices have declined to the extent of one cent per pound. The new prices on sisal, British manila and pure manila rope and lath yarn, sisal lariat and manila lariat, are contained on the current market quotation pages.

REVISED DISCOUNTS ON MANY STYLES OF DRILLS

Winnipeg.

Through a change in discounts, several lines of drills are reduced in price. The change brings blacksmiths, straight shank, taper shank, round shank and jobbers to a lower level, and these are now quoted at less 50 and 10 per cent. Bit stock bits remain at 40 per cent.

Hamilton Markets

HAMILTON, May 4.—The brighter days with promise of warmer weather now arriving have stimulated the seasonal activity of many hardware lines which were moving a little slower than expected. Garden tools and paint specialties have recorded a marked increase in popularity, and many other products now appear in better demand. The recent clean-up and paint-up campaign instigated by the city authorities, was capitalized by the majority of local dealers to good advantage, many expressive displays of paints, brushes, and other equipment

(Continued from page 70)

necessary for use in clean-up work, being recorded. Many price changes of an upward tendency have recently been noted, the advance in pig iron and galvanized sheets, being followed by a general stiffening in quotations on bolts, wire nails, various manufactured products and similar lines. On the other hand, reductions are reported on certain aluminum kitchen utensils, and a number of specific hardware lines. Keen interest is still attached to the steel position in general and to the strike of coal miners in particular.

As a matter of fact there is a feeling in many quarters that the coal strike has been a blessing in disguise for the steel market. There would probably have been trouble if buying and production had kept on increasing at the phenomenal rate of the first three months of the year, for it cannot be imagined that consumption of steel has been increasing at any comparative rate. After a drastic liquidation in stocks of steel in 1921, the country was stocking up, partly in anticipation of the coal strike and partly in anticipation of better business. Now the coal strike is retarding further increases in production while it is stiffening steel prices, some of which had fallen as low, and according to certain producers, in specific cases lower than the cost of production.

The strength of the steel situation at the moment, and for the nearby future, is well recognized, therefore, although the more conservative observers have strong doubts as to its permanence. In many quarters the opinion is expressed that the movement has come about six months too soon and that, but for the posible saving influence of the coal strike, it was almost certain to have an inglorious ending this summer.

An increased demand for crude oil with activity in forward booking, is described in some quarters as one of the resultant effects of the southern coal strike, large consumers of coal being interested in the adaptation of fuel oil to meet their requirements in the event of the duration of the miners' strike. Radio equipment is in exceptionally brisk demand, producers stating that the supply is at present inadequate, although increased output is looked for. The effect of the steel situation on specific hardware products, is apparent in the firmer tone on corrugated sheets, eavestrough, conductor pipe, wrought piping, wire goods and similar lines. The warmer weather has induced the shipment of early summer goods, while general activity in seasonal buying is now indicated in the improved reports noted from both wholesale and retail circles.

Ed. Hemstreet of Alymer Ont.. has joined the staff of Paterson Bros. Hardware.

Pittsburg Markets

PITTSBURG, May 4—The coal strike has not restricted steel production, for the rate is slightly heavier than a month ago, and the market is stronger than ever. It is strictly a sellers' market, in that the mills decide what orders they will accept, instead of cutting prices to get almost any kind of an order. On the whole, the coal strike has proved a very good thing for the steel industry.

Of course there is the superficial showing that at some points steel production would be greater if production of Connellsville coal and coke were not restricted, but then it might be too great, and if there had been no coal strike, or expectation of one, steel demand might not have been as heavy during the past three months, as it has been.

Production in the Connellsville region is about one-third what it was in March, and has been approximately stationary for the past ten days. It is quite unlikely these non-union strikes will extend farther, but it is improbable that the men will drift back to work in large numbers in the very near future. They must do so eventually, for the Connellsville region has always been non-union, and it is absurd to think of its becoming union, under the control of the United Mine Workers, in the very year in which the U. M. W. so prosperous and powerful in the past quarter century, is likely to lose its chief foundation, the check-off. The check-off may be described briefly as automatic unionism, the dues, fines and initiation fee being deducted by the payroll clerk and remitted in a lump sum to the district office of the U. M. W. The union operators are determined never to agree to the check-off again, and the non-union operators are not going to become union at a time like this.

Iron and Steel.—Only a part of the iron and steel industry depends on the Connellsville region, where these non-union strikes occurred. The union strike was fully expected, and ample provision was made for it. The Connellsville strikes, however, were not expected, and there has been striking in some other

The Brush Department

"A Brush With Every Order of Paint"

Under This Slogan Mathewson Hardware, Toronto, and Other Hardware Stores Are Educating Customers That a Poor Brush Will Spoil the Application of the Best Paint

"A BRUSH with every order of paint," is the slogan adopted by the staff of the Mathewson Hardware Co., Danforth Ave., Toronto. This firm has made something of a study of paint customers' requirements and of the difficulties which the latter encounter in connection with painting and varnishing and it has been found that a great many of these difficulties arise from the use of a brush which is not suited for the purpose, which is too much worn to give good results or which has not been given proper care.

Too frequently in the past have customers for paint been allowed to take home their cans of paint and varnish with never a thought for a brush and rather than take the time to return to the store or perhaps from ignorance of the importance of having the right brush for the purpose they have been content to proceed with any brush available. Mathewson Hardware, like many other hardware stores, are commencing a new policy of paint selling, namely, the establishment of their stores in the minds of people as a place where expert advice is available on such an important subject as painting. When customers have been brought to this realization the salesmen have the best possible opportunity to educate them to the use of good brushes and also regarding the care of them. In order to properly "Save the Surface" the paint or varnish must be correctly applied. This phase of the matter is receiving increasing attention at the hands of a number of merchants, with good results. It is noteworthy that brushes occupy a prominent location in practically all the various paint displays shown in this issue. The campaign offers good opportunity for stimulating the sale of brushes of all kinds. Paint brushes will be needed for the painting and other household brushes will be required for the various housecleaning duties which now confront the housewife. She will be anxious to learn of the latest labor saving brushes offered for her use. Both of these are important branches of brush trade at present and they justify special attention.

Boeckh's Brush News

Keep the Ball Rolling

The great national household paint up and clean up campaign is doing a great deal towards stimulating business. The effect is being felt in cities, towns and villages all over Canada. Hardware merchants who are co-operating in the campaign are reaping tidy benefits.

Aggressive advertising on a large scale, unique, striking and interesting window displays and exhibits, and the energetic, enthusiastic efforts of thousands of merchants, travelers and salesmen, have had an excellent effect on spring trade.

The ball has started to roll. Let us keep it rolling.

In many localities these efforts reach their climax in a special "Paint Up and Clean Up Week." During this week householders cannot overlook the advantages of cleaning up and painting up their homes. In some localities all efforts cease once the campaign week is over, and trade quiets down. But in other localities this special week is looked upon merely as the introduction to a Spring of Painting and Cleaning Up. In these districts trade stays lively and brisk. Ambitious hardware merchants keep ding-donging away at their respective territories, and results are forthcoming.

They keep the ball rolling!

If you have had your Paint Up and Clean Up Week, don't let the good idea die. Keep it alive. There's an after-effect to this campaign that needs only a little cultivating to make it productive of really fruitful results. The one week's campaign is simply a "take-off." The weeks that follow are the ones where results come from, and the merchants who realize this fact are the boys that are going to show a whacking big profit column.

Play this tip for all you are worth. We'll give you all the help at our command if you will only let us know. Say the word and we are at your service with display cards, counter cards, free electros for your ads, and brush display boards. Give Boeckh's Brushes a good show in your Paint Up and Clean Up Week, and the weeks that follow, and you will be highly pleased with results.

Weekly Paint Markets

Montreal

MONTREAL, May 4—Price developments attract attention on the current paint markets, linseed oil, turpentine and shellac, each recording advanced quotations. Linseed oil is increased five cents per gallon following a former advance last week. The flax seed market continues to climb and the highest point for sometime has now been reached. With a heavier demand during the active season, a firm outlook is lent to both seed and oil markets. A strong re-action in the turpentine market at the close of last week furnished a surprise to local importers and distributors. Following a slightly easier tendency, owing to the advent of the new crop, Southern quotations are now advanced several cents, with an increase of five cents in sympathy locally. Although definite information from the South is not yet to hand, earlier reports indicate lighter receipts owing to unfavorable weather and floods in the wooded areas. Shellac prices are increased twenty-five cents per gallon on both white and orange in barrels and one gallon jugs. This market remains firm with little improvement in the situation on primary markets. The movement of paint, varnishes and sundries continues along satisfactory lines, producers, without exception, stating they are working to capacity. The undertone of the market in general is said to be continuing on a steady to firm basis.

LINSEED OIL STILL ON UPWARD CLIMB

Montreal.

Continuing on its upward climb, linseed oil again registers a five cent advance in quotations, bringing present price of raw oil in one barrel lots to $1.05 per gallon. The trend of oil closely follows the flax seed market, which also recorded higher levels during the week, and is now at the highest point for some time past. Demand is now a more important factor in the market, local crushers stating that it continues seasonably active and if the present movement is maintained, it will have a deciding effect on the future, as seed supply is just as important a question as it was some weeks ago when it was predicted that advanced prices would in probability rule later in the season because of light warehouse stocks.

From markets to the South come reports that imported oil is also firmer with prices advanced considerably over previous levels. This is due, it is stated, to the heavy buying on the part of American crushers in recent weeks. Imports have for some time past been troublesome, because of the variation between the prices of European and domestic oil, and it is taken that a stronger tone in this direction will further strengthen the situation. Following are revised quotations locally:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots per gal. ..	1 05	1 07
8 to 5 barrel lots, per gal. ..	1 03	1 05
Less barrels, add 10 cents per gallon.		

MODERATE ADVANCE IN SHELLAC QUOTATIONS

Montreal.

The strength of shellac on primary markets has now reflected locally to an extent, average quotations being advanced twenty-five cents per gallon on both white and orange in all quantities. Former price levels are still quoted in a few quarters, but higher quotations are expected here also in the very near future as the market has lost none of its former strength. Conditions at sources of supply are reported as showing very little improvement during the week, and import shipments are still of a very light nature. Average quotations, with revision, are as follows:

SHELLAC—	
Orange shellac, in barrels	4 85
Do., in one gal. jugs	5 15
White, in 5 gal. jugs	5 35
Do., in one gal. jugs	5 65

STRONG REACTION IN TURPENTINE MARKET

Montreal

A surprise was given local importers and distributors of turpentine when prices at Southern centres recorded a sharp advance at the close of last week, a gain of several cents being recorded in one day. Owing to the advent of the new crop, it was generally anticipated that an easier tendency would follow, as a softer tone is usually apparent at this season. An indication that this year would be no exception was the easier tone last week, when local quotations appeared on both Southern and local markets. Not quite understanding such a marked reaction, importers are now awaiting more definite information from the South, but earlier reports state that unfavorable weather, accompanied by floods has hampered new receipts to a great extent. It has been realized that much depended on the extent of new offerings, and this being the case, a falling off at this time offers a fair solution for the present movement. Demand has also improved, and with comparatively small stocks available, the heavier buying movement has no doubt also contributed to the present higher market. Although buyers continue to restrict their orders to immediate requirements, this policy has had very little weakening effect on the market so far, and considering the active season in the ensuing months, a steadier outlook is forecast, unless the new crop proves a deciding factor in the near future.

TURPENTINE—	Imp. gal.
1 barrel lots	1 22
2 to 4 barrel lots, per gal.	1 21
Broken lots	1 32

Toronto

TORONTO, May 4.—A somewhat unexpected firmness in both southern and domestic turpentine markets, constitutes one of the feature developments in the current paint markets. This renewed strength is attributed to weather conditions hampering the arrival of the new crop, while the shortage of supplies noted during recent weeks has been accentuated by increased general market activity. Linseed oil also attracts attention, for while local prices continue at the higher levels recorded last week, the trend of flax seed prices reflects a firmer tone in oil, which is also supported by better consumer interest. Shellac prices are slightly higher in some quarters, but the general undertone shows some signs of relaxing, as shellac gum is now more freely offered than was apparent a few weeks ago. A satisfactory increase in the general movement of paints and varnishes is now reported from manufacturers and distributors of these products, with seasonal improvement in practically all phases of the industry.

SHORTAGE ADDS FIRM TONE TO TURPENTINE

Toronto.

An unexpected situation has developed in the turpentine markets, for much firmer tone is now being recorded, whereas an easier tendency was more or less looked for at this time of the year due to the anticipated arrival of the new crop. Some unsettlement in weather conditions has hampered this fresh crop of turpentine, and with the demand increasing on both domestic and southern producing centres, the shortage of supplies which has been referred to in recent market reports, becomes a conspicuous factor and current holdings, if any, assume preferred positions. Prices are considerably firmer as a result, and while southern quotations have regis-

(Continued from page 74)

tered a rise of several cents, this move has tended to strengthen the higher quotations of $1.30 per Imperial gallon in one barrel lots on the local markets, and this level has more or less become general. It will be recalled that last week a considerable variance in prices was recorded locally, and a quotation of $1.23 also appeared this week. This is not generally being adopted, however, owing to the scarcity of domestic stocks. Fresh supplies are stated to be on the way, and the shortage is expected to be relieved. However, as fresh receipts at producing centres cannot be compared with the present volume of demand, the firm situation already apparent may last for two or three weeks until new supplies are more plentiful. One distributor stated to Hardware and Metal, that future prices would most likely easier, but for the present, the increased market activity, coupled with the shortage already noted, has resulted in the current firm prices.

TURPENTINE—	Imp. gal.
1 barrel lots	1 30
2 to 4 barrel lots	1 29
5 gallon lots	1 45

Less than 1 barrel lots—15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

FIRM TREND EVIDENT IN LINSEED OIL

Toronto

The trend of linseed oil quotations, continues to closely follow the current movements in the flax seed market and the prevailing improvement in demand for both seed and oil constitutes the dominant feature. With seed prices advancing owing to the stimulant of increased activity, linseed oil was naturally expected to experience a firmer situation. A corresponding increase in consumer interest for linseed, however, is described as materially strengthening the present oil market conditions, and while local prices remain unchanged at the revised levels recorded last week, these quotations are stated to be very firm. Certain eastern centres have recorded a further advance in the price of linseed oil this week, but it is noted that this change brings quotations on a more uniform level. Following are local prices:

LINSEED OIL—	Per gallon Raw	Boiled
1 to 2 barrel lots	1 10	1 13
3 to 4 barrel lots	1 09	1 12
6 to 9 barrel lots	1 07	1 10

Less barrels, add 15 cents per gallon.

SIGNS OF REACTION IN SHELLAC UNDERTONE

Toronto

While a slight increase has been reported in shellac prices on certain domestic markets, the current undertone is now slightly easier. The advance in quotations reflects the stiffening in shellac gum which has been referred to in recent reports, but it is noted that shellac gum is now offered more freely, thus indicating that primary supplies have been more or less renewed. Scarcity of this product, owing to developments in India hindering the source of supply, was reported as the fundamental cause of recent developments, but while specific reports covering the prevailing Calcutta situation are difficult to secure, stocks at southern primary centres are evidently not so restricted as earlier advices indicated. Whether future supplies will be available, remains to be seen. The domestic advance in shellac prices is described as reflecting the uncertainty of the situation, particularly as regards stocks, combined with slightly more general market activity.

FIRMER TENDENCY IN WHITE LEAD IN OIL

Toronto.

There has been a constant improvement recorded in the market for white lead in oil, this being attributed to the seasonal expansion in demand coupled with the firm undertone of lead on the primary metal markets. It is noted that lead is at present the strongest of this group of metals, and producers of white lead in oil point out that lead becomes a more important factor than linseed. Some sections of the paint trade record more activity in white lead in oil than others, but a steady demand is general with improvement in this direction looked for during the ensuing weeks. The current market trend is therefore, firm, with quotations remaining at the following levels:

WHITE LEAD IN OIL—	
In 5-ton lots	12 45
In 1-ton lots	13 20
Less quantities	13 55

DEMAND FOR GLASS KEEPS PRICES STEADY

Toronto.

The demand for window glass is described as fairly good and the prospects are that the season will be one of the best experienced during recent years. Despite reports that window glass prices are high and that there have been some indications of easier levels due to the reopening of navigation, local distributors state that they are not looking for any price reductions in the immediate future. Local jobbers are quoting window glass at the unchanged list prices, with the usual discount for quantities of 25 cases and over.

PITTSBURG MARKETS

(Continued from page 72)

non-union districts, but not enough to have much influence on the general coal situation. The Connellsville strikes are important.

The iron and steel industry has now had a month to adjust itself to this unexpected condition, and is lined up for a very fair production indefinitely. The Steel Corporation uses Connellsville coke almost exclusively in its Pittsburg district and valley mills, having other sources of supply for Cleveland, Lorain, Chicago, etc. The corporation has bought coal freely on 30, 60 and 90 day contracts, much of this being West Virginia and Kentucky coal for the Clairton by-products coke plant, the largest of its kind in the world. The corporation's production in the affected district is slightly reduced, but production in other districts is increased. Much the same condition obtains as to independents.

Production of steel ingots at the present time may be estimated roughly at between 36,000,000 and 38,000,000 tons a year, against rates of 35,000,000 tons at the end of March, 30,000,000 tons at the end of February and 20,000,000 tons during December. Thus, if there should be a material reduction in output later, on account of the coal strike, which is improbable, the rate would be set back only a few weeks and would remain much heavier than a few months ago.

Many distributors and manufacturing consumers bought finished steel products heavily in February and March, in anticipation of possible trouble in deliveries on account of the coal strike set for April 1. They are now less active in the market, but buying from other motives has arisen. Some of this is attributed to the fact that mills have got back to their normal gait, and are scheduling rollings two or three weeks in advance, whereby one cannot depend upon instant mill shipment on a new specification and must round out stocks. Then there is no doubt some increase in actual consumption, while the railroads week by week are somewhat better buyers. Thus the steel market is moderately active, though probably not as active as at the end of March.

The steel mills are comfortably filled with business for the next two or three months at their present rate of operation, production being about 70 per cent. capacity, and having little margin in which to increase production, on account of the coal strike, they are in a very independent position.

DEFINITION OF "PRICE CUTTER"

(Continued from page 52)

on his goods and follow them through every channel to the end that his price be maintained.

I seek not to cast aspersion on the United States courts when I say I cannot follow some of their recent reasoning in this connection. For why should a maker be granted the right to refuse to sell a cutter and be denied the right to demand that said cutter shall not be supplied by an intermediary?

As for any danger that freedom of trade would be curtailed by this, that I consider a bogey too nebulous for serious consideration. I think, in fact, that were such a law passed and enforced, plenty of manufacturers would get busy making "unprotected" goods and advertising them. For competition will not be killed.

Finally, remember that business will have troubles always; that success is always to those who can use their brains to overcome them.

Saves The Surface and Safeguards The Paint Demand

Canada Paint is Canada's Favorite Surface Saver because it gives the paint buyer the ideal paint combination—durability, protective value and good appearance.

And this combination is not peculiar to Canada Paint only. It is characteristic of the entire Canada Paint line, which includes a Surface Saver for every painting and varnishing need.

Small wonder then that, as a general rule, the Canada Paint dealer is the man to whose store the biggest end of the local paint demand gravitates. If your paint department is lacking in results investigate the C. P. agency proposition. Full particulars will be sent you without any obligation.

JAMIESON'S

"Save the surface and you save all" *Paint & Varnish*

Been Doing It Since '58

That expressive slogan **"Save the Surface and You Save All"** had yet to be thought of in the days when the Jamieson Company was first established.

Paint in those days was regarded, primarily at least, as a beautifier.

But from the very beginning the Jamieson people appreciated the big possibilities of paint as a protective medium. Paint, they knew, could be made a surface protector as well as a surface beautifier. So, even in days when the surface saving virtue in paint was not generally appreciated Jamieson's Products were not only beautifying the surface but protecting and saving it just as they beautify, protect and save it to-day.

And to-day the Jamieson line is complete—"A beautifying protector for everything under the sun."

Pictured here is part of the Crown and Anchor line of Jamieson Products which is increasing paint business for dealers everywhere in Canada. Our Quality Products coupled with their generous margin of profit for the dealer is just the combination **YOU** need to make your paint department produce at top pressure.

"Save the Surface and You Save All"
—Applies to the Interior as well as the Exterior

YOUR customers are interested in protecting their furniture, woodwork and floors from the wear and tear of daily use. Sell them our high class, specialty line of Artistic Interior Wood Finishes.

YOU'RE in business to make money. Johnson's Artistic Wood Finishes net you a substantial profit on every sale. But in addition Johnson Products are business builders—they make satisfied customers — repeat buyers — the kind that mean a steady, continuous, profitable business to you.

Johnson's Sani-Spar Varnish Stain is a waterproof product which will not turn white. Gives wonderful results on furniture, floors, woodwork and all interior and exterior surfaces. Put up in four sizes and in natural and four shades only, consequently a small investment brings you a complete stock.

Johnson's Floor Varnish is as good as Johnson's Floor Wax. What more can be said? It gives a beautiful, high gloss which will not mar, blister or scratch white. Dries dust-free in two hours and hard over night. Is absolutely waterproof and will stand all reasonable tests.

Advertising

The complete Johnson line is extensively advertised throughout Canada. The leading magazines will carry the interesting Johnson story right into the homes of the people who are your logical customers. By displaying all the lines in your store and windows you will be the final link in completing the sale.

Sales Helps

And in addition to the advertising there will be attractive sales helps — counter cards, window cards, booklets, folders, envelope stuffers, and many other features that will aid you in building up an interesting and profitable business in Johnson products. When you send in your order specify just what sales helps you need.

Johnson's Is a Quality Line

Only the best grades of raw materials are used in the manufacture of our products and every department is in the hands of experts. This insures a uniform manufactured product of the highest quality. All Johnson Products are well canned—beautifully labeled—well advertised—and allow the dealer a good margin of profit.

Johnson's Car Savers--A Profit-Pulling Auto Accessory Line

No accessory stock complete without Johnson's Car Savers. They have stood the test of time. You can handle them right in connection with the regular Johnson Line without devoting much space to their display or tieing up much of your capital. There's a Johnson Car Saver for every purpose—for removing carbon—mending leaks in radiators—for renewing old tops—for varnishing old cars—for lubricating springs — for removing pits and foreign substance from valves—for patching tubes, casings, etc. The demand is for "Johnson's."

Will Your Window Win The Prize?

Some one dealer in Canada is going to win the prize offered by the "Save the Surface" Committee for the best window display.

Don't envy the winner when the results are announced. **Be the winner.**

Certainly you've got the material—attractively labeled cans of Sherwin-Williams Paints and Varnishes (the real Surface-Savers), eye-catching S-W window trims and cut-outs.

A little care is all that's necessary to arrange a window display that will win you the prize and more paint and varnish sales into the bargain.

See that your stocks are complete—then decide to enter and win. We are ready to assist you in every possible way.

Twenty-Two Beautiful Tints for Your Customers to Choose from

DECOTINT solves the old, old riddle of how to secure permanently beautiful interior walls and ceilings at little cost.

Decotint—so inexpensive, so artistic, so sanitary—in a range of twenty-two beautiful tints from among which it will be so easy for your customers to select the color combination they most desire.

Decotint is put up in handy-sized packages and is ready for use with the mere addition of cold water. It is very easy to apply and is extremely durable, retaining its original brightness and beauty indefinitely. Unlike cheap kalsomine paint it will not chalk or rub off on the clothing.

Order a supply now and let your customers know you handle this and the other Deco-Tint Blue Labeled products listed here.

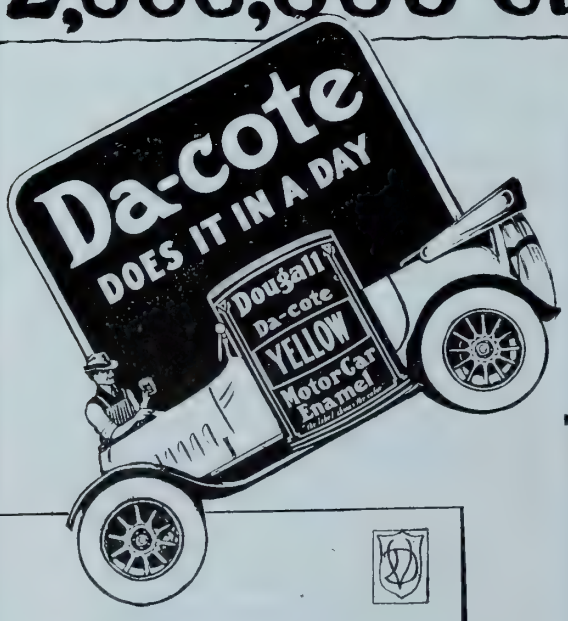
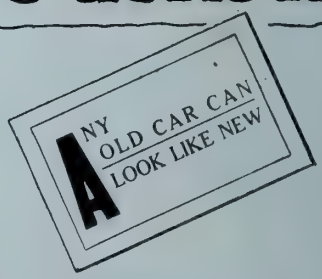
Repaint your Car this Spring
You can do it—with Da-Cote
2,000,000 others have done it



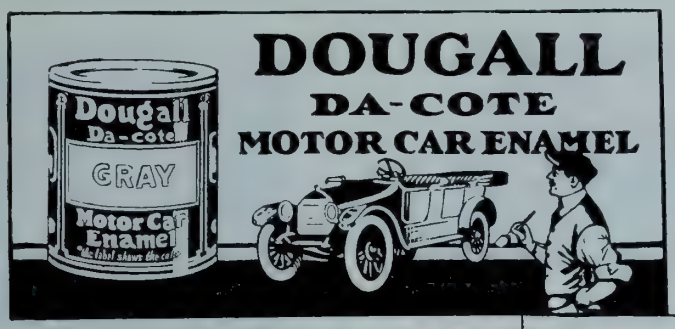


This is a "Shock" Effort

Concentrated on one product, "Da-Cote," planned to interest users in a specialty, knowing that they will come back for more of the same quality—Dougall quality.

It consists of three 4-column ads, 14 inches deep, a broadside and plenty of window trimming and other store material. Every ad. and every folder carries a full list of local dealers' names and addresses.

In Toronto, the ads ran in the Sunday World and Weekly Star, the Daily Star and The Telegram. The folders went to 15,000 owners of small cars. The results were excellent!



TEN LIVELY COLORS TO CHOOSE FROM

ENQUIRE INSIDE FOR DOUGALL DA-COTE MOTOR CAR ENAMEL

ONLY A LITTLE LABOR NECESSARY

CAN BE ENAMELLED IN A FEW HOURS

Sixty-Five Toronto Dealers Are Selling Dougall's Da-Cote

LOOK over the list of their names (below). Consider the overwhelming endorsement makes it easy for you to decide to investigate the Dougall proposition:—

Greater quality for your customer.
Greater profit for yourself.

There is a perfect Dougall product for every beautifying and surface protecting need.

Dougall products are right. Dougall advertising is sensibly planned to make definite sales. And it is faithfully carried out!

Isn't that a proposition worth investigating?

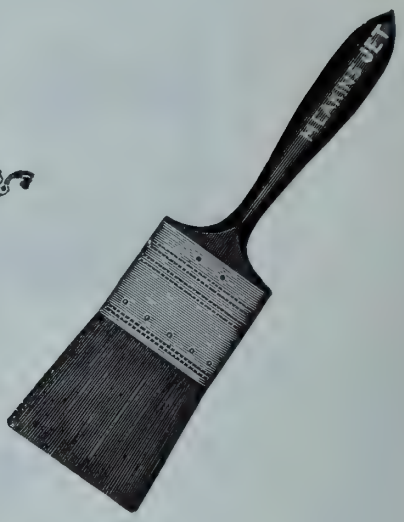
The Dougall Varnish Co., Limited

A perfect protection for every surface :: **MONTREAL** :: **Associated with the Murphy Varnish Company, U. S. A.**



Meakins Brushes

An Essential to Service Saving

Meakins Brushes are needed for Surface Saving jobs. You cannot paint or varnish without brushes in most cases.

To protect a surface, properly, the paint or varnish must be uniformly applied, so as to leave a continuous film of paint or varnish which affords protection from the various enemies that, otherwise, would attack and destroy the material concerned.

There is no better way of so coating the surface than by applying the protecting film with a brush — a good brush — therefore, a Meakins Brush.

Tie up your sales of Meakins Brushes with the "Save the Surface" advertising that is now before the public. Display Meakins Brushes and enforce on your prospects the fact that it is Meakins Brushes that Save the Surface.

FLOGLAZE "PORCH and VERANDA"

(The Can with the Blue and Yellow Label)

Harsh, severe Winter weather together with the wet and dampness of Spring have put a severe strain on the finish of Porch and Veranda floors.

They will be needing paint protection against the coming heat and moisture of Summer. FLOGLAZE "PORCH AND VERANDA" finish is especially adapted to protect against just such conditions.

Seven standard shades, giving a glossy, hardwearing surface; also suited for floors of schools, churches, kitchens, veranda steps or wherever hard usage is frequent.

FLOGLAZE PORCH AND VERANDA proves a strong and trusty arm in the paint department.

Our dealers' booklet "A Guide to Larger Profits" describes FLOGLAZE PORCH AND VERANDA fully. Write for this book.

The Luxeberry Painter Says-

"I've never yet come across a painter who wouldn't rather use LIQUID GRANITE than any other floor varnish made. It's the only one that gives absolute satisfaction for both beautiful finish and durability."

Because both the painters and the public prefer Liquid Granite, it has a bigger sale than any other floor varnish on the market.

Popularity of any product means profitable business for dealers handling it.

Are you carrying LIQUID GRANITE?

A Few Representatives

of our complete line of brushes

It is no secret that it is more profitable for hardware men to concentrate on one complete line, than to carry a number of assortments from various manufacturers.

Selling one complete line enables you to cut down on your time and money investment, and it builds up a more profitable and larger business for your brush department.

Our line includes:

Paint Brushes
Oval Varnish Brushes
Chiselled Varnish Brushes
Stencil Brushes
Glue Brushes
Tar Brushes
Roofing Paint Brushes
Stippling Brushes
Stair Brushes
Radiator Brushes
Floor Brooms
Floor Mops
Flat Varnish Brushes
Flowing Varnish Brushes
